[15] Employers would have to monitor the "next highest" individual in a stepwise fashion until all of those with a TWA greater than 85 dB are monitored. This technique would reduce the number of employees in the program to those deserving membership, but would also effectively require personal monitoring of most employees exposed above the action level.

hearing conservation program and in protecting the employer against allegations that employees have not been informed.

Methods of Measurement and Instrument Calibration

The method of measurement and calibration sections in the January hearing conservation amendment established specific requirements for instruments and techniques to be employed in measuring noise. In promulgating these requirements, OSHA stated, "These specifications are considered necessary in order to standardize and evaluate the measurement results" (46 FR at 4135).

The January document required dosimeters and sound level meters to meet certain criteria (e.g., ANSI specifications, specified operating ranges and specified dosimeter crest factor capabilities). The preamble stated, "By specifying minimum requirements for noise measuring instruments the Agency believes that it will better identify those workers needing audiometric testing and will help ensure that those workers requiring hearing protectors because of a significant threshold shift will be given protectors with proper attenuation to afford them adequate protection" (46 FR at 4135).

The August document continued the stay on the instrument specification provisions, the calibration requirements, and provisions specifying techniques to be applied in obtaining measurements, in response to many adverse comments about the necessity for and ability of existing equipment to meet these requirements. The August document stated, "The Agency also received comments objecting to the calibration requirements, stating that they were unnecessary" (46 FR at 42624). Additionally, microphone placement and specific sampling instructions (Appendix B in the January amendment) were stayed pending a final decision on the use of area monitoring.

The method of measurement sections which remained constituted a performance requirement. Employers were expected to integrate "* * * all continuous, intermittent, and impulsive sound levels from 80 dB to 130 dB * * * into the computation" (46 FR at 42633). Employers would choose the method and technique of measurement, providing that all appropriate employees were included in the hearing conservation program.

The August document also continued the stay on the specifications for sound measuring equipment, in response to objections about the ability of equipment to meet the requirements and the need for such specificity. The comments show considerable disagreement on the need for or amount of sound measuring equipment specification needed in the standard. Some respondents would like to retain the requirements exactly as they were stated in the January amendment (Exh. 327–59, pp. 2–3; Exh. 327–78, pp. 5–9; Exh. 345, pp. 7–8). Others wish to eliminate the specifications, so that a performance approach allowing professional judgment to be applied in evaluating specific environmental conditions could be used (e.g., continuous and intermittent noise without an impulse component) (Exh. 326–28, pp. 1–3; Exh. 327–122, p. 3; Exh. 149; Exh. 329–64). Still others preferred a modified specification requirement, which would accommodate concerns for crest factor appropriateness, ability of the equipment to integrate impulse noise, and appropriateness of an instrument operating range of 80 to 130 dB. A few participants wished the OSHA standard only to include what is contained in the current ANSI standards, and some requested a phase-in schedule for companies with existing equipment now in service (Exh. 326–1; Exh. 327–64, p. 4; Exh. 327–82–B; Exh. 327–99, p. 3; Exh. 327–98, p. 9).

Comments supporting implementation of the January amendment stated:

> "The stay of provisions * * * stating equipment performance criteria * * * weakens the protection provided by the standard * * * Without these standards, there would be no assurance of the validity and reliability of noise exposure measurements at individual workplaces" (Exh. 345).

Other commenters noted that, "* * * [There is] no justification for eliminating equipment specifications * * *" (Exh. 327–109, p. 8), and that "* * * It is entirely inconsistent to permit employers to use * * * equipment which meets no performance specifications" (Exh. 327–78, p. 8).

However, other comments contended that specifications were not needed in the standard. In addition, some commenters pointed out that "OSHA's [stayed] specification for dosimeters rendered obsolete 23,000 dosimeters * * * it would likely cost OSHA itself around one million dollars to replace its supply of instruments * *. * [and] fifteen million dollars [for industry]" (Exh. 326–28, p. 3). Measuring instruments should conform to the specifications of nationally recognized consensus standards, but the specifications should not be mandated, because it might restrict the development and use of new instruments and methods (Exh. 327–122, p. 4; Exh. 327–149, p. 4).

The Agency recognizes that it is not necessary to specify dosimeter crest factor capability in workplaces without implusive noise. Similarly, it is not reasonable to require employers to purchase equipment to measure sound levels up to 120 or 130 dB if a particular worksite does not have sound levels above 100 dB. "* * * The employer should be allowed to use any instrument or measurement technique that will provide employee exposure information which will include continuous, intermittent, and impulsive sound levels * * *" (Exh. 329–64).

OSHA believes that the performance approach taken in this document clearly states the objectives of monitoring and the capabilities that will be required, where appropriate, of sound measuring equipment that may be used. All continuous, intermittent and impulsive sounds between 80 dB and 130 dB must be included in the measurement. Additionally, the employer has the ultimate responsibility to ensure that measurements will allow the proper identification and classification of employees with regard to a hearing conservation program. OSHA expects that adherence to the performance approach prescribed in the revised amendment will ensure accurate data and that the appropriate employees will be selected for the hearing conservation program. Adoption of specific ANSI standards on measuring equipment will in some circumstances limit employer flexibility in complying with the amendment without providing additional employee protection. Thus, it is difficult to see how the adoption of the ANSI standard on monitoring equipment [16] will better effectuate the purposes of the Act than the performance approach adopted in the revised amendment. Therefore, the ANSI equipment specifications contained in the January amendment are revoked. OSHA finds that the revised monitoring provisions adopted herein will better effectuate the purposes of the Act within the meaning of section 6(b)(8) than will the adoption of the ANSI standard. This approach will provide the flexibility to apply appropriate methods of measurement using equipment that meet or exceed stated expectations.

Comments concerning monitoring equipment calibration were very similar to those about equipment specifications.

[16] American National Standard Specification for Personal Noise Dosimeters, S1.25–1978 and American National Standard Specification for Sound Level Meters, S1.4—1971 (R 1976).

Supporters of calibration requirements contended that they were needed to ensure valid measurements, were not time consuming (i.e., field calibration), and were a matter of good industrial hygiene practice (Exh. 328–41; Exh. 327–22, p. 2; Exh. 327–103, p. 4).[17] Many felt that the requirement for specific detailed calibration procedures should not be attempted in a hearing conservation amendment.

Dosimeters and sound level meters used to measure employee exposures were required by the January amendment to be calibrated at specific times and in accordance with detailed specifications.[18] In response to comments (Exh. 325–33; Exh. 325–50; Exh. 325–77) that the calibration provisions were too detailed and too burdensome, the August document stayed these requirements. In the interval since August, many commenters have stressed the importance of calibration for the accurate measurement of noise exposures (Exh. 347; Exh. 331–17; Tr. Vol. III, pp. 283–284, 294–295, March 25, 1982; Exh. 345; Exh. 327–103; Exh. 328–11; Exh. 328–41; Exh. 328–12). As J. H. Steinmark [American Iron and Steel Institute] stated:

"Field calibration of sound level meters is essential and should be conducted before the measurements, during the measurements, and after the measurements on each day the instrument is used. For dosimeters which are worn all shift by the worker, field calibration should be conducted on the instrument before the shift and after the shift. Laboratory calibration should be conducted when problems are encountered during field calibrations, anytime the instruments must be repaired, and on a periodic basis" (Exh. 327–105, p. 3).

R. J. Wurm [Quest Electronics] pointed out that the use of noise measuring instruments in industrial settings increases the need for calibration: "Field equipment is always subject to rough use * * * A calibration check after any important measurement is best to confirm the reading" (Exh. 328–11, p. 3). In addition, calibration is not time consuming, burdensome, or costly, and is necessary to ensure accurate measurements (Exh. 328–12). According to Deborah Berkowitz [Food and Beverages Trades Department, AFL–CIO], "Field calibration of a sound level meter can be performed in a matter of seconds and calibration of a dosimeter may take only several minutes" (Tr. Vol. V, p. 105, March 29, 1982).

Despite the widespread recognition of the need for calibration procedures to ensure measurement accuracy, however, many commenters (Exh. 327–87; Exh. 327–89; Exh. 327–98) objected to the degree of specification in the January calibration requirement. Several respondents argued that the revised amendment should refer employers to the calibration procedures specified by the manufacturer of the particular instrument used (Exh. 327–87, p. 3; Exh. 327–91, p. 13; Exh. 327–96, p. 11; Exh. 327–101, p. 5; Exh. 327–89, pp. 3–4). According to H. M. Williams of the American Telephone and Telegraph Company (Exh. 327–89), "* * * calibration of instruments is usually unique to the instrumentation being used, and it is, therefore, best left to the manufacturer's instructions * * *" Other commenters believe that including calibration procedures in a non-mandatory appendix, to be used either by OSHA compliance personnel or employers, would provide sufficient guidance about appropriate calibration techniques (Exh. 327–99, p. 9; Exh. 327–121, p. 2; Exh. 327–102, p. 7). As the Shipbuilders Council of America reported (Exh. 327–104, p. 21):

"* * * we do not think that OSHA should specify the method of calibration of noise measuring equipment. * * * Publishing instructions to OSHA inspectors about calibration techniques * * * can greatly assist by providing models for many companies. Making such guidelines mandatory, however, unnecessarily freezes the state of the art * * *"

J. G. Tritsch, of the American Textile Manufacturers Institute, recommended (Exh. 327–106, p. 3) that "the standard * * * only require the instruments [to] be properly operative and let performance be the criteria [sic]." J. B. Browning of the Union Carbide Corporation asserted that no calibration provision should be included in the revised amendment, because methods of calibration should be determined by the professional taking the exposure measurements (Exh. 329–17).

OSHA agrees with R. K. Meyers, of the Texaco Corporation, among others, that the calibration of sound measuring equipment is essential to obtaining accurate exposure measurements (Exh. 329–15; Exh. 327–87; Exh. 329–14; Exh. 329–16; Exh. 329–57). However, the Agency believes that the diversity of sound measuring instruments and the variability in manufacturers' calibration instruments precludes total reliance on these instructions to ensure measurement accuracy. For example, some manufacturers' instructions specify calibration intervals and techniques, while others simply recommend periodic calibration. In addition, the Agency finds some merit in the view expressed by G. V. Cox of the Chemical Manufacturers Association (Exh. 327–122), that specifically addressing calibration intervals is inconsistent with the revised amendment's performance approach to monitoring instruments, which permits employers to choose the most appropriate device rather than specifying instrument type and capability.

Consideration of all the comments and testimony received on the issue of measuring instrument calibration has convinced the Agency that adopting the performance approach to instrument calibration will ensure that exposure measurements are accurate and that employers conduct calibration at the intervals and in accordance with the procedures specified in the manufacturer's instructions or those dictated by good practice. Accordingly, the revised amendment requires that all noise measuring instruments be calibrated to ensure the accuracy of exposure measurements. This approach, which was recommended by several rulemaking participants (Exh. 327–102; Exh. 327–106; Exh. 327–140; Exh. 327–149; Exh. 368), has several advantages. First, it is consistent with the revised amendment's performance orientation. In addition, it permits employers to follow the instructions recommended by the instrument's manufacturer, and to adapt these as necessary to particular circumstances of their workplaces. For example, employers are not required to return instruments to the laboratory for calibration unless they cannot be properly calibrated in the field. Moreover, contrary to the opinion expressed by George Taylor of the AFL–CIO (Exh. 327–109), OSHA believes that adopting the performance approach will better effectuate the purpose of the Act than adopting the national consensus standard because it will ensure that employers maintain their noise monitoring instruments within calibration specifications *whenever* exposure measurements are made. On the other hand, employers will not be required to perform field or laboratory calibrations that are not essential to ensuring measurement accuracy. For these reasons, OSHA is revising the amendment to include a requirement that employers calibrate all sound

---

[17] The January amendment required that field calibrations be done before and after each day's measurements to verify the accuracy of the measuring equipment. In addition, it required a laboratory calibration when acoustical calibration and manual adjustments could not be used to verify the accuracy of the measuring instrument.

[18] The January calibration requirements read in part: Whenever acoustical calibration and manual adjustments of the measuring equipment cannot verify the accuracy of the measuring instrument, laboratory calibration shall be performed to ensure conformance with the requirements of ANSI S1.25–1978 or S1.4–1971, as appropriate.

measuring instruments as necessary to ensure that employee exposure measurements accurately reflect the noise exposure of their employees.

Since the performance approach to monitoring allows either area or personal monitoring, the specifications for microphone placement are no longer consistent with the monitoring requirements and are also being revoked.

Many commenters requested a simplified non-mandatory version of Appendix B, which suggested a monitoring strategy to be used with sound level meters (Exh. 327–99; Exh. 327–102, p. 7; Exh. 327–121, p. 2). Appendix B, as it appeared in the January amendment (46 FR 4166–4176), was designed to implement a personal sampling program; since the amendment has been revised, this Appendix is no longer necessary and it is being revoked. As noted above, a new appendix, Appendix G, has been included to provide employers, particularly small employers, with some useful data to aid in meeting their monitoring obligations under this amendment.

As the above discussion clearly shows, the detailed monitoring requirements being revoked herein are not necessary to ensure that the noise monitoring mandated in the hearing conservation amendment achieves the goals for which it was intended: to select all employees who should be included in the hearing conservation program and to ensure that any hearing protectors used will provide adequate attenuation to protect employees in their particular workplace noise environment.

OSHA agrees with Dr. Harold Dietz [Director of Health and Environmental Services of the BF Goodrich Company], who stated:

> "The company has carefully reviewed the proposed monitoring obligations, as well as complied with the performance standard which has been in effect pending the stay of the more complex requirements. In our experience, we have found the performance standard to be far superior to the more detailed monitoring requirements, and we believe that employee protection would in no way be diminished should OSHA retain the performance standard when it promulgates its final rule" [Exh. 327–66, p. 2].

Enforcement of Monitoring

The preceding section discussed the differences between the monitoring requirements of the January 1981 amendment, which contained many specifications for noise monitoring, and the revised amendment, which also requires noise monitoring but allows the employer flexibility under most circumstances to select any method as long as it achieves the defined performance goals. The revised amendment requires that the employer choose a sampling strategy designed to identify employees for inclusion in the hearing conservation program and to enable the proper selection of hearing protectors. The revised amendment, therefore, requires that the employer must choose a sampling strategy, which could be tailored for his own plant, that results in attaining the monitoring goals. Since OSHA compliance personnel use personal sampling techniques for inspection purposes, employers who use area monitoring in situations where monitoring results would be substantially different from those obtained with personal monitoring will increase their risk of being judged to be out of compliance.

Although OSHA acknowledges that many monitoring procedures may permit employers to identify employees for inclusion in the hearing conservation program, the Agency believes that personal monitoring with a dosimeter is the most accurate method of estimating employee noise exposure (employee noise exposure is expressed as a numerical value that represents the employee's noise dose). For this reason, OSHA uses the dosimeter for compliance determinations in routine workplace inspections. Since the Agency bears the burden of proof when alleging that an employer has violated an occupational safety and health standard, OSHA strives to allege violations only when relatively certain that violations have occurred. The procedures OSHA uses to obtain exposure data are therefore designed to yield the best estimates available.

Dosimeters

During the March hearings, the accuracy of dosimeters was questioned by Paul Hess, appearing for the Chocolate Manufacturers Association. Hess stated that he conducted an experiment using two or three dosimeters from the same manufacturer and that "I found variances as much as 100 percent, 120 percent or more" (Tr. Vol. II, p. 250, March 24, 1982. He concluded that he did not want dosimeters used in his workplace. The revised amendment does not require employers to use dosimeters. However, OSHA does not agree with Hess' conclusion. When Hess compared 8-hour TWA values obtained with dosimeters to calculated 8-hour TWA estimates made by sound level meters, he *assumed* that the sound level meter measurements and sampling strategy were accurate and that the variations were due to dosimeter inaccuracy. John J. Earshen, Chairman of the ANSI working group on Personal Noise Dosimeters (S1–78), addresses this matter directly (Tr. Vol. III, pp. 135–145, March 24, 1982). Earshen points out that the dosimeter's function is to measure sound in the same way as a sound level meter and to carry out automatic data processing of the measurements to calculate a time-weighted average sound level or noise exposure. When using the sound level meter, measurements must be visually obtained from the instrument and then must be manually processed (e.g., by recording the length of time of the various levels) to calculate the employee's noise exposure. Mr. Earshen stated that if a sound level meter's output were carefully recorded with a device such as a graphic level recorder, the measurement information could be mathematically processed in the same manner as the dosimeter's output. Processing of the sound level meter output in this way will theoretically give the same exposure results as the dosimeter gives. In other words, the difference between a dosimeter and a sound level meter is that the dosimeter integrates sound level information with time electronically whereas the sound level meter produces data that require manual processing. To repeat, if the sound level meter output were processed automatically, the results would be, theoretically, the same (Tr. Vol. III, pp. 135–145, March 24, 1982). The difference in results between dosimeters and sound level meters is caused by differences in human perception during the intergration of sound level meter readings. "Therefore, many of the problems that people attribute to being fundamental differences between sound level meters and dosimeters are really reflections on what an operator can and cannot do" (Tr. Vol. III, p. 137, March 24, 1982).[19]

Earshen included in his post-hearing submission an article by Warren R. Kundert entitled, "Dosimeters, Impulsive Noise, and the OSHA Hearing Conservation Amendment," which further supports OSHA's conclusion. When discussing the measurement of impulse noise, Kundert states that:

[19] Earshen claimed that if a high speed motion picture camera recorded the bouncing needle of a sound level meter and if these pictures were analyzed frame by frame to synthesize what the readings were on the sound level meter, the results would be similar to the results produced by a dosimeter. He concluded that the human eye/brain combination was not able to analyze this high speed dynamic motion properly and that this fact, rather than any flaw in the dosimeters, accounted for discrepancies between dosimeter readings and sound level meter readings (Tr. Vol. III, p. 137, March 25, 1982).

"An ordinary ANSI Type 2 sound level meter should not be used. Only an impulsive sound level meter (set to A slow) will provide sufficient accuracy when short duration impulses are present. This instrument is specified by standard IEC 651. 1979 and included in the current ANSI draft standard that will replace S1.4–1971.

We have the task of taking many readings, (10 or possibly many more) assigning to each a duration which we must estimate and then using the equation given in that OSHA regulation to find the percentage dose. It would seem that such a procedure should be automated.

We could take samples from our sound level meter automatically using a mini-computer and special interfacing equipment. Of course this equipment could not easily be moved about in a manufacturing plant. To solve this portability problem, we would record the noise signal using a tape recorder and then play the tape through our stationary impulse sound level meter and computer equipment. Can we afford the time and equipment for such a complicated procedure? Of course not! Fortunately, there is not need to. *The dosimeter will do the job for us.*

The dosimeter is really an automatic system just like the one described. On site, a small wearable package continuously monitors the A weighted sound level and solves the OSHA equation to determine the dose. The dosimeter is clearly more efficient than a manual or even an automated procedure using a sound level meter. Impulsive noises need not be a problem if care is taken to select a dosimeter capable of handling them" (Exh. 380–2, pp. 15–16, emphasis added).

Since January 1981, OSHA has received other information concerning dosimeter accuracy. This information essentially conforms with the information discussed in the January amendment. Therefore, OSHA reaffirms its January 1981 discussion, interpretations, and findings on the use of dosimeters to make measurements under 29 CFR 1910.95 (46 FR 4135 to 4139). They are repeated, in part, below (46 FR 4139):

"It has been stated (Exh. 321–47, pp. 1–2) that in certain conditions a noise dosimeter overestimates the noise dose relative to that which would be obtained using a sound level meter and timing device. OSHA believes that this situation should not occur for the following reasons: A dosimeter essentially consists of a sound level meter followed by a circuit that integrates the proper function of the A-weighted sound level. When only a sound level meter is used, sufficient data as to the temporal distribution of sound levels must be taken so as to enable the integration to be done numerically. Assuming that each instrument performs accurately and that the microphone positions are the same, the noise dose obtained with a dosimeter and that obtained using a sound level meter and a timing device should agree when the daily noise exposure is the result of several essentially constant sound levels, each experienced for an easily determined duration. OSHA has observed this kind of agreement in its compliance experience. In such cases, the noise dose can easily be obtained with a sound level meter using Table G–16a and the procedures given in Appendix A, I. However, if the sound level varies over a range of more than a few decibels and, particularly, if the sound level undergoes rather rapid excursions due to intermittent or impulse noises, it can be very difficult to obtain accurate noise doses using a sound level meter and a timing device.

OSHA therefore concludes that a properly calibrated dosimeter reads the correct dose but that the use of a sound level meter, for intermittent noise or noise with significant impluse content, may lead to an underestimate of the correct dose."

OSHA will, therefore, allow the employer to use any monitoring equipment. OSHA will evaluate compliance with the monitoring requirements by evaluating the employer's decisions for including employees in the hearing conservation program and for selecting the proper hearing protection using exposure results obtained using the dosimeters. Employers whose monitoring program fails to meet the goals of the monitoring requirements will, however, be subject to citation.

Observation of Monitoring

OSHA's January amendment required employers to provide employees with the opportunity to observe any measurements of employee noise exposure being conducted pursuant to the amendment. The January preamble noted that the right to observe monitoring is mandated by Section 8(c)(3) of the Act. The Agency also reaffirmed its belief that "* * * workers who observ[ed] the monitoring of their exposures [will] gain insight into the nature and extent of the noise hazard, and will become more involved in the hearing conservation program. This involvement should increase the motivation for proper use of ear protection, and thereby increase the effectiveness of the program" (46 FR at 4155).

In addition to the basic right to observe monitoring, the January amendment provided employees with the right to an explanation of the measurement procedures, to observe all steps related to the noise exposure measurements, and to record the results. After publication of the January amendment, OSHA received comments expressing confusion as to the amount of explanation necessary and asserting that this requirement would be overly burdensome (Exh. 325–58; Exh. 325–103; Exh. 325–245; Exh. 325–51 Exh. 325–239;). Therefore, in August, OSHA continued the stay of the paragraphs specifically requiring that employees be given an explanation of procedures, observe all steps involved, and record the results. Information was requested as to whether these stayed provisions are necessary to afford employees a meaningful opportunity to exercise their statutory right to observe monitoring.

OSHA has received many comments asking that the more detailed provisions that were stayed be deleted on the grounds that the general observation requirement on which the stay was lifted in August provides sufficient assurance of employees' right to observe monitoring [20] (Exh. 326–21; Exh. 326–31; Exh. 326–32; Exh. 326–62; Exh. 327–13; Exh. 327–20; Exh. 327–28; Exh. 327–51; Exh. 327–62; Exh. 327–71; Exh. 327–80; Exh. 327–90; Exh. 327–102; Exh. 327–105; Exh. 327–111; Exh. 327–129; Exh. 327–135; Exh. 327–138; Exh. 327–139; Exh. 327–141; Exh. 327–145; Exh. 328–5; Exh. 329–15; Exh. 364).

Several commenters suggested the language of the stayed provision concerning explanations was confusing in that it places an open-ended requirement for explanation on employers (Exh. 327–67; Exh. 327–90; Exh. 327–93; Exh. 327–136). Several others asked detailed an explanation is required (Exh. 327–21; Exh. 327–90; Exh. 327–136; Exh. 364). The Diamond Shamrock Corporation suggested "* * * because of the technical nature of the noise measurement [we] suggest that mandatory explanations be limited to the significance of observed measurements and need not include technical explanations of either the physical aspects of the noise being measured or the practice of noise measurement" (Exh. 327–95, p. 4).

The Motor Vehicle Manufacturers Association (Exh. 327–103, p. 4) and the Ford Motor Company (Exh. 329–2, p. 4) opposed the detailed specifications, claiming that they interfere in areas covered in negotiated labor agreements. Other commenters argued that explanations of exposure monitoring are

[20] As promulgated in January the observation of monitoring provisions read:

(i) The employer shall provide affected employees or their representatives with an opportunity to observe any measurements of employer noise exposure which are conducted pursuant to * * * this section.

(2) Without interfering with the monitoring procedures the observer shall be entitled to:

(i) Receive an explanation of the measurement procedures;

(ii) Observe all steps related to the noise exposure measurements performed at the place of exposure; and

(iii) Record the results obtained.

The stay of paragraphs (i)(2)(i), (ii) and (iii) was continued in the August Federal Register document. Paragraph (i)(1) was allowed to go into effect.

more easily provided in regular training sessions (Exh. 327–102, p. 7; Exh. 327–139, p. 4).

OSHA also has received many comments attesting to the need to specify the rights of employees when observing monitoring (Exh. 328–41; Exh. 328–42; Exh. 327–59; Exh. 327–78, p. 15; Exh. 327–109, p. 10; Exh. 327–136; Exh. 329–30; Exh. 329–57; Exh. 345; Exh. 347; Tr. Vol. III, p. 83, March 25, 1982; Tr. Vol. IV, p. 345, March 26, 1982; Tr. Vol. V, pp. 243–266, March 29, 1982; Tr. Vol. V, pp. 266–272, March 29, 1982). Frank Grimes of the United Steelworkers of America (Exh. 326–41, p. 3) asserted that observers need sufficient information to understand what is going on. He contended further, "* * * we do not have any indication from any other health standard that problems with the explanation provision is more than a figment of an employer's hyperactive imagination. In fact, the parties often work out any procedures that are necessary to implement this provision." The United Paperworkers International Union (Exh. 327–50, p. 3) recommended that the stay on the provisions be lifted because it "* * * will help to ensure that the worker is involved in the noise measurements and is not a passive observer who does not understand measurement procedures." The Paperworkers also specified a list of items they believe should be included in the explanation of monitoring.

OHSA has reviewed the comments submitted regarding the necessity of retaining the stayed provisions to obtain meaningful observation of monitoring. Virtually all commenters agree that observation of monitoring is an employee right and many are accustomed to providing such opportunities. We do not think that the revocation of these detailed provisions will cause the observation of monitoring provisions to become meaningless in the context of noise measurement. There are two standard ways of measuring noise exposure: The dosimeter and the sound level meter. The results obtained with a sound level meter are readily observable and understandable. When dosimeters are used the Agency assumes that the dosimeter readout would be observed by employees so long as the readout device is located in the plant. The dosimeter readout, in percentage of allowable dose or in decibels, should be self-explanatory.

The fact that provisions similar to the hearing conservation amendment's original observation of monitoring requirements have been included without apparently causing confusion in other health standards is not dispositive here because this standard covers a far greater number and variety of employers than any other health standard. Moreover, it should be noted that a number of health standards, including those covering asbestos and vinyl chloride, have observation of monitoring sections that do not specifically accord the right to receive an explanation. We are not aware of employees suffering as a result of the more abbreviated version of the observation of monitoring rights included in those standards.

In addition, OSHA finds the arguments of some commenters, that information on monitoring procedures is more effectively presented in scheduled training sessions than during actual monitoring persuasive (Exh. 327–58; Exh. 327–139; Exh. 329–17). For these reasons, OSHA has determined that in the context of the hearing conservation amendment the stayed provisions of the observation of monitoring requirements are not essential for employees to exercise their right to observe monitoring in a meaningful manner. Therefore, these detailed provisions have been revoked.

Summary

Clearly, substantial evidence in the record considered as a whole supports the conclusion that the performance-oriented monitoring requirements adopted herein are all that is necessary or appropriate to ensure the employee protection contemplated by the hearing conservation amendment. Moreover, this approach is consistent with the mandate of Section 6(b)(5) of the Act, which stipulates that standards be phrased in performance terms insofar as possible. OSHA therefore finds that the monitoring provisions prescribed herein are appropriate. This finding is based on Agency expertise and judgment as to what is necessary to achieve the goals of the amendment and on the fact that the objections raised to the performance approach adopted herein are speculative and conclusory.

Audiometric Testing

The amendment promulgated in January required that employers make audiometric testing available to all employees who had workplace noise exposures equal to or greater than an 8-hour TWA of 85 dB. After the phase-in period, initial or baseline audiograms were to be obtained within 4 months of an employee's first noise exposure at or above the action level. The audiometric testing was to be conducted by a physician, audiologist or otolaryngologist or by a technician under the supervision of one of these professionals. After the baseline audiogram, employees were to be tested at least annually and the results of this annual audiometric test were to be compared against the baseline audiogram to determine whether any deterioration of hearing had occurred. The amendment used the term significant threshold shift (STS) to denote deterioration of hearing that was substantial enough to initiate follow-up procedures to prevent further hearing loss. In response to some confusion concerning the term "significant threshold shift", OSHA has decided to use instead the term "standard threshold shift" (STS) to describe the point at which follow-up procedures are required. Under certain circumstances, the amendment required that an employee with an STS be retested to determine if the hearing loss was permanent. Under other circumstances, employees exhibiting STS's had to be referred to professionals for evaluation or counseled. Some of the audiometric test provisions generated a good deal of controversy. Some of the other provisions caused confusion and many commenters requested clarifications or interpretations. The audiometric test provisions and interpretations of some of these provisions are discussed below.

Qualifications of Technicians Administering Audiometric Tests

The January amendment [21] provided that audiometric examinations be administered by a licensed or certified audiologist, otolaryngologist or other qualified physician, or by a certified audiometric technician under the supervision of an audiologist, otolaryngologist or physician. After promulgation, commenters requested clarification of the qualifications of the technicians permitted to administer audiometric tests. In response to these requests, the Agency explained that all persons who can demonstrate "competency in administering tests and in the use and care of audiometers may administer audiometric tests required by the standard" (46 FR 42625). This would include trained technicians, hearing aid specialists, industrial hygienists, and nurses, in addition to the audiologists, otolaryngologists, and physicians who are specifically permitted by the standard to administer these tests. OSHA still endorses this interpretation. Questions raised during the recent public hearing indicate, however, that further clarification would be useful.

The standard recognizes two methods for persons to become trained in administering audiometric tests. The

[21] 29 CFR 1910.95(g)(5), 46 FR at 4152.

first is to complete a training course administered by a training institution certified by the Council of Accreditation for Occupational Hearing Conservation or a course given by another recognized training organization, and to receive a certificate upon completion of the course. The second method involves demonstrating, to the satisfaction of the professional supervisor of the hearing conservation program, that competence in test administration and audiometer use has been achieved. The wording of the amendment has been changed slightly to clarify the intent; that is, that the technician must be able to show competence in the proper use, maintenance, calibration and functioning of the particular type of audiometer being used, rather than audiometers in general. This on-the-job training approach will permit employers a substantial amount of flexibility in staffing their hearing conservation programs, while ensuring that employee audiograms are properly taken. The standard envisions that persons administering audiometric tests will ensure the appropriateness of the test environment and functionally calibrate and maintain the audiometer; in addition, this person will screen audiograms to identify problem audiograms needing further evaluation by a professional and audiograms with standard threshold shifts. OSHA agrees with J. C. Morrill [Impact Hearing Conservation], however, that the responsibility for direction of the hearing conservation program should remain "in the hands of a professional audiologist, otolaryngologist, or physician" (Exh. 327–35, p. 5), although trained technicians can perform the tasks specified above. We believe that the amendment reflects this intention.

Qualified Physician

As stated above, the hearing conservation amendment requires that certain portions of the audiometric testing program be performed by professionals, while other functions may be carried out by technicians. By the terms of the amendment, professionals include licensed or certified audiologists, otolaryngologists, and "qualified" physicians.

After publication of the January amendment, OSHA received requests for clarification of the term *qualified* preceding physician (see 29 CFR 1910.95(j)(3) and (j)(7)(ii), 46 FR at 4162). In the preamble to the August document, OSHA explained that "qualified" was intended to mean any licensed physician who believes that he or she has adequate training or knowledge to administer audiometric tests and interpret the results. The Agency gave notice in the August **Federal Register** document that it believed that the word "qualified" is unnecessary in the amendment because adequate professional judgment and responsibility can be assumed.

In response to the Agency's request for comments on this issue, many commenters (Exh. 327–24, p. 1; Exh. 327–28, p. 2; Exh. 327–35, p. 1; Exh. 327–76, p. 7; Exh. 327–77, p. 2; Exh. 327–88, p. 5; Exh. 327–95, p. 5; Exh. 327–102, p. 7; Exh. 327–106, p. 7; Exh. 327–140, p. 3) agreed with the Agency's position that the term "qualified" should be deleted because licensed physicians who undertake responsibility for audiometric testing programs are assumed to be qualified. Only one commenter, Dr. S. White of the American Speech-Language-Hearing Association, stated that the term should be retained (Exh. 327–154, p. 3). Therefore, in view of the evidence in the record, OSHA has decided to delete the term, "qualified," preceding the word physician in the audiometric testing provisions of the standard.

Baseline Audiogram

The baseline audiogram is extremely important since it is the reference against which future audiograms are compared to determine the extent to which an employee's hearing is deteriorating. If the baseline audiometric test is not conducted properly, it will not reflect the employee's true hearing thresholds, and any real changes between baseline and future tests may be masked. The January amendment required employers to obtain a baseline or first audiogram for each employee within 4 months of the employee's first exposure to workplace noise at or above an 8-hour TWA of 85 dB. The need to perform baseline audiograms early during the employee's exposure to safeguard the purity of the audiogram as much as possible was recognized. In the January preamble, OSHA made a finding that to delay baseline testing more than 4 months was not appropriate since employees might incur some hearing loss during the interval, which would cause the baseline audiogram to be elevated by temporary hearing loss (46 FR 4143). This elevation would mask the true extent of any threshold shift between baseline and future tests and would result in delayed detection of a significant threshold shift. Additionally, OSHA established the 4-month period to enable employers to exclude most seasonal and temporary workers from the audiometric testing program on the basis that audiometric testing and follow-up procedures for seasonal employees would be administratively difficult or impossible because these workers work for several employers in a season or over the year. Furthermore, OSHA allowed the 4-month period to permit employers who used distant consulting services to schedule mobile test van visits at quarterly intervals.

Commenters argued that companies relying on mobile van audiometric test services would be forced by the 4-month baseline requirement to send newly hired employees to a clinic, which would be considerably more expensive on a per employee basis than using a mobile test van. Mobile testing services frequently impose a minimum fee and it might not be practical to have the test van visit the company more than once a year. In view of the above considerations, the Agency decided to reconsider the 4-month baseline requirement. The stay was therefore continued in August, and the Agency requested data and information on this issue (see 46 FR 42625–42626).

OSHA understands the value of conducting pre-employment baseline audiograms, which are the most accurate indicators of employees' hearing levels before exposure to noise. They help to determine if changes in future audiograms represent actual shifts due to noise exposures. Several organizations and companies, including DuPont (Exh. 327–91), Shell Oil (Exh. 327–102, p. 8), Texaco (Exh. 329–15, p. 5), Motor Vehicle Manufacturers Association (Tr. Vol. II, p. 109, March 24, 1982), Reynolds Metals (Tr. Vol. I–B, pp. 270–271, March 23, 1982), Edison Electric Institute (Tr. Vol. II, p. 219, March 24, 1982), American Iron and Steel Institute (Tr. Vol. III, p. 277, March 25, 1982), and Dresser Industries (Tr. Vol. IV, p. 80, March 26, 1982) either perform or recommend pre-employment audiograms when feasible. OSHA does not believe that pre-employment audiograms are practical in many cases, or essential to protect worker hearing in the context of an industrial hearing conservation program. However, pre-employment audiograms do represent good or "ideal" practice, and OSHA encourages employers to obtain them where it is practical to do so.

Dr. L. Royster (Exh. 327–84, pp. 30–31) and others (Exh. 327–20, pp. 2–3; Exh. 327–135, p. 4; Exh. 327–119, pp. 2–3) urged that different intervals should be allowed for baseline testing, depending on the employee's exposure level. They argued that employees exposed to high levels of noise should be tested sooner than those exposed to moderate or lower levels. However, OSHA agrees with D. C. Gasaway, who stated that using different time frames to establish

baseline audiograms for employees exposed to different levels of noise would lead to administrative confusion and might cause some affected employees to be overlooked (Exh. 327–66, p. 17). Moreover, such a strategy would not solve the problem for those using mobile testing services. Others requested that the period for obtaining baseline audiograms be extended to 6 months to exclude seasonal workers in some industries who work more than 120 days but less than 180 days, and who often have a 100% turnover rate (Tr. Vol. III, p. 8, March 25, 1982; Tr. Vol. IV, p. 203, March 26, 1982).

After carefully considering the record evidence, the Agency has decided that employers who have their own audiometric testing facilities or who send their employees to clinics for testing should obtain baseline audiograms for their employees within 6 months of the employees' first exposures to workplace noise at or above the action level. The requirement to obtain baseline audiograms within 4 months of the employees' first exposure at or above the action level is being revoked. This relaxation of the time period in which to obtain baseline audiograms for those employers with in-house testing capability and those using clinics for audiometric testing is in recognition of the fact that the 4-month period allowed in January to obtain baseline audiograms was too short to permit the exclusion of many seasonal workers from the audiometric testing requirements (see Exh. 326–29; Exh. 326–30; Exh. 374, pp. 199–206; Exh. 325–64). It is neither practical nor appropriate to require audiometric testing of seasonal workers; the tenure of employment is too short to permit the type of hearing evaluation mandated by the amendment in that the employee will not be employed long enough for the employer to obtain an annual audiogram against which to compare the baseline audiogram.[32]

In January, the Agency found that it was not appropriate to delay baseline testing more than 4 months since employees' audiograms might be contaminated by temporary threshold shifts (TTS) (46 FR 4143). While this finding was undoubtedly correct when employees are exposed to high noise levels, it did not fully consider the realities of the situation. The occupational noise exposure standard (29 CFR 1910.95(a) and (b)) requires that employee exposures be reduced to within the permissible exposure limits (90 dB as a TWA). Therefore, employees are not expected to be exposed to extremely high levels of noise at any time during their employment, including during the period before the baseline audiogram is taken. Under these circumstances, the Agency finds that it is appropriate to allow the employer 6 months in which to obtain employee baseline audiograms.

Numerous commenters argued persuasively that the 4-month baseline audiogram requirement contained in the January amendment was unduly restrictive and costly for those who rely on mobile test vans because it would either necessitate three visits by the van a year or require employers to send employees to a clinic, which would involve high cost, travel time, and special testing fees (Exh. 329–15, p. 5; Exh. 327–146, pp. 18–19; Exh. 327–61, p. 2; Exh. 327–96, p. 2; Tr. Vol. I–B, pp. 208–209, 254, March 23, 1982; Tr. Vol. IV, p. 80, March 26, 1982).

Many commenters recommended that OSHA extend the 4-month baseline requirement to 1 year, provided that hearing protectors are used until a baseline audiogram is performed (Exh. 327–143, p. 5; Exh. 327–61, p. 2; Exh. 333, p. 3; Exh. 327–96, p. 2; Tr. Vol. IV, p. 209, March 26, 1982; Tr. Vol. I–B, p. 208, March 23, 1982).[33]

These participants maintained that hearing protectors would be effective in minimizing or preventing temporary threshold shift prior to the baseline audiogram (Exh. 327–61, p. 2; Exh. 327–143, p. 5; Exh. 327–96, p. 2; Tr. Vol. IV, pp. 80–81, March 26, 1982). In the words of R. Connelly of Audiometric Associates:

"The implementation of an effective hearing conservation program should eliminate the need to obtain a baseline audiogram within the first 4 months of exposure to workplace noise. Companies should be encouraged to obtain baseline tests as soon as possible for new employees and [be] required to do so within 1 year of exposure" (Tr. Vol. IV, p. 209, March 26, 1982).

W. E. Bodenheimer [Colorado Speech and Hearing Center] noted:

"The intent here [of the 4-month baseline requirement] was to avoid contamination by threshold shifts on the baseline audiogram, to allow employers to exclude most seasonal and temporary workers from the testing program, and avoid the problems of requiring pre-employment baseline tests.

"All of these problems can be solved in a much easier and cost effective manner as far as we are concerned, particularly for those thousands of companies that rely on mobile testing services that test on-site on an annual basis.

"Since the standard requires the use of personal hearing protectors and emphasizes training in the use and care of these devices, were they provided immediately to any employee at his first exposure to noise at or above a time-weighted average of 85 dB, and were their proper use enforced, a valuable and reliable baseline hearing test would be established for those employees at the time of the annual hearing testing.

"This approach would be effective in preventing any threshold shift until the baseline could be established at the economic convenience of the employer.

"Many companies who rely on mobile service have operations located far from cities and other urban areas. They rely on the mobile operations to go to them for baseline and annual hearing testing and for catch-up tests when possible. It would be economically disastrous for these companies and logistically impossible for the mobile services to travel to each location to conduct baseline tests within four months of exposure, or for the companies to send their employees to a local clinic or physician where the cost per employee would be much higher.

"Effective industrial hearing conservation can be achieved with a program of annual hearing testing conducted in conjunction with a conscientious and enforced program of personal hearing protection use" (Tr. Vol. I–B, pp. 208–209, March 23, 1982.

OSHA agrees in principle with P. Crouch of the Refractories Institute and others (Exh. 327–28; Exh. 327–66; Exh. 327–143; Exh 327–146) that companies using mobile testing services to satisfy their audiometric testing obligations under the hearing conservation amendment should be allowed one year to obtain baseline audiograms provided that their employees exposed at or above the action level use hearing protectors until such time as the baseline audiogram is obtained. Such an approach would, however, treat employees who are to be tested using mobile test vans differently from those whose employers have their own in-house audiometric testing facilities. The former group of employees would have to wear hearing protectors for up to a year before the baseline audiogram is taken even if their exposure is below the permissible exposure level of 90 dB; the latter group of employees would not need to wear hearing protectors during the six-month period in which the employer has to obtain baseline audiograms if their exposures are below the permissible exposure level. Therefore, the amendment only requires that where the employer is using mobile test vans and wishes to take a full year to obtain baseline audiograms, employees whose exposures are below the permissible exposure level must

[32] The same rationale applies in all high turnover situations.

[33] The effect of the continued stay on the provision requiring that baseline audiograms be obtained within 4 months was to allow employers a year to obtain baseline audiograms.

wear hearing protectors from any period exceeding six months after first exposure until the baseline audiogram is obtained. This decision recognizes the practical limitations posed by the use of mobile testing vans and the logistical problems which would arise if the amendment were to require audiometric baselines to be obtained within 6 months, regardless of the size and location of the employer's firm. It also allows some flexibility for scheduling difficulties (Exh. 327–106, p. 4; Exh. 327–51; Exh. 327–91, p. 16) while minimizing the chances that the baselines will be contaminated by temporary threshold shifts as hearing protectors are only being relied upon to provide a very small amount of attenuation. Moreover, this approach is expected to substantially relieve the burden of obtaining baseline audiograms on those employers with highly transient or difficult to reach worksites.[34] R. Brisnehan of the Petroleum Equipment Suppliers Association and G. McKown of the International Association of Drilling Contractors admitted that extending the baseline requirement to 1 year would solve several of their industry's problems with complying with the audiometric test provisions of the amendment (Tr. Vol. I–B, p. 295, March 23, 1982).[35]

14 Quiet Hours

The January amendment required that employees exposed at or above the 85 dB action level be given an audiometric test to establish a baseline audiogram. That test was to be preceded by a minimum period of 14 quiet hours without exposure to workplace noise. This quiet period was intended to allow an employees's hearing to recover from any temporary threshold shift (TTS) caused by pre-test noise exposure, because TTS would mask the employee's true hearing threshold. If the baseline audiogram was contaminated by TTS, subsequent comparisons of the baseline audiogram to the annual audiogram would not show the true extent of the hearing loss since the baseline would not reflect the true hearing threshold at the time it was taken (see 46 FR 4146–4147). The wearing of hearing protectors could not be used to provide this quiet period.

After publication of the January amendment, many commenters informed OSHA that prohibiting the use of hearing protectors to provide quiet before the baseline audiogram might prove unnecessarily restrictive (Exh. 325–220; Exh. 325–248; Exh. 325–251; Exh. 325–268). The stay on this prohibition was continued in August and OSHA solicited evidence on whether hearing protectors would be effective in preventing TTS before baseline audiograms.

The Agency received many comments in favor of allowing the use of hearing protectors to supply quiet prior to the baseline audiogram (Exh. 327–103; Exh. 327–101; Exh. 327–105). On the other hand, some commenters argued that hearing protectors should not be substituted for the quiet period (Exh. 326–41; Exh. 326–42; p. 12; Exh. 327–20, p. 3). For example, F. P. Grimes of the United Steelworkers of America asserted that even close supervision of employees wearing hearing protectors before testing is not equivalent to a 14-hour pre-test quiet period (Exh. 326–41). Two professional audiologists, J. Shampan of Impact Hearing Conservation, Inc., and Dr. D. G. Harvey of Audiology Associates, Inc., expressed concern that the use of hearing protectors would not prevent TTS from contaminating the audiogram (Exh. 327–53, p. 1; Tr. Vol. V, p. 45, March 29, 1982).

Most commenters, however, stated that hearing protectors can be effective in minimizing TTS and will not interfere with obtaining a valid audiogram (Exh. 327–114, p. 23; Exh. 327–108, pp. 6–7; Exh. 327–105, p. 4; Exh. 327–101, p. 5; Exh. 327–98, p. 19; Exh. 327–97, p. 3; Exh. 327–93, p. 3; Exh. 327–89, p. 4; Exh. 327–88, pp. 2–3; Tr. Vol. II, pp. 106–107, March 24, 1982).

Dr. H. W. McCurdy, Executive Director of the American Council of Otolaryngology, asserted that a hearing protector that reduces the level of sound energy reaching the ear to 80 dBA or less will effectively reduce TTS; attenuation to this level would limit the amount of baseline contamination to less than the usual amount of audiometric measurement error (Exh. 327–151, p. 3).

An evaluation of more than 40 industrial audiometric data bases, which was conducted by Dr. L. Royster of North Carolina State University, confirms the effectiveness of hearing protection in preventing TTS contamination of the audiogram (Exh. 327–84, p. 41). As Dr. Royster reports, "proper utilization of appropriate (hearing protectors) will prevent significant contamination of the data base by TTS" (Exh. 327–84, p. 4).

Several comments claimed that valid baseline audiograms could be obtained if hearing protector use was well supervised on the day of the baseline test. In fact, this was felt to be superior to the 14-hour quiet period "without exposure to workplace noise" where employee exposures are unknown and uncontrolled (Exh. 327–113, p. 2; Exh. 327–104, p. 17; Exh. 327–51, p. 3; Exh. 327–39; p. 1; Exh. 327–35, p. 2; Exh. 327–120, pp. 2–3; Tr. Vol. I–B, pp. 193–194, 209, March 23, 1982; Tr. Vol. II, p. 222, March 24, 1982; Tr. Vol. IV, pp. 67, 107–108, March 26, 1982.

Several commenters testified to the difficulties that the prohibition against substituting hearing protectors for the 14-hour quiet period would cause. Among the problems cited were the cost of paying employees overtime wages when they were tested on unscheduled work days (Exh. 326–35; Exh. 326–43; Exh. 327–21; Exh. 327–34; Exh. 327–29; Exh. 329–64; Exh. 331–33), disruption of employee work schedules (Exh. 326–28; Exh. 326–35; Exh. 326–43; Exh. 327–21; Exh. 327–34; Exh. 327–54; Exh. 327–88; Exh. 327–90; Exh. 329–64), and the difficulty and expense associated with scheduling mobile audiometric test vans (Exh. 326–43; Exh. 327–29; Exh. 327–54; Exh. 327–90; Exh. 327–146; Exh. 331–33). Many participants stated that these problems could be overcome by permitting employees to wear hearing protectors during the 14-hour period before the baseline is taken, particularly if employees were made aware of the effects of pre-test noise exposures (Exh. 327–141, p. 4; Exh. 327–61, p. 3; Exh. 327–140, p. 4).

After thorough review and analysis of the comments and testimony received in connection with this issue, OSHA has determined that the use of hearing protectors should be permitted as a substitute for the 14-hour quiet period. The Agency concurs with the large number of commenters who testified that hearing protectors may provide sufficient attenuation to prevent noise-induced TTS from contaminating baseline audiograms. As Dr. McCurdy emphasized, * * * "[the] use of hearing protection to reduce exposure to noise prior to the baseline measurement should be permitted * * * [An] advantage of this allowance is that it may aid in reducing TTS due to non-occupational noise exposure prior to baseline testing, if the employer makes hearing protectors available to employees for use outside the workplace. Informing employees of the

[34] Where employers with these type of workplaces do have an in-house test capability, there would, of course, be no problem in obtaining baseline audiograms within 6 months.

[35] Clearly, high employee turnover rates do not render the requirement to obtain baseline audiograms impractical when a full year is allowed to obtain the baseline. The employer has the option of waiting to see which employees stay before obtaining baseline audiograms; this may greatly reduce the number of baseline audiograms the employer will have to obtain (Tr. Vol. I–B, p. 295, March 23, 1982).

importance of avoiding excessive noise exposure on and off the job is an integral part of any hearing conservation effort * * *" (Exh. 327–151, p. 3). OSHA agrees with Dr. McCurdy that the amendment's training provisions, which require that employees be trained in the selection, fitting, use, and care of hearing protectors and the effects of noise on hearing, will also operate to increase the effectiveness of hearing protectors in the workplace.

A number of other suggestions were given to help maximize hearing protector effectiveness in preventing temporary threshold contamination of the baseline audiogram (Exh. 327–114, p. 23; Exh. 327–106, p. 3; Exh. 327–113, p. 2; Exh. 327–105, p. 4; Exh. 327–103, p. 5). For example, Mr. J. Morrill, an industrial audiologist and president of Impact Hearing Conservation, recommended that special steps be taken, such as instruction in the need to avoid high levels of noise both on and off the job and careful fitting of hearing protectors, when using hearing protectors to ensure the integrity of the baseline audiogram (Exh. 327–35). Some commenters believed that only ear muffs are suitable to provide quiet on the day of testing since their visibility makes them easily verifiable (Exh. 327–151, p. 3; Exh. 327–103, p. 5; Exh. 327–62, p. 3; Exh. 327–56, p. 2; Exh. 327–154, p. 3; Tr. Vol. II, p. 151, March 24, 1982). OSHA agrees, but has decided not to require that ear muffs (as opposed to ear plugs) be used to provide quiet before baseline audiograms for the following reasons: ear muffs may be extremely uncomfortable in hot or humid environments, the use of glasses, goggles or respirators may interfere with their effectiveness, and certain hairstyles may make it difficult to get a good seal. The revised amendment allows employers to have sufficient flexibility to choose the most appropriate method of providing a quiet period before the baseline audiogram which is consistent with the particular working environment. In some instances, ear plugs will be used, in others, ear muffs, and in some circumstances employees may be scheduled for baseline testing at the beginning of the work shift. Accordingly, the prohibition on the use of hearing protectors before baseline audiograms is being revoked. Employers or professionals supervising audiometric testing programs are, of course, free to prohibit the use of hearing protectors to provide quiet hours before the baseline audiogram if, in their judgment, the circumstances so warrant.

Avoidance of Noise Before Audiometric Tests. The January amendment required employers to notify employees of the need to avoid high levels of noise during the 14-hour period preceding their baseline audiograms. This requirement was designed to help ensure that the baseline audiogram was not contaminated with temporary threshold shift (see 29 CFR 1910.95(j)(5)(ii)(*b*), 46 FR 4162). Some commenters suggested that this requirement was unnecessary and redundant since the effect of noise exposures on audiogram results would be explained during the training required by another provision of the standard (Exh. 327–20, p. 5; Exh. 326–34, p. 5; Exh. 327–91, p. 22).

Other commenters stated that even if employees were notified of the importance of the quiet period as part of the training required by the amendment, there would be no assurance that they would actually receive this training before taking their baseline audiograms (Exh. 326–41, p. 5). Moreover, even if training were completed prior to taking a baseline audiogram, reiterating this information would still be beneficial since "repetition is a good teaching method" (Exh. 327–80, p. 2).

Moreover, other commenters felt that informing employees of the importance of avoiding noise prior to the baseline audiogram is necessary to ensure an accurate baseline (Exh. 326–31, p. 2; Exh. 326–41, p. 5; Exh. 327–12, p. 2; Exh. 327–95, p. 6; Exh. 327–102, p. 6; Exh. 327–104, p. 17; Exh. 327–131, p. 1; Exh. 327–135, p. 4; Exh. 327–143, p. 6; Exh. 327–154, p. 4; Tr. Vol I-B, pp. 200, 212, 252, 3/23/82). According to J. Toupen, attorney for the Shipbuilders Council of America:

> "Employees who are so informed [about the necessity for the quiet period] have every reason to protect themselves from excessive noise exposure, since it is in their interest for their baseline audiograms to record their hearing capacity accurately. Workers who are trained in protecting their hearing on the job will have a special incentive to follow the hearing conservation program before their baselines" (Exh. 327–104, p. 17).

Dr. S. White of the American Speech-Language-Hearing Association also believed this provision was important:

> "* * * the more information the employee has about why they should avoid the noise [prior to audiometric testing] the better. The employee would be certain * * * to want a valid audiogram * * *" (Tr. Vol. IV, p. 67, March 26, 1982.

After a thorough review of the record, OSHA has decided to lift the administrative stay on the requirement that employers tell their employees to avoid high levels of non-occupational noise during the period preceding their baseline audiograms. The Agency agrees with Dr. W. E. Bodenheimer of the Colorado Speech and Hearing Center that, "although this paragraph may be redundant because this kind of information would occur during training, which is already required by the standard, * * * retaining this requirement would supply additional support to the goal of obtaining valid and reliabe hearing testing results" (Tr. Vol. I-B, p. 212, March 23, 1982).

Although employers are not responsible for employee noise exposures sustained away from the workplace, the likelihood of non-occupational noise exposure contaminating the baseline audiogram can be substantially reduced by counseling workers of the need to avoid such exposures in the period before their baseline tests. Therefore, this requirement is necessary and appropriate for the implementation of a successful hearing conservation program.

Grandfathering of Baseline Audiograms

After publication of the January amendment, many commenters asked the Agency whether audiograms taken before the effective date of the amendment would be accepted as baseline audiograms. Most comments urged OSHA to accept these audiometric baselines, which had been taken using hearing protectors as a substitute for the 14-hour quiet period required by the amendment. In August, OSHA decided to adopt a very lenient policy on accepting baseline audiograms taken before the promulgation of the amendment:

> Since the prohibition against the use of hearing protectors to achieve the quiet hours is being stayed, OSHA will accept baseline audiograms that were taken using hearing protectors as a substitute for 14 quiet hours. The Agency will continue to accept these audiograms in the future as valid baseline audiograms regardless of the outcome of the stay, and will accept or "grandfather" older baseline audiograms that reflect substantial compliance with the audiometric test requirements of the amendment. For example, to be acceptable, baseline audiograms should be administered by a trained technician, taken at the required test frequencies (500, 1000, 2000, 3000, 4000 and 6000 Hz), in a reasonably quiet room, and with calibrated equipment. The Agency is prepared to be flexible in accepting or grandfathering old baseline audiograms because in most cases this would be more protective of the employee since old baselines will allow the true extent of the hearing loss over the years to be evaluated. Obtaining a new baseline audiogram after many years of noise exposure might be less protective since the new audiogram might show higher thresholds and the true extent of future losses would

appear smaller than when compared with the original baseline (46 FR at 42626).

The Agency received many comments in response to this statement. There was a groundswell of support for the proposition that pre-existing baseline audiograms should be acceptable and be given "grandfather" status (Exh. 326–49, p. 3; Exh. 326–54, p. 3; Exh. 326–56, p. 4; Exh. 327–18, p. 2; Exh. 327–76, p. 3; Exh. 327–87, p. 4; Exh. 327–89, p. 10; Exh. 327–98, p. 3; Exh. 327–98, p. 17; Exh. 327–101, p. 5; Exh. 327–106, p. 4, Exh. 327–112, p. 15; Exh. 327–115, p. 3; Exh. 327–121, p. 2; Exh. 327–122, pp. 5–6; Exh. 327–140, p. 4; Exh. 327–149, p. 4; Exh. 327–154, p. 5; Tr. Vol I-B, p. 193, March 23, 1982; Tr. Vol. III, p. 114, March 25, 1982; Tr. Vol. IV, p. 233, March 26, 1982. They reasoned that this policy was in the best interest of employees since in most cases these older audiograms would show lower thresholds and would better reflect the ture extent of hearing loss over the years (Exh. 327–76, p. 3; Exh. 327–86, p. 6; Exh. 327–90, p. 4; Exh. 327–96, p. 3; Exh. 327–115, p. 3; Exh. 329–17, p. 3; Tr. Vol. I-B, p. 193, March 23, 1982; Tr. Vol. IV, p. 44, March 26, 1982;) Tr. Vol. IV, p. 233, March 26, 1982. Advocates of this policy also claimed that grandfathering older audiograms would eliminate unnecessary costs (Exh. 327–76, p. 3; Exh. 327–122, pp. 5–6; Exh. 327–140, p. 4).

So great was the support generated in favor of "grandfathering" pre-existing baseline audiograms that many of these commenters requested that OSHA add language to the amendment explicitly stating that audiograms taken prior to the effective date of the amendment are acceptable as baseline audiograms (Exh. 326–49, p. 3; Exh. 326–54, p. 3; Exh. 327–76, p. 3; Exh. 327–87, p. 4; Exh. 327–88, p. 6; Exh. 327–89, p. 10; Exh. 327–98, p. 17; Exh. 327–101, p. 5; Exh. 327–122, p. 5; Exh. 327–149, p. 4; Tr. Vol. I–B, p. 193, March 23, 1982). Other commenters were less enthusiastic, asserting that older audiograms should be considered as acceptable baselines only if they have been determined to be valid and to have been taken under conditions reasonably similar to those required by the amendment (Exh. 326–49, p. 3; Exh. 326–54, p. 3; Exh. 326–56, p. 4; Exh. 327–76, p. 3; Exh. 327–87, p. 4; Exh. 327–90, p. 4; Exh. 327–96, p. 3; Exh. 327–149, p. 4; Exh. 327–154, p. 5; Exh. 329–17, p. 3; Tr. Vol. IV, pp. 44, 233–234, March 26, 1982; Tr. Vol. V, pp. 139–141, March 29, 1982).

However, others claimed that it is unfair to require old baseline audiograms to comply with the requirements of the present amendment (Exh. 327–101, p. 5) and that, at a minimum, audiograms meeting the 1974 proposal's requirements should be grandfathered (Exh. 327–98, p. 17; Exh. 327–89, p. 10). George Taylor of the AFL–CIO (Exh. 327–109, p. 12) and H. Buoy of the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers (Exh. 327–78, p. 13) recommended that employers conduct new baseline audiograms and then choose from among the old and new audiograms that audiogram with the lowest threshold as the employee's baseline.

OSHA believes that almost any baseline audiogram taken prior to the present amendment can be valuable in evaluating the true extent of an employee's hearing loss over time. As Dr. S. White of the American Speech-Language-Hearing Association cautioned, however:

"The grandfathering of pre-amendment audiograms should only be allowed when the supervising professional agrees that they are valid. Some previous audiograms may reflect, in part, temporary threshold shifts because of pretest noise exposure or high background noise levels in the test area. Therefore, previous test equipment, environment, and personnel should be considered. Obviously, if a hearing conservation program were in place prior to the enactment of the current amendment, the ramifications of allowing a reestablishment of baseline should also be considered. If the hearing loss had occurred prior to August of 1981, and that loss was due to industrial noise, the previous audiograms would reflect that change in hearing. As it presently stands, the reestablishment of baseline * * * would overlook the changes in hearing that took place and were already documented" (Tr. Vol. IV, p. 44, March 26, 1982).

Similarly, R. Connelly of Audiometric Associates stressed the importance of professional opinion in deciding whether to depend on a pre-existing baseline:

"I believe that * * * the older the audiogram * * * the more valuable it becomes in terms of identifying significant change. I believe that audiograms should be grandfathered as long as they appear to be reliable. I don't think there is any particular problem with that, as long as some safeguard is given to the method of comparison by an appropriate professional (Tr. Vol. IV, p. 233, March 26, 1982).

In response to a question about methods of determining the validity of old baseline audiograms, Mr. Connelly explained:

"Generally what is done is that, if they appear to be inconsistent, then the credibility, the validity of the audiogram comes into question. If they are generally consistent, then they are generally accepted as evidence" (Tr. Vol. IV, p. 234, March 26, 1982).

After review of the evidence on this issue, OSHA is reaffirming its position, stated in the August **Federal Register** document, of allowing the grandfathering of baseline audiograms. This policy is consistent with the exercise of professional judgment. It is the responsibility of the professional supervising the hearing conservation program to determine which pre-existing audiograms are acceptable and which to choose as the baseline.

Evaluation of Audiogram

The January amendment stipulated that evaluation of audiograms must be performed by an audiologist, otolaryngologist, or qualified physician to determine if the baseline is valid and whether a significant threshold shift has occurred. These professionals are responsible for supervising the employer's audiometric test program and ensuring that tests conducted by technicians are carried out properly, that the test equipment is calibrated, and that the test room is sufficiently quiet. Professional supervisors also determine the need for employee referral for further testing when test results are questionable or when problems of a medical nature are suspected. Because these professionals have extensive education and training in audiometry and the recognition of various types of hearing loss, they are considered to be the most qualified to oversee a testing program.[26]

The Agency received some comments, however, indicating that commenters had mistakenly interpreted the amendment as prohibiting technicians from reviewing routine audiograms. In the August **Federal Register** document, OSHA explained that technicians were permitted to review typical audiograms to determine STS, and that only problem audiograms were required to be reviewed by professionals (see 46 FR at 42626). This means that if technicians preliminarily review audiograms, they must refer problem audiograms or audiograms of questionable validity to an audiologist, otolaryngologist, or qualified physician for further evaluation (Exh. 327–66, pp. 50–52; Exh. 327–87, p. 4; Exh. 327–88, p. 7; Exh. 327–102, p. 3; Exh. 327–106, p. 7; Tr. Vol. I–B, p. 120, March 23, 1982). As Dr. S. White of the American Speech-Language-Hearing Association explained, it is acceptable for technicians to screen

[26] The preamble to the January amendment explained that in companies and consulting firms where audiometric test results are computerized, professionals do not have to review every audiogram but are responsible for preparing and developing the computer program to ensure that the professional reviews audiograms on a selective basis (see 46 FR 4141).

audiograms as long as the professional in charge establishes the criteria for audiogram review (Exh. 327–154, p. 5).

Some commenters urged that the Agency require professional review of all audiograms indicating STS in addition to problem audiograms (Exh. 327–106, p. 7; Exh. 327–102, p. 3). Mr. Bert Scott [Environmental Technology Corporation] argued that it is important for the professional to review every audiogram.

"ETC does not agree with OSHA's position * * * that technicians may review audiograms and give only problem audiograms to the professionals for review. ETC's 11 years of experience in reviewing hundreds of thousands of audiograms from various industrial sites reveal that trained audiometric technicians are not always capable of determining whether or not an audiogram is valid. This is especially true when a self-recording audiometer is being used. We have rarely if ever, reviewed plant audiograms and not found invalid data. We consistently found it necessary to reject audiograms generated by certified technicians. In addition to invalid testing procedures, unlikely thresholds at one or more frequencies, missing frequencies on manual testing, failure to retest frequencies to determine invalidity by microprocessors or audiometers, reversal of earphones, etc. [sic]

We observed other areas such as omission of names, dates, use of non-standard audiometric symbols on manual audiograms, out-of-date calibrations, and inconsistencies between audiometric data and medical history" (Tr. Vol. IV, pp. 137–138, March 28, 1982).

Dr. McCurdy, Director of the American Council of Otolaryngology—Head and Neck Surgery, and Dr. Summar, Medical Director of MTS Associates, Inc., also recommended that the professional should review every audiogram (Exh. 327–151, p. 5; Exh. 327–69, p. 6). As Dr. Summar explained:

"The entire Hearing Preservation Program, not just the hearing tests, must be under the direction of an experienced otolaryngologist, other physician, or audiologist. He must be personally and intimately involved in all aspects of the program in order to compare threshold results as to whether a change is present, why there is a change, and what followup steps need to be taken" (Exh. 327–69, p. 6).

OSHA does not believe that the record evidence demonstrates a need to require professionals to review every audiogram. Audiometric technicians, under the general supervison of an audiologist, otolaryngologist or physician have the skill necessary to review routine audio grams. The amendment has been revised to more clearly reflect this intent. Of course, if the supervising professional wishes to review every audiogram, he or she is free to do so.

The Agency therefore reaffirms its position, as stated in the August Federal Register document, which would require that professionals review problem audiograms including those of questionable validity. This procedure will help to ensure that employees whose audiograms merit further investigation will receive the necessary professional attention.

Standard Threshold Shift

In the January amendment, OSHA stated that:

"A definition and an understanding of what OSHA considers to be a significant shift of hearing threshold is very important in the proper implementation of the amendment's requirements. Without such a definition, workers and employers are unable to know the seriousness of the noise-induced hearing loss.

Identifying threshold shift as significant means that it is outside the range audiometric error (±5dB), and it is serious enough to warrant prompt attention because it is a precursor to material impairment of hearing. When threshold shifts are significant, employers must provide and fit hearing protection, and take other remedial actions depending upon whether or not the shift is permanent.

The definition of the term "significant" is critical to the effective operation of the hearing conservation program. If the definition is too stringent, spurious threshold shifts may occur and workers will be identified because of audiometer or technician error. If the definition is not stringent enough, workers will be allowed to lose too much hearing before protective actions are taken. Correctly identifying significant threshold shifts of hearing is particularly important for workers who have already begun to lose their hearing, so that the progression may be stopped before the hearing loss becomes handicapping" (46 FR 4144).

The January amendment defined a significant threshold shift (STS) as:

(i) A change in hearing threshold relative to the baseline audiogram of 20 dB or greater at any test frequency other than 500 Hz in either ear, if no previous audiograms have thresholds that exceed 25 dB with reference to audiometric zero as specified by American National Standard S3.6–1969; or

(ii) A change in hearing threshold relative to the baseline audiogram of 10 dB or greater at 1,000 or 2,000 Hz, 15 dB at 3,000 or 4,000 Hz, or 20 dB at 6,000 Hz, in either ear, if any previous audiogram has one or more thresholds that exceed 25 dB with reference to audiometric zero; or

(iii) A change in hearing threshold relative to the baseline audiogram of 10 dB or greater at any test frequency other than 500 Hz in either ear, if any previous audiogram has thresholds exceeding an average of 25 dB with reference to audiometric zero at the frequencies 1,000, 2,000 and 3,000 Hz; or

(iv) A change in hearing threshold relative to the baseline audiogram of 10 dB or greater at any test frequency other than 500 Hz in either ear, if the employee has previously suffered one or more permanent significant threshold shifts.

Thus the January definition of STS reflected a "sliding scale" approach, with the amount of hearing loss constituting a significant threshold shift becoming smaller as the worker's hearing loss becomes greater. (For a more complete discussion of the definition of STS promulgated in January, see 46 FR 4144–4145).

According to many commenters, the STS definition included in the January amendment would permit too many employees, or certain groups of employees, to suffer occupationally-induced hearing loss without detection (Exh. 326–21, p. 3; Exh. 326–28, p. 5; Exh. 327–13, p. 5), while others maintained that OSHA's definition would result in a large number of "false-positives" (i.e., persons initially identified as having STS although subsequent audiometric tests show they have not had a shift in hearing threshold) (Exh. 327–91, p. 30; Exh. 325–30; Exh. 327–101, p. 7; Exh. 327–138, p. 6; Exh. 327–151, p. 10). [27] Although a number of contributors supported OSHA's January STS definition (Exh. 327–35, p. 4; Exh. 327–86, p. 6; Exh. 327–97, p. 5; Exh. 327–136, p. 6), others stated that it was too complicated to be used in the field (Tr. Vol. II, pp. 170–171, March 24, 1982; Exh. 326–28, p. 5; Exh. 325–34; Exh. 327–84; Exh. 327–140, p. 4), or would require the use of a computer to analyze statistical trends in audiogram results (Exh. 327–135, p. 7; Exh. 325–48, Exh. 327–22, p. 3; Exh. 327–151, pp. 10–11).

OSHA agrees that defining the STS in a manner that requires computer analysis or extensive computation will not encourage voluntary compliance, and will additionally place a disproportionate burden on small and medium-sized employers. The Agency also believes, after a thorough review of the rulemaking record, that the January amendment's STS definition might require unnecessarily complex calculations and might prove difficult to administer because the definition differs for employees who have previously experienced STS and those who have not.

The August document (46 FR 42622) continued the interim stay on the definition of STS, noting that OSHA had received many comments requesting the Agency to reconsider this important definition (Exh. 325–274; Exh. 325–288). The Agency has reviewed the comments

[27] For example, according to W. Carey, Chocolate Manufacturer's Association, this criteria resulted in medical referrals for 30% of the non-noise exposed population and 75% of the noise exposed population (Tr. Vol. II, p. 299, March 24, 1982).

in the record thoroughly and has reevaluated the available evidence pertaining to a definition of STS. The great majority of comments supported the inclusion of a standardized definition of STS in any revised hearing conservation amendment promulgated by the Agency (Exh. 328–42, p. 13; Exh. 326–49, p. 3; Exh. 327–13, p. 5; Exh. 329–16, p. 8; Exh. 331–33; Exh. 327–109; Tr. Vol. V, p. 270, March 26, 1982; Exh. 327–89, p. 6).

The STS concept is essential to the proper working of any hearing conservation program because, as R. F. Boggs of Organization Resources Counselors noted, those conducting audiometric examinations need to have a "flag" to indicate when additional testing or evaluation is needed (Exh. 327–96, p. 15). Further, a standardized definition of STS permits both the seriousness of an employee's hearing loss and the effectiveness of an employer's hearing conservation program to be evaluated and monitored (Exh. 327–66, pp. 48–49; Exh. 327–89, p. 6; Exh. 327–94, p. 3; Exh. 327–99). R. G. Wieneck, of General Motors, summarized the need for a standardized definition of STS by describing it as the benchmark for evaluating audiograms to determine whether hearing is being conserved (Exh. 327–99). Margaret Seminario of the AFL–CIO also pointed out that the absence of a standardized definition would mean that "the level of employees' protection will be highly variable * * * in direct conflict with OSHA Act requirements to set standards that are protective of employee's health" (Tr. Vol. V, p. 270, March 26, 1982).

However, as the American Council of Otholaryngology emphasized (Exh. 327–152, p. 5), it is important to distinguish between threshold shifts defined as significant, which merely trigger in-house hearing conservation program activities such as providing employee training and hearing protectors, and a criterion used for medical referral. As the Council stated, STS should be defined in a way that will detect the least amount of hearing loss in excess of test-retest variability, while othologic referral criteria are intended to detect substantial abnormalities * * *" (Exh. 327–152, p. 5). In accordance with these and other comments and recommendations, OSHA reaffirms the need for a standardized definition of significant threshold shift [20] in the hearing conservation amendment. Correctly identifying standard threshold shifts will enable employers and employees to take corrective action so that the progression of hearing loss may be stopped before it becomes handicapping. Moreover, a standardized definition of STS will ensure that the protection afforded to exposed employees is uniform in regard to follow-up procedures.

After much review and reconsideration OSHA reaffirms its position on the ideal criterion for STS which was articulated in the January 16, 1981 promulgation (See 46 FR 4144). The criterion must be sensitive enough to identify meaningful changes in hearing level so that follow-up procedures can be implemented to prevent further deterioration of hearing but must not be so sensitive as to pick up spurious shifts (sometimes referred to as "false positives"). In other words, the criterion selected must be outside the range of audiometric error. Thus, while the ultimate goal of the hearing conservation amendment is to identify and retard hearing loss, this cannot be done effectively if many workers are falsely identified as having threshold shifts when they do not. Falsely or incorrectly identifying large numbers of workers for follow-up procedures is not only costly and unnecessary but as Jack Shampan of Impact Hearing Conservation, Inc. pointed out, large numbers of incorrect identifications will cause both labor and management to lose confidence in their hearing conservation program (Exh. 375, pp. 24–25). Therefore the definition of STS must reflect a careful balancing between these competing considerations.

More than 40 different definitions of STS were recommended to OSHA by various individuals, groups, and organizations in the comments received subsequent to the publication of the January amendment. The most important of these are discussed below.

The definition of STS included in OSHA's Field Operations Manual was recommeded by several commenters (Exh. 327–66, p. 12; Exh. 327–108, p. 9; Exh. 327–62, pp. 6–7; Exh. 327–79, p. 3; Exh. 327–88, p. 8); this defines STS as a change of 20 dB at any test frequency in either ear. These participants argued that adopting any other STS definition would make comparing past and future test results difficult (Exh. 327–108, p. 9) and further that the 20 dB criterion was "straight-forward, easy to use, and does not require complex comparisons from computer programs to assure compliance" (Exh. 327–66, p. 12). OSHA agrees that a single-frequency criterion is simple to use and understand. However, J. L. McGuire [Acoustical Research Associates] argued that, "* * * employing a STS of 20 dB or greater for all employees does not protect the worker effectively" (Exh. 327–115, p. 2).

Both McGuire and J. Ropes of the Environmental Protection Agency (Exh. 327–94, p. 7) believe that a 20 dB criterion is too lenient because it allows too great a threshold shift to occur at individual frequencies before protective action is taken. Further, Drs. Larry and Julia Royster believe (Exh. 327–84, p. 170) that "Use of a 20 dB shift * * * would fail to protect female populations * * *."

OSHA agrees with these and other participants that the 20 dB at any frequency criterion will not provide necessary employee protection, since this definition of STS would permit an employee with a shift as great as 19 dB across the entire test frequency range to go untreated. In addition, OSHA does not find merit to the argument that using any but the 20 dB criterion will make pre-and post-amendment test comparisons difficult, since the audiogram itself, which is the record of actual hearing acuity, is not affected by the choice of definition and can be interpreted according to any definition.

Several organizations and agencies, including the Environmental Protection Agency (Exh. 327–94, p. 4), the United Steelworkers of America (Tr. Vol. III, p. 129, March 25, 1982, the Amalgamated Clothing and Textile Workers Union (Exh. 362–H, p. 3), and the International Union of Electrical, Radio, and Machine Workers (Exh. 331–17, p. 9), have recommended that OSHA adopt the following definition of STS: a 15 dB shift at any frequency other than 500 Hz in either ear relative to the baseline audiogram, adjusted for presbycusis. Many commenters praised the simplicity of this definition (Exh. 327–66, p. 7; Exh. 327–94, p. 4; Exh. 331–17, p. 9) and argued that it is more protective than a single frequency 20 dB criterion (Exh. 327–94, p. 7; Exh. 331–17, p. 9); follow-up procedures are provided at an earlier point in time. Although the 15 dB at any frequency (other than 500 Hz) criterion has the advantage of simplicity, OSHA has not adopted it because it is not appropriate. The Agency believes that use of this definition would produce an unacceptable number of false positive identifications. Clearly more false positive identifications than the 20 dB criterion would result because the amount of shift required to identify employees and implement follow-up procedures is smaller.

[20] As noted earlier, OSHA has decided to use the term standard threshold shift rather than significant threshold shift in the final version of the hearing conservation amendment.

Although the Royster's report, "Comparing the Effectiveness of STS Criteria for Industrial Hearing Conservation Programs," found that the 15 dB criterion had the most appropriate identification rate and the lowest false positive rate, the Royster's criteria was not the same as that recommended by the commenters. The Royster's criterion required that the 15 dB shift occur on two successive audiometric tests rather than on just one (see Exh. 378, pp. 1–2). This criterion would mean that employees would not receive appropriate follow-up attention after their annual audiograms showed STS until a subsequent audiogram confirmed the initial STS. Since the audiometric testing is only required annually, in some cases this could result in the delay of follow-up procedures for as long as three or more years (Exh. 387, pp. 3–10). OSHA does not believe that this criterion adequately protects the employee. When the Roysters evaluated the effectiveness of a 15 dB shift once (as opposed to twice) at the appropriate test frequencies, they came up with a very high percentage of false positives and a relatively low percentage of appropriate identifications (Exh. 366, pp. 53, 63). It is clear therefore that using a 15 dB shift (once) will not be as effective as other criteria in effectuating the purposes of the hearing conservation amendment.

A number of commenters (Exh. 327–91–D, p. 5; Exh. 327–20, p. 5; Exh. 327–96, p. 4) advocated multi-level definitions, which specify different shifts at different frequencies. These definitions usually are relatively stringent for the lower frequencies and more lenient for the higher frequencies (see Exh. 327–96, p. 4; Exh. 327–96, pp. 12–13; and Exh. 327–122, p. 7). For example DuPont, the American Textile Manufacturers Institute and the American Paper Institute, recommended that OSHA adopt the National Institute for Occupational Safety and Health (NIOSH) definition of STS (Exh. 372–01; Exh. 327, p. 144; Exh. 327–20, p. 5). The NIOSH criterion is a 10 dB or greater shift at 500, 1000, or 2000 Hz, a 15 dB shift at 3000 Hz, and a 20 dB shift at 4000 or 6000 Hz in either ear relative to the baseline audiogram. Julia Phillips, speaking for the DuPont Company, asserted that this criterion is reasonable and will permit employers to distinguish between an STS caused by presbycusis and one caused by occupational exposure (Exh. 327–91–D, pp. 4–5). However, J. Repes of the Environmental Protection Agency's Office of Noise Control Programs stated that a STS criterion using multiple level and frequency measurements, i.e., different thresholds at different frequencies, does not provide any additional diagnostic information and may interfere with early detection of hearing loss (Exh. 327–94, p. 7). Moreover such a definition which targets different amounts of hearing loss at different frequencies is somewhat complicated by its very nature.

Many commenters advocated that OSHA adopt a simple to understand and easy to use definition. For example, D. C. Gasaway, an An Air Force hearing specialist with many years of experience, advised that "* * * [the method selected] by OSHA [should] be a simple, uncomplicated, numeric method that can be easily understood and used by those who will actually conduct the task" (Exh. 327–66, p. 65). OSHA believes that a definition of STS that specifies different hearing thresholds for different frequencies may be too complex and therefore will be subject to error in field and industrial use. In addition, many commenters have pointed out that any formula specifying a shift of only 10 dB in individual frequencies will be very likely to produce false positive identifications (Exh. 327–151 and 327–152, p. 10; Exh. 327–62, p. 7; Exh. 327–98, p. 12). Therefore, OSHA has decided not to adopt the NIOSH definition described above.

A large number of companies and organizations, including the Chemical Manufacturers Association (Exh. 328–54, p. 2), the Dow Chemical Company (Exh. 327–76, p. 2), and the Monsanto Company (Exh. 328–49, p. 3) urged OSHA to define STS in accordance with "the American Academy of Otolaryngology's (AAO) definition." These participants mistakenly believed that the AAO's STS criterion was: a shift of more than 15 dB at 500, 1000, or 2000 Hz, more than 20 dB at 3000 Hz, or more than 30 dB at 4000 or 6000 Hz (Exh. 328–54; Exh. 327–76; Exh. 328–49). However, the AAO's successor organization, the American Council of Otolaryngology, emphatically states (Exh. 327–151) that this criterion is intended to be used only for otologic referrals; it is not suitable for use as an STS criterion to trigger hearing conservation program follow-up procedures. According to the Council (Exh. 327–151, p. 4), "[This criterion] * * * can be used to select those workers who are most likely to have *non-occupational hearing loss* for referral for otologic evaluation" [italics added]. Since OSHA is concerned in this amendment with occupationally induced rather than non-occupationally induced hearing loss, and is not specifically addressing other otologic disorders, adoption of this criterion would be inappropriate for the purposes of the hearing conservation amendment.

The three STS criteria specifically considered above (that is: 20 dB any frequency; 15 dB at any frequency from 1000 Hz to 6000 Hz; and the NIOSH criteria) and the OSHA January 16, 1981, criterion have a common feature. All indicate that a STS has occurred when a hearing loss exceeds a certain value as measured at a single frequency. Although the specifications differ for each definition, all have the characteristic of having a high false positive rate. This is caused, in part, by intrinsic variation of the audiometric testing instrumentation. As a result, a large hearing loss might be measured at only one frequency which would, by the nature of the STS criterion, give the illusion that an STS has occurred. If the audiogram is taken again, the hearing loss measured at that frequency may not be as large as previously measured, and therefore no real STS has occured. The initial observation that an STS occurred was thus due only to the instrumentation and testing variability and the nature of the STS criterion.

OSHA believes that any definition that is triggered by a specified amount of hearing loss at a given frequency is more likely to produce false positives than a definition that averages hearing levels over a number of frequencies. For example, with the two single number criteria considered above (15 dB at any test frequency or 20 dB at any test frequency) as well as the different level for different frequency NIOSH definition, a testing error at any frequency would trigger the prescribed follow-up procedures regardless of how improbable the results appeared to be.[39] Even where a very lenient criteria such as 20 dB is used, the flaws of this method are apparent: the criteria itself is not sufficiently protective and the defined change at any single frequency can trigger follow-up procedures. This is not necessarily a theoretical problem. The American Council of Otolaryngology—Head and Neck Surgery (ACO) and the American Academy of Otolaryngology (AAO) reported that in a study of 280 aluminum and chemical workers, 19.6% of the test population had shifts of 20 dB or more, whereas nearly that many (16.15%) had changes toward better hearing (negative shifts) of 20 dB or more (Exh. 327–151 and Exh. 327–157, p. 13). The ACO concludes that this problem is due to the

[39] Audiograms showing large shifts at only one frequency might be considered questionable.

use of an STS definition that specifies "any frequency, either ear," and recommends that the definition of STS adopted require that hearing levels be averaged over several frequencies to avoid this problem (Exh. 327–151, pp. 12–14).

In addition, a number of commenters have testified that averaging shifts over adjacent frequencies minimizes normal test error (Exh. 327–150, pp. 1–2; Exh. 327–151, p. 10; Exh. 327–152, p. 10; Exh. 376A, p. 4). Acoustician W. Dixon Ward, on behalf of the American Iron and Steel Institute, argued "Any multiple frequency criterion has an advantage over a single frequency criterion because random errors will tend to cancel each other" (Tr. Vol. III, p. 225, March 25, 1982). The ACO–AAO reported that, even under clinical conditions, the probability of exceeding a testing error of 10 dB [30] at a single frequency could be as great as 56%, assuming that the measurement of all audiometric frequencies varied independently (Exh. 327–151 and 152, p. 10).[31] Test-retest variability would probably be even greater in industrial settings.

Dr. R. A. Dobie suggested using the following criteria for STS: a change for the worse of 10 dB or more in the pure-tone average at either 500, 1000, and 2000 Hz or at 3000, 4000 and 6000 Hz, in either ear (Exh. 327–152, p. 11). Using this definition, the technician takes 12 measurements (six frequencies, two ears), after which the average shift for the lower three frequencies (500, 1000, and 2000 Hz) is calculated, followed by the average shift for the three upper frequencies (3000, 4000, and 6000 Hz). If an average shift of 10 dB or more is detected for either the upper or the lower group of frequencies, the audiogram is deemed to demonstrate STS.

This definition appears to be protective and has several other advantages as well. According to Dr. Dobie, this STS definition is sensitive both to early noise-induced hearing loss and the later, more severe losses, as well as to other otologic conditions (Exh. 378, p. 1). In addition, the definition employs an averaging technique, which discourages false positive identifications and reduces the degree of testing error commonly associated with the use of a single level at any frequency definition.

On the other hand, this definition appears to have been articulated only recently and has been tested on only one industrial population in one study. Because relatively little information on Dr. Dobie's investigation has been submitted to the record, it is difficult to compare his results with those of the Roysters or other investigators. Moreover, the definition is relatively complicated, requiring a number of computations and comparisons and it may be difficult for people to understand and use. OSHA believes that any formula that is difficult may contribute to technician error and may ultimately result in a less effective hearing conservation program (cf Exh. 327–66, pp. 51–54). While one group, the American Academy of Otolaryngology and the American Council of Otolaryngology (AAO–ACO) has endorsed the definition, it is generally unknown to professionals involved in industrial hearing conservation and untried by professionals in the hearing conservation community. In view of these shortcomings and the fact that another acceptable definition of STS exists (see discussion below), OSHA has decided not to adopt this definition.[32]

OSHA has decided to adopt the following definition of STS: an average shift of 10 dB or more at 2000, 3000 and 4000 Hz relative to the baseline audiogram in either ear. This definition is similar to the definition originally proposed in 1974 (see 39 FR at 37775, October 24, 1974) [33] and meets all the criteria for an appropriate definition of STS. The formula is sensitive enough to give an early indication of noise-induced hearing loss because of the frequencies used. The importance of using 4000 Hz, which is generally considered to be one of the frequencies which is affected by noise earliest and most severely (see 46 FR at 4085), is clear. The hearing threshold level at 3,000 Hz tends to follow the level at 4,000 Hz fairly closely (46 FR 4088; Exh. 17, p. 12; Exh. 12, Appendix 10; and Exh. 327–94, p. 7) and is also severely affected by noise damage. Hearing loss at the 2,000 Hz frequency usually begins after the higher frequencies have been affected; because of this phenomenon, the 2,000 Hz frequency is an indicator of additional hearing loss in employees who have already lost some hearing. As noted previously (46 FR 4082), the 2,000 and 3,000 Hz frequencies are very important for the understanding of speech, and should therefore be included in any definition of threshold shift that will trigger follow-up procedures.

The OSHA STS definition is sufficiently restrictive to locate meaningful shifts in hearing yet not so stringent that it will result in the implementation of unnecessary follow-up procedures for numerous employees. In addition, the OSHA definition requires averaging hearing levels at adjacent frequencies which reduces the effect of testing errors at single frequencies (Tr. Vol. V. pp. 24–25, March 29, 1982).

The OSHA definition has a number of additional advantages. As noted above, many commenters urged OSHA to adopt a simple formula and praised the simplicity of the 2,000 and 3,000 and 4,000 Hz average criterion (Exh. 376A, p. 4; Exh. 327–13, p. 3; Tr. Vol. I–B, pp. 192 and 198, March 23, 1982; Exh. 349–1, p. 11; Exh. 327–142, p. 5).

Further, the average shift of 10 dB at 2,000, 3,000, and 4,000 Hz definition has been "field tested" by industrial audiologists and many industry groups (Exh. 376A, p. 3; Exh. 327–105, p. 6; Exh. 327–138, p. 6), and it has also been systematically compared to other STS formulas. In a large study of military and civilian Air Force employees, a number of definitions were tested and the 2,000, 3,000, and 4,000 Hz criterion identified a reasonable number of STS cases compared to the number tagged by other definitions (Exh. 329–50C, Tables 2–4). In addition, the Royster study was essentially favorable to the definition of STS which OSHA is adopting. The Royster study found that an STS of 10 dB or greater average at 2,000, 3,000, and 4,000 Hz produced the lowest annual percentage of unnecessary identifications of the various definitions evaluated. In addition, the Roysters found that the OSHA definition *appropriately* identified a higher

---

[30] The January amendment states that the range of audiometric error is ±5 dB. This value, that is ±5 dB, reflects the precision and accuracy of the audiometric instrumentation. Variability in audiograms also result from test subject response and slight procedural changes from one test to the next, which increases the variability greater than ±5 dB. OSHA recognizes that false positives are caused by this variability as well as real, but temporary, changes in hearing levels (generally referred to as a temporary threshold shift).

[31] Dr. Ward cited a study by Berger, Royster and Thomas (Exh. 266A) in which the use of the 2,000, 3,000 and 4,000 Hz criterion rather than the single-number 20 dB criterion reduced the percentages of workers whom he judged "incorrectly" identified as having STS by more than half (Tr. Vol. III, p. 225, March 25, 1982).

[32] Several commenters have noted (Exh. 331–40; pp. 4–5; Exh. 327–66 pp. 60–66) that the 6000 Hz frequency is particularly susceptible to test variability. OSHA believes that averaging hearing levels at 3000 Hz, 4000 Hz and 6000 Hz in this definition will reduce the impact of the 6000 Hz test variability, but does not know the magnitude of the effect. This issue was not addressed at the hearing. OSHA believes that adopting an STS definition that contains the 6000 Hz frequency involves unnecessary speculation regarding the number of resulting false positives.

[33] In 1974 OSHA proposed that STS should be defined as an average shift of more than 10 dB at 2000, 3000 and 4000 Hz in either ear, relative to the baseline audiogram.

percentage of employees suffering STS than most of the other definitions studied (Exh. 368, pp. 61–62).[34] Because of its concentration on the frequencies that are the earliest or the most severely affected by noise, the resulting high degree of appropriate identifications for follow-up and the simplicity of the definition, OSHA believes that the definition of STS which it is adopting today will contribute more to the effectiveness of hearing conservation programs than any other definition considered.

The definition that OSHA has decided to adopt, that is, an average change in hearing level of 10 dB or greater at 2,000, 3,000, and 4,000 Hz is a slight change from the STS definition proposed in 1974 which included average shifts *greater than* 10 dB at these same frequencies. This change is in recognition of the fact that the definition as originally proposed was not sufficiently protective of employee hearing in all circumstances. (See, e.g. Exh. 9, pp. 37, 41, 51; Exh. 5, p. 43802; Exh. 51, pp. 10–11; Exh. 80, p. 2; Exh. 82, attach. 1, p. 2). There are some instances where large shifts in hearing level could occur in the highest test frequencies (4,000 and 6,000 Hz), with little or no change in hearing level occurring in the middle frequencies. While shifts of this magnitude are not common, they may occur in noise-sensitive individuals especially in the early stages of noise-induced hearing loss. Under the 1974 proposed definition, individuals suffering shifts as large as 30 dB at 4,000 Hz would not be identified provided that hearing thresholds at the lower frequencies had not shifted. Such individuals should be identified so that protective action can be taken. The change in the STS definition will allow for earlier identification of individuals at risk and earlier intervention in the process of hearing deterioration for these individuals.[35]

In addition to the fact that the OSHA STS criteria is more protective than that originally proposed, this change will clarify the Agency's intention and will help avoid some of the confusion suffered in the past between self-recording and manual audiometers (see 46 FR 42628, 42629, August 21, 1981).

The definition of STS contained in the January amendment is being revoked. Further evaluation of the record has convinced the Agency that the original definition was too complex to be workable especially in view of the extremely diverse workplaces and working populations covered by the amendment.

While some may feel that even the changed definition is not protective enough because under certain circumstances a shift of up to 25 dB could go untreated, OSHA believes that the definition of STS which it is adopting is as protective of the general population as the January, 1981 STS definition which was subject to the same flaws as all single frequency definitions. The ACO-AAO has labeled the single frequency criteria "equally vulnerable" and noted that:

> "If set at practical levels, e.g., 20 dB, they allow [to go undetected] broad shifts—up to 15 dB for the entire audiogram—which * * * are more common than isolated large shifts and are more significant both medically and in terms of communication handicap" Exh. 327–151, p. 14; Exh. 327–152, p. 14).

In many ways the new definition is a better definition than the original STS definition; it provides the necessary protection but is more cost effective in that is reduces the number of false positive identifications. Therefore, in view of all of the relevant factors, the new OSHA definition of STS is the most appropriate and consistent with the purposes of the hearing conservation amendment.

The standard requires that audiograms include as a minimum measurements taken at 500, 1000, 2000, 3000, 4000 and 6000 Hz. while the STS criterion only uses the 2000, 3000, and 4000 Hz frequencies, OSHA believes that requiring the measuring of these other frequencies adds other benefits justifying its inclusion in the standard. Testing at all frequencies is important to have a complete record of the employee's hearing ability and may be invaluable to the audiologist or physician upon referral.

Failure to do so might mean that medical problems that could easily be treated might be ignored.[36] OSHA believes that testing these frequencies constitutes good industrial hygiene and medical practice. Moreover, testing at frequencies other than those specified in the STS criteria will impose minimal burden the employer.

Aging

OSHA has also decided, after careful consideration of the data in the record, to permit employers to interpret audiograms using a presbycusis or aging correction before determining whether an STS has occurred. Many commenters (Exh. 327–106; Exh. 327–105; Exh. 327–103; Exh. 327–100; Exh. 327–101; Exh. 327–94; Exh. 327–147) urged the Agency to allow presbycusis correction factors to be used. A substantial number of comments recommended the use of an age correction, many stating that hearing loss can occur from aging, non-occupational noise, and other factors, and such hearing loss should not be considered part of a significant threshold shift within the context of the OSHA standard (Exh. 14–110, p. 2; Exh. 14–150, p. 2; Exh. 14–160, p. 2; Exh. 14–188, p. 1; Exh. 14–200, p. 1; Exh. 14–215, p. 3; Exh. 14–248, p. 3.

The NIOSH criteria document (Exh. 1, pp. 1–14 to 1–17, III–6) recommended adjusting the baseline audiogram for hearing loss that occurs naturally due to the aging process. The adjusted baseline could then be subtracted from the most recent annual audiogram in order to determine whether or not an STS had occurred. If employers wish to correct for aging, the amendment directs them to make the adjustment to the annual audiogram rather than to the baseline, so that the baseline will not be changed by mistake. The NIOSH presbycusis values are similar to those of other well known presbycusis data bases. Although there may be slight variations at individual frequencies, the NIOSH values are generally consistent with other presbycusis data such as the U.S. Public Health Service data, and those used by Robinson and Burns, and by Passchier-Vermeer (found in "Derivation of Presbycusis and Noise Induced Permanent Threshold Shift (NIPTS) To Be Used for the Basis of a Standard on the Effects of Noise on Hearing", (Exh. 310, p. 31)). When applying an age correction, the most recent audiogram is corrected according to the procedures outlined in Appendix F. In the appendix, OSHA has adopted the procedures and the age correction tables used by NIOSH in the criteria document (Exh. 1, pp. 1–14 to 1–17).

OSHA believes that these correction factors will aid in distinguishing between occupationally induced and age-induced hearing loss. This is particularly important because the pattern of hearing loss due to aging closely resembles that of noise-induced hearing loss. Therefore, although the Agency agrees with D. C. Gasaway that

---

[34] The only criteria that fared better was 15 dB twice.

[35] In addition, it should be noted that both the Air Force and the Royesters used the OSHA definition rather than the proposed criteria to analyze their data (Exh. 339–30B, Exh. 339–50C; Exh. 368). Therefore the change is consistent with the findings of these studies.

[36] Further, some employers may choose to use the American Academy of Otolaryngology's otologic referral definition, in addition to this standard's definition of STS , to provide employee protection against medically caused hearing loss. Since the amendment still requires testing at all the usual test frequencies, employers will have little difficulty applying this definition.

requiring the use of a correction factor may complicate calculation procedures (Exh. 327–067, pp. 66–67) and cause some errors, we believe that professional supervision of the hearing conservation program will ensure that audiometric technicians understand how to use the age-correction chart, included in Appendix F of this revised amendment. Further, since the use of presbycusis factors is discretionary, employers are free to use OSHA's STS criterion without a correction for the effects of age. The Agency believes that allowing the consideration of the contribution of aging to hearing loss is both reasonable and appropriate and will allow the employer to discern how well the hearing conservation program is working by determining the amount of hearing loss attributable primarily to aging. Therefore, the stay on Appendix F is being lifted.

Determination of Work Relatedness

The January amendment required that the professional reviewing employee audiograms determine whether any significant threshold shifts detected were caused by occupational noise exposure. The preamble explained that under most circumstances the professional supervising the hearing conservation program would refer the employee for medical evaluation to ascertain whether the hearing loss was work related, unless the employer was willing to record the hearing loss as such on the OSHA Form 200, Log of Occupational Illnesses and Injuries (see 46 FR 4146). the preamble stated that in most cases, occupational hearing loss constituted the major component of a worker's hearing loss, because the average person generally spends more time at work than in recreational activities that may also cause hearing loss, such as hunting.

The August document continued the administrative stay on this requirement pending review of the many comments objecting to this provision. Commenters stated that in some cases it is very difficult, even for an audiologist or otolaryngologist, to determine the cause, or work relatedness, of a significant threshold shift because of the similarity between an occupational and nonoccupational audiometric hearing loss configuration on the audiogram (Exh. 325–130; Exh. 325–239; Exh. 325–248; Exh. 325–96). Specifically, the Agency stayed the paragraphs requiring determination of the work-relatedness or cause of a significant threshold shift, and the paragraph requiring employers to record the existence of a significant threshold shift on the OSHA Form 200 when the professional reviewer determines that the shift is work related. OSHA asked for comments and information regarding the necessity of determining the cause of a significant threshold shift to protect a worker's hearing and on methods for distinguishing between occupational and non-occupational hearing loss.

A number of participants claimed that this requirement would not offer additional protection to workers and that determining causality is irrelevant to the effectiveness of the hearing conservation program (Exh. 327–79, p. 2; Exh. 327–90, pp. 4–5; Exh. 327–104, p. 13, Exh. 327–120, p. 3).

"In any case, it is not necessary to determine the cause of a significant threshold shift in order to take the necessary steps to protect a worker's hearing. When significant hearing loss is discovered, regardless of the source, the employee should be informed and counseled regarding the effects of noisy activities both on and off the job. Ear protectors should be fitted and the employee trained in their use and care. If ear protectors are currently in use, they should be checked for fit and attenuation" (Exh. 327–108, p. 9).

Others agreed with this position (Exh. 327–141, p. 4; Tr. Vol. II, p. 109, March 24, 1982; Exh. 327–143, p. 5).

OSHA does not regard the determination of STS causality as central to the effectiveness of the hearing conservation program. STS is a means of identifying a change in hearing that triggers certain follow-up actions to prevent further change. Once STS is found, the same actions are required, whether or not the STS is work related. The determination of causality, therefore, does not enhance hearing protection as far as the hearing conservation program is concerned. (See generally the discussion of this issue in 46 FR 4146.) Therefore, the requirement to determine the causality of the STS is being revoked. In addition, OSHA has determined that the paragraph directing employers to record STS's on the OSHA Form 200 is unnecessary. Employers are already required pursuant to 29 CFR 1904.2 to record work related injuries and illnesses on the OSHA Form 200. Since this reiteration of the employer's obligation is duplicative, the requirement as stated in the hearing conservation amendment is hereby revoked.

Retest Audiogram

The January amendment required employers to provide employees with a retest audiogram within 60 days if the annual audiogram showed that the employee had a significant threshold shift (STS). The preamble explained that the purpose of the retest was to determine whether the significant threshold shift was permanent (46 FR 4144). In August, the stay of the retest requirement was continued in response to comments concerned with the difficulty of determining the permanency of an STS (Exh. 325–57, p. 26). In addition, many persons objected to the shortness of the time period for the retest, asserting that the definition of STS contained in the January amendment resulted in many persons being falsely identified as having an STS, thereby requiring more retesting than necessary (Exh. 325–48, p. 4; Exh. 325–57, p. 2). Moreover, it was claimed that retesting was burdensome for those employers using the services of a mobile test van (Exh. 325–130, p. 2).

OSHA also requested information on whether retesting within a short period of time to confirm the presence of a STS was necessary to protect employee hearing and, if retesting was necessary, whether it was appropriate to require retesting within 60 days. OSHA received many comments in response to this request for information. Several commenters stated that a retest audiogram and the interval to perform any retest audiogram should be left to the discretion of the professional supervising the hearing conservation program and should not be firmly fixed by the standard (Exh. 327–101, p. 6; Exh. 327–154, p. 6; Exh. 327–141, p. 4; Exh. 329–22, p. 5; Exh. 328–15, p. 7; Exh. 327–20, p. 5; Exh. 327–121, p. 3; Exh. 327–98, p. 14). Dr. S. White of the American Speech-Language-Hearing Association explained that he favored this more flexible approach because it was not possible to determine whether the STS was permanent on the basis of a test performed in an industrial setting by a technician. According to Dr. White, such a determination could only be made after a diagnostic evaluation had been performed in a clinical setting. For these reasons, Dr. White recommended that professionals in charge of the program be allowed to decide, on a case-by-case basis, whether a retest or referral was appropriate (Exh. 327–154, p. 6; Tr. Vol. IV, p. 46, March 26, 1982).

Richard Crewdson [Industrial Health, Inc.] also observed that:

"* * * the majority of shifts found in this way are artifacts * * * caused by the normal inaccuracies inherent in audiometric testing * * * the supervisor [should] determine the necessity to retest" (Exh. 327–83, p. 3).

Other commenters claimed that it was not necessary to perform a retest or to determine whether an STS is permanent since simply identifying an STS triggers protective action (Exh. 327–26; Exh. 327–61; Exh. 327–62). In addition, the costs

and complications of scheduling retest audiograms, especially for employers who contract their audiometric work out to mobile van services or whose firms are located in remote areas, were emphasized by several commenters (Exh. 327–146, pp. 5–6; Exh. 327–120, p. 3; Exh. 329–22, pp. 4–5).

Despite these considerations, however, representatives of several companies reported they would perform a retest audiogram after an STS was identified even if such a requirement was not mandatory. In fact, J. Stenmark of the American Iron and Steel Institute asserted that employers will usually elect to retest because in many cases the shift will be caused by subjective problems or testing artifacts (Exh. 327–105, p. 5). Dr. McCurdy of the American Council of Otolaryngology thought that retesting would reduce the costs of the hearing conservation program by eliminating the need for further preventive action if the retest showed that the shift was not persistent (Exh. 327–151, p. 7). In a similar vein, a number of commenters suggested that retesting reduces the number of unnecessary referrals (Exh. 327–57, p. 2; Exh. 329–8, p. 2; Exh. 327–12, p. 3; Exh. 327–135, p. 5; Exh. 329–14, p. 6; Exh. 327–68, p. 5; Exh. 326–21, p. 3; Exh. 327–66, pp. 34–43). Richard Boggs of Organization Resources Counselors and H. M. Williams of the American Telephone and Telegraph Company also believed that most employers would wish to retest to avoid unnecessary referral fees (Exh. 327–96, p. 14; Exh. 327–89, p. 5).

Several participants indicated that although they felt a retest was necessary, OSHA should allow employers more time to conduct retests, especially if mobile van test services were used (Exh. 327–20; Exh. 327–84A). A few commenters suggested that the retest interval, rather than the decision to retest, should be determined by the professional supervising the program, and others recommended that a flexible time period be permitted for employers using mobile vans to obtain retest audiograms (Exh. 327–139, p. 7; Exh. 327–136, p. 5; Exh. 327–142, p. 4; Exh. 327–140, p. 4; Exh. 327–106, p. 5; Exh. 327–103, p. 5; Exh. 327–80, p. 5; Exh. 327–91, p. 27).

After careful consideration of the evidence in the record, OSHA has concluded that it is not necessary to require employers to conduct retest audiograms. Deleting the retest requirements from the hearing conservation amendment would not in any way diminish employee protection. However, a number of participants indicated that they wished to conduct retest audiograms to validate the results of earlier audiograms showing STS and did not wish to implement follow-up procedures until this had been accomplished. The stay of the retest provisions had the effect of disallowing this approach in many cases because of time constraints. OSHA has decided to amend the retest provisions to allow but not require a retest within 30 days where the annual audiogram shows that an employee has suffered a standard threshold shift. An employer wishing to retest under these conditions may consider the retest audiogram as the annual audiogram. Therefore, if a valid retest audiogram does not show that the employee has suffered a STS, no follow-up procedures need be implemented. This change will permit employers and the professionals who direct their hearing conservation programs to decide, on a case-by-case basis, whether a retest audiogram is necessary or desirable.

In response to comments received after publication of the January amendment, the stay of the word "permanent" before the phrase "significant threshold shift" in the follow-up procedures section of the audiometric testing provisions was continued in the August document.[37] Some commenters have argued that making the distinction between permanent and temporary threshold shifts is irrelevant in relation to a hearing conservation program in that the employer should provide protection as soon as *any* STS is discovered. (Tr. Vol. I–B, pp. 212–213, March 23, 1982; Tr. Vol. II, pp. 108–109, March 24, 1982). This would be true of course in the absence of a retest. OSHA believes that labeling the STS as permanent is not important in this context and may even be misleading. The term "permanent" implies that shifts identified on successive audiograms are *never* subsequently determined to be temporary. There is ample evidence in the record to indicate the variability of audiometric test results (Exh. 327–12, p. 3; 327–19, p. 2), and thus the artifactual nature of many threshold shifts. The word "permanent" as it relates to the term "STS" has therefore been deleted. Accordingly, an STS subsequently confirmed by another audiogram is termed "persistent" rather than "permanent" in the revised amendment.

Follow-up Procedures

The January amendment permitted employees initially identified as having STS to discontinue the wearing of hearing protectors if retesting showed that the STS was not permanent, unless such employees were required to wear hearing protectors anyway because they were exposed over the permissible exposure level, a TWA of 90 dB. Since the retest requirement of the January amendment has been revoked, the language of the paragraph [38] has been amended to be consistent with these revisions, and the provision now reads "subsequent tests" rather than "retesting." The provision would not permit employees exposed to an 8-hour TWA of less than 90 dB to discontinue the use of hearing protectors "if *subsequent audiometric testing* of an employee * * * indicates that the standard threshold shift is not *persistent* * * * *" (emphasis added).

Revised Baseline Audiograms.

The January amendment [39] required revision of the baseline audiogram when a subsequent audiogram revealed an improved hearing threshold at two or more test frequencies with respect to the baseline audiogram or when a subsequent audiogram revealed a permanent significant threshold shift. In either case, the baseline was revised by substituting the annual or retest audiogram for the original baseline audiogram. In the case of an improved hearing threshold, the preamble explained that the revised baseline would more closely resemble the employee's actual non-noise exposed baseline. Revising the baseline after an STS had been identified would prevent the same STS from being identified repeatedly for the same employee.

After publication of the January amendment, the Agency received requests for clarification of the amount of improvement in thresholds needed to

---

[37] As originally promulgated, paragraph (j)(8)(iv)(*a*) and (*b*) read:

(iv) If a significant threshold shift has been determined to be *permanent* on the basis of a retest audiogram or an annual audiogram conducted after 14 hours without exposure to workplace noise, the employer shall:

(*a*) Inform the employee in writing, within 21 days of the determination, of the existence of a *permanent* significant threshold shift;

(*b*) Refer the employee for a clinical audiological evaluation or an otological examination, as appropriate, if additional testing is necessary to determine the cause of the *permanent* significant threshold shift, or if the employer suspects that a medical pathology of the ear (as defined in Appendix I) is caused or aggravated by the wearing of hearing protectors. [Italics added]

[38] As originally promulgated, paragraph (j)(8)(iii) read: If *retesting* of an employee reveals that the significant threshold shift is not *permanent*, the use of hearing protectors by that employee may be discontinued, unless the employee is required to wear hearing protectors pursuant to paragraph (b)(1) of this secton. [Italics added]

[39] 29 CFR 1910.95(j)(9) (i) and (ii), 46 FR at 4163.

trigger a revision of the baseline and methods of handling the situation in which an annual audiogram shows improvement at some frequencies and losses at others. To consider these comments, the Agency continued to stay on this requirement in the August **Federal Register** document.

OSHA received a variety of comments and opinions on revising the baseline following the continuation of the interim stay. Many comments supported the January amendment's requirement to revise baselines when improved thresholds or an STS occurs (Exh. 329–14, p. 6; Exh. 327–154, p. 6; Exh. 327–142, p. 4; Exh. 327–139, p. 7; Exh. 327–138, p. 5; Exh. 327–119, p. 3; Exh. 327–105, p. 6; Exh. 327–101, p. 6; Exh. 327–102, p. 10; Exh. 327–103, p. 6; Exh. 327–98, p. 14; Exh. 327–94, p. 8; Exh. 327–89, p. 6; Exh. 327–53, p. 2; Exh. 329–21, p. 3; Exh. 327–84, p. 27). These commenters stated that if the baseline were not allowed to be revised when an STS occurs, the employee would be classified as having an STS on each subsequent audiogram, and the employer would repeatedly be required to institute follow-up measures. Dr. S. White of the American Speech-Language-Hearing Association maintained that baseline revision is essential for accurate audiogram comparison. He recommended that the original baseline be revised after a significant threshold shift when two successive annual tests confirm a change in hearing, either for better or worse (Exh. 327–154, p. 6). Other commenters also supported revising the baseline but favored different criteria for determining an improved hearing threshold (Exh. 327–119, p. 3; Exh. 327–115, p. 3; Exh. 327–105, p. 6; Exh. 327–102, p. 10; Exh. 327–98, p. 14; Exh. 327–35, p. 4; Exh. 327–29, p. 2; Exh. 327–84, p. 25; Exh. 327–142, p. 4; Exh. 327–139, p. 7; Exh. 327–138, p. 5). For example, some participants defined improvements as a shift for the better of 10 dB or more beyond any test-retest error. J. Morrill of Impact Hearing Conservation, Inc., believed that revising the baseline when STS occurs is only appropriate if a sliding scale STS criteria, such as that included in the January amendment, is used (Exh. 327–35, p. 4).

J. Shampan of Impact Hearing Conservation, Inc., reported at the OSHA hearing that his company intends to retest before revising the baseline to eliminate the problem of revising the baseline on the basis of a temporary threshold shift (Tr. Vol. V, p. 52, March 29, 1982). Other commenters supported revising the baseline only on the basis of a confirmed STS or a permanent threshold shift, implying that the baseline should not be revised if a retest audiogram had not been performed (Exh. 327–98, p. 14; Exh. 327–103, p. 6; Exh. 327–139, p. 7).

Some commenters advocated revising baselines only when subsequent audiograms showed improved thresholds (Exh. 327–135, p. 6; Exh. 327–95, p. 8). Dr. W. G. Thomas of the North Carolina Memorial Hospital stated that employee hearing thresholds could improve by as much as 20 to 40 dB after the initiation of a hearing conservation program. Dr. Thomas stressed the importance of revising the baseline to reflect such an improved threshold because otherwise the initial baseline would be contaminated by temporary threshold shift, which would render any comparison of audiograms meaningless (Exh. 329–26, p. 2). D. C. Gasaway, a hearing conservation specialist, discussed the results of an Air Force study which had led him to conclude that:

> "* * * negative [improved] threshold values greater than 10 dB (i.e., 15 dB or more) at 500 Hz and/or 6000 Hz should be used to require re-establishment of reference audiograms and/or negative differences of 10 dB or more at 1000 through 4000 Hz. This approach would be simplified further if only the differences (negative) at only 1000 through 4000 Hz, either ear, were used. If adopted, then negative values of threshold shift would * * * [be] equal to, or exceeding, 10 dB at two or more frequencies between 1000 and 4000 Hz, either ear. Under these conditions the reference audiogram should be re-established. Of course, the re-established reference should be accomplished only after the individual has been free from noise a minimum period of time * * *" (Exh. 327–66, pp. 46–47).

Other commenters stated that the baseline should be revised only when a significant threshold shift occurs and not when an improvement in hearing has occurred. These participants believed that revising the baseline when hearing improved would cause confusion, and require the use of a computer to track employee baselines (Exh. 329–18, pp. 6–7; Exh. 329–16, pp. 7–8).

Two commenters suggested that OSHA should require revised baselines for audiograms showing STS, but that a professional should decide whether to revise them after an improvement in hearing had occurred. D. McCurdy of the American Council of Otolaryngology explained that after a permanent significant threshold shift occurs it is no longer suitable to compare subsequent audiograms to the initial baseline since even if no further change occurred the reviewer would repeatedly identify the same shift. However, with regard to improved thresholds, he felt that the decision to revise the baseline should be left to the discretion of the supervising professional since many variables, such as results of otologic referral, instrument calibration, and the test environment, must be considered. Dr. McCurdy also criticized the criterion for improved thresholds in the January amendment because he felt that a majority of audiograms would meet this criterion without showing a consistent change in hearing across different frequencies (Exh. 327–151, pp. 8–9). Dr. S. White of the American Speech-Language-Hearing Association also recommended that the professional determine the revision criteria for improved thresholds (Tr. Vol. IV, p. 72, March 26, 1982).

A number of other commenters also believed that the professional should be the one to decide whether it is necessary to revise the baseline either for STS or improved thresholds (Exh. 329–22, p. 5; Exh. 329–15, p. 6; Exh. 327–143, p. 6; Exh. 327–91, p. 29; Exh. 327–76, p. 10; Exh. 327–20, p. 5).

A few commenters objected to permitting any revision of the baseline at all (Exh. 327–120, p. 3; Exh. 327–108, p. 9; Exh. 327–106, p. 5; Exh. 327–71, p. 3; Exh. 327–69, p. 7; Tr. Vol. I–B, p. 244, March 23, 1982). Many felt that revisions will lead to confusion and tampering with audiometric records, and will not contribute to the overall hearing conservation program (Exh. 327–120, p. 3; Exh. 327–108). Some reasoned that the annual audiogram should be compared to the baseline as well as to any subsequent audiogram rather than revising the baseline (Exh. 327–71, p. 3) and another commenter recommended that noting the date of the change would be sufficent (Exh. 327–69, p. 7).

In light of the evidence in the record, OSHA has decided that an annual audiogram may be substituted for the baseline audiogram if the professional supervising the program determines that the employee has experienced a persistent STS or has shown a significant improvement in hearing acuity. The Agency agrees with the view expressed by Robert Connelly, an industrial audiologist with Audiometric Associates:

> "Revising the baseline test would provide an effective means of monitoring hearing levels over time" (Exh. 327–119, p. 3).

In addition, OSHA agrees with Dr. McCurdy of the American Council of Otolaryngology (Exh. 327–151) and Richard Klinzing of the American Paper Institute (Exh. 329–22, p. 6), among others, that the professional supervising the employer's hearing conservation program can best determine when an annual audiogram should be substituted

for the baseline audiogram. For these reasons, the mandatory requirements in the January amendment concerning revision of the baseline audiogram have been restated in non-mandatory performance language. In addition, it should be noted that all audiograms must be retained for the length of employment of the affected employee. This revision of the provisions concerning revised baseline audiograms does not in any way permit the destruction of any original baseline audiograms.

Microprocessor Audiometers

The January amendment required audiometric tests to be conducted with equipment meeting the specifications of the American National Standard Specification for Audiometers, S3.6–1969. The preamble to the August **Federal Register** document (46 FR 42628) noted that although microprocessor audiometers were not specifically mentioned as acceptable instruments, they were allowed by the amendment if they meet the requirements of ANSI 3.6–1969. In August OSHA indicated it was considering adding language to the amendment explicitly permitting the use of this equipment. Two commenters, D. E. Rapp of Dow Chemical (Exh. 327–76) and H. T. Buelter of the American Center for Occupational Health (Exh. 329–05), requested that the Agency specifically permit the use of microprocessor audiometers in the revised amendment. OSHA agrees with these suggestions and is adding clarifying language to the provisions describing acceptable audiometric measuring instruments.

Background Levels in Audiometric Test Rooms

The January amendment required that, within two years, audiometric testing must be conducted in test rooms meeting the background sound pressure level specifications of Table D–1 in Appendix D. In the January amendment, Table D–1's specifications were essentially those of the American National Standard Institute's (ANSI) S3.1–1977 standard, except that the background sound pressure levels permitted at 500 Hz (27 dB) were higher than those of the ANSI standard (21.5 dB).

OSHA relaxed ANSI's requirement for a background sound pressure level of 21.5 dB at 500 Hz to 27 dB in response to data suggesting that this level could not be met at 500 Hz in industrial settings and that audiometric precision was not as important at 500 Hz as at other frequencies (see 46 FR 4148–4149). After publication of the January amendment, OSHA received comments stating that the sound pressure levels in Table D–1 are not necessary and are not feasible for industrial audiometric testing programs. For example, some comments indicated that double-walled rooms would have to be used to meet the permissible background sound pressure levels (46 FR at 42628). The stay of the requirement that employers meet the specifications of Table D–1 was continued in August 1981. In the interim, employers conducting audiometric examinations have been required to meet the less stringent background sound pressure level specifications of Table D–2.

Many comments submitted since the August publication have addressed the issue of whether Table D–1 or Table D–2 is the most appropriate for industrial audiometric testing. Background sound levels required by Table D–1 are essentially the same as those specified in the ANSI S3.1–1977 standards, while Table D–2 was adopted directly from the older ANSI S3.1–1960 standard.

There is widespread agreement that the audiometric testing requirements of this amendment describe "industrial audiometry" rather than "clinical audiometry." Industrial audiometry consists of obtaining actual air conduction thresholds at specified frequencies. Paragraph (h)(1) of the amendment requires, in part, that audiometric test examinations consist of pure tone, air conduction thresholds, with test frequencies including as a minimum 500, 1000, 2000, 3000, 4000 and 6000 Hz. Clinical audiometry, however, is comprehensive, and includes, as a minimum, air and bone conduction threshold measurements at each frequency for the purpose of diagnosis and rehabilitation. Since this amendment does not require audiological diagnosis but rather only requires employee referral for a clinical audiological evaluation or an otological examination, under certain special circumstances, the audiometric test program is not considered a clinical program. Richard L. Stepkin, an industrial audiologist and President of Enviromed Corporation, best describes the difference between clincial and industrial audiometric testing:

> "The best criteria for establishing differences between clinical and industrial audiometric test programs are by the types of tests performed. Industrial audiometric evaluations require only an air conducted threshold and nothing more. Clinical audiometry includes anything and everything beyond this process.
>
> It should be noted that industrial audiometric threshold testing is not to be confused with "screening" programs. A screening procedure is where the test is presented at one intensity level and it is an all or none response. Audiometric threshold testing requires the identification of threshold at the selective frequencies, as should be [done] in industry" (Exh. 327–56 p. 7).

Commenters who favored Table D–1 essentially paraphrased the rationale given in the January 16, 1981, preamble (46 FR 4148): background sound pressure levels in audiometric test rooms must be quiet enough to permit accurate threshold measurements (Exh. 327–62, p. 7; Exh. 327–137 B, p. 1; Exh. 331–17, p. 14; Exh. 376 A, p. 2; Tr. Vol. IV, pp. 143, 211, March 26, 1982; Tr. Vol. V, p. 22, March 29, 1982).

Dr. Francis I. Catlin [American Academy of Otolaryngology—Head and Neck Surgery] emphasized the Academy's concern. He asserted that the background sound pressure levels permitted by Table D–2 would result in a loss of ability to identify early hearing losses from hazardous noise exposures. At these levels, the hearing test program would only identify problems after employees have experienced significant hearing loss close to that of material impairment, or when the noise levels were high enough to produce temporary threshold shifts of more than 25 dB (Exh. 327–152, p. 19).

An overwhelming number of commenters recommended the use of Table D–2 rather than Table D–1, contending that Table D–2 is adequate for determining STS and for obtaining valid measurements (Exh. 327–112, p. 14; Exh. 327–122, p. 7; Exh. 327–149, p. 6; Exh. 329–17, p. 4). James T. McCallum, Corporation Audiologist at the Reynolds Metal Company and others asserted that the more stringent sound pressure levels of Table D–1 are necessary in a clinical setting for diagnostic purposes. (Tr. Vol. I–B, p. 264, March 23, 1982; Exh. 326–34, p. 3; Exh. 327–61, p. 4; Exh. 327–84, p. 32; Exh. 327–56, p. 7; Exh. 327–91, p. 36; Exh. 327–103, p. 7; Exh. 327–114, p. 26; Exh. 327–139, p. 6; Exh. 329–11, p. 4; Tr. Vol. I–B, p. 194, March 23, 1982). However, an industrial audiometric testing program which is intended merely for identification of persons susceptible to noise does not require such rigorous levels. Dr. S. White of the American Speech-Language-Hearing Association stated the following:

> Concerning the appendix to the audiometric test rooms, there is an express purpose for the allowable octave band sound pressure levels as recommended by the American National Standard for Permissible Ambient Noise during Audiometric Testing or ANSI S3.1 1977. That purpose is to ensure ability to achieve hearing threshold levels to zero decibels. These are the background levels required for hearing research and

accurate diagnostic measurement of absolute thresholds of people with normal hearing. A monitoring program does not need such rigorous levels.

Authorities cite a range of normal hearing and the levels presently permitted by OSHA as indicated in Table D–2 would allow measurement of hearing to well within the range of 0 to 25 decibels during threshold levels. Table D–1 levels should only be mandated if precise scientific measurement is to be accomplished with highly trained personnel and highly calibrated instrumentation (Tr. Vol. IV, pp. 49–50, March 25, 1982).

After thorough review and analysis of the comments in the record in connection with this issue, OSHA has determined that the background sound pressure levels specified in Table D–1 are not necessary for the purposes of the hearing conservation amendment. OSHA concurs with Dr. S. White and J. McCallum, and many others, that the intent of the audiometric testing program required by this amendment is to identify persons with hearing loss before the loss progresses to material impairment. The fact that the employer is not required to make a determination of work relatedness, and the fact that employees are advised to seek referral where a medical pathology is suspect, are evidence that "medical or audiological diagnosis" is beyond the scope of the audiometric test program.

The Agency reaffirms its position as stated in the preamble of January 16, 1981 (46 FR 4148) that background sound levels in audiometric test rooms must be quiet enough to permit valid measurements of audiometric thresholds. However, OSHA is now convinced that the levels of Table D–2 are sufficient for obtaining valid threshold measurements for purposes of industrial hearing conservation programs. Thus, OSHA no longer believes that the sound pressure levels specified in Table D–1 are necessary to achieve this goal. The comments submitted which reflect a variety of professional experiences have persuaded OSHA that the background levels in Table D–2 will ensure an adequate environment for audiometric testing. Ronald D. Poole, Director of the Audiology Clinic, Mankato State University, summarized the opinions of those who favor Table D–2:

"In the past 5–6 years I have seen the audiograms of literally hundreds of employees tested in rooms where the maximum allowable background noise conformed to that contained in Table D–2 and their thresholds were found to be well within that range of normal between 0—25 dB, and in most instances were even closer to those minimum (0 dB) than the maximum (25 dB). I do not feel any test accuracy or integrity will be sacrified by retaining those values presently acceptable in Table D–2 (Exh. 329–07, pp. 1 to 2)."

Therefore, Table D–1 of Appendix D, required by the January amendment is revoked. The background sound pressure levels for audiometric test rooms which are required by this amendment are contained in Table D of Appendix D.

Audiometer Calibration

The January promulgation of the hearing conservation amendment required that audiometers be given a functional check each day they are in use. This process involves a biological calibration and a listening check. This is done by testing a person with known, stable hearing thresholds and by listening to the audiometer's output to make sure it is free of distorted or unwanted sounds. Such sounds might lead to invalid audiograms.

When the biologic calibration resulted in "deviations of more than 5 dB" in hearing level from the subject's known audiogram, the January amendment required an acoustic calibration. An acoustic calibration is one in which the audiometer is checked with a sound level meter and earphone coupler to make sure the instrument is producing the correct level of pure tones at specific frequencies. Also included in the acoustic calibration is a linearity check to ensure that the sound pressure output is increasing at the proper increments.

The January amendment also stipulated that "deviations of more than 10 dB" on the sound pressure output check and linearity check triggered an exhaustive calibration. Exhaustive calibration involves a thorough instrument check and, where necessary, an adjustment to conform with requirements of the ANSI Standard Specification for Audiometers (S3.6–1969). The audiometer usually must be sent back to the manufacturer or to a laboratory for the exhaustive calibration because specialized equipment is needed to perform this calibration.

Commenters (Exh. 327–66, p. 66; Exh. 347–141, p. 5; Exh. 327–91; Exh. 349–1; Exh. 327–154) pointed out that since self-recording audiometers trace thresholds in 1 dB increments, "deviations of more than 5 dB" could be interpreted to mean that a 6 dB deviation would trigger an acoustic calibration. Similarly, "deviations of more than 10 dB" would imply that an employer using a self-recording audiometer would be required to send the audiometer back to the manufacturer or to a laboratory for an exhaustive calibration when only an 11 dB deviation was found. This would result in a much more stringent rule than the Agency intended. In promulgating the requirements detailed above, the Agency assumed that manual audiometers, which trace thresholds in 5 dB increments, were being used. It was intended that the trigger for an acoustic calibration be deviations of 10 dB and the trigger for an exhaustive calibration be deviations of 15 dB or more.[40]

The Agency's position on this issue was discussed in the August **Federal Register** document and an interpretation consistent with the above discussion was given (see 46 FR 42628–42629). After evaluating the comments on this issue, OSHA has decided to incorporate into the text of the amendment explicit language to clarify these points. The revised amendment therefore specifies that an acoustic calibration is necessary if the results of the biological calibration indicate "deviations of 10 dB or greater" and an exhaustive calibration is necessary when an acoustic calibration results in "deviations of 15 dB or greater."

Summary

The audiometric test provisions of this revised hearing conservation amendment are somewhat less detailed than those promulgated in January 1981, although they have not been simplified as much as the amendment's monitoring provisions. It was not possible to embrace the performance approach completely for the audiometric testing provisions. Based upon a thorough review of the information and comments in the record, OSHA believes that a certain degree of specificity in the audiometric test provisions is absolutely necessary to protect employees in the hearing conservation program adequately and to realize fully the benefits the Agency has predicted will occur as a result of such program (see Regulatory Analysis).

OSHA recognizes that employers may employ different professionals to supervise their audiometric test program from year to year. Moreover, the professional supervising the program may use any number of audiometric technicians to obtain the required audiograms. As a result, it is quite possible that there will be little continuity of personnel responsible for the program from year to year. It is crucial to ensure that certain basic elements of the program are performed in a relatively uniform manner so that the evaluation of audiometric test data

[40] These performance triggers were in addition to the stated frequency with which such calibrations must be done: at least yearly for acoustic calibration and every two years for exhaustive calibration. For a more complete discussion of audiometer calibration, see 46 FR 4149–4151.

and comparison of results are meaningful. Therefore, it was necessary to specify certain items, such as audiometric test frequencies, permissible background sound pressure levels in audiometric test booths, a definition of standard threshold shift, and certain follow-up procedures.

Whenever OSHA felt that the specific details of a particular provision were not absolutely essential to the protection of employees, however, we have tried to allow for the use of professional discretion. For example, OSHA revoked the retest requirements because we anticipate that employees will be provided the same amount of protection whether an STS is temporary or permanent. A professional directing a particular program, however, may deem it important to determine whether an employee's STS is temporary. The revised amendment is designed to give the supervising professional a considerable amount of latitude in making these decisions, while simultaneously affording the greatest amount of employee protection.

Hearing Protector Attenuation

The amendment requires that when an employee has suffered a STS, the employee must wear hearing protectors that attenuate exposure to a TWA of 85 dB or below. There may be some circumstances or environments where it is not possible to attenuate noise down to the appropriate level with hearing protectors. It should be noted that impossibility of compliance is recognized as a defense to any citation by the Review Commission.

In August, 1981, OSHA reopened the record and requested data and information on whether Appendix G [41] should be amended so that estimations of hearing protector attenuation would more accurately reflect the amount of attenuation received in actual industrial use. The value of hearing protectors lies in their ability to attenuate or reduce the noise that reaches the ear. Hearing protector manufacturers are required by the Environmental Protection Agency (EPA) to identify clearly in a uniform manner, the noise reduction capability of all hearing protectors sold in the United States. This measure of effectiveness is called the noise reduction rating (NRR). The NRR is a laboratory derived numerical estimate of attenuation that is provided by the hearing protector. Appendix G (subsequently redesignated as Appendix B), which is mandatory, describes the NRR and three alternative NIOSH methods that may be used to estimate hearing protector attenuation.

In response to the August 1981 request for information, some commenters suggested that the noise reduction rating (NRR) method produces an accurate estimate of real-world attenuation and should be continued (Exh. 327–34; Exh. 327–91, pp. 40–41; Exh. 327–65, p. 9; Exh. 327–95, p. 10; Exh. 327–131; Exh. 327–142, p. 7). Others stated that the NRR should not be adopted as part of the standard at all (Exh. 327–80, p. 3; Exh. 327–35, p. 5; Exh. 327–13, p. 7; Exh. 327–77, p. 9; Exh. 327–28, p. 3; Exh. 327–106, p. 7). Several comments suggested alternative methods of evaluating hearing protection (Exh. 327–47; Exh. 327–46; Exh. 327–62–A, p. 8; Exh. 327–99), while others supported de-rating of the laboratory derived attenuation values of hearing protectors to reflect the actual attenuation achieved under real-world conditions which is often significantly less than the NRR would indicate. (Exh. 327–84; Exh. 327–61; Exh. 327–66; Exh. 327–116). OSHA plans in the near future to propose a new rule to modify the existing noise standard (29 CFR 1910.95(b)). At that time the Agency will assess the overall effectiveness of the hearing conservation program, administrative and engineering controls, and personal protective equipment (i.e. hearing protectors). Since the issue raised in the present rulemaking—whether the Appendix should be modified so that estimations of hearing protector attenuation more accurately reflect the amount of attenuation achieved in "real use" situations—will be the central focus in that proposal, OSHA is not changing the provisions dealing with hearing protector attenuation at this time. Comments received in connection with this portion of the rulemaking on the hearing conservation amendment will be considered in the development of the proposed occupational noise standard.

Training Program

In the January amendment, OSHA required training to be repeated annually for all employees included in hearing conservation programs. The contents of the training program where specified in detail. Employees were required to be informed about: (1) OSHA's noise standard and the hearing conservation program; (2) the effects of noise on hearing; (3) identification of the specific machinery at the jobsite that could produce hazardous noise exposures; (4) the role of engineering and administrative controls in the reduction of noise exposure; (5) the contents of any noise control compliance plan in effect; (6) the purpose of hearing protectors, the advantages and disadvantages of various types of protectors, and instructions on their selection, fitting, use, and care; and (7) the purpose and procedures of audiometric testing.

After publication of the January amendment, OSHA received numerous comments contending that the training requirements were too detailed and did not provide employers with enough flexibility to tailor their training programs to the specific needs of their employees. In August, OSHA continued the stay of several training provisions, which are listed above (1, 3, 4, and 5) and requested information on the necessity of these training requirements for an effective hearing conservation program.

Many commenters stressed the importance of training in obtaining the full cooperation of employees in the hearing conservation program. However, these commenters also stated that such detailed training requirements were too rigid (Exh. 326–15, p. 9; Exh. 326–30, p. 2; Exh. 326–32, p. 1; Exh. 326–34, p. 9; Exh. 327–20, pp. 5–6; Exh. 327–70, p. 2; Exh. 327–76, pp. 13–14; Exh. 327–87, p. 4; Exh. 327–89, p. 9; Exh. 327–97, p. 6; Exh. 327–146, p. 7; Exh. 327–145, p. 7; Exh. 329–22, p. 6). For example, the DuPont Company stated:

> "DuPont believes it is appropriate for the agency to stay and modify the employee training provisions of the amendment because the specifications contained in the original version [January standard] were more detailed than necessary and did not permit enough employer discretion in determining what communications will guarantee them the best employee participation and cooperation in the hearing conservation program. DuPont agrees with OSHA that employee training is important but does not believe OSHA's specifications would elicit employee attention and compliance with necessary safety precautions" (Exh. 326–28, p. 7–8).

Other commenters indicated that the training requirements would be administratively burdensome and of little benefit (Exh. 326–12, p. 5; Exh. 327–51, p. 5; Exh. 327–93, p. 3; Tr. Vol. IV, p. 111, March 26, 1982). Some participants noted that professionally prepared and packaged programs that are often less costly and of higher quality than those developed in-house could be used if the stayed portions of the January amendment were revoked (Exh. 327–145, p. 9; Exh. 327–89, p. 9; Exh. 329–13, p. 4). In fact, the Dow Chemical Company declared that of some of the requirements listed above (3, 4 and 5) "are not necessary as they do not

[41] In the revised amendment, Appendix G: Methods for Estimating the Adequacy of Hearing Protector Attenuation, has been redesignated as Appendix B.

pertain to a hearing conservation program" (Exh. 327–76, pp. 13–14).

Other commenters addressed the role of training in industrial hearing conservation programs. Dr. Larry Royster, of the Department of Mechanical and Aerospace Engineering of North Carolina State University, stressed that successful training must reflect the company's commitment to hearing conservation and should include an explanation of how hearing loss occurs and how each employee can be protected, the mechanics of the program and the employee's and employer's respective responsibilities, detailed instructions on hearing protection devices, and an explanation of audiometer tests and procedures (Exh. 327–84).

Several participants, however, supported the inclusion of detailed training requirements (Exh. 326–41, p. 6; Exh. 326–42, p. 13; Exh. 327–59, p. 4; Exh. 327–66, pp. 92–94; Exh. 327–78, pp. 15–16; Exh. 327–107, p. 7; Exh. 327–109, p. 16–17; Exh. 327–136B, p. 6; Exh. 329–57, p. 2; Exh. 345, p. 11; Exh. 347, p. 9). For example, Frank Grimes of the United Steelworkers of America stated:

> "It is essential that the persons affected get as much detail as possible on the requirements and controls so that the program will be properly implemented" (Exh. 347, p. 9).

George Taylor, Director of Occupational Safety and Health for the AFL–CIO, also generally supported this view (Exh. 327–109, p. 17).

In general, the great majority of commenters agreed that employee training is an important part of any hearing conservation program. However, OSHA agrees with those commenters who contended that some details of the training program should be left to the judgment of the employer or the professional administering the hearing conservation program. In addition, several commenters (Exh. 327–88, p. 20; Exh. 327–110, p. 5; Exh. 327–59, p. 4) argued that the requirement to inform employees of the contents of the amendment is redundant with another requirement in the amendment: the requirement to post a copy of the standard in the workplace. OSHA does not believe it is necessary to include a specific requirement to inform employees of the contents of the standard in the training program when these documents are required to be readily available to employees and copies must be posted. The Agency also believes that it is not necessary to require the items listed, as 3, 4, and 5 above to be included in the training requirements because information about engineering and administrative controls and the employer's compliance plan is not essential to the employee's understanding of or cooperation in the hearing conservation program.

OSHA does not agree with the suggestion of the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers that section 6(b)(7) of the Act requires training in the identification of specific machinery at the jobsite that could produce hazardous noise exposures (Exh. 327–78, p. 16). Section 6(b)(7) of the Act states in part that "any standard promulgated under this subsection shall prescribe the use of labels or other appropriate forms of warning as are necessary to insure that employees are apprised of all hazards to which they are exposed * * *." Noise is the hazard to which employees are exposed and the requirement to include training on the effects of noise on hearing certainly meets the statutory obligation of apprising employees of the hazards encountered in the workplace.

For these reasons those provisions of the training requirements on which the stay was continued in August are hereby revoked. The revocation of some of these detailed requirements will allow employers to avail themselves of pre-prepared materials such as pamphlets and films, where appropriate, which may be more effective and less expensive than individually prepared programs. As written, the training provisions in the hearing conservation amendment require employers to conduct annual training for all employees included in their hearing conservation programs. Such training must include, at a minimum, information on the effects of noise on hearing; the purpose of hearing protectors; the advantages and disadvantages of various types of protectors; instructions in the selection, fitting, use, and care of protectors; and the purposes and procedures of audiometric testing.

Warning Signs

The January amendment required signs to be posted at entrances to or on the periphery of all well-defined work areas where employees might be exposed at or above a TWA of 85 dB. These signs were intended to alert employees that they were entering a high noise area and that hearing protectors might be required (see 29 CFR 1910.95(p), 46 FR 4164, January 16, 1981). The stay of this provision was continued in the August **Federal Register** document because of objections asserting that warning signs would be costly and inconvenient and that employees might be confused as to whether hearing protection was advisory or mandatory in certain areas (see 46 FR at 42630, August 21, 1981).

Warning signs by their nature describe area noise levels rather than individual exposures (Exh. 64–6, pp. 1–2). The need for warning signs depends on the nature and extent of the occupational exposure (Exh. 327–143, p. 8). For example, an employee in an area with 92 dB of noise for two hours a day with no significant noise exposure for the rest of the day would not need to wear hearing protectors, whereas the employee who spends the whole day in that area would (see Exh. 326–62, p. 3). Therefore, in cases where employees move in and out of noisy areas, such warning signs might be unduly confusing.

Similarly, many commenters felt that the fact that only *some* employees (those with STS) exposed above 85 dB were required to wear hearing protectors would contribute to the confusion.[42] Accordingly, they suggested that warning signs be required only when exposures were at or above an 8-hour TWA of 90 dB (Exh. 327–62, p. 6; Exh. 327–71, p. 4; Exh. 327–145, p. 9; Exh. 329–2, p. 4; Tr. Vol. I–B, p. 265, March 23, 1982; see also Exh. 327–101, p. 8).

Despite these considerations, W. J. Rheume of the Teamsters Union stated that "warning signs are an integral part of any hearing conservation program." He added that they are inexpensive indicators of high noise areas and have been common industrial practice for years (Tr. Vol. III, p. 62, March 25, 1982). Wayne Bodenheimer of the Colorado Hearing and Speech Center also favored the use of warning signs, characterizing them as "constant reminders to everyone about high noise areas and the need to protect themselves." Moreover, he felt it "naive" to assume that everyone would remember the high noise areas on a day-to-day basis without such visual reinforcement (Tr. Vol. I–B, p. 215, March 3, 1982). Similarly, Dan MacLeod, an industrial hygienist for the International Union of United Automobile, Aerospace and Agricultural Implements Workers of America, testified from personal experience about the educational value of warning signs (Tr. Vol. III, p. 98–99, March 25, 1982). In addition, a number of other commenters such as the International Brotherhood of

[42] Hearing protector use is mandatory for employees exposed below an 8-hour TWA of 90 dBA in only two situations: after experiencing a standard threshold shift and, where employee baselines are delayed beyond six months because mobile testing vans are used, for that period beyond six months until the baselines are obtained.

Boilermakers, Iron Ship Builders, Blacksmiths, Forgers, and Helpers Union and the Air Products and Chemicals Corporation also felt that warning signs were helpful in a hearing conservation program (see Exh. 327–13, p. 7; Exh. 327–56, p. 8; Exh. 327–58, p. 4; Tr. Vol. IV, p. 61, March 26, 1982; Exh. 327–78, p. 17; Exh. 327–86, p. 8; Exh. 327–135, p. 9; Exh. 327–138, pp. 6–7).

On the other hand, a number of participants questioned the educational value of warning signs (Exh. 327–70, p. 2; Exh. 327–76, p. 14; Exh. 327–97, p. 6; Exh. 327–89, p. 7). For example, Dr. Thomas Summar, who based his opinion on 25 years of experience in directing industrial hearing conservation programs, felt that warning signs had "minimal" educational value (Exh. 327–69, p. 9; Tr. Vol. I–B, p. 126, March 23, 1982). Others questioned the wisdom of the requirement and stated that warning signs would be ignored after a short period of time, becoming, in effect, part of the "scenery" (Exh. 327–116, p. 3; see also Exh. 326–62, p. 3; Tr. Vol. I–B, p. 265, March 23, 1982). Some commenters indicated that while warning signs have *some* educational value (Exh. 329–14, p. 10; Exh. 329–15, p. 7), good training and enforcement practices contribute far more to the success of the hearing conservation program (Exh. 329–19, p. 2; Exh. 327–51, p. 5; Exh. 327–129, p. 3). Moreover, Dow Chemical (Exh. 327–76, p. 14) and the Motor Vehicle Manufacturers Association (Exh. 327–103, p. 9), among others, suggested that warning signs are not necessary for an effective hearing conservation program.

Many commenters, including General Motors Corporation (Exh. 327–99), felt that while warning signs might be useful in some work environments, they serve no useful purpose in others; therefore the decision as to whether or not to post warning signs should be left to the discretion of the employer (see Exh. 327–89, pp. 7–8; Exh. 327–120, p. 4; Exh. 327–105, p. 7).

After a careful analysis of the record comments, OSHA agrees with the position taken by General Motors and the others cited above that the use of signs to warn employees about noise hazards in high noise areas should be left to the discretion of the employer. In so doing, OSHA finds some merit in the view that noise is more readily discernible than other harmful physical agents and therefore a specific warning sign requirement may not be necessary to protect employees and that in certain circumstances such signs might confuse rather than serve a useful educational purpose.

Therefore, the provision requiring that warning signs be posted in *all* areas where high noise exposures may occur will be revoked. The revocation of this requirement is not meant to discourage employers from posting any warning signs. Rather, it recognizes that the employer is more familiar with the workplace environment and will be in a better position to determine if the posting of signs in a given situation will aid in the success of the company's hearing conservation program. A number of those commenting noted that warning signs may be helpful in enforcing hearing protector use where required. Therefore we expect that, where appropriate, employers will voluntarily adopt the use of warning signs as part of their hearing conservation program.

Several unions argued that Section 6(b)(7) of the Act required the use of warning signs (Exh. 327–109, p. 18: Exh. 327–78, p. 17). Section 6(b)(7) of the Act merely requires that standards "prescribe the use of labels or *other appropriate forms of warnings as are necessary* to insure that employees are apprised of all hazards to which they are exposed * * * [*italics added*]. It should be clear from the above discussion that warning signs are not generally necessary, nor are they always the most appropriate method of apprising employees of the hazards of noise. Training may be a more appropriate vehicle to inform workers of the hazards of noise to their hearing and, in fact, employers are required to include this in their training program (see discussion above). Therefore, substantial evidence in the record supports the conclusion that the revocation of the warning sign requirement is not contrary to Section 6(b)(7) of the Act.

Recordkeeping

The January amendment required that extensive and detailed records be maintained of exposure measurements, audiometric tests, audiometric test room sound levels, and calibration of audiometers. OSHA explained (46 FR 4159) that recordkeeping is necessary to enable professional reviewers to "* * * make sure that the audiometric tests were carried out under proper conditions and that audiograms reflect employees' true hearing levels. Records [serve an] * * * educational purpose for employees because they enable employees to assess the continuing status of their hearing. In addition, they provide employers with a way of assessing the success or failure of the hearing conservation program."

After the amendment was promulgated in January. OSHA received many objections to the detailed nature and redundancy of some of these recordkeeping provisions. Therefore, on August 21, 1981 (46 FR 42630) OSHA continued the stay of several specific recordkeeping provisions and asked for comments on whether they were necessary for an effective hearing conservation program.

OSHA received many requests that the detailed recordkeeping provisions for noise exposure monitoring be revoked [43] (Exh. 326–31, p. 3; Exh. 327–93, p. 3; Exh. 327–145, pp. 9–10; Exh. 327–110, p. 5; Exh. 327–89, p. 10; Exh. 327–88, p. 10; Exh. 327–121, p. 3; Exh. 328–5; Exh. 329–17, p. 4). Objections focused on the excessive amount of detail required and argued that such detailed records are not necessary for an effective hearing conservation program. Many stated that the performance language at the beginning of the exposure monitoring recordkeeping requirement was sufficient.[44]

OSHA has concluded that the detailed exposure monitoring information originally required in the January amendment is not essential to an effective hearing conservation program. Since the recordkeeping provisions for audiometric tests require that a record of the lastest exposure measurement be retained with the employee's audiometric test record, much of the information required by the exposure monitoring recordkeeping requirements would be redundant.[45] OSHA believes that the detailed exposure measurement data required in January 1981 has extremely limited usefulness and this level of detail is not essential to the effective implementation of a hearing conservation program. Therefore, the stayed provisions concerning exposure monitoring recordkeeping have been

---

[43] The January amendment required that the exposure record include the employee's name and job classification; the date, location, and result of each measurement taken; and the number of measurements (where sound level meters are used to make the measurement), as well as a description of the noise measurement equipment used and the date of its last laboratory calibration. The stay of these provisions was continued in August.

[44] That provision simply stated that the employer must keep accurate records of all employee exposure measurements required by the amendment.

[45] As it now reads, the employer must keep the following information with audiometric test records:

(i) The employer shall retain all employee audiometric test records obtained pursuant to paragraph (g) of this section;

(ii) This record shall include:

(*a*) Name and job classification of the employee;

(*b*) Date of the audiogram;

(*c*) The examiner's name;

(*d*) Date of the last acoustic or exhaustive calibration of the audiometer; and

(*e*) Employee's most recent noise exposure assessment.

revoked. Thus, only the general exposure recordkeeping requirement is being retained. This is consistent with the mandates of sections 8(c)(3) and 8(d) of the Act which require that employers keep accurate records of employee exposures to harmful physical agents which are required to be monitored but that the burden of such an obligation be reduced to the maximum extent feasible.

OSHA also received many comments asking for the revocation of the stayed provisions regarding audiometric test records [46] (Exh. 326–62, p. 4; Exh. 327–20, p. 6; Exh. 327–90, p. 6; Exh. 327–98, p. 10; Exh. 327–121, p. 3; Exh. 327–145, pp. 9–10; Exh. 329–5; Exh. 329–17, p. 4). For example, the DuPont Company (Exh. 326–28, pp. 8–9) pointed out that it is unnecessary for each employee's audiogram to include general information, such as manufacturer and model of the audiometer and a statement of whether sound pressure levels in the test room comply with Table D–1 of Appendix D, when this information is available from other records. OSHA has determined that having a record of the qualifications of the examiner and of the manufacturer and model of the audiometer is not essential to determining the validity of the test. In addition, the requirement for a statement as to whether the sound pressure levels in the test room meet the levels of Table D–1 or Table D–2 of Appendix D is being revoked to be consistent with the revocation of Table D–1. The remaining requirement that a record be kept of background sound pressure levels in audiometric test rooms is sufficient to ensure adequate information to enable proper audiogram evaluation.[47] For these reasons, OSHA has revoked the stayed provisions on audiometric test records.

There is some confusion (Exh. 327–91, p. 46; Exh. 327–149, p. 8) about whether OSHA intended the audiometric information required to be kept to be entered on the face of audiograms.[48] It has been pointed out that some audiometric forms are not sufficiently large to permit this information to be actually recorded on them. It was not OSHA's intention to require that this information be entered on the actual audiogram; the wording of this provision has therefore been changed to permit this information to be kept *with* the audiometric records. Employers may maintain the information in a separate document that is kept or filed with the audiometric test results.

Several commenters requested revocation of the stayed provision that specified the audiometric frequencies for which background sound pressure level measurement records were to be kept and the date of the measurement (Exh. 327–145, pp. 9–10; Exh. 326–62, p. 4; Exh. 327–20, p. 6; Exh. 327–90, p. 6; Exh. 329–22). OSHA has concluded that this requirement is unnecessary since Table D–1 in Appendix D specifies the required frequencies.[49] Further, standard audiometric practice provides that the date of sound pressure measurements be recorded. OSHA has therefore revoked the stayed portions of the provision (see footnote 49, above).

Several commenters also asked that the stayed requirement to maintain records of acoustical and exhaustive audiometer calibrations be revoked because it is unnecessary (Exh. 326–62, p. 4; Exh. 327–20, p. 6; Exh. 327–90, p. 6; Exh. 327–141, p. 6; Exh. 329–22). OSHA agrees that this provision is redundant, since the date of the last acoustic or exhaustive calibration must be kept with the employee's audiometric test record. OSHA has therefore revoked this provision in its entirety.

By its actions today, OSHA has revoked those detailed recordkeeping requirements found to be unnecessarily burdensome or redundant. This is consistent with the mandate of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq* and section 8(d) of the OSH Act. OSHA does not agree with the Teamsters assertion (Exh. 345, p. 12) that trimming the recordkeeping requirements in this manner will reduce the effectiveness of the hearing conservation program. The recordkeeping requirements remaining in the revised amendment are essential and sufficient to insure the effectiveness of the hearing conservation program and OSHA so finds.

Record Retention

In August, OSHA stayed the provisions requiring records of test room sound pressure levels and audiometer calibrations to be kept for 5 years. The requirement for retaining audiometric test records was partially stayed insofar as it required employers to retain audiometric test records for 5 years after termination of employment. OSHA received many requests that these stayed provisions regarding record retention be revoked (Exh. 327–90, p. 6; Exh. 327–122, pp. 10–11; Exh. 327–125; Exh. 327–145, pp. 9–10; Exh. 327–149, pp. 8–10; Exh. 329–15, p. 7; Exh. 327–110, p. 5; Exh. 327–129, p. 3; Exh. 327–105, pp. 7–8; Exh. 327–143, p. 8). Some commenters cited the costs of retaining individual records and asserted that such records are not necessary to employee health or safety.

OSHA has decided to revoke the requirements to retain separate records of sound pressure levels and audiometer calibrations since this information must be kept with or on the audiogram. In addition, OSHA has concluded that retention of audiometric records for 5 years beyond termination of employment is not necessary, since this section also requires the employer to provide employees with access to their records. Since employees can obtain a copy of audiological records during their employment or upon termination of employment, the requirement to retain such records for 5 years after termination is not necessary. OSHA has concluded that it is more appropriate to require retention of audiometric test records for the length of employment rather than the longer period originally specified. Therefore the requirement to keep audiometric test records for 5 years after the termination of employment is being revoked.

Other Issues

Other Alternatives. In the August 21, 1981, **Federal Register** (46 FR 42631), OSHA noted that alternatives to the hearing conservation amendment had been suggested to the Agency. OSHA published and asked for comments on the following performance provisions, which are referred to as the alternative provisions or the three-paragraph alternative.

1. Employers shall conduct audiograms annually of every employee exposed to noise in excess of an 8-hour time weighted average sound level

---

[46] In August 1981, OSHA continued the stay of the following audiometric test recordkeeping provisions: qualifications of the person who administered the audiometric test, name of the manufacturer and model of the audiometer, and a statement of whether the sound pressure levels in the test room meet those specified in Table D–1 or D–2.

[47] The amendment requires that "the employer shall maintain accurate records of the measurements of the background sound pressure levels in audiometric test rooms (see paragraph (m)(2)(ii)(*f*) below).

[48] This information includes such things as measurements of background sound pressure level in the audiometric test room, and the examiner's name and date of the last calibration. Where this information is the same for an entire group of audiograms, this information may be maintained on one sheet of paper rather than separately for each audiogram.

[49] In January, employers were required to keep the following information concerning audiometric test rooms. (i) The employer shall maintain accurate records of the measurements of the background sound pressure levels in audiometric test rooms. (ii) *This record shall include:* (*a*) *Background sound pressure level measurements at each of the following octave bands: 500, 1000, 2000, 4000, and 8000 Hz;* and (*b*) *Date of measurement.* The stay was continued on the italicized portion of this provision in August.

(TWA) of 85 dBA,[60] according to standards on audiometers and audiometric test rooms established by the American National Standards Institute,[61] and under the supervision of a qualified technician;

2. Such audiograms shall be reviewed annually by a qualified audiologist, otolaryngologist or physician to identify employees whose hearing acuity has diminished more than normal;

3. Employers shall instruct all employees identified under paragraph 2 in the proper use of hearing protection when working in noisy areas and shall take appropriate measures to enforce the use of suitable protective devices for those employees when they are exposed to noise levels in excess of an 8-hour time weighted average sound level (TWA) of 85 dBA.

The August document noted that the purpose of publishing these alternatives was to "determine whether the goal of hearing conservation could be achieved by a performance standard that does not contain detailed compliance requirements but rather leaves implementation to physicians and other experts in the field" (46 FR 42631).

Many comments have been received regarding the adequacy of the employee protection that might be provided by implementation of these alternative provisions. Many commenters asserted, in general terms, that the alternatives would be as protective as the provisions contained in the January and August documents (Exh. 327–20; Exh. 327–26; Exh. 327–27; Exh. 327–28; Exh. 327–34; Exh. 327–51; Exh. 327–55; Exh. 327–62; Exh. 327–67; Exh. 327–89; Exh. 327–93; Exh. 327–101; Exh. 327–129; Exh. 327–145; Exh. 329–5; Exh. 329–10; Exh. 329–19; Exh. 329–42; Tr. Vol. III, pp. 179–180, March 25, 1982). These participants generally favored the simplicity and flexibility of the alternative provisions.

The Chocolate Manufacturers Association (Exh. 327–112, p. 7) thought that the three-paragraph alternative would increase compliance, and therefore worker protection, because it would be better understood by employers and employees and would be easier for small businesses to comply with. On the other hand, other commenters felt that the alternative standard would be more difficult for employers without strong technical capabilities to comply with effectively and suggested that the alternative standard would result in lack of uniform enforcement from one employer to another (see generally Exh. 327–78, p. 17; Exh. 327–113, p. 3; Exh. 327–98, p. 21).

Several commenters who generally supported the three-paragraph alternative suggested specific changes. For example, Owens Illinois (Exh. 326–15, p. 3), the Chocolate Manufacturer's Association (Exh. 327–112, p. 17–18), the National Soft Drink Association (Exh. 327–90, p. 6), and the Edison Electric Institute (Exh. 327–106, pp. 1–2) objected to the incorporation by reference of American National Standard Institute standards. Air Products and Chemicals (Exh. 327–58) suggested that a requirement be added stating that the employer should have a written description of the program to make all persons aware of it. R. C. Crewdson of Industrial Health, Inc. (Exh. 327–83, p. 5) requested addition of a requirement stating that the program be under the supervision of an audiologist, otolaryngologist, or physician.

Other comments were concerned that exceptions for temporary employees would not be provided (Exh. 327–90, p. 6; Exh. 327–110, pp. 1–2). The National Screw Machine Products Association (Exh. 327–124) and Lewis Goodfriend and Associates (Exh. 327–23, p. 5) suggested adding a provision that employers require hearing protection when noise exposures exceed a given level. Lewis Goodfriend and Associates (Exh. 327–23, pp. 4–5) also indicated that any alternative should clearly require the employer to provide the employees with hearing protectors and should "state how effective the hearing protection devices should be." The DuPont Company (Exh. 327–91, pp. 52–54) also recommended many additions to the alternative provisions, including the addition of a definition of significant threshold shift.

OSHA also received a large number of comments asserting that the alternative provisions would not provide employee protection equivalent to that offered by the August amendment (Exh. 327–22; Exh. 327–35; Exh. 327–59; Exh. 327–68; Exh. 327–76; Exh. 327–78; Exh. 327–82; Exh. 327–84; Exh. 327–87; Exh. 327–94; Exh. 327–102; Exh. 327–119; Exh. 327–148; Exh. 331–17; Exh. 345; Tr. Vol. IV, pp. 242, March 26, 1982). The American Textile Manufacturer's Institute (Exh. 327–106, p. 1), although generally in favor of a performance-oriented standard, stated that the three-paragraph alternative "certainly would not provide needed protection to workers * * *." The International Brotherhood of Teamsters (Exh. 345, p. 12) argued that "* * * it offers no improvement over the previous standard [29 CFR 1910.95(b)(3)] * * *."

Some comments contained more specific criticism. For example, submissions by Dow Chemical (Exh. 327–76, p. 17), Shell Oil (Exh. 327–102, p. 13) and others emphasized the need for an explicit monitoring requirement, or offered alternative performance language for the monitoring provision (Exh. 327–87, p. 5; Exh. 327–91, p. 52; Exh. 327–99; Exh. 327–106, p. 1; Exh. 345, pp. 12–13). In addition, one commenter pointed out that the three-paragraph alternative fails to indicate the types and levels of sounds to be included in the noise exposure measurement (Exh. 327–82). He suggested that the lack of such a specification could result in underestimates of exposure.

The National Screw Machine Products Association (Exh. 327–124) and the Alliance of Metal Working Industries (Exh. 327–72, p. 4) noted that the alternative provisions suggest that only employees who have experienced a significant threshold shift be instructed in the use of, and required to wear, hearing protectors. They suggested that the three-paragraph alternative be modified to require that employers instruct all employees to wear hearing protection where noise levels exceed those shown in Table G–16a. Shell Oil (Exh. 327–102, pp. 13–14) pointed out, "The * * * alternative fails to provide for employee education and training, except for employees who have already suffered a hearing loss. To prevent hearing loss, employees must know when and how to wear hearing protectors, and what is gained by their use."

The DuPont (Exh. 327–91, p. 53) and General Motors companies (Exh. 327–99) added definitions of significant threshold shift in their suggested performance alternatives. The Motor Vehicle Manufacturers Association (Exh. 327–103, p. 9) contended that the alternative's lack of a definition of significant threshold shift is a "serious omission." The American Textile Manufacturers Institute (Exh. 327–106, p. 1) asserted that referral criteria are needed for evaluation of workers who develop medical abnormalities. In addition, commenters called attention to what they felt was ambiguous language in the three-paragraph alternative. For example, the National Soft Drink Association (Exh. 327–90, p. 6) pointed out that the language "hearing acuity * * * diminished more than normal" is ambiguous.

---

[60] See Appendix A.

[61] American National Standards Institute (ANSI) Specification for Audiometers, S3.6–1969, and the Institute's Specification for Audiometric Test Rooms, ANSI S3.1–1977. Audiometers shall be calibrated annually to ensure the standard is met. ANSI S3.1–1977 must be followed for testing performed at frequencies of 1,000 Hz and above; for testing below 1,000 Hz, ANSI S3.1–1960 may be used.

A few commenters suggested that the three-paragraph alternative would result in fewer enforcement problems than would a more specification-oriented standard. The Chamber of Commerce (Exh. 329–10, p. 6), for example, stated "The alternative would afford more flexibility for compliance officers * * *; by being freed from enforcing overly specific requirements * * * [compliance officers] could perform less intensive but more expeditious and results-oriented inspections." Others, however, viewed such lack of specificity with alarm. The Portland Cement Association, for example, (Exh. 327–113, p. 3) stated, "The less specific a standard is, the more room there is for subjectivity on the part of the inspector * * *. Unduly vague standards can open the way for abuses and arbitrary action, without any positive effect on hearing conservation" (see also Exh. 327–76, p. 19). Similarly, Standard Oil of Indiana (Exh. 327–67, p. 5) asserted, "the problem with * * * the proposed alternative is that there is no way to measure compliance because many of the terms are vague. Consequently, each compliance officer becomes an interpreter of the law and uniform enforcement is lost." Others simply stated that the 3-paragraph alternative is absolutely unenforceable (Exh. 327–76, p. 17; Tr. Vol. III, p. 52–05, March 25, 1982).

Organization Resources Counselors (Exh. 327–68, p. 21) noted that implementing the alternative provisions could be difficult for employers without strong technical capability. R. C. Crewdson of Industrial Health, Inc. (Exh. 327–62, p. 6) pointed out that hearing conservation programs should be supervised by professionals. This requirement was not included in the three-paragraph alternative. In a similar vein, Pelton/Blum, Inc. (Exh. 329–12) commented, "It has been our experience that most small and medium sized companies do not necessarily have the knowledge to carry out a hearing conservation program when it is stated [as] in the 3 paragraph alternative provisions. The Amendment as * * * in August * * * would allow even the individual that is not knowledgeable to begin to see how a program * * * works."

OSHA has carefully reviewed the comments in the record regarding the efficacy of the three paragraph alternative provisions. Ideally, an occupational safety and health standard should be specific enough to give employers adequate notice of what is expected of them and to allow for uniform enforcement from one employer to another, and be flexible enough to allow employers to comply in the manner that best fits the circumstances of the company. These considerations must be balanced against the need to be able to enforce the standard vigorously against any recalcitrant employer who fails to provide employees with meaningful protection. Although the Agency supports the use of performance language wherever possible, and has used the performance approach in several sections of this revised amendment, the alternative provisions do not provide the degree of specification needed to ensure employee protection against occupational hearing loss. The Agency position on this matter is generally corroborated by the American Textile Manufacturers Institute:

"ATMI supports performance standards with minimum specification and any such standard in the area of hearing conservation would have to include the following elements; required monitoring of noise exposures, feasible engineering controls, adequate protective devices, periodic audiometric evaluation and referral criteria for evaluation of workers developing abnormalities. Obviously, the proposal [three-paragraph alternative] in the notice does not meet those criteria. In striking contrast, the regulation made effective in the August 21 notice meets those criteria and in our judgment, would be adequate" (Exh. 327–106, p. 1).

For example, a specific index of hearing damage serious enough to trigger follow-up action is needed to provide guidance to employers. Without a standardized definition of STS, OSHA believes there would be great variability in the protective actions taken (see Exh. 327–76, p. 19]. Approximately forty definitions of STS have been suggested to OSHA (see discussion in audiometry section above), indicating the range of opinion on the correct interpretation of this important term. Therefore, the Agency considers that the alternative provisions' lack of a definition of STS would result in less than uniform protection for noise-exposed employees.

OSHA also finds the 3-paragraph alternative's lack of minimum requirements for audiometer calibration a serious problem. Calibration requirements are essential to ensure the validity and comparability of tests. If audiometers are not properly calibrated, employers may expend substantial resources with little assurance that test results can be compared from one year to the next, and without assurance that employees are receiving adequate protection.

OSHA believes that the lack of a requirement that employees be instructed in hearing protector use *before* a hearing loss occurs is a serious oversight of the 3-paragraph alternative. The absence of such a provision runs counter to the Agency's emphasis on *preventive* measures in occupational safety and health.

Similarly, to help avoid hearing loss OSHA's amendment requires that hearing protectors be properly fitted. The amount of protection offered by hearing protectors is greatly dependent on proper fit. Further, hearing protectors themselves vary considerably in the degree of attenuation offered. Without an assessment of the protection actually offered by hearing protectors in specific noise environments, employers may believe that sufficient protection is being provided when in fact it is inadequate. OSHA feels that the failure to require fitting and attenuation evaluations of hearing protectors would seriously reduce the degree of protection provided to employees.

Further, OSHA believes there are serious questions regarding the Agency's ability to enforce the 3-paragraph alternative. Some have suggested that OSHA enforcement would be improved since it would have to focus on results, i.e., whether protection is being provided rather than on the specifics of program implementation (Exh. 327–00, pp. 4–5; Exh. 329–10, p. 6). Consequently, others noted that OSHA compliance officers would have to be given special training in evaluating audiometric data bases (Exh. 327–98, pp. 21–22; see also Exh. 327–69, p. 9). However, no commenter suggested how OSHA compliance personnel would determine at what point a given hearing conservation program was protective enough to be considered "in compliance." In addition, many of the phrases used in the three-paragraph alternative, such as "more than normal" and "noisy areas" are subject to many interpretations and would therefore be difficult to enforce in practice. Moreover, if the Agency were to revise the three paragraph alternative by adding the various specific requirements that many of the participants felt were necessary to protect employees adequately, the alternative would become as long and as specific as the revised amendment published today.

For the reasons discussed above, OSHA has concluded that the 3-paragrpah alternative would not be as protective as the hearing conservation amendment published in August. In particular, the failure of the alternative provisions to provide guidance to employers in the areas of pre-impairment hearing protection use, the

definition of a standard threshold shift, and employee training is felt to be sufficient to support this conclusion. Therefore, the alternative provisions will not be adopted.

Performance Criteria

The preamble to the August **Federal Register** document discussed a study (see post-promulgation comment #266a) recommending that performance criteria be developed for determining the effectiveness of an employer's hearing conservation program.[52] That study, which was prepared for the Rockefeller Foundation, suggested that results of analyses of audiometric data be the index of such effectiveness. Comments and information were requested on the advisability of adopting such an approach in the hearing conservation amendment. The comments and testimony received in response to this recommendation generally agreed that evaluating the effectiveness of hearing conservation programs is desirable, but there was little consensus among commenters regarding what performance criteria should be used.

A number of commenters felt that audiometric data analysis would be a useful tool for demonstrating the effectiveness of a hearing conservation program but made no recommendations concerning the minimum appropriate criteria for judging a program (Exh. 327–99; Exh. 327–113, p. 3; Exh. 327–125). Some participants stated that audiometric data showing an incidence of significant threshold shift rates greater than 5 to 10 percent should indicate a problem with a given hearing conservation program (Exh. 327–54; Exh. 327–58; Tr. Vol. II, p. 128, 3/29/82; Tr. Vol. II, p. 59, March 26, 1982). Others recommended using analysis of audiometric data as an indicator but only after the data has been adjusted for variables such as age, sex, race, years or exposure at various sound levels, and so forth (Exh. 327–84; Exh. 327–77, pp. 7–8; Exh. 327–66, pp. 11–85; Exh. 327–120, p. 4).

Some stated that analysis of audiometric data by individual employers would not really indicate the effectiveness of a hearing conservation program (Exh. 327–15; Exh. 327–147, p. 6–7). In his testimony, Dr. Crewdson, a physicist, suggested that the inaccuracy and variability of individual test results would make it impossible to assess trends by simply looking at audiogram results. He recommended evaluation of several years' worth of data by experienced professionals (Tr. Vol. V, pp. 146–162, March 29, 1982). Another commenter stated:

"[There is] no generally accepted method * * * available to evaluate the effectiveness of individual hearing conservation programs. * * * With computer-assisted data collection, and a uniform criteria [sic] for describing threshold shift, the analysis of audiometric test data may prove to be a tool for the future. However, the current methods of data collection and retrieval do not make the analysis of audiometric test data a feasible method for evaluating the effectiveness of a hearing conservation program" (Exh. 327–103).

Other commenters agreed, stating:

"[We] do not believe objective or quantitative evaluation of HCP's could be statistically significant or an adequate indicator of program effectiveness" (Exh. 327–120, p. 4).

and

"* * * The analysis of audiometric data is an incomplete approach to an effective and enforceable HCP" (Exh. 327–141).

A number or commenters stated that responsibility for determining program effectiveness should be left in the hands of professional audiologists, otolaryngologists and physicians (Exh. 327–35, p. 5; Exh. 327–105, p. 7; Exh. 327–112, p. 17; Tr. Vol. V, p. 159–160, March 29, 1982). In addition, several stated that OSHA should not attempt to specify mandatory criteria for evaluating hearing conservation programs (Exh. 327–35, p. 5; Exh. 327–77, p. 7–8; Exh. 327–143, p. 2; Exh. 331–11).

OSHA agrees with the large number of commenters who stressed the importance of professional judgment in evaluating audiometric test data. The Agency believes that it would not be useful to draw conclusions on the effectiveness of specific hearing conservation programs on the basis of test data alone, because of the many variables that may affect these results. OSHA believes that it should be left to the judgment of the professionals supervising the audiometric examinations and analyzing the results to advise the employer concerning the effectiveness of the employer's hearing conservation program. Therefore, the final standard does not contain a specific requirement for employer assessment of the effectiveness of hearing conservation programs.

At this time the Agency does not know of any specific performance criteria which would unequivocally demonstrate the effectiveness of any hearing conservation program.

Exemptions

At the present time, the agency is exempting the gas and oil well drilling and servicing industry from the requirements of this revised amendment. OSHA is granting this exemption because of the unique characteristics of this industry, which characteristics have also convinced the agency to initiate rulemaking that addresses the unique hazards for the gas and oil well drillers and servicers.[53]

Appendices Paragraph (r)

The August 1981 **Federal Register** document continued stays on Appendix B (Temporal Sampling Procedures for Use with a Sound Level Meter] and Appendix F (Calculations and Application of Age Corrections to Audiograms). As discussed in the monitoring section above, OSHA is revoking Appendix B. In addition, the stay on Appendix F is being lifted (see discussion under standard threshold shift above) and that appendix is being redesignated as Appendix B.

Effective Dates

The hearing conservation amendment was originally promulgated on January 16, 1981 (46 FR 4078) to become effective on April 15, 1981. After several temporary stays, portions of the amendment went into effect on August 22, 1981 (46 FR 42622, August 21, 1981). Those provisions which went into effect on August 22, 1981, and which were not substantially amended in this final rule are listed in Table I below (with new paragraph designations, where appropriate). In the original promulgation, employers were allowed until February 22, 1982, to complete noise monitoring. The August 22, 1981, effective date of the amendment and the start-up date for monitoring remain unchanged.

Paragraph (i)(2)(ii)

[52] Berger, E. H. and L. H. Royster. "The Effects of Noise Exposure On One Industrial Population," October 1976.

[53] A combination of factors, including tremendous variation in working conditions, high mobility of operations, extremely high employee turnover rates, and limited accessability of many worksites, convinced OSHA that the interests of both employers and employees would be better served by developing a standard more specifically tailored to the needs of this industry (Exh. 329–34, pp 1–2; Exh. 329–33; Exh. 329–29, p. 2; Tr. Vol. I–B, pp. 156–157, 167–168; Tr. Vol. V, pp. 73–75).

Portions of the original hearing conservation amendment were stayed beyond August 22, 1981, and were the subject of this rulemaking. In addition, some provisions which went into effect on August 22, 1981, are also being modified by this final rule. The provisions being issued today in final form will be effective on April 7, 1983, to allow employers enough time to familiarize themselves with the revisions. Table II below lists the provisions and modified provisions (as indicated) which will be effective April 7, 1983.

*An asterisk denotes those provisions which are amendments of provisions that were effective August 22, 1981.

Initially, employers were allowed until August 22, 1982, to complete baseline audiograms. OSHA received a number of requests for extensions of the time allowed to obtain baseline audiograms. Some commenters indicated that they needed more time to comply for various practical and resource reasons (Exh. 329–3; Exh. 327–106). Others stated that OSHA's final decisions on critical technical issues were necessary before baseline audiograms could be obtained (Exh. 327–98; Tr. Vol. IV, p. 202, March 26, 1982.) One commenter stated that an extension of time to obtain baseline audiograms would avoid the paperwork of asking for a variance (Ex. 329–3). OSHA agrees that an extension of time in which to obtain employee audiograms of approximately one year is appropriate under the circumstances of this proceeding. A number of important elements of the audiometric testing provisions have been reconsidered and revised. Employers could not have performed baseline audiograms until these issues were resolved. Employers now need sufficient time to incorporate these requirements into their hearing conservation programs and to purchase the necessary equipment to run such a testing program or to make the necessary arrangements for consultants to perform these services. In the January 1981 amendments, OSHA allowed approximately one year from the effective date of the standard for employers to obtain baseline audiograms. Since a number of elements related to the baseline audiogram were stayed, OSHA will extend the date for completion of baseline audiograms until March 1, 1984, which is approximately one year after the publication of this document. [**]

List of Subjects in 29 CFR Part 1910

Occupational safety and health, Health.

Authority: This document was prepared under the direction of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue, N.W., Washinton, D.C. 20210.

Pursuant to sections 6(b) and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1593, 1599, 29 U.S.C. 655, 657), Secretary of Labor's Order No. 8–76 (41 FR 25059) and 29 CFR Part 1911, § 1910.95 of 29 CFR Part 1910 is amended as set forth below.

(Secs. 4, 6, 8, 84 Stat. 1592, 1593, 1599, [29 U.S.C. 653, 655, 657]; 5 U.S.C. 553; Secretary of Labor's Order No. 8–76 (41 FR 25059))

Signed at Washington, D.C. this 28th day of February 1983.

Thorne G. Auchter,
Assistant Secretary of Labor.

PART 1910—[AMENDED]

Paragraphs (c) through (p) and Appendices A through I of 29 CFR 1910.95 are revised to read as follows:

[**] It should be noted, however, that this delayed effective date is not in addition to the amount of time employers are normally given to obtain baseline audiograms under paragraph (g)(5)(i). Thus, all current employees must have baseline audiograms taken by March 1, 1984, or six months from the date of their first exposure at or above the action level, whichever is longer.

§ 1910.95 Occupational noise exposure.

* * * * *

(c) *Hearing conservation program.* (1) The employer shall administer a continuing, effective hearing conservation program, as described in paragraphs (c) through (o) of this section, whenever employee noise exposures equal or exceed an 8-hour time-weighted average sound level (TWA) of 85 decibels measured on the A scale (slow response) or, equivalently, a dose of fifty percent. For purposes of the hearing conservation program, employee noise exposures shall be computed in accordance with Appendix A and Table G–16a, and without regard to any attenuation provided by the use of personal protective equipment.

(2) For purposes of paragraphs (c) through (n) of this section, an 8-hour time-weighted average of 85 decibels or a dose of fifty percent shall also be referred to as the action level.

(d) *Monitoring.* (1) When information indicates that any employee's exposure may equal or exceed an 8-hour time-weighted average of 85 decibels, the employer shall develop and implement a monitoring program. (i) The sampling strategy shall be designed to identify employees for inclusion in the hearing conservation program and to enable the proper selection of hearing protectors.

(ii) Where circumstances such as high worker mobility, significant variations in sound level, or a significant component of impulse noise make area monitoring generally inappropriate, the employer shall use representative personal sampling to comply with the monitoring requirements of this paragraph unless the employer can show that area sampling produces equivalent results.

(2)(i) All continuous, intermittent and impulsive sound levels from 80 decibels to 130 decibels shall be integrated into the noise measurements.

(ii) Instruments used to measure employee noise exposure shall be calibrated to ensure measurement accuracy.

(3) Monitoring shall be repeated whenever a change in production, process, equipment or controls increases noise exposures to the extent that:

(i) Additional employees may be exposed at or above the action level; or

(ii) The attenuation provided by hearing protectors being used by employees may be rendered inadequate to meet the requirements of paragraph (j) of this section.

(e) *Employee notification.* The employer shall notify each employee exposed at or above an 8-hour time-weighted average of 85 decibels of the results of the monitoring.

(f) *Observation of monitoring.* The employer shall provide affected employees or their representatives with an opportunity to observe any noise measurements conducted pursuant to this section.

(g) *Audiometric testing program.* (1) The employer shall establish and maintain an audiometric testing program as provided in this paragraph by making audiometric testing available to all employees whose exposures equal or exceed an 8-hour time-weighted average of 85 decibels.

(2) The program shall be provided at no cost to employees.

(3) Audiometric tests shall be performed by a licensed or certified audiologist, otolaryngologist, or other physician, or by a technician who is certified by the Council of Accreditation in Occupational Hearing Conservation, or who has satisfactorily demonstrated competence in administering audiometric examinations, obtaining valid audiograms, and properly using, maintaining and checking calibration and proper functioning of the audiometers being used. A technician who operates microprocessor audiometers does not need to be certified. A technician who performs audiometric tests must be responsible to an audiologist, otolaryngologist or physician.

(4) All audiograms obtained pursuant to this section shall meet the requirements of Appendix C: *Audiometric Measuring Instruments.*

(5) *Baseline audiogram.* (i) Within 6 months of an employee's first exposure at or above the action level, the employer shall establish a valid baseline audiogram against which subsequent audiograms can be compared.

(ii) *Mobile test van exception.* Where mobile test vans are used to meet the audiometric testing obligation, the employer shall obtain a valid baseline audiogram within 1 year of an employee's first exposure at or above the action level. Where baseline audiograms are obtained more than 6 months after the employee's first exposure at or above the action level, employees shall wearing hearing protectors for any period exceeding six months after first exposure until the baseline audiogram is obtained.

(iii) Testing to establish a baseline audiogram shall be preceded by at least 14 hours without exposure to workplace noise. Hearing protectors may be used as a substitute for the requirement that baseline audiograms be preceded by 14 hours without exposure to workplace noise.

(iv) The employer shall notify employees of the need to avoid high levels of non-occupational noise exposure during the 14-hour period immediately preceding the audiometric examination.

(6) *Annual audiogram.* At least annually after obtaining the baseline audiogram, the employer shall obtain a new audiogram for each employee exposed at or above an 8-hour time-weighted average of 85 decibels.

(7) *Evaluation of audiogram.* (i) Each employee's annual audiogram shall be compared to that employee's baseline audiogram to determine if the audiogram is valid and if a standard threshold shift as defined in paragraph (g)(10) of this section has occurred. This comparison may be done by a technician.

(ii) If the annual audiogram shows that an employee has suffered a standard threshold shift, the employer may obtain a retest within 30 days and consider the results of the retest as the annual audiogram.

(iii) The audiologist, otolaryngologist, or physician shall review problem audiograms and shall determine whether there is a need for further evaluation. The employer shall provide to the person performing this evaluation the following information:

(A) A copy of the requirements for hearing conservation as set forth in paragraphs (c) through (n) of this section;

(B) The baseline audiogram and most recent audiogram of the employee to be evaluated;

(C) Measurements of background sound pressure levels in the audiometric test room as required in Appendix D: Audiometric Test Rooms.

(D) Records of audiometer calibrations required by paragraph (h)(5) of this section.

(8) *Follow-up procedures.* (i) If a comparison of the annual audiogram to the baseline audiogram indicates a standard threshold shift as defined in paragraph (g)(10) of this section has occurred, the employee shall be informed of this fact in writing, within 21 days of the determination.

(ii) Unless a physician determines that the standard threshold shift is not work related or aggravated by occupational noise exposure, the employer shall ensure that the following steps are taken when a standard threshold shift occurs:

(A) Employees not using hearing protectors shall be fitted with hearing protectors, trained in their use and care, and required to use them.

(B) Employees already using hearing protectors shall be refitted and retained in the use of hearing protectors and provided with hearing protectors offering greater attenuation if necessary.

(C) The employee shall be referred for a clinical audiological evaluation or an otological examination, as appropriate, if additional testing is necessary or if the employer suspects that a medical pathology of the ear is caused or aggravated by the wearing of hearing protectors.

(D) The employee is informed of the need for an otological examination if a medical pathology of the ear that is unrelated to the use of hearing protectors is suspected.

(iii) If subsequent audiometric testing of an employee whose exposure to noise is less than an 8-hour TWA of 90 decibels indicates that a standard threshold shift is not persistent, the employer:

(A) Shall inform the employee of the new audiometric interpretation; and

(B) May discontinue the required use of hearing protectors for that employee.

(9) *Revised baseline.* An annual audiogram may be substituted for the baseline audiogram when, in the judgment of the audiologist, otolaryngologist or physician who is evaluating the audiogram:

(i) The standard threshold shift revealed by the audiogram is persistent; or

(ii) The hearing threshold shown in the annual audiogram indicates significant improvement over the baseline audiogram.

(10) *Standard threshold shift.* (1) As used in this section, a standard threshold shift is a change in hearing threshold relative to the baseline audiogram of an average of 10 dB or more at 2000, 3000, and 4000 Hz in either ear.

(ii) In determining whether a standard threshold shift has occurred, allowance may be made for the contribution of aging (presbycusis) to the change in hearing level by correcting the annual audiogram according to the procedure described in Appendix F: *Calculation and Application of Age Correction to Audiograms.*

(h) *Audiometric test requirements.* (1) Audiometric tests shall be pure tone, air conduction, hearing threshold examinations, with test frequencies including as a minimum 500, 1000, 2000, 3000, 4000, and 6000 Hz. Tests at each frequency shall be taken separately for each ear.

(2) Audiometric tests shall be conducted with audiometers (including microprocessor audiometers) that meet the specifications of, and are maintained and used in accordance with, American National Standard Specification for Audiometers, S3.6–1969.

(3) Pulsed-tone and self-recording audiometers, if used, shall meet the requirements specified in Appendix C: *Audiometric Measuring Instruments.*

(4) Audiometric examinations shall be administered in a room meeting the requirements listed in Appendix D: *Audiometric Test Rooms.*

(5) *Audiometer calibration.* (i) The functional operation of the audiometer shall be checked before each day's use by testing a person with known, stable hearing thresholds, and by listening to the audiometer's output to make sure that the output is free from distorted or unwanted sounds. Deviations of 10 decibels or greater require an acoustic calibration.

(ii) Audiometer calibration shall be checked acoustically at least annually in accordance with Appendix E: *Acoustic Calibration of Audiometers.* Test frequencies below 500 Hz and above 6000 Hz may be omitted from this check. Deviations of 15 decibels or greater require an exhaustive calibration.

(iii) An exhaustive calibration shall be performed at least every two years in accordance with sections 4.1.2; 4.1.3.; 4.1.4.3; 4.2; 4.4.1; 4.4.2; 4.4.3; and 4.5 of the American National Standard Specification for Audiometers, S3.6–1969. Test frequencies below 500 Hz and above 6000 Hz may be omitted from this calibration.

(i) *Hearing protectors.* (1) Employers shall make hearing protectors available to all employees exposed to an 8-hour time-weighted average of 85 decibels or greater at no cost to the employees. Hearing protectors shall be replaced as necessary.

(2) Employers shall ensure that hearing protectors are worn:

(i) By an employee who is required by paragraph (b)(1) of this section to wear personal protective equipment; and

(ii) By any employee who is exposed to an 8-hour time-weighted average of 85 decibels or greater, and who:

(A) Has not yet had a baseline audiogram established pursuant to paragraph (g)(5)(ii); or

(B) Has experienced a standard threshold shift.

(3)Employees shall be given the opportunity to select their hearing protectors from a variety of suitable hearing protectors provided by the employer.

(4) The employer shall provide training in the use and care of all hearing protectors provided to employees.

(5) The employer shall ensure proper initial fitting and supervise the correct use of all hearing protectors.

(j) *Hearing protector attenuation.* (1) The employer shall evaluate hearing protector attenuation for the specific noise environments in which the protector will be used. The employer shall use one of the evaluation methods described in Appendix B: *Methods for Estimating the Adequacy of Hearing Protection Attenuation.*

(2) Hearing protectors must attenuate employee exposure at least to an 8-hour time-weighted average of 90 decibels as required by paragraph (b) of this section.

(3) For employees who have experienced a standard threshold shift, hearing protectors must attenuate employee exposure to an 8-hour time-weighted average of 85 decibels or below.

(4) The adequacy of hearing protector attenuation shall be re-evaluated whenever employee noise exposures increase to the extent that the hearing protectors provided may no longer provide adequate attenuation. The employee shall provide more effective hearing protectors where necessary.

(k) *Training program.* (1) The employer shall institute a training program for all employees who are exposed to noise at or above an 8-hour time-weighted average of 85 decibels, and shall ensure employee participation in such program.

(2) The training program shall be repeated annually for each employee included in the hearing conservation program. Information provided in the training program shall be updated to be consistent with changes in protective equipment and work processes.

(3) The employer shall ensure that each employee is informed of the following:

(i) The effects of noise on hearing;

(ii) The purpose of hearing protectors, the advantages, disadvantages, and attenuation of various types, and instructions on selection, fitting, use, and care; and

(iii) The purpose of audiometric testing, and an explanation of the test procedures.

(l) *Access to information and training materials.* (1) The employer shall make available to affected employees or their representatives copies of this standard and shall also post a copy in the workplace.

(2) The employer shall provide to affected employees any informational materials pertaining to the standard that are supplied to the employer by the Assistant Secretary.

(3) The employer shall provide, upon request, all materials related to the employer's training and education program pertaining to this standard to the Assistant Secretary and the Director

(m) *Recordkeeping.*—(1) *Exposure measurements.* The employer shall maintain an accurate record of all employee exposure measurements required by paragraph (d) of this section.

(2) *Audiometric tests.* (i) The employer shall retain all employee audiometric test records obtained pursuant to paragraph (g) of this section:

(ii) This record shall include:

(A) Name and job classification of the employee;

(B) Date of the audiogram;

(C) The examiner's name;

(D) Date of the last acoustic or exhaustive calibration of the audiometer; and

(E) Employee's most recent noise exposure assessment.

(F) The employer shall maintain accurate records of the measurements of the background sound pressure levels in audiometric test rooms.

(3) *Record retention.* The employer shall retain records required in this paragraph (m) for at least the following periods.

(i) Noise exposure measurement records shall be retained for two years.

(ii) Audiometric test records shall be retained for the duration of the affected employee's employment.

(4) *Access to records.* All records required by this section shall be provided upon request to employees, former employees, representatives designated by the individual employee, and the Assistant Secretary. The provisions of 29 CFR 1910.20 (a)–(e) and (g)–(i) apply to access to records under this section.

(5) *Transfer of records.* If the employer ceases to do business, the employer shall transfer to the successor employer all records required to be maintained by this section, and the successor employer shall retain them for the remainder of the period prescribed in paragraph (m) (3) of this section.

(n) *Appendices.* (1) Appendices A, B, C, D, and E to this section are incorporated as part of this section and the contents of these Appendices are mandatory.

(2) Appendices F and G to this section are informational and are not intended to create any additional obligations not

otherwise imposed or to detract from any existing obligations.

(o) *Exemptions.* Paragraphs (c) through (n) of this section shall not apply to employers engaged in oil and gas well drilling and servicing operations.

(p) *Startup date.* Baseline audiograms required by paragraph (g) of this section shall be completed by March 1, 1984.

* * * * *

Appendix A: Noise Exposure Computation

This Appendix is Mandatory

I. Computation of Employee Noise Exposure

(1) Noise dose is computed using Table G–16a as follows:

(i) When the sound level, L, is constant over the entire work shift, the noise dose, D, in percent, is given by: D=100 C/T where C is the total length of the work day, in hours, and T is the reference duration corresponding to the measured sound level, L, as given in Table G–16a or by the formula shown as a footnote to that table.

(ii) When the workshift noise exposure is composed of two or more periods of noise at different levels, the total noise dose over the work day is given by:

$D=100\ (C_1/T_1+C_2/T_2+\ldots+C_n/T_n)$,

where C_n indicates the total time of exposure at a specific noise level, and T_n indicates the reference duration for that level as given by Table G–16a.

(2) The eight-hour time-weighted average sound level (TWA), in decibels, may be computed from the dose, in percent, by means of the formula: $TWA=16.61\ \log_{10}(D/100)+90$. For an eight-hour workshift with the noise level constant over the entire shift, the TWA is equal to the measured sound level.

(3) A table relating dose and TWA is given in Section II.

TABLE G–16a

A-weighted sound level, L (decibel)	Reference duration, T (hour)
80	32
81	27.9
82	24.3
83	21.1
84	16.4
85	[illegible]
86	13.9
87	12.1
88	10.6
89	[illegible]
90	8
91	7.0
92	6.1
93	5.3
94	[illegible]
95	[illegible]
96	3.5
97	[illegible]
98	[illegible]
99	2.3
100	[illegible]
101	1.7
102	1.5
103	1.3
104	1.1
105	1
106	[illegible]

TABLE G–16a—Continued

A-weighted sound level, L (decibel)	Reference duration, T (hour)
107	0.76
108	0.66
109	0.57
110	0.5
111	0.44
112	0.38
113	0.33
114	0.29
115	0.25
116	0.22
117	0.19
118	0.16
119	0.14
120	0.125
121	0.11
122	0.095
123	0.082
124	0.072
125	0.063
126	0.054
127	0.047
128	0.041
129	0.036
130	0.031

In the above table the reference duration, T, is computed by

$$T=\frac{8}{2^{(L-90)/5}}$$

where L is the measured A-weighted sound level.

II. Conversion Between "Dose" and "8-Hour Time-Weighted Average" Sound Level

Compliance with paragraphs (c)–(r) of this regulation is determined by the amount of exposure to noise in the workplace. The amount of such exposure is usually measured with an audiodosimeter which gives a readout in terms of "dose." In order to better understand the requirements of the amendment, dosimeter readings can be converted to an "8-hour time-weighted average sound level." (TWA).

In order to convert the reading of a dosimeter into TWA, see Table A–1, below. This table applies to dosimeters that are set by the manufacturer to calculate dose or percent exposure according to the relationships in Table G–16a. So, for example, a dose of 91 percent over an eight hour day results in a TWA of 89.3 dB, and, a dose of 50 percent corresponds to a TWA of 85 dB.

If the dose as read on the dosimeter is less than or greater than the values found in Table A–1, the TWA may be calculated by using the formula: $TWA=16.61\ \log_{10}(D/100)+90$ where TWA=8-hour time-weighted average sound level and D=accumulated dose in percent exposure.

TABLE A–1.—CONVERSION FROM "PERCENT NOISE EXPOSURE" OR "DOSE" TO "8-HOUR TIME-WEIGHTED AVERAGE SOUND LEVEL" (TWA)

Dose or percent noise exposure	TWA

Appendix B: Methods for Estimating the Adequacy of Hearing Protector Attenuation

This Appendix is Mandatory

For employees who have experienced a significant threshold shift, hearing protector attenuation must be sufficient to reduce employee exposure to a TWA of 85 dB. Employers must select one of the following methods by which to estimate the adequacy of hearing protector attenuation.

The most convenient method is the Noise Reduction Rating (NRR) developed by the Environmental Protection Agency (EPA). According to EPA regulation, the NRR must be shown on the hearing protector package. The NRR is then related to an individual worker's noise environment in order to assess the adequacy of the attenuation of a given hearing protector. This Appendix describes four methods of using the NRR to determine whether a particular hearing protector provides adequate protection within a given exposure environment. Selection among the four procedures is dependent upon the employer's noise measuring instruments.

Instead of using the NRR, employers may evaluate the adequacy of hearing protector attenuation by using one of the three methods developed by the National Institute for Occupational Safety and Health (NIOSH), which are described in the "List of Personal Hearing Protectors and Attenuation Data," HEW Publication No. 76–120, 1975, pages 21–37. These methods are known as NIOSH methods #1, #2 and #3. The NRR described below is a simplification of NIOSH method #2. The most complex method is NIOSH method #1, which is probably the most accurate method since it uses the largest amount of spectral information from the individual employee's noise environment. As in the case of the NRR method described below, if one of the NIOSH methods is used, the selected method must be applied to an individual's noise environment to assess the adequacy of the attenuation. Employers should be careful to take a sufficient number of measurements in order to achieve a representative sample for each time segment.

Note.—The employer must remember that calculated attenuation values reflect realistic values only to the extent that the protectors are properly fitted and worn.

When using the NRR to assess hearing protector adequacy, one of the following methods must be used:

(i) When using a dosimeter that is capable of C-weighted measurements:

(A) Obtain the employee's C-weighted dose for the entire workshift, and convert to TWA (see Appendix A, II).

(B) Subtract the NRR from the C-weighted TWA to obtain the estimated A-weighted TWA under the ear protector.

(ii) When using a dosimeter that is not capable of C-weighted measurements, the following method may be used:

(A) Convert the A-weighted dose to TWA (see Appendix A).

(B) Subtract 7 dB from the NRR.

(C) Subtract the remainder from the A-weighted TWA to obtain the estimated A-weighted TWA under the ear protector.

(iii) When using a sound level meter set to the A-weighting network:

(A) Obtain the employee's A-weighted TWA.

(B) Subtract 7 dB from the NRR, and subtract the remainder from the A-weighted TWA to obtain the estimated A-weighted TWA under the ear protector.

(iv) When using a sound level meter set on the C-weighting network:

(A) Obtain a representative sample of the C-weighted sound levels in the employee's environment.

(B) Subtract the NRR from the C-weighted average sound level to obtain the estimated A-weighted TWA under the ear protector.

(v) When using area monitoring procedures and a sound level meter set to the A-weighing network.

(A) Obtain a representative sound level for the area in question.

(B) Subtract 7 dB from the NRR and subtract the remainder from the A-weighted sound level for that area.

(vi) When using area monitoring procedures and a sound level meter set to the C-weighting network:

(A) Obtain a representative sound level for the area in question.

(B) Subtract the NRR from the C-weighted sound level for that area.

Appendix C: Audiometric Measuring Instruments

This Appendix is Mandatory

1. In the event that pulsed-tone audiometers are used, they shall have a tone on-time of at least 200 milliseconds.

2. Self-recording audiometers shall comply with the following requirements:

(A) The chart upon which the audiogram is traced shall have lines at positions corresponding to all multiples of 10 dB hearing level within the intensity range spanned by the audiometer. The lines shall be equally spaced and shall be separated by at least ¼ inch. Additional increments are optional. The audiogram pen tracings shall not exceed 2 dB in width.

(B) It shall be possible to set the stylus manually at the 10-dB increment lines for calibration purposes.

(C) The slewing rate for the audiometer attenuator shall not be more than 6 dB/sec except that an initial slewing rate greater than 6 dB/sec is permitted at the beginning of each new test frequency, but only until the second subject response.

(D) The audiometer shall remain at each required test frequency for 30 seconds (± 3 seconds). The audiogram shall be clearly marked at each change

of frequency and the actual frequency change of the audiometer shall not deviate from the frequency boundaries marked on the audiogram by more than ± 3 seconds.

(E) It must be possible at each test frequency to place a horizontal line segment parallel to the time axis on the audiogram, such that the audiometric tracing crosses the line segment at least six times at that test frequency. At each test frequency the threshold shall be the average of the midpoints of the tracing excursions.

Appendix D: Audiometric Test Rooms

This Appendix is Mandatory

Rooms used for audiometric testing shall not have background sound pressure levels exceeding those in Table D–1 when measured by equipment conforming at least to the Type 2 requirements of American National Standard Specification for Sound Level Meters, S1.4–1971 (R1976), and to the Class II requirements of American National Standard Specification for Octave, Half-Octave, and Third-Octave Band Filter Sets, S1.11–1971 (R1976).

TABLE D–1.—MAXIMUM ALLOWABLE OCTAVE-BAND SOUND PRESSURE LEVELS FOR AUDIOMETRIC TEST ROOMS

Octave-band center frequency (Hz)	500	1000	2000	4000	8000
Sound pressure level (dB)	40	40	47	57	62

Appendix E: Acoustic Calibration of Audiometers

This Appendix is Mandatory

Audiometer calibration shall be checked acoustically, at least annually, according to the procedures described in this Appendix. The equipment necessary to perform these measurements is a sound level meter, octave-band filter set, and a National Bureau of Standards 9A coupler. In making these measurements, the accuracy of the calibrating equipment shall be sufficient to determine that the audiometer is within the tolerances permitted by American Standard Specification for Audiometers, S3.6–1969.

(1) Sound Pressure Output Check

A. Place the earphone coupler over the microphone of the sound level meter and place the earphone on the coupler.

B. Set the audiometer's hearing threshold level (HTL) dial to 70 dB.

C. Measure the sound pressure level of the tones that each test frequency from 500 Hz through 6000 Hz for each earphone.

D. At each frequency the readout on the sound level meter should correspond to the levels in Table E–1 or Table E–2, as appropriate, for the type of earphone, in the column entitled "sound level meter reading."

(2) Linearity Check

A. With the earphone in place, set the frequency to 1000 Hz and the HTL dial on the audiometer to 70 dB.

B. Measure the sound levels in the coupler at each 10-dB decrement from 70 dB to 10 dB, noting the sound level meter reading at each setting.

C. For each 10-dB decrement on the audiometer the sound level meter should indicate a corresponding 10 dB decrease.

D. This measurement may be made electrically with a voltmeter connected to the earphone terminals.

(3) Tolerances

When any of the measured sound levels deviate from the levels in Table E–1 or Table E–2 by ± 3 dB at any test frequency between 500 and 3000 Hz, 4 dB at 4000 Hz, or 5 dB at 6000 Hz, an exhaustive calibration is advised. An exhaustive calibration is required if the deviations are greater than 10 dB at any test frequency.

TABLE E–1.—REFERENCE THRESHOLD LEVELS FOR TELEPHONICS—TDH–39 EARPHONES

Frequency, Hz	Reference threshold level for TDH–39 earphones, dB	Sound level meter reading, dB
500	11.5	81.5
1000	7	77
2000	8	79
3000	10	80
4000	9.5	79.5
6000	15.5	85.5

TABLE E–2.—REFERENCE THRESHOLD LEVELS FOR TELEPHONICS—TDH–49 EARPHONES

Frequency, Hz	Reference threshold level for TDH–49 earphones, dB	Sound level meter reading, dB
500	13.5	83.5
1000	7.5	77.5
2000	11	81.0
3000	9.5	79.5
4000	10.5	80.5
6000	13.5	83.5

Appendix F: Calculations and Application of Age Corrections to Audiograms

This Appendix Is Non-Mandatory

In determining whether a standard threshold shift has occurred, allowance may be made for the contribution of aging to the change in hearing level by adjusting the most recent audiogram. If the employer chooses to adjust the audiogram, the employer shall follow the procedure described below. This procedure and the age correction tables were developed by the National Institute for Occupational Safety and Health in the criteria document entitled "Criteria for a Recommended Standard . . . Occupational Exposure to Noise," ((HSM)–11001).

For each audiometric test frequency:

(i) Determine from Tables F–1 or F–2 the age correction values for the employee by:

(A) Finding the age at which the most recent audiogram was taken and recording the corresponding values of age corrections at 1000 Hz through 6000 Hz;

(B) Finding the age at which the baseline audiogram was taken and recording the corresponding values of age corrections at 1000 Hz through 6000 Hz.

(ii) Subtract the values found in step (i)(A) from the value found in step (i)(B).

(iii) The differences calculated in step (ii) represented that portion of the change in hearing that may be due to aging.

Example: Employee is a 32-year-old male. The audiometric history for his right ear is shown in decibels below.

Employee's age	Audiometric test frequency (Hz)				
	1000	2000	3000	4000	6000
26	10	5	5	10	5
*27	0	0	0	5	5
28	0	0	0	10	5
29	5	0	5	15	5
30	0	5	10	20	10
31	5	10	20	15	15
*32	5	10	10	25	20

The audiogram at age 27 is considered the baseline since it shows the best hearing threshold levels. Asterisks have been used to identify the baseline and most recent audiogram. A threshold shift of 20 dB exists at 4000 Hz between the audiograms taken at ages 27 and 32.

(The threshold shift is computed by subtracting the hearing threshold at age 27, which was 5, from the hearing threshold at age 32, which is 25). A retest audiogram has confirmed this shift. The contribution of aging to this change in hearing may be estimated in the following manner:

Go to Table F–1 and find the age correction values (in dB) for 4000 Hz at age 27 and age 32.

	Frequency (Hz)				
	1000	2000	3000	4000	6000
Age 26	4	5	7	10	14
Age 27	5	4	8	7	11
Difference	1	1 —	1	3	3

The difference represents the amount of hearing loss that may be attributed to aging in the time period between the baseline audiogram and the most recent audiogram. In this example, the difference at 4000 Hz is 3 dB. This value is subtracted from the hearing level at 4000 Hz, which in the most recent audiogram is 25, yielding 22 after adjustment. Then the hearing threshold in the baseline audiogram at 4000 Hz (5) is subtracted from the adjusted annual audiogram hearing threshold at 4000 Hz (22). Thus the age-corrected threshold shift would be 17 dB (as opposed to a threshold shift of 20 dB without age correction).

TABLE F–1.—AGE CORRECTION VALUES IN DECIBELS FOR MALES

Years	Audiometric Test Frequencies (Hz)				
	1000	2000	3000	4000	6000
20 or younger	5	3	4	5	8
21	5	3	4	5	8
22	5	3	4	5	8
23	5	3	4	6	9
24	5	3	5	6	9
25	5	3	5	7	10
26	5	4	5	7	10
27	5	4	6	7	11

Appendix G: Monitoring Noise Levels Non-Mandatory Informational Appendix

This appendix provides information to help employers comply with the noise monitoring obligations that are part of the hearing conservation amendment.

What is the purpose of noise monitoring?

This revised amendment requires that employees be placed in a hearing conservation program if they are exposed to average noise levels of 85 dB or greater during an 8 hour workday. In order to determine if exposures are at or above this level, it may be necessary to measure or monitor the actual noise levels in the workplace and to estimate the noise exposure or "dose" received by employees during the workday.

When is it necessary to implement a noise monitoring program?

It is not necessary for every employer to measure workplace noise. Noise monitoring or measuring must be conducted only when exposures are at or above 85 dB. Factors which suggest that noise exposures in the workplace may be at this level include employee complaints about the loudness of noise, indications that employees are losing their hearing, or noisy conditions which make normal conversation difficult. The employer should also consider any information available regarding noise emitted from specific machines. In addition, actual workplace noise measurements can suggest whether or not a monitoring program should be initiated.

How is noise measured?

Basically, there are two different instruments to measure noise exposures: the sound level meter and the dosimeter. A sound level meter is a device that measures the intensity of sound at a given moment. Since sound level meters provide a measure of sound intensity at only one point in time, it is generally necessary to take a number of measurements at different times during the day to estimate noise exposure over a workday. If noise levels fluctuate, the amount of time noise remains at each of the various measured levels must be determined.

To estimate employee noise exposures with a sound level meter it is also generally necessary to take several measurements at different locations within the workplace. After appropriate sound level meter readings are obtained, people sometimes draw "maps" of the sound levels within different areas of the workplace. By using a sound level "map" and information on employee locations throughout the day, estimates of individual exposure levels can be developed. This measurement method is generally referred to as *area* noise monitoring.

A dosimeter is like a sound level meter except that it stores sound level measurements and integrates these measurements over time, providing an average noise exposure reading for a given period of time, such as an 8-hour workday. With a dosimeter, a microphone is attached to the employee's clothing and the exposure measurement is simply read at the end of the desired time period. A reader may be used to read-out the dosimeter's measurements. Since the dosimeter is worn by the employee, it measures noise levels in those locations in which the employee travels. A sound level meter can also be positioned within the immediate vicinity of the exposed worker to obtain an individual exposure estimate. Such procedures are generally referred to as *personal* noise monitoring.

Area monitoring can be used to estimate noise exposure when the noise levels are relatively constant and employees are not mobile. In workplaces where employees move about in different areas or where the noise intensity tends to fluctuate over time, noise exposure is generally more accurately estimated by the personal monitoring approach.

In situations where personal monitoring is appropriate, proper positioning of the microphone is necessary to obtain accurate measurements. With a dosimeter, the microphone is generally located on the shoulder and remains in that position for the entire workday. With a sound level meter, the microphone is stationed near the employee's head, and the instrument is usually held by an individual who follows the employee as he or she moves about.

Manufacturer's instructions, contained in dosimeter and sound level meter operating manuals, should be followed for calibration and maintenance. To ensure accurate results, it is considered good professional practice to calibrate instruments before and after each use.

How often is it necessary to monitor noise levels?

The amendment requires that when there are significant changes in machinery or production processes that may result in increased noise levels, remonitoring must be conducted to determine whether additional employees need to be included in the hearing conservation program. Many companies choose to remonitor periodically (once every year or two) to ensure that all exposed employees are included in their hearing conservation programs.

Where can equipment and technical advice be obtained?

Noise monitoring equipment may be either purchased or rented. Sound level meters cost about $500 to $1,000, while dosimeters range in price from about $750 to $1,500. Smaller companies may find it more economical to rent equipment rather than to purchase it. Names of equipment suppliers may be found in the telephone book (Yellow Pages) under headings such as: "Safety Equipment," "Industrial Hygiene," or "Engineers-Acoustical." In addition to providing information on obtaining noise monitoring equipment, many companies and individuals included under such listings can provide professional advice on how to conduct a valid noise monitoring program. Some audiological testing firms and industrial hygiene firms also provide noise monitoring services. Universities with audiology, industrial hygiene, or acoustical engineering departments may also provide information or may be able to help employers meet their obligations under this amendment.

Free, on-site assistance may be obtained from OSHA-supported state and private consultation organizations. These safety and health consultative entities generally give priority to the needs of small businesses. See the attached directory for a listing of organizations to contact for aid.

OSHA Onsite Consultation Project Directory

State	Office and address	Contact
Alabama	Alabama Consultation Program, P.O. Box 6005, University, Alabama 35486	(205) 348-7136, Mr. William Weems, Director.
Alaska	State of Alaska, Department of Labor, Occupational Safety & Health, 3301 Eagle St., Pouch 7-022, Anchorage, Alaska 99510.	(907) 276-5013, Mr. Stan Godsoe, Project Manager (Air Mail).
American Samoa	Service not yet available.

Appendix H: Availability of Referenced Documents

Paragraphs (c) through (o) of 29 CFR 1910.95 and the accompanying appendices contain provisions which incorporate publications by reference. Generally, the publications provide criteria for instruments to be used in monitoring and audiometric testing. These criteria are intended to be mandatory when so indicated in the applicable paragraphs of Section 1910.95 and appendices.

It should be noted that OSHA does not require that employers purchase a copy of the referenced publications. Employers, however, may desire to obtain a copy of the referenced publications for their own information.

The designation of the paragraph of the standard in which the referenced publications appear, the titles of the publications, and the availability of the publications are as follows:

Paragraph designation	Referenced publication	Available from—
Appendix B	"List of Personal Hearing Protectors and Attenuation Data," HEW Pub. No. 76-120, 1975. NTIS-PB257461.	National Technical Information Service, Port Royal Road, Springfield, VA 22161.
Appendix D	"Specification for Sound Level Meters," S1.4-1971 (R1976).	American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018.
§ 1910.95(h)(2), appendix E	"Specifications for Audiometers," S3.6-1969.	American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018.
Appendix D	"Specification for Octave, Half-Octave and Third-Octave Band Filter Sets," S1.11-1971 (R1976).	Back Numbers Department, Dept. STD, American Institute of Physics, 333 E. 45th St., New York, NY 10017; American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018.

The referenced publications (or a microfiche of the publications) are available for review at many universities and public libraries throughout the country. These publications may also be examined at the OSHA Technical Data Center, Room N2439, United States Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, (202) 523–9700 or at any OSHA Regional Office (see telephone directories under United States Government—Labor Department).

Appendix I: Definitions

These definitions apply to the following terms as used in paragraphs (c) through (n) of 29 CFR 1910.95.

Action level—An 8-hour time-weighted average of 85 decibels measured on the A-scale, slow response, or equivalently, a dose of fifty percent.

Audiogram—A chart, graph, or table resulting from an audiometric test showing an individual's hearing threshold levels as a function of frequency.

Audiologist—A professional, specializing in the study and rehabilitation of hearing, who is certified by the American Speech-Language-Hearing Association or licensed by a state board of examiners.

Baseline audiogram—The audiogram against which future audiograms are compared.

Criterion sound level—A sound level of 90 decibels.

Decibel (dB)—Unit of measurement of sound level.

Hertz (Hz)—Unit of measurement of frequency, numerically equal to cycles per second.

Medical pathology—A disorder or disease. For purposes of this regulation, a condition or disease affecting the ear, which should be treated by a physician specialist.

Noise dose—The ratio, expressed as a percentage, of (1) the time integral, over a stated time or event, of the 0.6 power of the measured SLOW exponential time-averaged, squared A-weighted sound pressure and (2) the product of the criterion duration (8 hours) and the 0.6 power of the squared sound pressure corresponding to the criterion sound level (90 dB).

Noise dosimeter—An instrument that integrates a function of sound pressure over a period of time in such a manner that it directly indicates a noise dose.

Otolaryngologist—A physician specializing in diagnosis and treatment of disorders of the ear, nose and throat.

Representative exposure—Measurements of an employee's noise dose or 8-hour time-weighted average sound level that the employers deem to be representative of the exposures of other employees in the workplace.

Sound level—Ten times the common logarithm of the ratio of the square of the measured A-weighted sound pressure to the square of the standard reference pressure of 20 micropascals. Unit: decibels (dB). For use with this regulation, SLOW time response, in accordance with ANSI S1.4–1971 (R1976), is required.

Sound level meter—An instrument for the measurement of sound level.

Time-weighted average sound level—That sound level, which if constant over an 8-hour exposure, would result in the same noise dose as is measured.

Part III

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Coal Mining and Reclamation Operations; Initial and Permanent Regulatory Programs; Use of Explosives

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 715, 780, 816, and 817

Surface Coal Mining and Reclamation Operations; Initial and Permanent Regulatory Programs; Use of Explosives

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is amending its rules governing the use of explosives. The rules revise the requirements relating to blasting standards, preblasting surveys, airblast, ground vibration and flyrock, monitoring of blasts, and blast design. Final rules are adopted for the initial regulatory program, and the permanent regulatory program. The rules govern the blasts associated with surface and underground mines. The effect of the rule is to provide increased flexibility to design professionals to meet the regulatory performance standards contained in this rule.

EFFECTIVE DATE: April 7, 1983.

FOR FURTHER INFORMATION CONTACT: Arthur Anderson, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Ave., NW., Washington, DC 20240; 202–343–5954.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Discussion of Rules Adopted and Responses to Comments.
III. Procedural Matters.

I. Background.

The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (the Act), sets forth initial regulatory procedures, permit requirements, and performance standards in Sections 502(c), 507(g), and 515(b)(15), respectively, governing the use of explosives in surface coal mining operations. Section 516 provides performance standards governing the surface effects of underground mining. Rules implementing those sections were published by OSM at 42 FR 62639 (December 13, 1977) under the initial regulatory program (30 CFR 715.19) and at 44 FR 14901 (March 13, 1979) under the permanent regulatory program (30 CFR 780.13, 816.11, 816.61–816.68, 817.11, and 817.61–817.68).

In litigation over the initial program rules, the U.S. Court of Appeals for the District of Columbia issued a decision on May 2, 1980. *In re: Surface Mining Regulation Litigation*, 627 F. 2d 1346 (D.C. Cir. 1980). That decision addressed two blasting issues: (1) The 1,000-foot limitation on blasting near houses, schools, and other buildings in § 715.19(e)(1)(vii), and (2) the 1.0-inch-per-second limitation on particle velocity produced by blasting in § 715.19(e)(2)(ii). The court ruled that the 1,000-foot limit was not authorized by Sections 522(e) (4) and (5) of the Act and that the 1.0-inch-per-second vibration limit was arbitrary and capricious because it lacked technical support.

On May 16, 1980, in litigation over the permanent program rules, the U.S. District Court for the District of Columbia remanded the 1,000-foot limitation on blasting in § 816.65(f). *In re: Permanent Surface Mining Regulation Litigation*, No. 79-1144 (D.D.C. May 16, 1980). The court did not invalidate the 1.0-inch-per-second vibration limitation, but at footnote 19 in its opinion the court recognized that the court of appeals had invalidated a similar provision in § 715.19(e)(2)(ii) in the initial program rules. To implement the court's decision, §§ 816.65(f) and 817.65(f) were suspended by notice at 45 FR 51549 (August 4, 1980).

In response to these decisions, amendments to the blasting rules were proposed at 46 FR 6982 (January 22, 1981). These proposed rules were later withdrawn, by notice at 46 FR 32455 (June 23, 1981) to allow OSM to undertake a more general review of all the blasting rules under the permanent regulatory program. On March 24, 1982, OSM proposed to amend many of the rules governing the use of explosives under the initial and permanent regulatory programs (47 FR 12760).

OSM today adopts many of the rules proposed on March 24, 1982. Final rules are adopted with regard to the use of explosives under the initial regulatory program (§ 715.19). Final rules are also adopted under the permanent regulatory program for surface (§§ 816.11 and 816.61–816.68) and underground (§§ 817.11 and 817.61–817.68) mines and with regard to blasting plans (§ 780.13) for surface mines.

II. Discussion of Rules Adopted and Responses to Comments

OSM received numerous comments on the proposed rules. Although public hearings were scheduled to be held in Washington, D.C.; Pittsburgh, Pa.; and Denver, Colo., no one requested the opportunity to speak at any of these hearings; therefore they were not held. Two requests for public meetings were filed. Meetings were held on June 9, 1982, in Washington, D.C., and on May 4, 1982, in Indianapolis, Ind. Summaries of each of those meetings have been included in the Administrative Record.

The rules adopted today place increased responsibility on design professionals, such as certified blasters and blast vibration experts, in establishing the design standards to meet the regulatory performance standards contained herein. Those operators staying within the approved limits, complying with approved performance standards, and maintaining a responsible relationship with surrounding residents will be able to operate without additional constraint.

Technical References. In promulgating the previous permanent program rules governing blasting, OSM analyzed the technical references which were available through the fall of 1978. Those materials are listed at 44 FR 15179. OSM relied upon those references, as well as the following additional and, in some cases, more recent technical documents in the development of these revised rules:

Bollinger, G. A., 1971, Blast vibration analysis: Southern Illinois University Press, Carbondale and Edwardsville, 132 pp.

Braile, L. W., Sexton, J. L., Martindale, K. W., and Chiang, C. S., 1982, Seismic wave generation and preparation from coal mine blasts at the Wright mine, Warrick County, Indiana: Prepared by Department of Geosciences and Center for Earthquake Engineering and Ground Motion Studies, Purdue University, for U.S. Office of Surface Mining under contract J6211205, 344 pp.

Section 715.19

OSM proposed three options for amending 30 CFR 715.19(e)(2), which contains those parts of the initial regulatory program governing ground vibration. OSM is adopting a hybrid of the three options.

Comments on these three options and the ground vibration rule adopted today are discussed later in this rulemaking in conjunction with the rules adopted at § 816.67(d).

In its proposed rule OSM neglected to propose a rule comparable to previous § 715.19(e)(2)(iii), which made the maximum peak-particle-velocity standard inapplicable to property inside the permit area owned or leased by the permittee. In order to correct this oversight, OSM is adopting a new rule at § 715.19(e)(2)(iii), which provides the same exemption as found in the new permanent program rules under § 816.67(e). Previous § 715.19(e)(3) has also been removed and incorporated into § 715.19(e)(2), and previous paragraph (e)(4) has been redesignated as paragraph (e)(3).

One commenter suggested that the rules governing flyrock proposed on March 24, 1982, at §§ 816.67(c) and 817.67(c) should be adopted under the initial regulatory program at Part 715 as well. The commenter pointed out that flyrock should be regulated under the initial regulatory program as well as under the permanent regulatory program. OSM declines to adopt such a change for several reasons. First, OSM believes that flyrock is already regulated by § 715.19(e)(2)(i). Second, the initial regulatory program is of such limited applicability at this time that OSM expects that such a rule would be of limited value. If a compelling reason for such a rule becomes evident, OSM may, at a later date, determine that it would be useful to propose an initial regulatory program flyrock rule.

Section 780.13

Blasting plans outline the procedures the operator intends to follow in conducting blasting operations. Section 780.13 of 30 CFR requires each application for a permit for a surface coal mine to have a blasting plan, sets standards for blasting plans, and details the information which is to be submitted along with the permit application.

Section 780.13(a) requires the operator to demonstrate in the blasting plan that the operator will achieve the applicable performance standards. In the blasting plan the operator will explain how the performance standards set out in §§ 816.61–816.68 will be achieved. The plan will include information setting the applicable ground vibration and airblast limits and justifying the use of these limits. These limits are discussed more fully in the preamble in relation to § 816.67. The plan must also discuss steps to be taken to control the adverse effects of blasting operations.

Some commenters believed that the blasting plan requires excessive detail in descriptions of limits to be met in protecting structures and the public from damage. Section 507(g) of the Act mandates that an applicant outline in the application the procedures and standards to be used to meet the environmental protection performance standards of Section 515(b)(15) of the Act. Therefore OSM believes the requirement for explanations of the applicable ground vibration and airblast levels is justified.

A commenter requested clarification of the information and explanations required in a blasting plan and suggested that OSM should require identification of sensitive areas, and "worst case scenarios." The intent of these rules is to provide nationwide requirements for blasting plans as required by the Act. OSM does not believe that it is necessary specifically to require identification of sensitive areas and worst case scenarios in the blasting plan. The blasting plan must be sufficient in any case to demonstrate compliance with the applicable performance standards and the blasting plan may include such information as appropriate. Additionally, this information may be required under a State program in every case if deemed appropriate by the State regulatory authority. The commenter also felt that an explanation of how the applicant will meet the performance standards should be required. Such an explanation is required by the last sentence of § 780.13(a).

A commenter objected to the fact that no blasting plan is required for underground operations. Because of the generally limited extent of surface blasting associated with the underground mining, OSM does not believe it is necessary to require a blasting plan for underground operations. OSM's existing rules do not require blasting plans for underground mines nor has OSM proposed to require such plans. Accordingly, no requirement for an underground mining blasting plan is adopted today. However, the rules adopted today do require the submission of some information (specifically blast designs) prior to certain surface blasts incidental to underground mining. See the discussion accompanying § 817.61(d).

A commenter recommended that OSM require the inclusion in the blasting plan of details such as: (1) The names of certified blasters who will be supervising blasting, (2) lists of structures near blast sites, and (3) a copy of the blasting schedule in the blasting plan. OSM acknowledges that this information could be useful in some instances, but believes that this information is not always necessary to decide whether to issue a permit. In any event, this information will become available prior to blasting. (See §§ 816.61, 817.61, 816.68 and 817.68 for information on certified blasters and lists of structures; §§ 816.64 and 817.64, on blasting schedules; and § 779.24(d), on location of buildings and identification of their current use.) Moreover, regulatory authorities who desire additional information incidental to permitting may require it.

Commenters indicated concern about the lack of a requirement in § 780.13(a) for a certified blast design in all blasting plans and the identification of a certified blaster who is in charge of all blast plans. As to the latter comment, a certified blaster is required for all blasting operations. Identification of a specific certified blaster in the blasting plan would not influence the regulatory authority's decision to issue a permit and would unnecessarily reduce operator flexibility.

OSM rejects the suggestion that a certified blast design be required in all blasting plans. Such detail is unnecessary to assure safe blasting and is unnecessary for the regulatory authority to determine that the blasting will be conducted in accordance with the performance standards. It would be difficult or impossible to require and review blast design for every blast

which will occur. Some conditions are unknown at the time of permitting, and operators need flexibility to design blasts for conditions as they are encountered. Absence of a certified blast design in the blasting plan will not allow unrestricted blasting. The blasting plan must show the general approach to all blasts and how all performance standards set out in §§ 816.67 and 817.67 will be met. In addition, for some sensitive areas more complete analyses, including blast designs, must be submitted as required by new § 816.61(d).

Comments were received regarding OSM's proposed change to allow for blasting plan submissions at a time other than permit application. Commenters were concerned that this would limit the opportunity to comment on blasting plans. No such result is intended. As discussed below, OSM intends to allow later submission of certain blast designs, but these will not be considered to be part of the blasting plan. Although regulatory authorities could receive comments on blast designs, the purpose of having blast designs is largely served by their advance preparation and submission to the regulatory authority. Such submissions increase operator accountability and demonstrate compliance with performance standards. As indicated above, OSM does not believe that submission of detailed designs is necessary in the permit application to assure safe blasting in accordance with the performance standards.

Section 780.13(b), which has been adopted as proposed, provides that each application must contain a description of any system to be used to monitor compliance with the standards of § 816.67, including the type, capability, and sensitivity of any blast monitoring equipment and proposed procedures and locations of monitoring.

One commenter objected to listing capability and sensitivity of blast monitoring equipment in the description of the monitoring system to be used. OSM believes that this is important in assessing control of adverse effects, since the degree of sophistication and complexity of instruments may result in additional data by which to evaluate the damage potential. Seismographs can vary in type, capabilities, complexity of data records, and analytical ability. Therefore, the monitoring system used, including capabilities and sensitivities, may assist the regulatory authority in setting allowable limits for each blasting plan. For instance, operators using instruments with sensitivity to low frequency airblast (concussion) could be given different airblast limits than operators using less sensitive equipment. This could occur because one instrument's range will include more sound levels, whereas a less sensitive instrument might ignore some low frequency noise. It is also important for the regulatory authority to know the type and sensitivity of equipment in order to evaluate the information it receives.

Commenters objected to the proposed deletion (from OSM's previous rules) of the requirement that an operator specify the procedures by which an operator will meet recordkeeping requirements. OSM proposed to delete the list of data from § 780.13(b) because that data is required by § 816.69. OSM believes that the recordkeeping procedures set out in §§ 816.68 and 817.68 are sufficient to ensure that the records are complete and adequately kept. A further requirement that the operator indicate how the operator intends to keep such records would be unnecessarily repetitive. The rule adopted today, at § 780.13(a), continues to require an explanation of how the operator intends to comply with § 816.68. All that has been removed is the specific list of information the blasting plan must include. Therefore, Section 507(g) is satisfied without regulatory redundancy. False or inaccurate recording of information will be handled through enforcement of § 816.68 or § 817.68. Commenters raised questions about the ability of blasters to keep records without an adequate knowledge of terms. Knowledge of terms and the ability to keep records would be evaluated in the context of training, examination, and certification of blasters. (This is governed by 30 CFR Chapter VII, Subchapter M.) For permitting purposes, it should be sufficient to show that blasts will be conducted under the direction of certified blasters. Accordingly, OSM adopts no rule in Part 780 requiring operators to demonstrate a knowledge of blasting terminology prior to permitting. However, such a demonstration can be included as a facet of the certification program.

Commenters objected to deletion of previous § 780.13(f) requiring that the operator define what specific conditions might require deviations from blasting schedules. Control of all blasts should be under the cognizance of certified blasters who will be trained in recognizing and handling hazardous conditions. Trying to anticipate all potentially hazardous situations is nearly impossible since many may not occur or be discovered until after mining commences. Furthermore, variation of potentially dangerous conditions may warrant alternative action to that specified in a permit application.

Other commenters suggested that the description of the monitoring system required by proposed § 780.13(b) be optional or be submitted only if required by the regulatory authority. In proposing that portion of the rule OSM intended to leave discretion available to the regulatory authority under §§ 816.67(d)(1), (2), and (4) as to whether monitoring systems will be used or if an equation could be used instead. OSM did not intend to require monitoring of all blasts nor monitoring where none would be needed.

OSM has slightly reworded the final rule in §§ 816.67(d) and 817.67(d), adopting the suggestion offered by one of the commenters so as to avoid the appearance that monitoring is mandatory in all cases. (No seismic monitoring is required if ground vibration limits are set using the scale-distance equation of § 816.67(d)(3) and 817.67(d)(3).) However, if a monitoring system will be used, the permit application must contain its description.

OSM's proposed language at § 780.13(c) required additional information on blasts to be conducted within 1,000 feet of certain structures or 500 feet of underground mines. Several commenters objected to inclusion of regulatory provisions which limit blasting within 1,000 feet of certain structures and 500 feet of underground mines. OSM believes that such provisions are necessary and that ensuring proper blast design is important in these sensitive areas. If properly implemented, blast design will prevent damage to structures or underground mines. In addition, requiring blasting operations within 500 feet of active underground mines to be approved by both the regulatory authorities concerned with surface mining regulations and with the health and safety of underground miners will help guard against potential hazards of such blasting to underground miners.

A commenter recommended limiting the applicability of the 500-foot provision from underground mines to active mines, excluding abandoned workings. OSM has accepted this comment with respect to the joint approval requirements included in revised § 780.13(c). The language of the proposed rule has been revised to require the approval of the State and Federal regulatory authorities for health and safety of mines. Other mine safety and health agencies as well as MSHA

may be involved since many States have counterpart agencies with responsibility for health and safety of mines. The language adopted tracks the requirement set forth in Section 515(b)(12)(A) of the Act. There are no specific underground mining activities associated with abandoned underground mines that must be coordinated with surface mining activities. If an abandoned underground mine becomes active, the requirement for joint approval of the blasting would immediately become effective. This change does not preclude MSHA involvement, but provides for joint approvals by all agencies involved. OSM does not agree with the commenter with respect to limiting the submission of blast designs to active underground operations. This comment is further discussed below under § 816.61(d).

Blast design need not be part of the permitting requirements; therefore the requirement of blast designs has been moved into the performance standards section. These designs require a great deal of factual information which may not be developed until mining approaches these critical areas. Accordingly, while OSM has decided to adopt these blast design requirements, they will be included in the performance standards for blasting, rather than permitting. These rules and comments thereto are discussed below at §§ 816.61 and 817.61. OSM also hopes that this restructuring of the rule will eliminate any concern with respect to the performance standards and the unsuitability criteria of Section 522 of the Act. The provision for blast designs when blasting close to certain structures or underground mines is not a prohibition of mining, as previously found invalid by *In re: Permanent Surface Mining Regulation Litigation, supra.* Rather it is a requirement imposing additional standards where the greatest potential hazards exist. The requirement for additional compliance data when blasting within these limits is based on Sections 515(b)(12), 515(b)(15) and 516 of the Act (See also Roth and others, 1977).

Also in the above case, industry challenged OSM's authority to issue regulations governing blasting. OSM believes that it has such authority based upon the reasoning set forth in its brief to the U.S. Court of Appeals for the District of Columbia in the above case.

Section 816.11. Signs and markers. OSM proposed to delete the requirements of § 816.11(f) relating to blasting signs because its provisions would be duplicative of those in proposed §§ 816.66 and 817.66 or duplicative of rules of the Mine Safety and Health Administration. OSM is adopting these changes as proposed.

Commenters objected to the deletion of § 816.11(f) because, according to them, it was necessary to meet the requirements of Section 515(b)(15). OSM believes that the provision for flagging charged holes is chiefly designed to protect mine workers and it would be duplicative to require a second flagging provision in OSM's rules. The Mine Safety and Health Administration rules are adequate to protect mine workers and will also provide protection of other persons who may enter the property. § 816.61(a) requires compliance with all applicable State and Federal rules, which include those set by MSHA at 30 CFR 77.1303(g).

Section 816.61. Use of explosives: General requirements. OSM proposed to change the phrase "person who conducts surface mining activities" to "operator" in this section and throughout the blasting rules. OSM received no negative comments on this change. Accordingly, the change has been adopted as proposed.

Section 816.61(a)

Section 816.61(a) requires operators to comply with all State and Federal laws governing the use of explosives. One commenter indicated that proposed § 816.61(a) gave the regulatory authority power to enforce laws and regulations beyond those authorized by the Act. Section 515(b)(15) requires that general performance standards ensure that explosives are used in compliance with existing State and Federal law. In addition, provisions of Section 515(b)(15)(A) through (E) authorize requirements that are supplemental to existing law. Thus, OSM has the authority under the Act to require compliance with other State or Federal laws regarding the use of explosives in conjunction with any applicable regulations implementing those laws. This is not a change from OSM's existing rule or its existing authority.

Section 816.61(b)

OSM proposed no change to § 816.61(b). That section, which requires a schedule for blasts that use more than 5 pounds of explosives, is adopted without change. The blasting schedule requirements are discussed below at § 816.64.

Section 816.61(c)

OSM proposed in § 816.61(c) to retain the requirement that a blaster certified under Subchapter M of 30 CFR Chapter VII be responsible for all blasting operations. Among those activities cited both in existing § 816.61(c) and in the proposed rule were transportation, storage, and destruction of explosives within the permit area. Commenters suggested deleting transportation, storage, and destruction of explosives from the identified activities. Section 515(b)(15) of the Act requires that explosives be used in accordance with existing State and Federal laws; OMS believes that this includes the transportation, storage, and destruction of explosives. This section was revised in the blaster certification rule which was issued together with this final rule. (See 48 FR 9486, March 4, 1983.)

Section 816.61(d)

OSM proposed in § 780.13(c) to require designs for blasts to be conducted within 1,000 feet of buildings used as public buildings, dwellings, schools, community or institutional buildings or within 500 feet of an underground mine, to be included in the permit application. As discussed above, OSM has determined that this information is more properly obtained in conjunction with the performance at individual blasting operations and is therefore adopted as part of the performance standards for blasting in new § 816.61(d). Operators may continue to submit blast designs as part of the permit application, but may also do so at a later time prior to the blast as approved by the regulatory authority.

This new § 816.61(d) requires that additional design information must be provided when blasting will be conducted within 1,000 feet of any building used as a dwelling, public building, school, or community or institutional building or within 500 feet of an underground mine. Some commenters felt that the requirement that operators submit typical blast designs within 1,000 feet of buildings or 500 feet of underground mines was prohibited according to Judge Flannery's decision. *In re: Permanent Surface Mining Regulation Litigation, supra.* These commenters also felt that a typical design requirement would be unnecessary and is irrelevant.

OSM disagrees. As described above, Judge Flannery's decision struck down OSM's attempt to prohibit blasting within these areas. The rule adopted today does not prohibit blasting within 1,000 feet of buildings or 500 feet of underground mines. Rather it requires the operator to take extra steps in these areas to help ensure the prevention of damage. In this context, blast designs can be a useful tool. They assure adequate planning and, together with

the required direction by a certified blaster, ensure proper implementation. They allow regulatory authority involvement if necessary and provide a record if problems should occur.

The rule requires that the operator submit information outlining specific precautions to be taken and criteria to be implemented. Sketches of drill patterns, delay periods, and decking and the type and amount of explosives to be used, critical dimensions, and the location and general description of structures to be protected will be submitted. Thus, where the damage potential is highest, the regulatory authority will have the greatest information to ensure adequate protection.

The 1,000-foot distance has been selected so that the operator is alerted that special precautions are necessary to prevent property damage and personal injury when conducting blasting operations within this distance. The blast design required when blasting within this area: (1) Provides a preblasting record of the blast design, (2) provides notification to the regulatory authority so that monitoring may be scheduled if appropriate, and (3) ensures that a certified blaster has developed a specific blast design for such blasting. The requirement that a certified blaster prepare and sign the design imposes on the blaster the responsibility for designing the blast in a responsible manner. It also assures that a competent professional has designed the blast.

A commenter recommended limiting the 500-foot provision from underground mines to active mines, excluding abandoned and collapsed workings. The blast design requirement provides for extra protection when blasting near underground mines and recognizes the sensitivity of *all* these structures in accordance with Section 515(b)(12) of the Act.

Other commenters suggested changing the proposed requirement for "specific" blast designs to "standard" or "typical" designs to indicate the acceptability of a typical engineering design solution rather than submitting a series of specific designs and later amending these based on site-specific conditions encountered. Although the words "standard" or "typical" are insufficient to tie the design to the specific blast, OSM believes that the intent of this section will be preserved by using the term "anticipated" rather than "specific." Using the term "anticipated" will allow operators the flexibility to change the designs based on unexpected conditions encountered at particular sites without having to resubmit the designs to the regulatory authority. To the extent a single design is intended to be used on more than one occasion, it need not be submitted more than once, although each blast for which it is used should be identified.

Some commenters believed that the blast design requirement would be duplicative of the record required by § 816.68. OSM, however, believes that both are important; one is necessary for implementing the blast properly, and the other for postblast analysis. As in other professions, the use of a detailed design better ensures its completion. OSM recognizes that formal submission of written blast design is more stringent than other operating practices, but believes that appropriate additional protection will be afforded by such submissions, particularly when mining operations are conducted in residential or inhabited areas.

One commenter objected to the provision in proposed § 780.13(c)(2), that a blast design may be submitted at some time after the initial permit application, because the public may not be afforded adequate participation. OSM believes that the blast design is best submitted at the time when an area is ready to be mined. The rule, adopted in § 816.61(d)(2), allows the regulatory authority to specify a particular time for design submittal. The intent of the design is not primarily for public or regulatory review; rather it serves as a tool for the operator, blaster, and the blasting crew to understand the blast layout and implementation and for the regulatory authority to be advised of the blast parameters and timing, to initiate monitoring, if appropriate, and to ensure compliance with performance standards.

Proposed § 780.13(c)(5) would have allowed the regulatory authority to require a change in the blast design. This has been adopted in § 816.61(d)(5). Some commenters stated that no benefit would result from regulatory authority revision of blast design. OSM recognizes that the certified blaster must retain primary design responsibility. However, the regulatory authority should have the authority to require changes in the design if it believes that required performance standards will not be met.

Commenters felt that proposed § 780.13(c)(6), which required 30-day notice to property owners whose structures are within 1,000 feet of the blasting site, would conflict with § 816.64(b) which requires similar notice via blasting schedules. OSM agrees and has chosen not to adopt the requirement proposed at § 780.13(c)(6).

Section 816.62. Use of explosives: Preblasting survey.

Section 816.62(a)

A number of commenters requested specific time frames for requesting and conducting preblasting surveys. OSM had originally proposed to have notification of the availability of preblasting surveys distributed with the blasting schedule. In response to the comments, a provision has been added as § 816.62(a) which requires an operator, at least 30 days prior to the initiation of the blasting, to notify in writing residents within one-half mile of the permit area of the procedures for requesting a preblasting survey. This notice may be accompanied by a copy of the blasting schedule. The 30-day notice requirement is set to give a resident sufficient time to request a survey and an operator adequate time within which to complete the survey. This change has been made because OSM agrees with those commenters who believed that it is feasible for preblasting surveys to begin earlier than blasting schedules are set. Preblasting surveys may be conducted independently of the actual blasting schedules. Furthermore, the earlier such surveys are requested and completed, the more flexibility the operator will have in scheduling blasts.

Several commenters requested that time limits be placed on preparation of preblasting surveys and for the filing of disagreements. The rules as adopted require operators to provide property owners or residents at least 30 days of notice for requesting blasting surveys, and to promptly complete the survey upon request. Section 816.62(e) has been added to clarify that for those surveys that have been requested at least 10 days prior to the scheduled initiation of blasting, completion of the survey is required prior to the initiation of blasting. If a survey is requested less than 10 days prior to the scheduled initiation of blasting, the operator should take all reasonable measures to complete the survey in a timely manner. Individual regulatory authorities may impose additional time limits if appropriate for the region or locale. OSM has declined to attach a time limit within which to file disagreements. Such a time limit would not necessarily serve the regulatory process. However, it should be recognized that disagreements which are filed promptly or prior to the start of blasting will be more likely to be satisfactorily resolved between the operator and resident than those filed long after the report has been completed and blasting has begun.

Section 816.62(b)

Section 816.62(b) of the final rule allows the owner or resident of a manmade structure within one-half mile of the permit area to request the operator to provide a preblasting survey by writing directly to the operator or to the regulatory authority, who then will request the operator to conduct the survey. Although one commenter objected to this proposal, OSM believes it provides needed flexibility and could expedite the preblasting survey process. An operator is required to conduct the survey promptly and to promptly prepare the report.

Another commenter objected to the requirement for requesting surveys in writing, citing previous preambles as allowing verbal requests. Although the Act does not mandate written requests for a survey, it is the best method to provide control over the request and survey production process, without placing undue burdens on the regulatory authority manpower or on persons requesting surveys. Moreover, the written request will serve as a verification of the request and trigger action by the operator in timely conduct of the survey.

Updated surveys may be requested by the owner or resident at any time. If a structure is enlarged, renovated or modified after a survey is completed, an update to the preblasting survey must be performed if requested.

Other commenters believed that the second sentence of Paragaph (b) should be rewritten to clarify the roles of the requester, the operator, and the regulatory authority in requesting, initiating, and conducting preblasting surveys. OSM has accepted these comments and has edited the sentence slightly to help clarify its intent.

A commenter indicated the need to include owners of property such as pipelines, water wells, and utility towers in the list of those notified for preblasting surveys. OSM does not consider the language of the Act or the rules to limit the preblasting survey to residences or buildings. Section 515(b)(15)(E) of the Act refers to manmade structures and therefore includes any structure such as dams, utility stations, pipelines, etc.

Commenters suggested that the proposed system of preblasting surveys would not protect operators from false damage claims. As a solution they suggested operators should have the right to request preblasting surveys. The preblasting survey provisions of the Act only provide the owner or resident the opportunity to request preblasting surveys. If the operator wishes to conduct a survey, a specific request could be made to the owner of the particular structure. If concern of false claims persists where a property owner does not request or refuses to allow a preblasting survey to be conducted, the operator should ensure that the blasting is carefully monitored.

Commenters objected to the requirement of a preblasting survey within one-half mile of a "permit area" while other requirements, such as notification in proposed § 816.64(b)(2), were keyed to the "blasting site." All blasting sites are contained within a permit area. Section 515(b)(15)(E) of the Act offers every resident or owner within one-half mile of any portion of the permit area the opportunity for a preblasting survey. Therefore, OSM has adopted the regulatory provisions which gives all owners and residents within one-half mile of the permit area the opportunity to receive a preblasting survey before blasting begins on any portion of the permit area. OSM believes that any other regulation would conflict with the language of the Act.

Section 816.62(c)

Under § 816.62(c) as adopted, preblasting surveys will address the condition of the structure and document any preblasting damage or structural defects. Assessments of structures such as pipelines, cables, transmission lines, and wells, cisterns, and other water systems will be required, but such assessments may be limited to surface conditions and other readily available data. The person conducting the survey must give special attention to such water systems and should document all available data and determine whether such additional analysis is appropriate, based upon the significance of the water system, its vulnerability, and the availability of data.

Commenters objected to OSM's proposal to require that special attention be given to water wells because recent studies have proven that blast vibrations have little effect on water quantity and quality. Other commenters believed that assessment of quality and quantity of water is essential in surveys involving wells. Such information is believed important for both the user and the operator, since hydrologic impacts can be caused both by mining and blasting. The degree of detail may be determined for each case by the regulatory authority, depending on the nature and amount of water or structures involved. Based on these comments the last sentences of § 816.62(c) have been rewritten to clarify OSM's intent.

Section 816.62(d)

Section 816.62(d), which was proposed as § 816.62(c), requires the person completing the survey to sign it and provide a copy of the report to the regulatory authority and the person requesting the survey. This section also allows the person who requested the survey to note disagreement with the contents by submitting a written detailed description of the disagreement.

A commenter requested that the owner or resident sign the preblasting survey indicating concurrence. OSM declines to adopt such a requirement which it believes is unnecessary. OSM believes that allowing residents or property owners to file their disagreements is adequate.

OSM's proposed rules had specified that the original of the survey be provided to the regulatory authority. Commenters suggested that either a copy or the original be provided to the regulatory authority. OSM accepts this suggestion and has adopted appropriate regulatory language.

A commenter objected to the omission in the proposed rule of a mechanism to resolve disagreements in survey data. OSM declines to adopt this suggestion. OSM believes that the regulatory authority is responsible to insure that blasting surveys are complete and accurate. Further, the regulatory authority could direct that inadequate surveys be redone. However, OSM does not believe it necessary to require that any disputes be resolved by the regulatory authority, but only that the survey, including the description of disputed results, should serve as a record of the condition. It should be noted that the regulatory authority could take appropriate action to ensure that surveys are complete and if a serious potential danger exists could incorporate restrictions into the blasting plan and performance standards.

Section 816.64, Use of explosives: Blasting schedules. The title of new § 816.64 has been shortened to "Use of explosives: Blasting schedules" as was proposed.

Section 816.64(a)

OSM has revised § 816.64(a)(1) to clarify the fact that the regulatory authority may limit the timing of blasts, the area covered by a blasting schedule, and the sequence of blasting. The proposal only mentioned limitations pertaining to hours per day, times per day, or number of blasts per day. As adopted § 816.64(a)(1) will allow blasting only at times approved by the regulatory authority and announced in

the blasting schedule. The regulatory authority's decision restricting blasts must be justified on the basis of public health and safety or welfare. OSM has not adopted the proposed requirement that limitations on blasting be based on written submissions only. However, every determination must have an adequate basis.

OSM believes that prevention of excessive noise, especially in populated and residential areas, is within the ambit of "health and safety or welfare." Thus if noise from blasting will disrupt nearby residents, blasting may be limited to times which create the least discomfort. OSM believes that certain site-specific conditions, such as residential surroundings, may require prohibition of nighttime blasting. The final rule has been revised to require such prohibitions, if conditions warrant.

Several commenters objected to the proposed removal of regulations absolutely limiting the times of blasting (previous §§ 816.64(b)(2)(ii) and 816.65(a)) or the blasting area (previous § 816.64(b)(2)(i)). The old rules set absolute limits on the number of hours per day, nighttime blasting, and the size of an area covered under one blasting schedule. OSM recognizes that such limits may be useful under some conditions. For this reason OSM has decided to retain the requirement that blasting be conducted between sunrise and sunset. That requirement is contained in § 816.64(a)(2). The final rule provides flexibility to the regulatory authority to impose more restrictive time periods or to allow nighttime blasting based upon a showing by the operator that the public will be protected from adverse noise and other impacts.

OSM does not believe, however, that national limits on the size of the blasting area or number of hours of blasting per day are necessary. The final rule deletes the prior absolute constraints of 4-hour aggregate amount of blasting per day, and 300-acre maximum blasting areas. These standards presented limits which in some cases were arbitrary or too stringent for an operator to develop an effective schedule. Individual regulatory authorities may impose such restrictions or other more stringent limitations on a site-specific or statewide basis as appropriate. Restraints on the total time of blasting is more a function of planning. The blasting schedule is required, and adherence to the schedule is expected. The regulatory authority must review and approve the times for blasting in the blasting schedule. To make the schedule work, the operator must control production, loading, delivery, and other physical factors to meet his schedule. Where the regulatory authority determines that blasting should be limited, it should impose such limits. In the absence of such a determination, the operator must conform to the approved blasting schedule.

OSM had proposed to relax some restrictions governing unscheduled blasts. Commenters objected that the specific restrictions on unscheduled blasting were omitted. In some instances, such as unusual weather conditions or unavoidable delays, public or operator safety may dictate unscheduled detonations. Obviously, where public or operator safety so require, unscheduled blasting is appropriate. However, OSM has declined to adopt the portion of the proposal which would have allowed unscheduled blasts in nonemergency situations. Thus, while OSM recognizes that some blasting activities such as the construction of roads or the creation of faceups are nonperiodic, these nonemergency blasts should be planned, scheduled, and announced in advance in the blasting schedule. Thus, § 816.64(a)(3) allows unscheduled blasts only in emergency situations. However, schedule changes for nonemergency blasts may be made between 10 and 30 days before blasting begins under § 816.64(b)(3).

Because unscheduled blasts will only be conducted in emergency situations, OSM has adopted the requirement of notification of all residents within one-half mile of the blasting site when unscheduled blasts will occur by requiring that audible notification take place. This allows for more efficient notification of every one within one-half mile, and such notification can be provided more quickly. Commenters expressed concern that in emergencies such as adverse unexpected weather conditions it might be impossible to notify all residents orally. Accordingly, in these situations, audible signals may be used.

Some commenters suggested adding a provision for the resolution of disputes with regulatory authorities regarding blasting schedules.

Apparently, the commenter was concerned with possible problems caused by disapproval of proposed blasting schedules. OSM believes that no such provision is necessary. In making the determination to restrict blasting, the regulatory authority must determine that such limits are reasonable and necessary in order to protect the public health and safety and welfare. OSM believes that standard is sufficiently objective to minimize disputes.

Section 816.64(b)

OSM is adopting paragraph (b)(1) of § 816.64 and most of paragraph (b)(2) as proposed. These require newspaper publication of the blasting schedule between 10 and 30 days before blasting is to begin and set the requirements for distribution of the blasting schedule to local governments, public utilities, and residences within one-half mile of the blasting site. The term "blasting site" here is the area formed by the perimeter of the blast holes.

One commenter felt that publication of a blasting schedule 10–30 days in advance would be too difficult. He suggested that production schedules could not be set that far in advance. OSM believes it is important for operators to undertake sufficient planning and preparation so that they know their schedule with sufficient certainty to allow publication of schedules well in advance. Accordingly, OSM has adopted the requirements as proposed.

OSM had proposed that information on how to obtain preblasting surveys should be provided when copies of the blasting schedule were distributed. OSM received comments that 10–30 days were insufficient to conduct preblasting surveys. Both operator and regulatory authority commenters felt that additional notification of the availability of preblast surveys should be provided. Accordingly, OSM has provided that notice of availability of preblasting surveys may be distributed separately from and earlier than the blasting schedule. As discussed earlier, preblasting survey information is required to be distributed according to § 816.62(a).

Notification of blasting as required by Section 515(b)(15)(A) of the Act and by the regulations is provided by three methods: (1) Schedules published in newspapers, (2) schedules delivered to persons living within one-half mile of the blasting site, and (3) daily notification of blasts through audible signals to locations within at least one-half mile of the blasting site (required by § 816.66(b)).

Section 816.64(c)

Section 816.64(c), setting forth the blasting schedule contents, is adopted as proposed. As indicated above, the final rule removes the constraints of 4-hour aggregate per day, daylight-only blasting (upon approval of the regulatory authority), and 300-acre blasting areas. Such restrictions may be

imposed by individual regulatory authorities under § 816.64(a), as appropriate.

Section 816.65

As proposed, OSM has deleted previous § 816.65 and recodified its requirements as follows:

The requirements contained in previous § 816.65 (a) and (b), which set forth limitations on the hours and times of blasting, are adopted in amended form in § 816.64(a), which is discussed above. The requirements contained in previous § 816.65(c), pertaining to audible signals, are adopted in an amended form in § 816.66. OSM has deleted the requirement of periodic notification of meanings of warnings and all-clear signals. Those notifications are adequately provided through blasting signs and the blasting schedule.

Previous § 816.65(d), limiting access to blasting areas, has been rewritten and renumbered as new § 816.66(c), which is discussed below.

Previous § 816.65(e), governing airblast, has been adopted in amended form as § 816.67(b).

Previous § 816.65(f), pertaining to blasting within 1,000 feet of certain buildings and 500 feet of other facilities, was proposed to be incorporated in amended form in § 780.13(c). Instead it has been adopted in amended form as § 816.61(d), which is discussed above.

Previous § 816.65(g), governing flyrock, has been adopted as § 816.67(c), which is discussed below.

Previous § 816.65(h), containing a general performance standard requiring blasting to be conducted to prevent injury or damage, has been adopted as § 816.67(a), which is discussed below.

Requirements similar to those in previous § 816.65(i), which contained maximum peak-particle-velocities for blasting, have been adopted in amended form in § 816.67(d).

The requirements of previous § 816.65(j), identifying the circumstances where less stringent performance standards apply, have been adopted as § 816.67(e).

Previous § 816.65 (k) and (l), containing alternative means to determine peak-particle-velocities, have been modified and adopted as part of § 816.67(d).

Section 816.66. Use of explosives: Blasting signs, warnings, and access control. Section 816.66 contains provisions for blasting signs and warning procedures throughout the permit area. It also contains the physical access and control requirements to fulfill the notification provisions of § 515(b)(15)(A) and the public protection provisions of § 515(b)(15)(C) of the Act.

Section 816.66(a)

New § 816.66(a)(1) includes provisions from previous § 816.11(f)(1) and the proposed rule, and requires that the operator conspicuously place signs reading "Blasting Area" along the edge of any blasting area that comes within 100 feet of any public road right-of-way and at the point where any other road provides access to the blasting area. Notice along any road that provides access to a blasting area will ensure that anyone entering the blasting area is aware that blasting is taking place.

New § 816.66(a)(2) includes provisions from previous § 816.11(f)(2), and, at all entrances to the permit area from public roads or highways, requires signs which state "Warning! Explosives in Use." These signs must clearly list and describe the meaning of the audible blast warning and all-clear signals and explain the marking of blasting areas and charged holes.

In addition, all signs used to mark blasting areas must conform to the specification for signs and markers set out in § 816.11.

A State regulatory authority commenting on the proposal recommended that signs required under proposed § 816.66(a)(1) contain the warnings and explanations required for signs under proposed § 816.66(a)(2), because in some instances the signs referenced in § 816.66(a)(1) may be closer to the blasting site than those at entry points (referenced in § 816.66(a)(2)). OSM has not accepted this recommendation. The "Blasting Area" signs are intended to warn people of the limits of and to stay out of the area where blasting will take place. The more complete description of paragraph (a)(2) is intended to provide guidance to persons who may need to enter the permit area of precautions to follow when within the permit area.

Commenters objected to the 100-foot requirement and suggested that signs be required only when a public road right-of-way occurs within 50 feet of the blasting area, citing that more signs would be required than under the previous rules. OSM disagrees since the previous rules required signs on roads within 100 feet of the permit area but required signs at 50 feet when roads were actually within the permit area. OSM has adopted a consistent 100-foot distance in order to simplify the requirements.

A commenter suggested adding to § 816.66(a)(2) the phrase "awaiting firing" after "charged holes." OSM has accepted this suggestion, recognizing the need to clearly advise personnel entering the mine site of the precautions to be taken to prevent injury.

Section 816.66(b)

New § 816.66(b) requires the use of audible warning and all-clear signals of different pattern. It also requires notification of the meaning of the signals to those who work within the permit area and those who reside or regularly work within one-half mile of the permit area.

Several commenters objected to the term "different character" in proposed § 816.66(b) regarding the application of audible signals, assuming this meant different sounds, sounds with different tonal qualities. OSM recognizes this concern and has replaced "character" with "character or pattern" to allow use of the same instrument to make the sound in a different pattern to differentiate between "warning" and "all-clear."

Section 816.66(c)

New § 816.66(c) requires the controlled restriction of access to the blast area until hazards no longer exist and access can be safely resumed. Both livestock and persons are protected. Also it requires that no unusual hazards such as imminent slides or undetonated charges exist.

A commenter objected to the deletion of the first sentence of § 816.65(d) restricting access to areas subject to flyrock, when it was redesignated § 816.66(c). By including the phrase "within the blasting area" in § 816.66(c), OSM intends to encompass all areas where the hazards of flyrock are present. Therefore § 816.66(c) controls the same area where access was previously controlled under § 816.65(d).

Section 816.67. Use of explosives: Control of adverse effects.

Section 816.67(a)

OSM is adopting § 816.67(a) as proposed. The rule requires that blasting be conducted to prevent injury to persons, damage to public or private property outside the permit area, adverse impacts on any underground mine, and change in the course, channel, or availability of ground or surface waters outside the permit area. This provision, which is the successor to previous § 816.65(h), implements Section 515(b)(15)(C) of the Act.

Commenters objected to the requirement in proposed § 816.67(a) which requires blasting to be conducted in such a way as to prevent the "change in the course, channel, or availability of ground or surface waters outside the permit area." The commenters felt that it

would be impossible to distinguish between changes resulting from blasting and those resulting from other mine-related operations. The requirements of § 816.67(a) are adopted from Section 515(b)(15) of the Act which specifically requires that blasting be conducted in that manner. Furthermore, since OSM's permitting regulations at § 786.19(c) require the finding that damage will be prevented with respect to hydrology outside of the permit area resulting from mining, no blasting could be permitted which would result in material offsite hydrologic damage.

Section 816.67(b)

Airblast limits. OSM is adopting a slightly modified version of the airblast rule from that proposed in § 816.67(b). Airblast limits must be met at any dwelling, public building, school, church, or community or institutional building outside the permit area, with the exception of certain structures owned by the operator and covered by § 816.67(e). OSM has lowered the allowable airblast limit from that proposed for measuring systems with lower frequency limits below 6 Hz (hertz) from 130 to 129 dB (decibels). This has been done at the request of a commenter who indicated that the higher airblast limit was inconsistent with data published by the Bureau of Mines in RI8485 (Siskind and others, 1980).

In addition, OSM has retained separate airblast limits from previous § 816.65(e)(1) for c-weighted, slow response measuring systems and flat response measuring systems with a lower frequency limit of .1 Hz or lower. These peak limits are 105 dBC and 134 dB, respectively, and are consistent with BOM data. The c-weighted, slow response limit is the same as the previous rule and the .1 Hz or lower system limit than the previous rule. The use of of both of these measuring systems must be approved by the regulatory authority.

Several commenters suggested that airblast limits should not apply at locations where a structure is owned by an operator. It appears that there was some confusion as to the applicability of § 816.67(e). In its proposal OSM intended that Paragraph (e) apply to such structures for both airblast and ground vibration. In order to clarify the applicability of the exception in § 816.47(e), the phrase "except as provided in Paragraph (e) of this section" has been added to the end of the airblast standard in § 816.67(b)(1)(i).

A commenter suggested inclusion in § 816.67(b)(1)(ii) of specific rulemaking and public hearing procedures for reduction of the airblast standard. In its proposal OSM intended that the maximum allowable airblast standard applicable to a specific mine may be modified by the regulatory authority if OSM's permanent program limits appear to create excessive levels which may cause damage. To clarify its intent, OSM has revised § 816.67(b)(1)(ii) and inserted the phrase "for use in the vicinity of the specific blasting operation." Rulemaking procedures are not required for changes to the standards that are not of general applicability.

Another commenter believed that OSM's proposed language which included the word "may" and also the requirement "if necessary" gave the regulatory authority too much discretion to decline to reduce the maximum airblast limit, if it determined that a lower value is necessary to prevent damage. OSM believes that imposition of a lower value is properly within the discretion of the regulatory authority. However, should the regulatory authority determine a lower value to be necessary it must set a lower value. For this reason the final rule contains the language under which the regulatory authority determines whether or not imposition of a lower limit is necessary, and, if so, must reduce the limit.

Commenters objected to proposed § 816.67(b)(1)(iii) because it placed a burden on operators to evaluate "adverse atmospheric conditions." OSM agrees that there is no need to have such a specific requirement. Accordingly, proposed § 816.67(b)(1)(iii) has not been adopted. However, the requirement to meet applicable airblast standards is general and applies regardless of atmospheric conditions.

Airblast monitoring. A commenter on proposed § 816.67(b)(2)(i) suggested that airblast measurements should be required at the location and occurrence of every seismographic reading. In considering this provision, OSM recognizes the need for ensuring that airblast levels are met, but also believes that the location of seismographic monitoring, for instance, may not be the critical or appropriate location for airblast monitoring. Wind, temperature, and overcast weather can affect the maximum airblast location. Therefore, the final rule includes a general provision for periodic airblast monitoring by the operator in which the locations and the periods of such monitoring are left to the discretion of operators and the regulatory authority. A sentence has been added to the § 816.97(b)(2)(i) to emphasize that the regulatory authority may specify monitoring locations and determine which blasts have to be monitored.

A commenter was dissatisfied with the explanation in the preamble to § 816.67(b)(2) (47 FR 12766) concerning airblast monitoring "at or near the nearest structure." The issues raised are: (1) When is a notice of violation issued for exceeding airblast standards? and (2) where should monitoring be located? In response, OSM notes that airblast limits apply at any location where damage may occur (*i.e.*, the location of any structure, not necessarily the nearest). Therefore, a monitor located at any structure which records a value exceeding the maximum value for that frequency would record a violation. The location may not be the nearest structure because wind conditions may focus airblast away from near structures to those at greater distances from the blast. Although OSM is not requiring specific locations to be monitored, the operator is responsible to insure that such airblast monitoring does take place to assure compliance with airblast limits at all locations.

Section 816.67(b)(2)(ii) specifies the sensitivity of airblast monitoring equipment, requiring the upper end of the response range of the measuring system to have a flat frequency response of at least 200 Hz. A commenter objected to the provision in proposed § 816.67(b)(2)(iii) which would have allowed the regulatory authority to approve alternative measuring systems for airblast. As discussed in the preamble to the proposed rules (47 FR 12766), some suitable alternative monitoring systems exist, such as a 0.1 Hz- or a C-weighted instrument. As described above, OSM has inserted limits for these particular alternatives in the final that will provide equivalent levels of protection. Therefore proposed § 816.67(b)(2)(iii) is unnecessary and has not been adopted.

Section 816.67(c)—Flyrock. OSM has adopted § 816.67(c) approximately as proposed. The final rule is essentially the same as previous § 816.65(g). Flyrock includes material either travelling along the ground or in the air. It may not be cast more than one-half the distance to the nearest dwelling or other occupied structure nor beyond the area of regulated access. It may not be cast off the permit area.

Comments varied on the items to be included as flyrock. OSM, in review of these comments intends to include rock, mud, and debris as flyrock. It should be noted that flyrock is considered to be cast, projected, or thrown, not drifting smoke or dust particles of fragmented rock. Several commenters disagreed

with the provision limiting flyrock range to one-half the distance to the nearest inhabited structure. These commenters cited this restriction as contrary to other departmental requirements for maximum coal recovery. Others cited this provision as providing a degree of safety in excess of that required by the Act. OSM has opted to retain the provision for one-half the distance, but has limited its applicability to dwellings or other occupied structures. This places the burden on operators to provide appropriate design restraints when mining close to such dwellings or structures, such as additional stemming, burden, or mats to prevent flyrock. Section 522(e)(5) of the Act limits mining within 300 feet of occupied dwellings, subject to valid existing rights or unless a waiver is obtained from the owner. Such a waiver does not, however, waive the protection of § 816.67(c)(1) from flyrock or other adverse effects of blasting.

OSM has also chosen to retain the prohibition against casting flyrock beyond the permit boundary limit, rather than allowing operators to cast it on the land owned or leased by the operator.

Unless such land is permitted, access control is not provided, and public protection might be jeopardized.

A commenter suggested including public road rights-of-way in § 816.67(c)(1). OSM considered this addition, but rejected it because such areas will be protected according to either § 816.66(c)(2) or § 816.67(c)(3) which prevents flyrock from being cast outside the permit boundary or the area of control under § 816.66(c).

A commenter raised the question of defining the blasting site as the location from which flyrock distances are measured. OSM agrees with explosives industry terminology which generally refers to the limits of a blasting site as encompassing an area contained within the perimeter formed by the exterior charged holes. This differs from the area of regulated access (blasting area) referred to in § 816.66(a)(1) and § 816.66(c). The blasting area reflects the area where danger from flyrock exists for mine workers and persons potentially entering the mine site.

Commenters requested the phrase: "from the blasting site" be changed to "from its point of origin" in § 816.67(c) referring to the precise location of the flyrock. Determining the exact point of origin of flyrock is generally impossible after blasting has occurred, and therefore the language "from the blasting site" has been adopted as proposed.

Section 816.67(d)—Ground vibration. Section 515(b)(15)(C) of the Act requires the regulatory authority to establish limits on the use of explosives based on physical conditions of the site so as to prevent injury to persons and damage to public and private property outside the permit area. Ground vibration is among the most relevant factors which must be considered.

OSM has proposed three options for the control of ground vibration. The final rule governing ground vibration incorporates aspects of each of the three options proposed. The three options were: (1) A peak-particle-velocity for each permit based on site-specific data, (2) A variable ground-vibration limit based on distance to the nearest structure; and (3) A constant particle-velocity criterion of 1.0 inch per second at any structure outside the permit area. The discussion which follows first describes the rule that is adopted and then responds to specific comments on the various alternatives.

The rule adopted today sets limits on the allowable ground vibration (i.e., peak-particle-velocity) at certain types of protected structures to ensure the prevention of damage. These include dwellings, public buildings, schools, churches, or community of institutional buildings outside the permit area.

Peak-particle-velocities have been selected which reasonably assure that structures will be protected from damage. Blasts conducted close to structures where the frequency of ground vibration is generally highest will be allowed to have higher peak-particle-velocities. Further away, where potentially damage-causing lower frequencies would predominate, a lower peak-particle-velocity is mandated. For structures which are not buildings, the operator must submit a value for regulatory authority approval.

Three methods for ground-vibration limitation are provided in §§ 816.67(d)(2), (3) and (4) for the use of operators. These methods vary in their complexity and expense in application.

First, peak-particle-velocities are set for use with seismic monitoring. Section 816.67(d)(2)(i) provides specific numeric limits for ground vibration for use with general seismic monitoring and equivalent scaled-distance factors. These limits provide the protection to structures including residences, based on an analysis of the damage recorded by the RI8507 study (Siskind and others, 1980). The specific limits are described below, together with OSM's justification therefor.

Second, as an alternative provided under § 816.67(d)(3)(i), an operator may use a scaled-distance equation which determines charge-weights (the weight of explosives) based on the distance of the blast to the nearest structure. The equation is used to determine the allowable charge-weight per delay without mandatory seismic monitoring. Under § 816.67(d)(3)(ii) operators may, with regulatory authority approval, develop and use a modified scaled-distance equation.

Third, under § 816.67(d)(4) the operator is allowed to conform to maximum peak-particle-velocities that vary by frequency. In those situations an operator must use sophisticated seismic monitoring which records the frequency content of the ground vibrations. A detailed discussion of this paragraph is included below.

Under § 816.67(d)(5), the regulatory authority may reduce ground vibration levels on a site-specific basis if necessary to provide sufficient damage protection. Generally seismic monitoring is at the option of the operator; however, under § 816.67(d)(6) the regulatory authority may require it and specify locations for such monitoring.

Under § 816.67(e) the operator may exceed the prescribed ground-vibration levels at structures owned by the operator with the written waiver of any lessees.

In selecting particle-velocity limits, OSM has considered the differences between performance criteria, design standards, and the range of potential damage based on these parameters.

In controlling ground vibration, information such as geology, hydrology, seismic characteristics, distances to structures, and the amount of explosives must be evaluated. These factors, plus the level of fragmentation necessary, must be considered in setting the pattern of drill holes, selecting of explosives, and determining charge-weight. Design standards for ground vibration, such as burden, spacing, stemming, and subdrilling were not mandated by the previous rules and are not found in the final rule. Such design considerations are more appropriately applied by the certified blaster. The performance criteria to be met for ground vibration must be based on the ground-vibration levels predicted to cause damage. To stay within these levels, design parameters which are intended to keep ground vibration at or below the maximum allowable level must be used. Ground-vibration limits which protect homes and buildings from damage have been predicted from research studies. One Bureau of Mines study, RI8507 by Siskind and others (1980), provides a consolidation of such studies for the purpose of developing safe limits. The study recommended a 0.75 inch-per-second standard for dwellings with

gypsum-board interiors and 0.50 for plaster-on-lath interiors. These recommended limits have been highly criticized by operators, explosives users, explosives engineers, explosives manufacturers, and others as overly stringent. Some claim that these limits result from misinterpretation of the data. Also, portions of the RI8507 study have been cited for inaccurate data and damage findings, placing some question on the conclusions and recommendations of the study. A number of comments contained such criticism.

OSM considers RI8507 as the most up-to-date consolidation of research data for evaluation of blast-induced damage, but agrees that the interpretation of the data raises some questions. OSM utilizes the study's data base to support the regulatory limits on blasting, but does not accept the study's recommended standards. From the data on page 16 of RI8507, OSM concludes that design indicators, relating design to performance levels such as the weight of explosives per delay, do not consistently produce absolutely predictable uniform levels of performance. Thus a blast using a specific charge-weight of explosives may result in a range of particle-velocities, and repeated blasts at that charge-weight may result in somewhat different ranges. Use of scaled-distance factors as design guides produces ranges of results as depicted on Figure 11 of RI8507. (For example, the range of expected particle-velocities for different mining blasts for a scaled-distance of 100 is from 0.015 to 0.20 inch per second, a factor of 1,333 percent.) Therefore, an operator attempting to meet a 1.0-inch-per-second standard would not design for a blast with a peak particle velocity of 1.0 inch per second, but rather would design for a blast with an expected range of peak particle velocities not to exceed 1.0 inch per second. The design range for a 1.0-inch-per-second limit from Figure 11 is 0.15 to 1.0 inch per second with a scaled-distance of 30. A scaled-distance of 55 results in a range of lower values. When monitored with seismographs, this approach will require careful application of design criteria to fall within the maximum limit. Without seismic monitoring, conservative safety factors must be applied to assure compatible performance for regulatory compliance.

Because OSM believes operators must design to achieve lower levels than the maximum permissible, setting a 1.0-inch-per-second performance level is believed by OSM to result in actual readings in the range 0.30 to 0.70 inch per second. This range is consistent with the recommendations in RI8507 (Siskind and others, 1980). OSM believes that a 1.0-inch-per-second peak-particle-velocity will prevent the occurrence of threshold damage and has set such a standard in § 816.67(d)(2)(i) for distances of 301 to 5,000 feet from the blasting site to the nearest building.

Several commenters objected to the use of the RI8507 study. The report incorporates and consolidates field data and laboratory experiments conducted in the definition of damage produced by blast vibrations. In addition to the conclusions reached, which have been the subject of much dispute, it has several chapters dealing with the fundamentals of ground vibration and airblast, including ground-vibration propagation with scaled-distance, response-spectra analysis applications, interior considerations such as amplification, and a chapter on failure characteristics of materials which relates damage potential to the inability of materials to undergo deformation and withstand stress or strain.

Commenters' concerns focused on the adequacy of the new structures and data observed, the relevance of the old study data, and the definition of the terms "threshold," "minor," and "major" damage. In developing these rules, OSM has relied upon the new data in RI8507 which was collected on actual structures in a controlled manner using highly complex and sensitive monitoring equipment. OSM followed the suggestion of commenters and used such data as a basis for its regulatory actions.

In review of damage data in the RI8507 study in Figure 46 on page 51, as related to the readings in Table 1 on page 10 of that report, OSM finds that threshold damage did not occur until considerably higher levels than the report's conclusions indicate. For instance, "structure 51" incurred damage from all recorded blasts except one at 0.5 inch per second. Threshold damage ranged from levels of 1.04 to 7.25 inches per second, but the damage which was observed at 1.04 inches per second immediately followed six higher recordings in the following order: 1.16, 1.22, 2.84, 1.24, 1.86, and 10.21 inches per second. OSM believes that if the structure had not been weakened by the six successive stronger blasts, a vibration of 1.04 inches per second may not have damaged it. "Structure 27" recorded damage at the lowest reading of the new data in RI8507 (0.72 inch per second). This value followed blasts at the following levels: 1.36, 1.89, 1.91, 2.33, 3.73, 5.31, 2.34, and 1.22 inches per second. Of these, only blasts with ground vibrations recorded at 1.91 and 5.31 inches per second were attributed with threshold damage. Numerous blasts with considerably higher values did not result in damage.

The data below taken from Report RI8507 demonstrate that the range of threshold damage occurred at 0.75 to 2.0 inches per second, with the majority of damage points concentrated between 1.0 and 2.5 inches per second, whereas, no nondamage points were observed above 2.0 inches per second. Of the structures presented as new damage points on Figure 46 of RI8507, the following data are evaluated:

Structure No.	Material type	Number of observations		Number of damage points	
		<1.0[1]	>1.0[1]	<1.0[1]	>1.0[1]
19	Plaster/lath.	29	16	1	5
20	Gypsum board.	13	2	2	1
27	Plaster/lath.	1	9	1	2
51	Plaster/lath/brick.	1	11	0	[2]13
58	Gypsum board/brick.	1	5	0	5
61	Gypsum board/plaster.	1	1	1	1
Total		46	44	4	27

[1] Inch per second.
[2] Questionable data plotting.

Based on the above table, 91 percent of blasts observed below 1.0 inch per second did not cause damage. Of the 4 blasts observed below 1.0 inch per second that caused damage, one at 0.72 inch per second followed two blast observations greater than 1.0 inch per second (2.34 and 1.22) which did not result in damage. Therefore, the 0.72 value is questionable as the actual damage-producing blast. Another damage value of 0.79 followed a nondamage value of 1.10 inches per second.

Therefore, OSM considers the 1.0-inch-per-second standard adopted in § 816.67(d)(2)(i) for the range of 300 to 5,000 feet to provide a degree of protection consistent with the Act, because (1) The range of threshold damage appears to occur at levels above 1.0 inch per second; (2) the range of recordings in field blasts designed to meet a maximum limit of 1.0 inch per second will infrequently reach 1.0 inch per second with expected results in the range from 0.30 to 0.90 inch per second; and (3) the ground-vibration criteria coupled with other limitations on adverse effects from blasting will tend to require design considerations which lead to cumulative protection (*i.e.*,

separate constraints on flyrock and airblast will limit charge-weight, dimensions, and explosive characteristics).

Several commenters compared the recommended levels in the RI8507 study (Siskind and others, 1980) to the values OSM proposed in Option I for structure type and frequency.

As can be seen from the following comparison, the recommended peak-particle-velocities of the study are lower than those in OSM's proposal.

Structure type	RI8507 recommended at 40 Hz (in/sec)	OSM rule at 10 Hz (in/sec)
II	0.50	0.75
II	0.75	1.00

2. Older homes more than 20 years old with construction elements such as plaster-on-lath interiors and deteriorated or rigid, easily fractured construction materials.

3. Modern homes less than 20 years old with gypsum-board interiors, reinforced concrete or concrete masonry unit foundations, and other wood-frame and wood-clad structure.

In response to these commenters, OSM recognizes the need for blasting levels which prevent damage. However, in review of the data contained in Figure 46 of RI8507, OSM observes that the lowest damage value associated with blasts affecting plaster-on-lath interiors was 0.72 inch per second on "structure 27," and the lowest value affecting gysum-board interiors was about 0.79 inch per second on "structure 20." Structures such as "51" (plaster/lath/brick), "19" (plaster/lath), and "58" (gypsum board/brick) showed the occurrence of threshold damage at blasts ranging from 0.85 to 5.75 inch per second with the majority of points between 1.0 and 3.0 inches per second.

Imposing a ground-vibration level of 0.5 inch per second for such structures would protect these structures, but OSM believes this level is overly conservative. A value of 0.75 inch per second would also have provided protection. OSM believes that if a blast is designed to avoid exceeding the limit, the design level will have to be far less than the maximum, because predictability of the maximum particle velocity is difficult unless a conservative scaled-distance equation is applied. OSM expects that blast designers would have to use design criteria of 0.3 to 0.5 inch per second to meet a 0.75-inch-per-second performance standard. Under a 1.0-inch-per-second standard, only rarely are values expected actually to reach the maximum levels. Actual recorded vibration levels are expected to range from 0.30 to 0.90 inch per second. The setting of particle velocity limits, rather than specifying design parameters for different types of structures ensures protection and allows the blaster reasonable latitude in conducting the shot. Such practices ensure protection consistent with the parameters of the RI8507 study (Siskind and others, 1980) without penalizing the operator by restrictive performance levels. The possibility of every blast reaching a constant 1.0-inch-per-second level is small. Furthermore, an occasional blast which reaches that level does not present a high degree of damage potential. Additionally, if blasting levels do consistently reach the prescribed standard and the regulatory authority considers this a potentially damaging level, it is authorized in §816.67(d)(3)(ii) to reduce the allowable maximum standard to a lower value.

One commenter agreed that the concepts applied by OSM were valid, but disagreed with the specific values proposed and the claimed oversimplification of the ground-vibration issue. The commenter recommended a constant 1.0-inch-per-second standard be mandated in the final rule. OSM, in developing the final rule, has incorporated suggestions from various commenters and under § 816.67(d)(2)(i) has applied a constant 1.0-inch-per-second value over a normal operating range of 300 to 5,000 feet, recognizing the occurrence of high frequency close to structures and low frequencies which would exist if the vibration intensity carried beyond 5,000 feet. This does not preclude low frequency from occurring in close-in blasts or high frequency from occurring at distances greater than 5,000 feet. However, based on the data found in RI8507, a constant 1.0-inch-per-second standard would have prevented at least 85 percent of the damage points, and it is noted that 15 observations produced no damage above the 1.0-inch-per-second particle-velocity level.

In § 816.67(d)(20)(i), ground-vibration limits within 300 feet and beyond 5,000 feet are different from the 1.0-inch-per-second standard. Based on the predominant occurrence of high frequency vibration near the blasting site, OSM allows a 25-percent higher particle-velocity limit within 300 feet of a blasting site. The higher level would only be allowed for residences within 300 feet after owner approval and when prior blast designs must also be submitted to the regulatory authority. The additional constraints when blasting within 300 feet, as well as the probability of higher frequencies, justify the increase to 1.25 inches per second.

Conversely, at distances beyond 5,000 feet, levels at 0.75 inch per second must be observed with due regard to the potential for potentially damaging low frequency vibrations.

Commenters called OSM's attention to the study conducted at the Wright Mine in Warrick County, Ind., by Braile and others (1982). This study only dealt with the propagation of ground-vibration waves: data was observed for the site-specific geology and geologic type but no analysis of damage was conducted. The conclusions support the limits on blasting which produces low frequency ground vibrations and long duration surface waves, because such occurrences raise damage potential as well as result in annoyance to residents. The study concludes that vibrations at 5,000 feet could be perceptible and disturbing to persons inside a structure. However, the study does not indicate a damage threshold for these low frequency waves. Other studies suggest that the results achieved by the peak-particle-velocity standards prescribed today will prevent damage from low frequency blasts. Because OSM is statutorily charged only to prevent damage to structures and injury to persons, OSM has based blast limits on avoidance of physical injury or damage rather than annoyance.

Many commenters suggested that OSM consolidate proposed Options 1 and 3, while others supported variable peak particle velocity as a function both of frequency and distance from the blasting site. Several commenters recommended proposed Option 1 because it (1) Considered levels of protection by structure type as well as frequency and (2) allowed a 2.0-inch-per-second maximum peak particle velocity under some site-specific conditions, whereas Options 2 and 3 apply generally conservative limits and equations. Based on these comments, OSM has adopted a variant of Option 1 in the form of Figure 1 as an alternative method of determining peak particle velocity. This provision, § 816.67(d)(4), provides a site-specific approach to blasting restrictions based on carefully monitored frequency of the blast and provides adequate flexibility for State program adaption. The derivation of the values used in this alternative is described below.

An operator-commenter preferred proposed Option 1 because it allowed limits to be set based on site-specific conditions. Other commenters objected to Option 1 because it contained values believed to be too permissive and would

be difficult to implement due to the variety of structure types, frequency verification, and monitoring constraints. The commenters also felt that levels for Type 4 structures would be too restrictive. OSM believes that the final rule reflects the positive aspects of Option 1, flexibility and site-specific levels, but only places the requirement of stringent monitoring and data development on those choosing to undertake such a sophisticated approach. OSM has decided not to adopt different standards for different types of structures because such a rule would be unnecessarily complex, would require an extensive analysis of structures surrounding the blasting site and would be difficult to enforce.

Some commenters expressed support for the Option 1 standards, because it appeared to be the only limit restricting ground vibration at the location of utilities (buried pipes, etc.). OSM did not intend that Option 1 be the only protection for pipelines, underground mines, water towers, impoundments, and tunnels, but recognizes that these structures are less susceptible to damage than buildings and residences. Therefore, OSM has included a provision under § 816.67(d)(1) to limit ground vibration at such structures as determined by the regulatory authority. Currently, the Mine Safety and Health Administration requires levels less than or equal to 2.0 inches per second for underground mines.

Some commenters preferred Option 3, but suggested a modification to allow values greater than 1.0 inch per second in areas specifically approved by the regulatory authority. In the new rule being adopted, OSM has incorporated two provisions allowing such values. First, at distances less than 300 feet an upper limit of 1.25 inches per second has been established in § 816.67(d)(2)(i) because of the frequency considerations; however, as noted throughout the comments, lack of substantiating data precludes incorporating limits in excess of 1.0 inch per second as proposed in Option 2 for distances between 300 and 3000 feet. Second, the use of alternative blasting criteria under § 816.67(d)(4), the limits of which are specified in Figure 1, will allow values up to 2.0 inches per second if site conditions warrant for blast frequencies in excess of 30Hz.

A commenter suggested that the only acceptable safe blasting criteria would be a variable limit with frequency similar to proposed Figure 1, or the use of response-spectra analysis requiring investigation of the natural frequency of the structure to be protected and relating this information to the blast vibration frequencies. OSM acknowledges that response-spectra analysis as used in the RI8507 study (Siskind and others, 1980) and by vibration consultants provides a unique solution because it sets allowable limits accurately by predicting the range of potential damage. However, OSM believes that a much more general standard must be authorized for application at coal mines where 200 to 1,000 houses may be involved. OSM does not want to discourage the use of response-spectra analysis, especially where a regulatory authority determines that a lower standard should apply. This technique if applied on a case-by-case basis might prove to be the best substantiation of the actual damage range. In order to allow such technique and to provide operators the option to increase particle velocities above the maximum limits set for general compliance, OSM has included in § 816.67(d)(4) an alternative method using Figure 1. Using this option requires monitoring of particle velocity at the frequency levels, which may be augmented by response spectra for confirmation of the structure's interaction with the monitored wave forms. In using this alternative, the seismographic record will provide evidence of regulatory compliance, as well as evidence of damage potential for information of nearby homeowners.

A commenter, objecting to all options presented in the proposed rules, cited difficulty in the application of proposed Option 1, disputed the assumption that frequency decreases linearly with distance from the blasting site as found in proposed Option 2, and did not like the inclusion of the alternative blasting criteria under proposed Option 3.

Commenters also believed that proposed Option 3 ignored structural response, claiming that single value limits are an oversimplification of blasting effects and misleading to further study.

As described above, the new rule combined the three options; it allows the application of three levels of ground-vibration control: (1) Seismic monitoring of peak particle velocity, (2) use of a scaled-distance equation without monitoring, and (3) complex monitoring of velocity at associated frequencies. Each allows a somewhat different approach to control of blasts, but each provides equivalent levels of damage prevention.

Several commenters suggested adding the use of vector-sum seismographs to the peak-particle-velocity component concept of § 816.67(d)(1)(i). OSM recognizes that some monitoring equipment records vector sum and that requiring component seismographs may be expensive for the operator. To avoid this unnecessary burden, OSM has allowed, but does not require, the use of vector-sum units. The Bureau of Mines has concluded that component velocity is the best indicator of damage potential and thus recommends limits and readings be in component format. The values listed for acceptable vector sum limits are identical for component limits, ensuring conservative results when using a vector-sum instrument. OSM recognizes that this will produce conservative monitoring standards, but a general conversion of component to vector-sum equivalent is not available.

Commenters were concerned that OSM's 1.0-inch-per-second standard would not provide adequate protection of sensitive structures. OSM believes that the limit of 1.0-inch per second over the range from 300 to 5,000 feet does set a limit which considers structural response. Setting a universally applied limit assumes that structures to be protected have natural frequencies in the range of 10–20 Hz (hertz). At frequencies between 10 and 20 Hz the safe vibration level recommended in RI8507 ranges between 0.75 and 1.40 inches per second. As indicated in OSM's evaluation of data from RI8507, the range of threshold damage appears to begin at levels greater than 1.0 inch per second. Therefore, a 1.0-inch-per-second standard provides protection within this range over the broad range of distances.

A commenter objected to the prohibition placed on mining within 300 feet of a dwelling without owner approval and within 300 feet of public buildings. The commenter felt that such limitations were inappropriate and could interfere with maximum coal recovery. Section 522 of the Act prohibits any mining operations within 300 feet of public buildings or dwellings (without owner consent) subject to valid existing rights. Rules governing these areas are set forth at 30 CFR Parts 761 and 769. It would be duplicative to restate them in conjunction with the blasting rules. Accordingly, the proposed language in § 816.67(d) has not been adopted.

Section 816.67(d)(1) sets levels for structures other than buildings. This new rule places the burden of setting particle-velocity limits for these structures on the operator and the regulatory authority. Operators would propose standards for structures, and the regulatory authority would approve or modify them.

Various commenters made recommendations regarding scaled-distance equations, a variant of which was proposed for all three options. Some commenters agreed with the correlation values proposed (e.g., $Ds=55$ correlating to 1.0 inch per second) while others believed that $Ds=60$ should be used to correspond to 1.0 inch per second, stating that it would better meet the requirements of the Act. Another commenter objected to the use of scaled distance as a safe blasting criterion. That commenter presented information attempting to refute the accuracy of scaled distance as a predictor at any specific value. OSM based the correlation values proposed (47 FR 12768) on the blast data contained on pages 10–17 of the RI8507 study and believes use of scaled distance will prevent damage in more than 99 percent of blasts as described below.

The use of the scaled-distance equations of § 816.67(d)(3) provides an operator with the option of not monitoring every blast to ensure compliance with the specified maximum ground-vibration level. Siskind and others (1980) in the RI8507 study collected and consolidated blast vibration data from blasting at various distances and blasting parameters. When displayed and analyzed, these data provide a line representing the mean occurrence of a specific particle velocity for a specified scaled-distance level. The equation adopted in § 816.67(d)(3) divides distance from the blast to the structure to be protected by a scaled-distance factor to yield the square root of the total charge weight of explosives which may be detonated in any 8-millisecond period: $(D/Ds)=/W$, where D=the distance from the blast to the structure to be protected, Ds=the scaled-distance factor, and W=the charge weight of explosives.

The values of ground vibration measured at location D from the blast reflect the actual measured ground vibration. Mean curves were developed as part of the RI 8507 study based on the actual ground vibrations measured. (See p. 14 of the RI 8507 study.) The mean portrayed thereon reflects an averaging of values above and below the curve at any scaled-distance factor. The curve representing a 95-percent-confidence level for specific vibration levels is obtained statistically, resulting in a similar curve two standard deviations above the mean. This results in a level providing 95-percent confidence that actual monitoring will fall at or below the predicted ground vibration. OSM has selected scaled-distance factors taken from the standard deviation curve. Coupled with the remote possibility of damage at the predicted level, these factors will afford a degree of protection in excess of 99 percent for the structure to be protected.

Some commenters felt that the proposed scaled distance of 70 in Option 1 was too conservative. Under the final rule, the maximum scaled-distance factor will be 65. Under the tables in new §§ 816.67(d)(2)(i) and 817.67(d)(2)(i), the scaled distance of 65 is applied only when the distance to the nearest building is greater than 5,000 feet. This will allow the use of a maximum of 5,900 pounds of explosives per 8-millisecond delay period at a distance of 5,000 feet. OSM does not believe this limit will constrain an operator unduly since explosive technology has developed delay blasting techniques available to conduct large blasts using this amount per delay. The scaled-distance denominator of 65 corresponds to a 0.75-inch-per-second peak particle velocity. In setting this peak particle velocity, OSM recognizes the need for lower ground vibration at locations of lower frequency. After traveling 5,000 feet, the intensity of a seismic wave should dissipate below the 0.75 peak-particle-velocity level; thus the standard should rarely be exceeded.

Some commenters contended that the proposed equation $W=D^{1.5}/90$ in Option 2 was too conservative for the large areas blasted in the West. OSM has not adopted that optional equation because it was too stringent at long distances and not stringent enough when structures were within 500 feet. Therefore, its applicability would have been limited to the distances between 1,000 and 3,000 feet, whereas the scaled-distance equation adopted in this new rule, using $Ds=55$, can be applied at distances between 300 and 5,000 feet.

OSM believes that the 55 level for Ds over the 300 to 5,000 foot range provides sufficient protection; as described earlier, a 1.0 inch-per-second level reflects an appropriate standard to provide damage protection.

Section 816.67(d)(3)(ii) allows the operator flexibility in modifying the scaled-distance factor Ds to allow for higher or lower scaling factors. The provision requires that after the operator correlates the mean occurrence of particle velocity with scaled distance, the modified value for the scaled-distance factor Ds must reflect a point that is two standard deviations above the mean regression curve. This correlation value provides a 95-percent-confidence level that the maximum allowable particle velocity will not be exceeded. A technical guidance document will be made available by OSM demonstrating the application of the modified equation and its derivation.

One commenter suggested that a lower limit be established on modified scaled-distance below which the regulatory authority would not set a standard. OSM has not accepted the suggestion. OSM believes that a 1.0-inch-per-second standard over the normal working distances provides adequate protection in general blasting practice, but recognizes that structure condition, geology, and vibration frequency affect damage potential and are site specific. The Act requires site-specific limits for use of explosives, and values as low as 0.5 inch per second may be necessary. The setting of a lower value is more appropriately left to the discretion of the regulatory authority at the time of evaluating the site-specific conditions.

Certain site-specific conditions warrant higher bore hole loadings per delay, but protection of people and property must be assured. Other site-specific conditions may warrant reduction of allowable peak particle velocity and the lowering of the weight of explosives per delay (i.e., higher scaled-distance factors). The provisions of § 816.67(d)(5)(ii) require the regulatory authority to take action if necessary to provide damage protection. Critical factors in assessing damage probability include distance to the nearest structure and charge weight.

A commenter objected to the proposed term "in the vicinity of the mine" with respect to proposed § 816.67(d)(3)(iii) which would have required regulatory authorities, upon requests from owners and residents, to evaluate the maximum allowable ground-vibration standard. The same commenter felt that "vicinity" could mean 100 feet or 100 miles. The commenter suggested that such requests be limited to structures within one-half mile of the permit area. OSM believes that the proposed provision is unnecessary. Upon request from a resident, or for any other reason, the regulatory authority may require seismic monitoring of blasts and may reduce ground vibration limits if conditions warrant. Thus, the regulatory authority has ample authority to protect those in the vicinity of the blasting.

As mentioned above, § 816.67(d)(4) presents a third optional ground-vibration standard. This is based on the standard proposed as Figure 1 in Option 3 in the proposed rule. It requires more stringent monitoring than the normal peak particle velocity and allows more flexibility to operators to use greater

charge weights. The limits are set forth in a graphic distribution of maximum allowable particle velocity versus blast vibration frequency. These are shown in a new Figure 1 to be included as part of the rule. Commenters requested that the limits of proposed Figure 1 be revised. Several commenters wanted this criterion to be the only one to apply to regulation of ground vibration. Others objected to the use of the criterion altogether and suggested its deletion. OSM has included the criterion as an alternative to allow flexibility by operators and regulatory authorities if they wish to conduct the more extensive monitoring required. The alternative blasting criterion (new Figure 1) differs slightly from that proposed. One commenter suggested retention of the proposed curve above 20 Hz, but a limit of 1.0 inch per second for the portion of the curve below 20 Hz. Another commenter provided a rationale for adjusting the cutoff point for the 2.0-inch-per-second standard from 40 Hz to 30 Hz, since the interaction with an amplification of natural frequencies of residential structures primarily occurs in the 5 to 20 Hz range. The suggestion to rely on a constant 1.0-inch-per-second limit up to 20 Hz has been rejected because it fails to acknowledge the impact of predominant low-level blast vibration frequency within the range of 5 to 10 Hz.

In determining the values in Figure 1, OSM has adopted the Bureau of Mines proposal cited in Appendix B of RI8507 (Siskind and others, 1980). For frequencies up to 4 Hz, a constant maximum amplitude of 0.030 inch will be allowed. (Under this standard, amplitude is related to particle velocity through the use of the equation $V=2\pi fA$, where V is the particle velocity, f is the frequency, and A is the amplitude.) Over this frequency range the maximum allowable particle velocity increases from 0.19 inch per second to 0.75 inch per second. At frequencies of 4 through 11 Hz a constant allowable particle velocity of 0.75 inch per second is set.

The level over the range 4 to 11 Hz was set at 0.75 inch per second rather than 1.0 inch per second to acknowledge the need to reduce particle velocity at low frequencies. Over the frequency range of 11 through 30 Hz, a constant amplitude of 0.0107 inch is allowed. This correlates to maximum particle velocities of 0.75 inch per second to 2.0 inch per second. Above 30 Hz, a constant peak particle velocity of 200 inches per second will be allowed.

A commenter cited concern with varying threshold levels on the basis of structure type and vibration frequency and allowing a maximum level of 2.0 inches per second. These commenters felt that proposed Option 1 would be the most beneficial in regulating the industry. OSM does not believe that a general limit of 2.0 inches per second provides adequate protection. In the previous rules, a peak particle velocity of 2.0 inches per second was allowed in some instances only when applying stringent monitoring techniques. In the final rule, the particle-velocity standard sought by the commenter is allowed under § 816.67(d)(4) at frequencies above 30 Hz, but only under well-monitored and controlled conditions that require seismic monitoring using equipment recording both particle-velocity data and vibration frequency levels to assure continuous compliance.

A commenter raised the problem of determining predominant frequency in applying proposed Option 1 dealing with the structure tables. This problem also exists in implementing the alternative blasting criteria of Figure 1. Therefore, a provision has been added to § 816.67(d)(4) to require approval of the method to be used in evaluating and ultimately establishing the predominant frequency at which vibration levels occur.

A commenter felt that the proposed alternative blasting criterion of Figure 1 was overly stringent and too expensive for most operators. They also were concerned about the possibility of rendering existing monitoring equipment obsolete by this rule. OSM has included new Figure 1 in the final rule for optional application. Some operators may find the economic outlay beneficial to production and the protection of nearby structures; those who do not need not use this alternative method of determining maximum ground vibration. Other provisions of the rules allow conventional monitoring and use of equations without monitoring.

Commenters requested clarification as to what was required to evaluate blast vibration frequency. They wanted to know whether visual inspection of seismographic records was adequate or whether electronic anlaysis of frequency would be required. Under § 816.67(d)(4), which requires regulatory authority approval of the method of analysis of the predominant frequency contained in the blasting records, visual inspection may be adequate if traces are distinct and only a few frequencies are contained in the wave-form. However, seismographic consultants have found that various waves with multiple frequencies typically are contained in the blasting record. In those cases, electronic analysis is necessary to separate the wave traces and analyze each intensity and frequency. OSM does not intend to mandate electronic analysis; rather the determination of what type of analysis is appropriate should be made by the regulatory authority.

Commenters did not believe that frequency analysis, which requires sophisticated equipment, should be required in all cases. Except when the criteria of § 816.67(d)(4) are used, the final rule leaves frequency analysis to the discretion of the regulatory authority. OSM recognizes its value as an indicator of vibration damage probability, but also recognizes the complexity and expense in its application, as well as the uncertainties in determining specific frequency levels.

Commenters referred to human annoyance from blast vibrations. Human response has been addressed by the RI8507 study (Siskind and others, 1980) and other researchers in the ground-vibration field. OSM concludes that the limits on airblast provide the most appropriate basis for minimizing disturbance to nearby residents. In addition, there does not appear to be a standardized correlation between ground vibration levels and degrees of annoyance, apart from injury and damage. OSM believes that through an effective public relations program and communication with nearby residents much anxiety over annoyance can be mitigated.

A commenter complained that OSM had not satisfied its obligations under the Administrative Procedure Act (APA) by indicating a preferred course of action. The APA requires that an agency publish an explanation of its proposed action sufficient to allow for meaningful comments. Due to the complexity of these issues OSM devised several regulatory approaches and has explained each of them with sufficient specificity to attract the numerous comments it has received. A decision on which option to adopt was not made until after evaluation of all the comments received. This new rule adopted by OSM falls well within the range of the alternatives proposed.

Section 816.67(e)

New § 816.67(e) excludes from ground vibration and airblast limits structures owned by the operator and those owned by the operator and leased to others if waivers are obtained from the lessees. Commenters requested that the exclusion for structures owned by the operator and leased to others apply to all options. This was the intent of the proposed rule, but was misinterpreted

as applying only to Option 3. This section has been retained in the final rule as § 816.67(c).

Section 816.68. Use of explosives: Records of blasting operations. As proposed, the new § 816.68 requires the operator to maintain blasting records for at least 3 years and to make them available for inspection by the regulatory authority or the public on request. This is required in Section 515(b)(15)(B) of the Act. Among the information which must be included is the name of the operator, the location, date, and time of the blast; the name signature, and certification number of the blaster conducting the blast; identification, direction, and distance from the nearest blast hole to the nearest dwelling or other structure outside the permit area; weather conditions described in more detail below; the type of material blasted; sketches of blast pattern including number of holes and the burden, spacing, decks, and delay pattern; the diameter and depth of holes, the type of explosives used; the total weight of explosives used per hole; the maximum weight of explosives detonated within any 8-millisecond period; the initiation system; type and length of stemming; and mats or other protection used.

Section 816.68(o) includes the requirement that if seismographic and airblast records are required, they should include a record of the instrument type, its sensitivity and calibration signal or the certification of annual calibration; location, date, time, and distance the instrument is from the blast; the person's name and firm who obtained the readings, and the person's name and firms analyzing the seismographic record; and vibration and/or airblast levels recorded. In addition § 816.68(p) provides that information stating the reasons and conditions for each unscheduled blast shall be contained within the record.

Commenters objected to deletion of specific weather characteristics listed in the previous rules. These commenters reasoned that these conditions may assist in determining adverse effects due to blasting focused by weather such as: clouds, wind, and temperature inversions. OSM believes the commenter is correct, but a blaster in the field may not know if an inversion exists or what the specific wind velocity is. The requirement of this data could result in inaccurate entries leading to false interpretation of impacts of weather. OSM acknowledges the potential impacts on blasting of temperature inversions, wind direction, and velocity and has inserted a provision for the blaster to estimate any adverse weather conditions which might exist.

A commenter objected to the deletion of previous § 816.68(1) establishing the number of holes to be detonated in any 8-millisecond-delay period because providing this information places no great burden on the operator. OSM believes this information summarizes data which are insignificant in the total blast record and are not necessary for assuring compliance with the rules. Another commenter believed that physical separation can provide the same effect as an 8-millisecond delay. OSM agrees. The 8-millisecond separation was determined by the Bureau of Mines as the minimum delay period to separate charges to reflect nonadditive ground-vibration levels when measured at some distance from the blast. However, this concept assumes that delay holes are at the same distance from the seismograph. In situations where holes are varying distances from the recorder, physical distance separation will delay arrival times of the ground vibration at a structure. This is variable, dependent on the velocity that the seismic wave travels in the specific geologic material.

A commenter objected to OSM's proposed deletion of the requirement that operators keep a record of the number of persons in the blasting crew. OSM believes that a specific number of persons should not be regulated on a national basis. The entry in OSM's old rules served the requirement governing crew size found in 30 CFR Part 850 which has been proposed for change. If a crew size is imposed by a State program, an appropriate entry could be required by the State. Accordingly, OSM has adopted no change to reinstate this entry.

A commenter suggested amending the entry under § 816.68(o)(3) to include the name of the person and firm conducting seismographic tests. OSM believes this to be an acceptable inclusion. Accordingly, OSM has adopted this requirement.

A commenter suggested including the frequency of recorded blast vibration in the seismic record. Not all records produced by seismographs in use in the industry today produce frequency spectra. Most recordings must be analyzed on complex systems to identify trace frequencies as expressed in the RI8507 report (Siskind and others, 1980). As discussed above, the use of a vibration criterion based on frequency monitoring is required in § 816.67(d)(4) in those situations where such sophistication is necessary. However, imposing this condition on all monitored blasts would be overly stringent and unnecessary.

A commenter objected to inclusion of the amount of information required by proposed § 816.68(g) stating that sketches should only be required if blasts are conducted within 1,000 feet from a dwelling or other structure. OSM believes the record is important for reference purposes to ensure the mitigation of damage. Moreover, OSM's regulation of aspects of the blast such as burden, spacing, decking, and delays is mandated by the Act. Other information proves valuable if a complaint arises. Also, an operator who maintains this type of record may revise future blast design if problems occur. OSM believes this degree of information is within that envisioned by the Act, and the final rule adopts the requirement. Commenters also felt that too much information was required for a single sketch. OSM accepts the comment that a single sketch may be cluttered and allows multiple sketches to reflect this information if a single sketch cannot be made.

A commenter believed that all blasts should be certified as designed by a certified blaster in the record. OSM does not require every blast to be designed by a certified blaster. Rather, they must be carried out by certified blasters. Since blast patterns and delays may be designed by someone other than the blaster carrying out the blast, the name of the designer may not be available. Furthermore, OSM requires certifications of blast designs when blasting is conducted within 1,000 feet of structures. OSM therefore has not added such a provision to its recordkeeping rules.

A commenter suggested limiting the data kept in records required by § 816.68(j) on explosives to total explosives used per blast rather than explosives per hole. OSM believes this information is necessary to evaluate the amount of explosives per delay. Furthermore, the per-hole information requirement is taken from the Section 515(b)(15)(B) of the Act. OSM agrees that total charge weight information is important, but recognizes that it is available by totalling all holes. Therefore, it is not considered to be necessary as additional data to be entered. Accordingly, OSM has not adopted such a provision.

A commenter requested that a provision be made in § 816.68(o) to allow "annual calibration" to relieve operators from showing calibration signals on each record. The commenter argued that some seismographs do not

have calibration signals integral with the records. OSM has adopted this provision in the final rule.

A commenter suggested deletion of the requirement in proposed § 816.68(o)(2) for location of the instrument and the date and time of the blast. OSM believes that this information is necessary to ensure that the operator is utilizing the monitoring system agreed to in the permit, and that the data recorded can be traced to a specific blast.

A commenter requested deletion of the requirement in proposed §816.68(p) of the names of persons notified when unscheduled blasts are conducted. As discussed above in conjunction with § 816.64(a)(2), OSM is deleting the requirement of verbal notification of area residents of unscheduled blasts. Instead, audible signals will be used. Weather and other site-specific conditions which necessitate unscheduled blasts may not allow notification to individual residences. Accordingly, OSM does not require records of individuals notified.

A commenter requested confirmation of the availability of blasting records to the public. Both § 816.68 and the Act require the operator to provide access to the blasting records for public inspection upon request. A commenter objected to the degree of detail made available to the public in the records required by § 816.68, stating that it exceeds the requirements of the Act. OSM recognizes that the information required in § 816.68 exceeds that specifically listed in Section 515(b)(15)(B) of the act. OSM requires additional information to evaluate the performance levels of rules implemented pursuant to Sections 515(b)(15)(C), (D), and (E) and 719 of the Act. The additional information relates to performance standard found in §§ 816.61 through 816.67. Such information is necessary to determine whether performance levels were attained. Segregating in the record the items listed in the Act to be available for public inspection is impractical and unnecessary. The commenter failed to demonstrate any harm that would occur through the public disclosure of the additional information. OSM therefore, has chosen to require the entire blasting record to be made available for public inspection.

Rules governing use of explosives associated with underground mining. The performance standards adopted in this rule governing the use of explosives associated with underground mining are identical to those governing surface mining except as noted below. Most offsite impacts, such as airblast and ground vibration, for surface blasting incident to underground mines are not substantially different from those for blasting at surface mines. OSM only regulates the surface impacts of blasting from underground mines, which are derived almost exclusively from surface blasting associated with such mines. This is not a change from the previous rules which also only regulated surface blasting activities incident to underground mining.

Only one difference exists between the two sets of rules in Parts 816 and 817. This relates to the use of blasting schedules. Rather than requiring a blasting schedule, § 817.64 will require weekly notice prior to any surface blasting in support of underground coal mining. Because of the occasional, sporadic nature of surface blasting in support of underground coal mining, the public will be sufficiently served by receiving notification weekly, but not less than 24 hours before any blasting occurs. The mine operator also will be relieved of the task of publishing and republishing a blasting schedule.

Blast design. OSM had proposed to place blast designs among the permitting requirements of § 780.13 for surface mines. No similar planning requirement was included for underground mines because blasting plans are not required for underground mines.

As described above, in adopting the final rules governing surface mines, OSM has shifted the requirement for blast design from the blasting plan section to the general performance standards requirement. This has been done for several reasons: (1) To emphasize the fact that the requirement for special information when blasting within sensitive areas is not a prohibition of mining within these areas, but a protection of structures more likely to suffer damage; (2) To ensure that blast designs are prepared in advance for blasting in areas where the possibility of damage is greatest; (3) To provide the regulatory authority with the greatest information when blasting will be conducted in sensitive areas to allow for monitoring or review of blast designs.

A number of commenters urged that blast designs also be required for underground mines. Because surface blasts may be equally damaging when associated with underground mines, OSM has adopted a requirement in § 817.61(d) identical to the blast design requirement of § 816.61(d).

Blasting schedules. Several commenters objected to the proposed retention of the previous 24-hour notice requirement for notification of local residents within one-half mile of the blasting site in proposed § 817.64(a). Since underground mines have a reasonably constant area of surface disturbance and the time period in which surface blasting would be performed is limited, OSM has rewritten the notification provisions for underground mines to require notification of residents within the ½ mile of the blasting site and local governments. The rule also allows weekly schedules to be distributed. This concept is envisioned to provide the advanced written notice required by statute, while recognizing the infrequent and limited blasting operations used in surface operations of underground mine development. The rule allows daily notification as in the previous rule, but also allows an operator to publish a schedule of weekly blasting events to avoid daily notification. This final rule is envisioned to allow flexibility in use of notification procedures.

Signs and markers. It was mentioned by several commenters that the introductory language to proposed § 817.66(a) used the wrong wording for the underground section. This has been corrected by removing the introductory language and restructuring the provision to parallel § 816.66. New § 817.61(a) limits the applicability of § 817.66 to surface blasting activities incidental to underground coal mining.

Addition of Figure 1. The addition of Figure 1 to §§ 715.19(e)(2)(ix), 816.67(d), and 817.66(d) is discussed in the preamble under the "Ground Vibration" section.

III. Procedural Matters

Federal Paperwork Reduction Act

The information collection requirements in existing 30 CFR Parts 715, 780, 816, and 817 were approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507 and assigned new clearance numbers 1029–0007, 1029–0036, 1029–0047, and 1029–0048 on April 1, 1981. This approval was identified in "Notes" at the introduction to 30 CFR Parts 715, 780, 816, and 817 under the old numbers R0494, R0606, R0618, and R0619 (all under No. B–190462). OSM has codified the OMB approvals under the new §§ 715.10, 780.10, 816.10, and 817.10 (47 FR 33683, August 4, 1982) and has received new OMB approval of these information collection requirements.

The information required by 30 CFR Part 715 will be used by the regulatory authority in monitoring blasting operations. This information required by 30 CFR Part 715 is mandatory.

The information required by 30 CFR Part 780 will be used by the regulatory authority to determine whether the applicant can meet the environmental protection performance standards of the regulatory program. This information required by 30 CFR Part 780 is mandatory.

The information required by 30 CFR Parts 816 and 817 will be used by the regulatory authority to monitor surface and underground mining activities to ensure that they are conducted in a manner which preserves and enhances environmental and other values of the Act. This information required by 30 CFR Parts 816 and 817 is mandatory.

Executive Order 12291

The DOI has determined that this document is not a major rule and does not require a regulatory impact analysis under Executive Order 12291.

Regulatory Flexibility Act

The DOI certifies that this document will not have a significant economic effect on a substantial number of small entities and therefore does not require a regulatory flexibility analysis under Pub. L. 96–354.

National Environmental Policy Act

Revision of § 715.19 of the initial program regulations is deemed not to be a major Federal action within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4332, as stated in Section 501(a) of the Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1251, and a detailed statement on the analysis of the environmental impacts of its revision is not required.

Amendments relating to use of explosives in 30 CFR Parts 780, 816 and 817, have been considered in relation to revisions of certain other rules in OSM's Final Environmental Statement OSM–EIS–1: Supplement. The final supplement is available in OSM's Administrative Record in Room 5315, 1100 L Street, NW., Washington, D.C., or may be obtained by mail from Mark Boster, Chief, Branch of Environmental Analysis, Room 134, Interior South Building, U.S. Department of the Interior, Washington, D.C. 20240. This preamble serves as the record of decision under NEPA. These final rules are the same as the preferred alternatives published in Volume III of the final EIS and analyzed in the EIS.

List of Subjects

30 CFR Part 715

Coal mining, Environmental protection, Surface mining, Underground mining.

30 CFR Part 780

Coal mining, Reporting requirement, Surface mining.

30 CFR Part 816

Coal mining, Environmental protection, Reporting requirements, Surface mining.

30 CFR Part 817

Coal mining, Environmental protection, Reporting requirements, Underground mining.

Agency Approval. Section 516(a) requires that, with regard to rules directed toward the surface effects of underground mining, OSM must obtain written concurrence from the head of the department which administers the Federal Coal Mine Health and Safety Act of 1969. OSM has obtained the written concurrence of the Assistant Secretary for Mine Safety and Health, U.S. Department of Labor.

Accordingly, 30 CFR Parts 715, 780, 816, and 817 are amended as set forth herein.

Dated: February 28, 1983.

William P. Pendley,

Acting Assistant Secretary, Energy and Minerals.

PART 715—GENERAL PERFORMANCE STANDARDS

1. Section 715.19 is amended by revising Paragraphs (e)(2)(ii) and (e)(2)(iii) and removing Paragraphs (e)(2)(iv)–(e)(2)(vi) to read as follows:

§ 715.19 Use of explosives.

* * * * *

(e) * * *

(2) *Blasting standards.* (i) * * *

(ii) *Ground vibration.*—(A) *General.* In all blasting operations, except as otherwise authorized in Paragraph (e)(2)(iii) of this section, the maximum ground vibration shall not exceed a value approved by the regulatory authority. It shall be established in accordance with the maximum peak-particle-velocity limit of Paragraph (e)(2)(ii)(B), the scaled-distance equation of Paragraph (e)(2)(ii)(C), or the blasting-level chart of Paragraph (e)(2)(ii)(D), or such other standard established under Paragraph (e)(2)(ii)(E), of this section. All structures in the vicinity of the blasting area, not listed in Paragraph (e)(2)(ii)(B), of this section, such as water towers, pipelines and other utilities, tunnels, dams, impoundments, and underground mines, shall be protected from damage by establishment of a maximum allowable limit on the ground vibration, submitted by the operator and approved by the regulatory authority before the initiation of blasting.

(B) *Maximum peak-particle velocity.* (*1*) The maximum ground vibration shall not exceed the following limits at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area.

Distance (*D*) from blasting site, in feet	Maximum allowable peak particle velocity (*Vmax*) for ground vibration, in inches/second [1]	Scaled-distance factor to be applied without seismic monitoring [2]
0 to 300	1.25	50
301 to 5,000	1.00	55
5,001 and beyond	0.75	65

[1] Ground vibration shall be measured as particle velocity. Particle velocity shall be recorded in three mutually perpendicular directions. The maximum allowable peak particle velocity shall apply to each of the three measurements.
[2] Applicable to the scaled-distance equation of Paragraph (e)(2)(ii)(C)(*1*) of this section.

(*2*) A seismographic record shall be provided for each blast.

(C) *Scaled-distance equation.* (*1*) The operator may use the scaled-distance equation, $W=(D/Ds)^2$, to determine the allowable charge weight of explosives to be detonated in any 8-millisecond period without seismic monitoring; where W=the maximum weight of explosives, in pounds; D=the distance, in feet, from the blasting site to the nearest protected structure; and Ds=the scaled-distance factor, which may initially be approved by the regulatory authority using the values for scaled-distance factor listed in Paragraph (e)(2)(ii)(B)(*1*), of this section.

(*2*) The development of a modified scaled-distance factor may be authorized by the regulatory authority on receipt of a written request by the operator, supported by seismographic records of blasting at the minesite. The modified scaled-distance factor shall be determined such that the particle velocity of the predicted ground vibration will not exceed the prescribed maximum allowable peak particle velocity of Paragraph (e)(2)(B)(*1*) of this section at a 95-percent confidence level.

(D) *Blasting-level chart.* (*1*) An operator may use the ground-vibration limits in Figure 1 to determine the maximum allowable ground vibration.

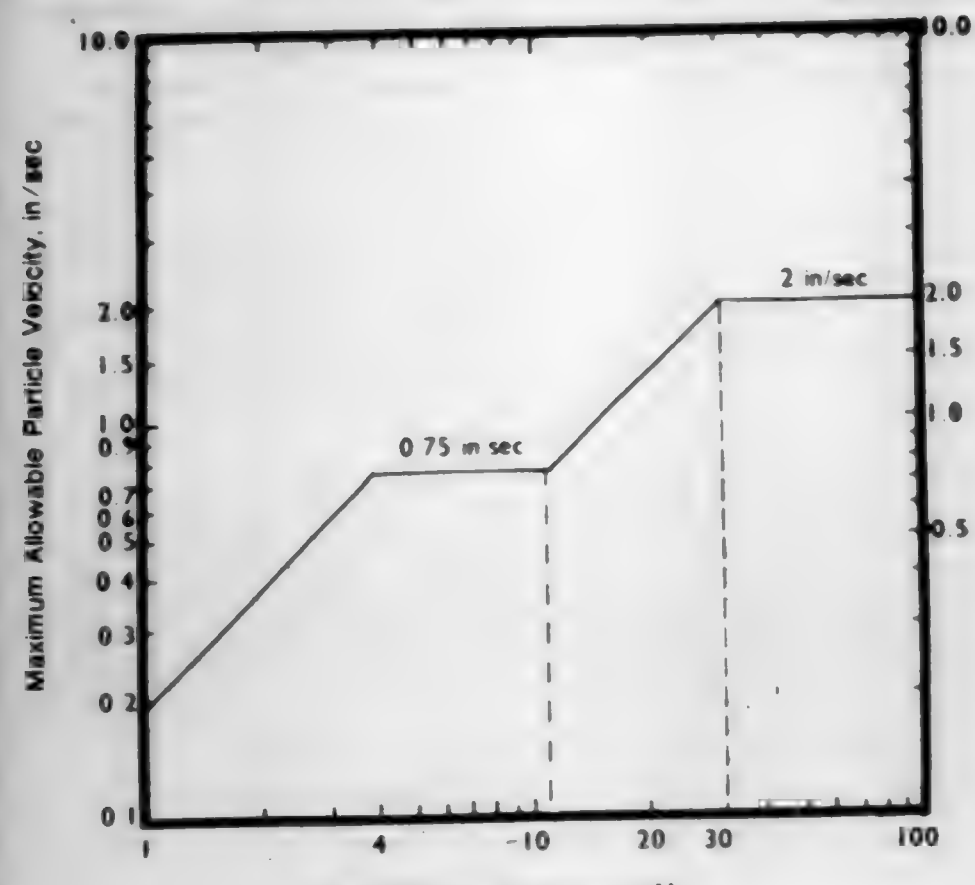

Figure 1. Alternative blasting level criteria
(Source: Modified from figure B-1, Bureau of Mines RI 8507)

(2) If the Figure 1 limits are used, a seismographic record including both particle-velocity and vibration-frequency levels shall be provided for each blast. The method for the analysis of the predominant frequency contained in the blasting records shall be approved by the regulatory authority before application of this alternative blasting criterion.

(E) The maximum allowable ground vibration shall be reduced by the regulatory authority beyond the limits otherwise provided by this section, if determined necessary to provide damage protection.

(F) The regulatory authority may require an operator to conduct seismic monitoring of any or all blasts and may specify the location at which the measurements are taken and the degree of detail necessary in the measurement.

(iii) If blasting is conducted in accordance with Paragraph (e)(2)(i) of this section, the maximum ground-vibration and airblast standards shall not apply at the following locations:

(A) At structures owned by the permittee and not leased to another person.

(B) At structures owned by the permittee and leased to another person, if a written waiver by the lessee is submitted to the regulatory authority before blasting.

* * * * *

§ 715.19 [Amended]

2. Section 715.19 is amended by removing Paragraph (e)(3) and redesignating Paragraph (e)(4) as Paragraph (e)(3).

PART 780—SURFACE MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR RECLAMATION AND OPERATION PLAN

3. Part 780 is amended by revising § 780.13 to read as follows:

§ 780.13 Operation plan: Blasting.

(a) *Blasting plan.* Each application shall contain a blasting plan for the proposed permit area, explaining how the applicant will comply with the requirements of §§ 816.61–816.68 of this chapter. This plan shall include, at a minimum, information setting forth the limitations the operator will meet with regard to ground vibration and airblast, the bases for those limitations, and the methods to be applied in controlling the adverse effects of blasting operations.

(b) *Monitoring system.* Each application shall contain a description of any system to be used to monitor compliance with the standards of § 816.67 including the type, capability, and sensitivity of any blast-monitoring equipment and proposed procedures and locations of monitoring.

(c) *Blasting near underground mines.* Blasting operations within 500 feet of active underground mines require approval of the State and Federal regulatory authorities concerned with the health and safety of underground miners.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

§ 816.11 [Amended]

4. Section 816.11 is amended by removing paragraph (f) and redesignating paragraph (g) as paragraph (f).

5. Section 816.61 is amended by revising paragraphs (a) and (b) and adding paragraph (d) to read as follows:

§ 816.61 Use of explosives: General requirements.

(a) Each operator shall comply with all applicable State and Federal laws and regulations in the use of explosives.

(b) Blasts that use more than 5 pounds of explosive or blasting agent shall be conducted according to the schedule required under § 816.64.

* * * * *

(d) *Blast design.* (1) An anticipated blast design shall be submitted if blasting operations will be conducted within—

(i) 1,000 feet of any building used as a dwelling, public building, school, church, or community or institutional building outside the permit area; or

(ii) 500 feet of an active or abandoned underground mine.

(2) The blast design may be presented as part of a permit application or at a time, before the blast, approved by the regulatory authority.

(3) The blast design shall contain sketches of the drill patterns, delay periods, and decking and shall indicate the type and amount of explosives to be used, critical dimensions, and the location and general description of structures to be protected, as well as a discussion of design factors to be used, which protect the pubic and meet the applicable airblast, flyrock, and ground-vibration standards in § 816.67.

(4) The blast design shall be prepared and signed by a certified blaster.

(5) The regulatory authority may require changes to the design submitted.

6. Section 816.62 is revised to read as follows:

§ 816.62 Use of explosives: Preblasting survey.

(a) At least 30 days before initiation of blasting, the operator shall notify, in writing, all residents or owners of dwellings or other structures located within ½ mile of the permit area how to request a preblasting survey.

(b) A resident or owner of a dwelling or structure within ½ mile of any part of the permit area may request a preblasting survey. This request shall be made, in writing, directly to the operator or to the regulatory authority, who shall promptly notify the operator. The operator shall promptly conduct a preblasting survey of the dwelling or structure and promptly prepare a written report of the survey. An updated survey of any additions, modifications, or renovations shall be performed by the operator if requested by the resident or owner.

(c) The operator shall determine the condition of the dwelling or structure and shall document any preblasting damage and other physical factors that could reasonably be affected by the blasting. Structures such as pipelines, cables, transmission lines, and cisterns, wells, and other water systems warrant special attention; however, the assessment of these structures may be limited to surface conditions and other readily available data.

(d) The written report of the survey shall be signed by the person who conducted the survey. Copies of the report shall be promptly provided to the regulatory authority and to the person requesting the survey. If the person requesting the survey disagrees with the contents and/or recommendations contained therein, he or she may submit to both the operator and the regulatory authority a detailed description of the specific areas of disagreement.

(e) Any surveys requested more than 10 days before the planned initiation of blasting shall be completed by the operator before the initiation of blasting.

7. Section 816.64 is revised to read as follows:

§ 816.64 Use of explosives: Blasting schedule.

(a) *General requirements.* (1) The operator shall conduct blasting operations at times approved by the regulatory authority and announced in the blasting schedule. The regulatory authority may limit the area covered, timing, and sequence of blasting as listed in the schedule, if such limitations are necessary and reasonable in order to protect the public health and safety or welfare.

(2) All blasting shall be conducted between sunrise and sunset, unless nighttime blasting is approved by the regulatory authority based upon a showing by the operator that the public will be protected from adverse noise and other impacts. The regulatory authority may specify more restrictive time periods for blasting.

(3) Unscheduled blasts may be conducted only where public or operator health and safety so require and for emergency blasting actions. When an operator conducts an unscheduled blast, the operator, using audible signals, shall notify residents within ½ mile of the blasting site and document the reason for the unscheduled blast in accordance with § 816.68(p).

(b) *Blasting schedule publication and distribution.* (1) The operator shall publish the blasting schedule in a newspaper of general circulation in the locality of the blasting site at least 10 days, but not more than 30 days, before beginning a blasting program.

(2) The operator shall distribute copies of the schedule to local governments and public utilities and to each local residence within ½ mile of the proposed blasting site described in the schedule.

(3) The operator shall republish and redistribute the schedule at least every 12 months and revise and republish the schedule at least 10 days, but not more than 30 days, before blasting whenever the area covered by the schedule changes or actual time periods for blasting significantly differ from the prior announcement.

(c) *Blasting schedule contents.* The blasting schedule shall contain, at a minimum—

(1) Name, address, and telephone number of operator;

(2) Identification of the specific areas in which blasting will take place;

(3) Dates and time periods when explosives are to be detonated;

(4) Methods to be used to control access to the blasting area; and

(5) Type and patterns of audible warning and all-clear signals to be used before and after blasting.

§ 816.65 [Removed]

8. Section 816.65 is removed.

9. Section 816.66 is added to read as follows:

§ 816.66 Use of explosives: Blasting signs, warnings, and access control.

(a) *Blasting signs.* Blasting signs shall meet the specifications of § 816.11. The operator shall—

(1) Conspicuously place signs reading "Blasting Area" along the edge of any blasting area that comes within 100 feet of any public road right-of-way, and at the point where any other road provides access to the blasting area; and

(2) At all entrances to the permit area from public roads or highways, place conspicuous signs which state "Warning! Explosives in Use," which clearly list and describe the meaning of the audible blast warning and all-clear signals that are in use, and which explain the marking of blasting areas and charged holes awaiting firing within the permit area.

(b) *Warnings.* Warning and all-clear signals of different character or pattern that are audible within a range of ½ mile from the point of the blast shall be given. Each person within the permit area and each person who resides or regularly works within ½ mile of the permit area shall be notified of the meaning of the signals in the blasting schedule.

(c) *Access control.* Access within the blasting area shall be controlled to prevent presence of livestock or unauthorized persons during blasting and until an authorized representative of the operator has reasonably determined that—

(1) No unusual hazards, such as imminent slides or undetonated charges, exist; and

(2) Access to and travel within the blasting area can be safely resumed.

10. Section 816.67 is revised to read as follows:

§ 816.67 Use of explosives: Control of adverse effects.

(a) *General requirements.* Blasting shall be conducted to prevent injury to persons, damage to public or private property outside the permit area, adverse impacts on any underground mine, and change in the course, channel, or availability of surface or ground water outside the permit area.

(b) *Airblast.*—(1) *Limits.* (i) Airblast shall not exceed the maximum limits listed below at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area, except as provided in Paragraph (e) of this section.

Lower frequency limit of measuring system, in Hz (±3 dB)	Maximum level, in dB
0.1 Hz or lower—flat response [1]	134 peak.
2 Hz or lower—flat response	133 peak.
6 Hz or lower—flat response	129 peak.
C-weighted—slow response [1]	105 peak dBC.

[1] Only when approved by the regulatory authority.

(ii) If necessary to prevent damage, the regulatory authority shall specify

lower maximum allowable airblast levels than those of Paragraph (b)(1)(i) of this section for use in the vicinity of a specific blasting operation.

(2) *Monitoring.* (i) The operator shall conduct periodic monitoring to ensure compliance with the airblast standards. The regulatory authority may require airblast measurement of any or all blasts and may specify the locations at which such measurements are taken.

(ii) The measuring systems shall have an upper-end flat-frequency response of at least 200 Hz.

(c) *Flyrock.* Flyrock travelling in the air or along the ground shall not be cast from the blasting site—

(1) More than one-half the distance to the nearest dwelling or other occupied structure;

(2) Beyond the area of control required under § 816.66(c); or

(3) Beyond the permit boundary.

(d) *Ground vibration*—(1) *General.* In all blasting operations, except as otherwise authorized in Paragraph (e) of this section, the maximum ground vibration shall not exceed the values approved in the blasting plan required under § 780.13 of this chapter. The maximum ground vibration for protected structures listed in Paragraph (d)(2)(i) of this section shall be established in accordance with either the maximum peak-particle-velocity limits of Paragraph (d)(2), the scaled-distance equation of Paragraph (d)(3), the blasting-level chart of Paragraph (d)(4) of this section, or by the regulatory authority under Paragraph (d)(5) of this section. All structures in the vicinity of the blasting area, not listed in Paragraph (d)(2)(i) of this section, such as water towers, pipelines and other utilities, tunnels, dams, impoundments, and underground mines, shall be protected from damage by establishment of a maximum allowable limit on the ground vibration, submitted by the operator in the blasting plan and approved by the regulatory authority.

(2) *Maximum peak particle velocity.* (i) The maximum ground vibration shall not exceed the following limits at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area:

Distance (*D*), from the blasting site, in feet	Maximum allowable peak particle velocity (V_{max}) for ground vibration, in inches/second [1]	Scaled-distance factor to be applied without seismic monitoring [2]
0 to 300	1.25	50
301 to 5,000	1.00	55
5,001 and beyond	0.75	65

[1] Ground vibration shall be measured as the particle velocity. Particle velocity shall be recorded in three mutually perpendicular directions. The maximum allowable peak particle velocity shall apply to each of the three measurements.
[2] Applicable to the scaled-distance equation of Paragraph (d)(3)(i) of this section.

(ii) A seismographic record shall be provided for each blast.

(3) *Scale-distance equation.* (i) An operator may use the scaled-distance equation, $W=(D/D_s)^2$, to determine the allowable charge weight of explosives to be detonated in any 8-millisecond period, without seismic monitoring; where W = the maximum weight of explosives, in pounds; D = the distance, in feet, from the blasting site to the nearest protected structure; and D_s = the scaled-distance factor, which may initially be approved by the regulatory authority using the values for scaled-distance factor listed in Paragraph (d)(2)(i) of this section.

(ii) The development of a modified scaled-distance factor may be authorized by the regulatory authority on receipt of a written request by the operator, supported by seismographic records of blasting at the minesite. The modified scale-distance factor shall be determined such that the particle velocity of the predicted ground vibration will not exceed the prescribed maximum allowable peak particle velocity of Paragraph (d)(2)(i) of this section, at a 95-percent confidence level.

(4) *Blasting-level chart.* (i) An operator may use the ground-vibration limits in Figure 1 to determine the maximum allowable ground vibration.

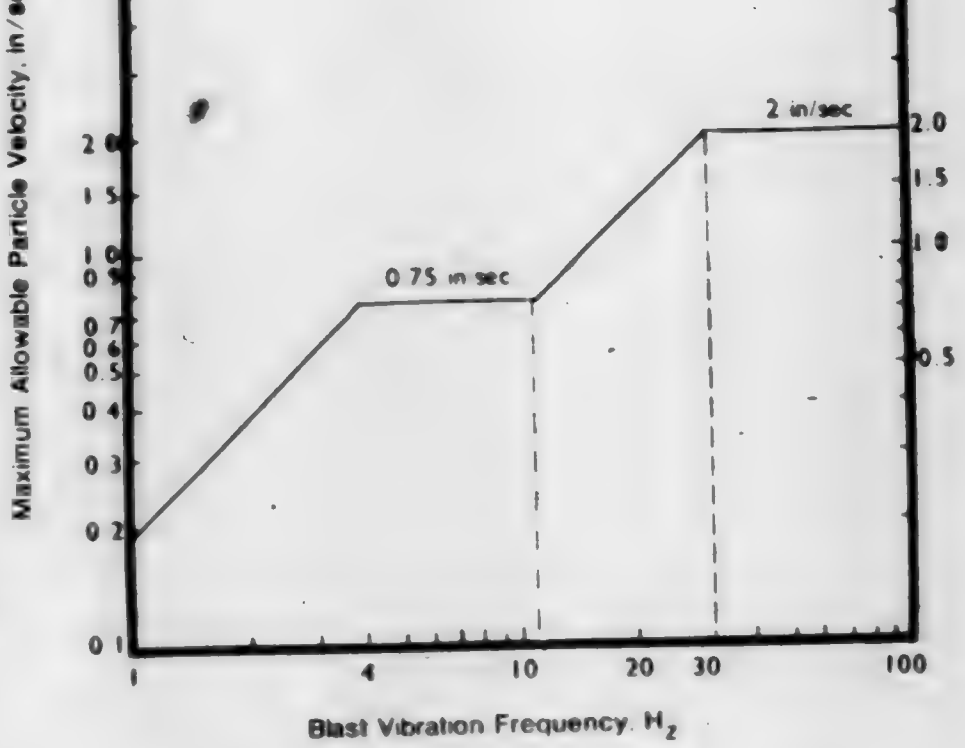

Figure 1 Alternative blasting level criteria
(Source Modified from figure B-1, Bureau of Mines RI 8507)

(ii) If the Figure 1 limits are used, a seismographic record including both particle velocity and vibration-frequency levels shall be provided for each blast. The method for the analysis of the predominant frequency contained in the blasting records shall be approved by the regulatory authority before application of this alternative blasting criterion.

(5) The maximum allowable ground vibration shall be reduced by the regulatory authority beyond the limits otherwise provided by this section, if determined necessary to provide damage protection.

(6) The regulatory authority may require an operator to conduct seismic monitoring of any or all blasts or may specify the location at which the measurements are taken and the degree of detail necessary in the measurement.

(e) The maximum airblast and ground-vibration standards of paragraphs (b) and (d) of this section shall not apply at the following locations:

(1) At structures owned by the permittee and not leased to another person.

(2) At structures owned by the permittee and leased to another person, if a written waiver by the lessee is submitted to the regulatory authority before blasting.

11. Section 816.68 is revised to read as follows:

§ 816.68 Use of explosives: Records of blasting operations.

The operator shall retain a record of all blasts for at least 3 years. Upon request, copies of these records shall be made available to the regulatory authority and to the public for inspection. Such records shall contain the following data:

(a) Name of the operator conducting the blast.

(b) Location, date, and time of the blast.

(c) Name, signature, and certification number of the blaster conducting the blast.

(d) Identification, direction, and distance, in feet, from the nearest blast hole to the nearest dwelling, public building, school, church, community or institutional building outside the permit area, except those described in § 816.67(e).

(e) Whether conditions, including those which may cause possible adverse blasting effects.

(f) Type of material blasted.

(g) Sketches of the blast pattern including number of holes, burden, spacing, decks, and delay pattern.

(h) Diameter and depth of holes.

(i) Types of explosives used.

(j) Total weight of explosives used per hole.

(k) The maximum weight of explosives detonated in an 8-millisecond period.

(l) Initiation system.

(m) Type and length of stemming.

(n) Mats or other protections used.

(o) Seismographic and airblast records, if required, which shall include—

(1) Type of instrument, sensitivity, and calibration signal or certification of annual calibration;

(2) Exact location of instrument and the date, time, and distance from the blast;

(3) Name of the person and firm taking the reading;

(4) Name of the person and firm analyzing the seismographic record; and

(5) The vibration and/or airblast level recorded.

(p) Reasons and conditions for each unscheduled blast.

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

§ 817.11 [Amended]

12. Section 817.11 is amended by removing paragraph (f) and redesignating paragraph (g) as paragraph (f).

13. Section 817.61 is amended by revising paragraphs (a) and (b) and adding paragraph (d) to read as follows:

§ 817.61 Use of explosives: General requirements.

(a) Sections 817.61—817.68 apply to surface blasting activities incident to underground coal mining, including, but not limited to, initial rounds of slopes and shafts.

(b) Each operator shall comply with all applicable State and Federal laws and regulations in the use of explosives.

* * * * *

(d) *Blast design.* (1) An anticipated blast design shall be submitted if blasting operations will be conducted within—

(i) 1,000 feet of any building used as a dwelling, public building, school, church or community or institutional building; or

(ii) 500 feet of active or abandoned underground mines.

(2) The blast design may be presented as part of a permit application or at a time, before the blast, approved by the regulatory authority.

(3) The blast design shall contain sketches of the drill patterns, delay periods, and decking and shall indicate the type and amount of explosives to be used, critical dimensions, and the location and general description of structures to be protected, as well as a discussion of design factors to be used, which protect the public and meet the applicable airblast, flyrock, and ground-vibration standards in § 817.67.

(4) The blast design shall be prepared and signed by a certified blaster.

(5) The regulatory authority may require changes to the design submitted.

14. Section 817.62 is revised to read as follows:

§ 817.62 Use of explosives: Preblasting survey.

(a) At least 30 days before initiation of blasting, the operator shall notify, in writing, all residents or owners of dwellings or other structures located within ½ mile of the permit area how to request a preblasting survey.

(b) A resident or owner of a dwelling or structure within ½ mile of any part of the permit area may request a preblasting survey. This request shall be made, in writing, directly to the operator or to the regulatory authority, who shall promptly notify the operator. The operator shall promptly conduct a preblasting survey of the dwelling or structure and promptly prepare a written report of the survey. An updated survey of any additions, modifications, or renovations shall be performed by the operator if requested by the resident or owner.

(c) The operator shall determine the condition of the dwelling or structure and shall document any preblasting damage and other physical factors that could reasonably be affected by the blasting. Structures such as pipelines, cables, transmission lines, and cisterns, wells, and other water systems warrant special attention; however, the assessment of these structures may be limited to surface conditions and other readily available data.

(d) The written report of the survey shall be signed by the person who conducted the survey. Copies of the report shall be promptly provided to the regulatory authority and to the person requesting the survey. If the person requesting the survey disagrees with the contents and/or recommendations contained therein, he or she may submit to both the operator and the regulatory authority a detailed description of the specific areas of disagreement.

(e) Any surveys requested more than 10 days before the planned initiation of blasting shall be completed by the operator before the initiation of blasting.

15. Section 817.64 is revised to read as follows:

§ 817.64 Use of explosives: General performance standards.

(a) The operator shall notify, in writing, residents within ½ mile of the blasting site and local governments of the proposed times and locations of blasting operations. Such notice of times that blasting is to be conducted may be

announced weekly, but in no case less than 24 hours before blasting will occur.

(b) Unscheduled blasts may be conducted only where public or operator health and safety so requires and for emergency blasting actions. When an operator conducts an unscheduled surface blast incidental to underground coal mining operations, the operator, using audible signals, shall notify residents within ½ mile of the blasting site and document the reason in accordance with § 817.68(p).

(c) All blasting shall be conducted between sunrise and sunset unless nighttime blasting is approved by the regulatory authority based upon a showing by the operator that the public will be protected from adverse noise and other impacts. The regulatory authority may specify more restrictive time periods for blasting.

§ 817.65 [Removed]

16. Section 817.65 is removed.

17. Section 817.66 is added to read as follows:

§ 817.66 Use of explosives: Blasting signs, warnings, and access control.

(a) *Blasting signs.* Blasting signs shall meet the specifications of § 817.11. The operator shall—

(1) Conspicuously place signs reading "Blasting Area" along the edge of any blasting area that comes within 100 feet of any public-road right-of-way, and at the point where any other road provides access to the blasting area; and

(2) At all entrances to the permit area from public roads or highways, place conspicuous signs which state "Warning! Explosives in Use," which clearly list and describe the meaning of the audible blast warning and all-clear signals that are in use, and which explain the marking of blasting areas and charged holes awaiting firing within the permit area.

(b) *Warnings.* Warning and all-clear signals of different character or pattern that are audible within a range of ½ mile from the point of the blast shall be given. Each person within the permit area and each person who resides or regularly works within ½ mile of the permit area shall be notified of the meaning of the signals in the blasting notification required in § 817.64(a).

(c) *Access control.* Access within the blasting areas shall be controlled to prevent presence of livestock or unauthorized persons during blasting and until an authorized representative of the operator has reasonably determined that—

(1) No unusual hazards, such as imminent slides or undetonated charges, exist; and

(2) Access to and travel within the blasting area can be safely resumed.

18. Section 817.67 is revised to read as follows:

§ 817.67 Use of explosives: Control of adverse effects.

(a) *General requirements.* Blasting shall be conducted to prevent injury to persons, damage to public or private property outside the permit area, adverse impacts on any underground mine, and change in the course, channel, or availability of surface or ground water outside the permit area.

(b) *Airblast.*—(1) *Limits.* (i) Airblast shall not exceed the maximum limits listed below at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area, except as provided in Paragraph (e) of this section.

Lower frequency limit of measuring system, in Hz (±3 dB)	Maximum level, in dB
0.1 Hz or lower—flat response [1]	134 peak.
2 Hz or lower—flat response	133 peak.
6 Hz or lower—flat response	129 peak.
C-weighted—slow response [1]	105 peak dBC.

[1] Only when approved by the regulatory authority.

(ii) If necessary to prevent damage, the regulatory authority may specify lower maximum allowable airblast levels than those of Paragraph (b)(1)(i) of this section for use in the vicinity of a specific blasting operation.

(2) *Monitoring.* (i) The operator shall conduct periodic monitoring to ensure compliance with the airblast standards. The regulatory authority may require airblast measurement of any or all blasts and may specify the locations at which such measurements are taken.

(ii) The measuring systems used shall have an upper-end flat-frequency response of at least 200 Hz.

(c) *Flyrock.* Flyrock travelling in the air or along the ground shall not be cast from the blasting site—

(1) More than one-half the distance to the nearest dwelling or other occupied structure;

(2) Beyond the area of control required under § 817.66(c); or

(3) Beyond the permit boundary.

(d) *Ground vibration.*—(1) *General.* In all blasting operations, except as otherwise authorized in paragraph (e) of this section, the maximum ground vibration shall not exceed the values approved by the regulatory authority. The maximum ground vibration for protected structures listed in paragraph (d)(2)(i) of this section shall be established in accordance with either the maximum peak-particle-velocity limits of paragraph (d)(2), the scaled-distance equation of paragraph (d)(3), the blasting-level chart of paragraph (d)(4) of this section, or by the regulatory authority under paragraph (d)(5) of this section. All structures in the vicinity of the blasting area, not listed in paragraph (d)(2)(i) of this section, such as water towers, pipelines and other utilities, tunnels, dams, impoundments, and underground mines shall be protected from damage by establishment of a maximum allowable limit on the ground vibration, submitted by the operator and approved by the regulatory authority before the initiation of blasting.

(2) *Maximum peak-particle velocity.* (i) The maximum ground vibration shall not exceed the following limits at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area:

Distance (*D*), from the blasting site, in feet	Maximum allowable peak particle velocity (*V*max) for ground vibration, in inches/second [1]	Scaled-distance factor to be applied without seismic monitoring [2]
0 to 300	1.25	[illegible]
301 to 5,000	1.00	[illegible]
5,001 and beyond	0.75	[illegible]

[1] Ground vibration shall be measured as the particle velocity. Particle velocity shall be recorded in three mutually perpendicular directions. The maximum allowable peak particle velocity shall apply to each of the three measurements.
[2] Applicable to the scaled-distance equation of Paragraph (d)(3)(i) of this section.

(ii) A seismographic record shall be provided for each blast.

(3) *Scaled-distance equation.* (i) An operator may use the scaled-distance equation, $W=(D/Ds)^2$, to determine the allowable charge weight of explosives to be detonated in any 8-millisecond period, without seismic monitoring; where W = the maximum weight of explosives, in pounds; D = the distance, in feet, from the blasting site to the nearest protected structure; and Ds = the scaled-distance factor, which may initially be approved by the regulatory authority using the values for scaled-distance factor listed in Paragraph (d)(2)(i) of this section.

(ii) The development of a modified scaled-distance factor may be authorized by the regulatory authority on receipt of a written request by the operator, supported by seismographic records of blasting at the minesite. The modified scaled-distance factor shall be determined such that the particle velocity of the predicted ground vibration will not exceed the prescribed maximum allowable peak particle

velocity of paragraph (d)(2)(i) of this section, at a 95-percent confidence level.

(4) *Blasting-level chart.* (i) An operator may use the ground-vibration limits in Figure 1 to determine the maximum allowable ground vibration.

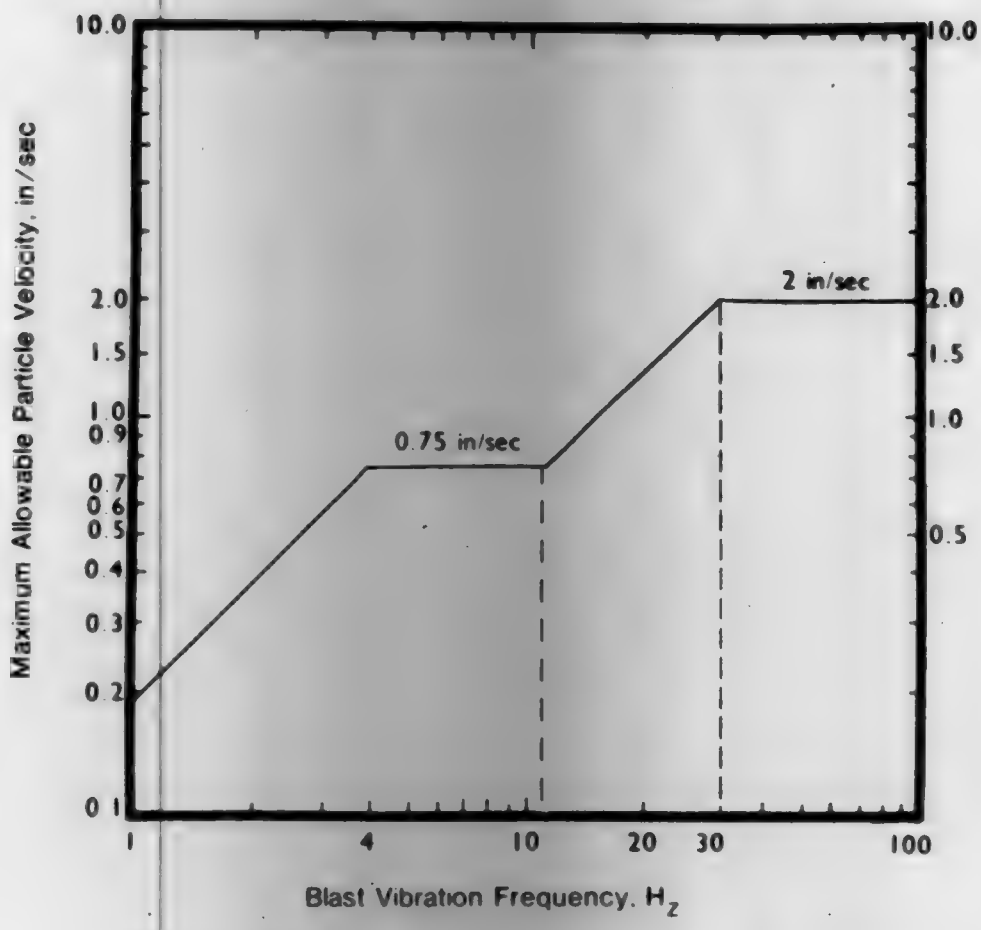

Figure 1 Alternative blasting level criteria

(Source Modified from figure B-1, Bureau of Mines RI8507)

(ii) If the Figure 1 limits are used, a seismographic record including both particle velocity and vibration-frequency levels shall be provided for each blast. The method for the analysis of the predominant frequency contained in the blasting records shall be approved by the regulatory authority before application of this alternative blasting criterion.

(5) The maximum allowable ground vibration shall be reduced by the regulatory authority beyond the limits otherwise provided by this section, if determined necessary to provide damage protection.

(6) The regulatory authority may require an operator to conduct seismic monitoring of any or all blasts and may specify the location at which the measurements are taken and the degree of detail necessary in the measurement.

(e) The maximum airblast and ground-vibration standards of paragraphs (b) and (d) of this section shall not apply at the following locations:

(1) At structures owned by the permittee and not leased to another person,

(2) At structures owned by the permittee and leased to another person, if a written waiver by the lessee is submitted to the regulatory authority before blasting.

19. Section 817.68 is revised to read as follows:

§ 817.68 Use of explosives: Records of blasting operations.

The operator shall retain a record of all blasts for at least 3 years. Upon request, copies of these records shall be made available to the regulatory authority and to the public for inspection. Such records shall contain the following data:

(a) Name of the operator conducting the blast.

(b) Location, date, and time of the blast.

(c) Name, signature, and certification number of the blaster conducting the blast.

(d) Identification, direction, and distance, in feet, from the nearest blast hole to the nearest dwelling, public building, school, church, community or institutional building outside the permit area, except those described in § 817.67 (e).

(e) Weather conditions, including those which may cause possible adverse blasting effects.

(f) Type of material blasted.

(g) Sketches of the blast pattern including number of holes, burden, spacing, decks, and delay pattern.

(h) Diameter and depth of holes.

(i) Types of explosives used.

(j) Total weight of explosives used per hole.

(k) The maximum weight of explosives detonated in an 8-millisecond period.

(l) Initiation system.

(m) Type and length of stemming.

(n) Mats or other protections used.

(o) Seismographic and airblast records, if required, which shall include—

(1) Type of instrument, sensitivity, and calibration signal or certification of annual calibration;

(2) Exact location of instrument and the date, time, and distance from the blast;

(3) Name of the person and firm taking the reading;

(4) Name of the person and firm analyzing the seismographic record; and

(5) The vibration and/or airblast level recorded.

(p) Reasons and conditions for each unscheduled blast.

Part IV

Department of Health and Human Services

Office of the Secretary

Children Involved as Subjects in Research; Additional Protections

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 46

Additional Protections for Children Involved as Subjects in Research

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services (Department or HHS) is prescribing additional requirements for protection of children involved as subjects in research. These regulations adopt, with some changes, the recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (National Commission) as were presented in the notice of proposed rulemaking (NPRM) 43 FR 31786 which preceded this final rule.

Specifically, these regulations impose certain added responsibilities on Institutional Review Boards (IRBs) depending on the degree of risk involved in the research and the extent that the research is likely to be a benefit to the subject or relate to a subject's illness. The regulations also set forth requirements for obtaining permission by parents and guardians and, except under certain circumstances, assent by the children themselves. When the child is a ward of the state, the appointment of an advocate is required under some circumstances. The regulations exempt from coverage most social, economic, and educational research in which the only involvement of children as subjects will be in one or more of the following categories: (a) Research conducted in established or commonly accepted educational settings, involving normal educational practices; (b) Research involving the observation of public behavior; (c) Research involving the use of educational tests; (d) Research involving the collection or study of existing data, documents, records or specimens.

EFFECTIVE DATE: These regulations are applicable to all research reviewed after June 6, 1983 by institutional review boards established under an HHS approved Assurance of Compliance.

ADDRESS: Please send comments or requests for additional information to: Denis J. Doyle, Assistant Regulations Officer, Office for Protection from Research Risks, National Institutes of Health, 5333 Westbard Avenue, Room 3A18, Bethesda, Maryland 20205. Telephone (301) 496–7163.

FOR FURTHER INFORMATION CONTACT: Denis J. Doyle (301) 496–7163.

SUPPLEMENTARY INFORMATION: Basic regulations governing the protection of human subjects involved in research funded by HHS (formerly HEW) were first published in the **Federal Register** on May 30, 1974 (30 FR 18914).

In the preamble to those regulations, HHS indicated that it would propose further rules to provide additional protections for research subjects, including children, who may have diminished capacity to provide informed consent.

The National Research Act (Pub. L. 93–348) was signed into law on July 12, 1974, creating the National Commission. One of the charges to the National Commission was to study the nature of research involving children, the purposes of such research, the steps necessary to protect children as subjects, and the requirements for the informed consent of children, their parents or guardians. The National Commission was required to recommend to the Secretary, HHS, policies defining any circumstances under which research with and for children might be appropriate, and to make recommendations to Congress regarding the protection of subjects (including children) involved in research not subject to regulation by HHS.

In discharging its duties under this mandate, the National Commission studied the nature and extent of research involving children, the purposes for which the research is conducted, and other issues surrounding the participation of children in research. Representatives from professional societies, federal agencies, and public interest groups, as well as parents and other members of the public, presented their views to the National Commission at a public hearing. The National Minority Conference on Human Experimentation, convened by the National Commission to solicit minority views, made recommendations to the National Commission on research involving children.

The National Commission also reviewed papers and reports prepared under contract, on topics including informed consent and actual practices in research involving children. Finally, the National Commission conducted extensive public deliberations and developed recommendations on the participation of children in research.

Pursuant to Section 205 of the National Research Act (Pub. L. 93–348), the report and recommendations of the National Commission on research involving children were published in the **Federal Register** (43 FR 2084) on January 13, 1978.

After review of the National Commission's report and recommendations as well as the public comments received, the Secretary published a notice of proposed rulemaking on research involving children in the **Federal Register** (43 FR 31786) on July 21, 1978. In addition to solicitation of comments on the proposed rules, public comments were also sought on the following points: (1) How could the Department provide more useful guidance to IRBs in evaluating whether only a minor increment over minimum risk is involved and (2) further comments, preferably supported by studies, concerning the issues of requiring assent from children, whether an age for requiring assent should be stated, and, if not, whether there should be guidance in the preamble regarding a suggested appropriate age for assent.

OMB Clearance: Reporting and recordkeeping requirements in Subpart A of 45 CFR Part 46 also cover research affected by this subpart. OMB approval for reporting and recordkeeping requirements contained in 45 CFR Part 46, as amended January 26, 1981, was requested and received.

Impact Analysis

Economic Impact on Small Entities—The Secretary certifies that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, Pub. L. 96–354. Since the establishment of an institutional review board and the filing of an Assurance of Compliance is already required by 45 CFR Part 46, Subpart A, this subpart will not necessarily impose requirement which are additional to the basic conditions required of entities for receiving HHS funds to conduct or sponsor human subject research.

Classification of Rule Under E.O. 12291—The Secretary has determined that this rule is not a "major rule" under Executive Order 12291 and thus a regulatory impact analysis is not required. The Secretary's determination is based on the finding that the proposed rule would not:

(1) Have an annual effect on the economy of $100 million or more;

(2) Impose a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(3) Result in significant adverse effects on competition, employment,

investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Response to Public Comment

A total of 127 public comments was received from individuals and organizations in response to the publication in the **Federal Register** of Proposed Regulations on Research Involving Children (43 FR 31786, July 21, 1978). After reviewing the comments and taking into consideration the recently amended Basic HHS Policy for the Protection of Human Research Subjects (Title 45 Part 46 Code of Federal Regulations), the Department has prepared the final rule on research involving children as human subjects. A number of provisions of the proposed rule have been deleted since they are discussed and incorporated into the amended 45 CFR 46 Subpart A published in the **Federal Register** on January 26, 1981 (46 FR 8366). The summaries of the public comment and the Department's responses and final decisions are organized below by the section and paragraph designation of the proposed rule.

Section 46.401 To what do these regulations apply?

Public Comment: Several commentators stated that specific exemptions should be included in this subpart.

HHS Response: The Department agrees that exemptions (1), (2), (5) and (6), as listed in Subpart A at § 46.101(b) should be applicable to Subpart D as well, and has reworded the final rule to reflect this.

Exemption (3), research involving survey or interview procedures, as listed in § 46.101(b) of Subpart A is not made applicable to this subpart. The Department assumes that adults have the capability to determine whether or not to participate in survey or interview research. However, the Department believes that children being surveyed or interviewed by an investigator may not be capable of recognizing that their responses to questions on sensitive issues could be potentially damaging to themselves or others. Therefore, it is appropriate that the IRB at least review such research to determine whether the rights and welfare of children participating as subjects are adequately protected and when the requirements of permission or assent can be waived. Such waivers shall be in accordance with the requirements of §§ 46.116 and 46.117 of Subpart A.

Exemption (4), research involving the observation of public behavior, as listed in § 46.101(b) of Subpart A, is applicable to Subpart D where the investigator(s) does not participate in the activities being observed. The Department believes that children involved in observation research, where the investigator(s) is also participating in the activities being observed, may not have the capability to determine whether or not to participate and therefore IRB review of such research is appropriate. This modification is reflected in the final rule at § 46.101(b).

Reference is also made in this final rule to the exceptions, additions, and provisions listed in paragraphs (c) through (f) of § 46.101 of Subpart A.

In addition, two other provisions concerning applicability of other subparts of 45 CFR Part 46 or other laws or regulations that are included under § 46.101(a) are repeated in § 46.401(a).

Section 46.402 Purpose.

Public Comment: There was a single comment suggesting that this section be amended to include an explicit statement regarding the value of research involving children as stated in the recommendations of the National Commission.

HHS Response: This section was hortatory in nature and served no substantive purpose.

This section is deleted in the final rule and all subsequent sections are re-numbered.

Section 46.403 Definitions.

Public Comment: There were a total of 26 comments on the definitions. "Secretary," "DHEW" (now HHS), "Parent" and "Guardian" were not the subject of comment. There were three comments on "Research" and seven on "Minimal risk." Responses to these ten comments were considered in the preamble of Subpart A, previously published (46 FR 8366).

Three commentators criticized the Department's definition of "Children" for including those "persons who have not attained the legal age of consent to general medical care as determined under the applicable law of the jurisdiction in which the research will be conducted." They pointed out that in many jurisdictions certain classes of minors are considered to be emancipated and are legally authorized to consent to certain kinds of treatment or services.

There were eight comments on the definition of "Advocate," five of which objected to the provision that such an individual should not have "any financial interest in, or other association with, the institution conducting or sponsoring the research." A reason given was that it would be difficult, if not impossible, to get qualified volunteers to serve as advocates. Other commentators questioned the legal authority of an IRE to appoint an advocate and whether an advocate might be placed in legal jeopardy if an injury or suit resulted.

Five comments on "Assent" and "Permission" as definitions were received which did not call for a major change in these definitions. Additional comments on "Assent" and "Permission" in general are summarized in the discussion of § 46.409 below.

HHS Response: The definitions of "Parent" and "Guardian" are unchanged. The terms "Research" and "Minimal risk" are removed from this subpart since they appear in subpart A (§ 46.102 (e) and (g)). The Department agrees that reference to "consent to general medical care" in the definition of children is not appropriate and has, therefore, reworded the final regulation to read "consent to treatments or procedures involved in the research." The Department does not believe that a definition of "Advocate" is needed since it has been decided to delete any requirements for an advocate other than under Section 46.409 (a) and (b) of the final rule where the duties of the advocate serve as a working definition. It is the Department's position that the role of the advocate not be compromised by association with the research, the investigator(s), or the guardian organization. Modification of the final rule, at § 46.409 reflects this position, and is consistent with the recommendations of the National Commission.

In the definitions of "Assent" and "Permission" all references to informed consent requirements have been deleted since they are discussed in § 46.409 below.

This section is redesignated as § 46.402 in the final rule.

Section 46.404 IRB duties.

Public Comment: A total of 38 commentators addressed one or more of the duties assigned to IRBs by this support, in addition to those assigned in Subpart A. The majority of the comments referred to § 46.404(a)(1) "The research methods are appropriate to the aims of the research" or to § 46.404(a)(8), "adequate provisions are made for monitoring solicitation of assent and permission * * *."

Six commentators questioned the phrase "The competence of investigator(s) and the quality of the

research facility are sufficient for the conduct of the research."

Comments on §§ 46.404(a)(1) and 46.404(a)(2) were related and very similar to those objections received in connection with a similar provision in the Proposed Regulations Amending Basic HEW Policy for Protection of Human Research Subjects (44 FR 47688, August 14, 1979), which states that "The research methods are appropriate to the objective of the research and the field of study."

Commentators pointed out, in response to the National Commission's recommendation (7)(B) (43 FR 31789), that the Department evidently intended to have the phrase "when appropriate" precede the provision at § 46.404(a)(8) and, therefore, monitoring would be the IRB decision. Had the phrase "when appropriate" been included in the proposed regulation, most of the comments probably would not have been expressed, since objections concerned the requirement for monitoring solicitation of assent and permission for all projects.

HHS Response: On August 14, 1979, when the Department published Proposed Regulations Amending Basic HEW (now HHS) Policy for Protection of Human Research Subjects (44 FR 47688), the public comment period for soliciting responses to the proposed regulations for research involving children was also extended. In its preparation of final regulations concerning the basic policy (Subpart A of Part 46), the Department examined all comments relating to IRB duties. Therefore, the HHS believes that the comments concerning this section have been adequately addressed in the preamble and regulatory sections of the final regulations amending Subpart A, published on January 26, 1981 (46 FR 8366). Accordingly, provisions (1) through (9) of § 46.404(a) as well as § 46.404(b) and (c) have been deleted. Section 46.404(a) has been modified and redesignated as §46.403 in the final rule.

Although subject selection was not a point of significant public comment, the Department believes, as did the National Commission, that research involving risk should be conducted first on animals and adult humans in order to ascertain the degree of risk. When this is not relevant or possible, research should be first conducted on older children if feasible before progressing to younger children.

Section 46.405 Research not involving greater than minimal risk.

Public Comment: Only two commentators addressed this section, with one stating that to require explicit permission in all minimal risk, social and educational research would greatly and unnecessarily inhibit valuable research, especially in school settings. The other commentator felt that the phrase, "except where such provisions are waived by an IRB or its equivalent," should be added after the reference to § 46.409.

HHS Response: The Department has already taken account of the comment concerning research in schools since 45 CFR 46.101(b) exempts certain types of social and educational research which are also exempted from coverage under this subpart. In response to the second comment, §46.408 (formerly § 46.409) does provide for IRB waiver of the requirements for permission and assent under certain circumstances. Section 46.405(a), which referred to conditions of § 46.404, has been deleted.

This section, redesignated as § 46.404, reflects the above discussion in the final rule.

Section 46.406 Research involving greater than minimal risk but presenting the prospect of direct benefit to the individual subjects.

Public Comment: Of the five commentators who directed their remarks to this section, one felt that if this were interpreted to mean that each subject should benefit, no placebo controlled drug study could be done. The other four comments pertained to § 46.406(b). One person felt that the provisions should incorporate language from the National Commission's report describing when a risk is acceptable. Another commentator questioned how the IRB could make the required judgment in the case of an Investigational New Drug (IND) study. A third person suggested that "is believed" be inserted before "at least as favorable." Another commentator suggested deleting the section since it lacks logic in view of the fact that a research program does not allow the estimates required by this section.

HHS Response: It is the Department's position that research activities involving placebos may be conducted in accord with Subpart D, depending upon the individual activity. An IRB may find that a particular activity is approvable under sections redesignated in the final rule as §§ 46.404, 46.405, and 46.406, or, in some cases, a combination of these sections.

The Department feels that in order to provide adequate safeguards for the protection of children as research subjects, the language of § 46.406 as proposed is not only essential but is in keeping with the recommendations of the National Commission. Therefore, except for deleting §46.406(c), the section is retained and redesignated as § 46.405 in the final rule.

Section 46.407 Research involving greater than minimal risk and no prospect of direct benefit to individual subjects, but likely to yield generalizable knowledge about the subject's disorder or condition.

Public Comment: There were a total of 12 commentators that referred to this section or to a related question posed in the proposed regulations on how the Department could provide more useful guidance to IRBs in evaluating when a "minor increment over minimal risk is involved."

Several commentators felt that no attempt should be made either to define the concept of "minor increment" or to provide guidance to IRBs on evaluating whether a minor increment over minimal risk is involved. These commentators believed that because of varying situations and circumstances, IRBs would have to make judgments on a case by case basis. Other commentators cited the present difficulty of dealing with the concept of minimal risk and objected to any additional category of risk if not specifically defined. A few commentators stated that attempts by IRBs and investigators to determine minor increment over minimal risk could be too frustrating and impractical.

Several commentators questioned whether IRBs would have the expertise to evaluate adequately whether the research is likely to yield generalizable knowledge about the subject's disorder or condition which is of vital importance for the understanding or amelioration of same.

HHS Response: The Department believes that it is an appropriate responsibility of the IRBs to determine when the research would involve a minor increase over minimal risk. The Department also believes that the IRBs either are qualified or will enlist the aid of consultants who are qualified to judge whether the generalizable knowledge yielded will be of vital importance for the understanding or amelioration of the subject's disorder or condition.

Except for the deletion of § 46.407(d) this section is retained and redesignated as § 46.406 in the final rule.

Section 46.408 Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health or welfare of children.

Public Comment: There were a total of 11 comments, the majority of which spoke to § 46.408(b). Some commentators felt that properly

constituted IRBs serve the best interest of children and should review and approve all types of research proposals. Others preferred a standing Ethics Advisory Board and pointed out that employment of expert panels could lead to a kind of situational ethics. Four commentators, however, endorsed the change to a panel of experts instead of a National Ethics Advisory Board.

One respondent questioned the apparent escalation of the level of risk to which the Department is willing to expose research subjects. The commentator pointed out that minimal risk was once being suggested as an outer limit, but now research in children is authorized by the proposed regulations which cannot even meet the relaxed and "mystifying" standard of "minor increases over minimal risk." The same commentator suggested deleting this section in its entirety.

HHS Response: The National Commission made a recommendation that provided for exceptional situations in which the problem addressed would be a grave one, the expected benefit would be of major significance, the hypothesis regarding the expected benefit would be scientifically sound, and an equitable method would be used for selecting subjects. HHS intends that this section apply when the IRB has difficulty in applying §§ 46.405, 46.406 and 46.407 (now designated as §§ 46.404, 46.405 and 46.406 in the final rule) but considers the research of sufficient importance to warrant national review and determination by the Secretary, HHS, prior to its being conducted.

The Department believes not only that the section should be retained, but that a panel of experts, which could be an ethics advisory board or some other qualified body, offers a flexible mechanism for reaching decisions on these difficult questions. HHS further feels that consultation with the panel, in addition to IRB and peer review, with final determination being made by the Secretary, will assure appropriate protection of children as research subjects.

Reference to § 46.404 was deleted from § 46.406(a)(1) as in the previous three sections. Section 46.408 is redesignated as § 46.407 in the final rule.

Section 46.409 Requirements for permission by parents or guardians and for assent by children.

Public Comments: Thirty-nine commentators specifically addressed this section. There were an additional 48 comments directed to the Department's request for public response to options presented in the preamble to the proposed rule (43 FR 31786, July 21, 1978) which related to whether an age for assent should be stated and, if so, what age.

Fourteen commentators addressed the subject of soliciting assent of children. A few of these commentators felt that a child should be informed and voluntary participation assured, but that there should be no formal regulatory requirement for assent. Others stated that IRBs should not be given exact guidelines, because information provided to and assent obtained from the child should depend on a variety of factors, such as the type of research, the child's level of competence, and the potential risk and discomfort involved. Almost one half of the commentators suggested that the investigator, using appropriate criteria, should decide when to obtain assent from children on a case by case basis. A few commentators pointed out that there were no guidelines for determining what could be done in situations where subjects object to participation in the research. Some commentators were concerned that if an IRB had to make a judgment regarding the assent of each individual child in a project involving 200 children, the review task would be impossible.

In response to the first option presented by the Department concerning the age of assent, five commentators preferred requiring assent from children who are 12 years of age or older. Of these commentators, one believed that age seven or older would be more appropriate when the research involved drug testing. A number of commentators were of the opinion that children between the ages of seven and 12 be informed of the research although assent would not be required until age 12.

Five commentators preferred option (2) agreeing that it was reasonable to expect children at age seven and older to understand and actively participate in the decision-making concerning their involvement in the research.

Eleven commentators felt that option (3) was most appropriate. Under this option, the IRBs would decide when to require assent, but the preamble to the regulations would provide guidance to the IRBs concerning an appropriate age. Of these commentators, six favored guidance recommending age 12, three favored age seven and two did not express an opinion concerning age.

Sixteen commentators favored option (4), preferring that assent be left to the discretion of the IRB and that no guidance be provided either in the regulations or in the preamble. Many of these commentators felt that option (4) presented the most flexible approach to the determination of capability, since chronological age alone is an insufficient criterion. They also believed that the best protection for children would be the thoughtful consideration of what information would be given to subjects by a competent group of scientists and lay persons, together with the informed permission of parents.

There were seven comments on option (5), other alternatives, which dealt mostly with different suggested ages for assent varying from age three to 16.

There were five comments directed to the subject of advocate which was proposed under § 46.409(b). Three commentators endorsed this section requiring that the IRB determine when to employ an advocate. One commentator stated that it would be a mistake to establish a distinct and separate class of children for whom third party permission was required. Another commentator suggested that material should be provided concerning issues relevant to the role of an advocate who would have the delicate and challenging task of decision-making. A fifth commentator opposed an advocacy plan, stating that to require the IRBs to locate and monitor advocates would greatly increase the burden of the IRBs.

Seven commentators addressed provision § 46.409(c). One commentator felt that the concept of one parent being "not reasonably available" might need further clarification or definition. Another commentator believed that no research ought to be undertaken on children unless both parents, or a single parent if the child is under the care of only one parent, consent in accordance with the requirements of informed consent. Others suggested that a section should be provided allowing the IRB to establish criteria for activities not requiring parental permission such as levels of research that do not involve risk beyond that which is expected in day to day activities. A few commentators stated that parental permission should be waived for social and educational research.

Twelve commentators responded to § 46.409(d), five of whom agreed in principle that the section as drafted was appropriate and adequate. Other comments varied as follows: additional safeguards should be listed and the IRB should not be the body to grant permission; the IRBs should not be encouraged to treat categories of children, neglected, abused or whatever, as candidates for uniform waivers and such groups of children should not be research subjects unless the research offers them direct therapeutic gains; and, a phrase should be added to the parenthetical example in § 46.409(d) such as "children in educational settings

where no greater than minimal risk is involved."

There were no comments on § 46.409 (e) and (f).

HHS Response: The Department appreciates the public's response to its request for comments on the important issue of assent and after careful consideration of all the comments agrees that determination of an appropriate age for assent should be made by the IRB and that § 46.409(a) should be adopted with minor modification. The phrase "the child is so incapacitated" is changed to "the capability of some or all of the children is so limited." In addition, the last sentence referring to a subject advocate is deleted.

As discussed above under definitions, the Department does not believe that emphasis should be given to advocates, and, therefore, the appointment of an advocate should not be a provision of this section. Even in the absence of the child's assent, if the procedure holds out a prospect of direct benefit available only in the context of the research, permission of the child's parent(s) or guardian should be sufficent. Therefore all references to the use of an advocate are deleted from this section in the final rule.

The Department believes that the wording of the final regulations at § 46.408(b) (formerly § 46.409(c)) is such that the IRB will require the permission of both parents in all instances if they feel that it is appropriate and that the IRB should be given the responsibility for determining when a parent is not "reasonably available." A sentence has been inserted in this provision pointing out that in soliciting permission, the requirements for informed consent set forth in § 46.116 of Subpart A shall apply. With regard to assent, the criteria set forth in § 46.116 may be used by IRBs as a guide to determine what types of information should be provided to children when soliciting their assent.

The Department agrees with the public comment suggesting that assent and parental permission or documentation of such permission may not be appropriate in some cases. Accordingly, references to § 46.116 and § 46.117 of Subpart A are added to clarify that the IRB may approve waivers under certain circumstances.

The Department considers § 46.408(c) (formerly § 46.409(d)), to be adequate as drafted since it provides flexibility for the IRB to provide an appropriate mechanism for protecting certain subject populations.

Section 46.409 (e) and (f) have been reworded and the entire section has been redesignated as § 46.408 in the final rule.

Section 46.410 Wards.

Public Comments: A total of eight commentators addressed this section. Some suggested that the common legal element of § 46.410 be removed by changing the title from "Wards" to a more neutral title such as "children removed from parental custody and care." Several commentators interpreted the specified conditions as being too restrictive if "related to their status as wards" meant that research on such an individual's condition could not be undertaken. Another was of the opinion that the circumstances under which wards of the state might be involved need to be defined more narrowly to allow research only when it presents a reasonable opportunity to understand, prevent or alleviate a serious problem affecting the health or welfare of wards as a class and only when the information cannot be obtained from other segments of the population. One questioned the role of the advocate and felt that, due to the "coercive nature of their situation and lack of parental concern," involvement of wards in nontherapeutic research should be forbidden.

HHS Response: The Department would like to point out that this section is intended to apply strictly to "wards" and not also to children who, because of various physical or mental disabilities, may be under the custody and care of some other person or facility and whose parents are still legally responsible for them. The Department emphasizes that the provisions of this section are to be applied only if wards are to be included in research approved under §§ 46.406 or 46.407 of this part, as redesignated. Therefore, this section would not affect research presenting direct benefit to the individual subjects. The Department believes that these provisions would protect such children from being involved in research not intended to be of direct benefit and from being taken advantage of because of their status. The Department has deleted § 46.410(c) because § 46.410(b) adequately covers the role of an appointed advocate.

This section is redesignated as § 46.409 in the final rule.

List of Subjects in 45 CFR Part 46

Civil rights, Government contracts, Grant programs—health, Prisoners, Research, Safety, Women, Children, Human research subjects, Research.

Dated: September 23, 1982.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Dated: February 3, 1983.

Richard S. Schweiker,

Secretary.

PART 46—[AMENDED]

Accordingly, Part 46 of 45 CFR is amended by adding a new Subpart D to read as follows:

Subpart D—Additional Protections for Children Involved as Subjects in Research

Sec.

46.401 To what do these regulations apply?
46.402 Definitions.
46.403 IRB duties.
46.404 Research not involving greater than minimal risk.
46.405 Research involving greater than minimal risk but presenting the prospect of direct benefit to the individual subjects.
46.406 Research involving greater than minimal risk and no prospect of direct benefit to individual subjects, but likely to yield generalizable knowledge about the subject's disorder or condition.
46.407 Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health or welfare of children.
46.408 Requirements for permission by parents or guardians and for assent by children.
46.409 Wards.

Subpart D—Additional Protections for Children Involved as Subjects in Research

§ 46.401 To what do these regulations apply?

(a) This subpart applies to all research involving children as subjects, conducted or supported by the Department of Health and Human Services.

(1) This includes research conducted by Department employees, except that each head of an Operating Division of the Department may adopt such nonsubstantive, procedural modifications as may be appropriate from an administrative standpoint.

(2) It also includes research conducted or supported by the Department of Health and Human Services outside the United States, but in appropriate circumstances, the Secretary may, under paragraph (e) of § 46.101 of Subpart A, waive the applicability of some or all of the requirements of these regulations for research of this type.

(b) Exemptions (1), (2), (5) and (6) as listed in Subpart A at § 46.101(b) are applicable to this subpart. Exemption (4), research involving the observation

of public behavior, listed at § 46.101(b), is applicable to this subpart where the investigator(s) does not participate in the activities being observed. Exemption (3), research involving survey or interview procedures, listed at § 46.101(b) does not apply to research covered by this subpart.

(c) The exceptions, additions, and provisions for waiver as they appear in paragraphs (c) through (i) of § 46.101 of Subpart A are applicable to this subpart.

§ 46.402 Definitions.

The definitions in § 46.102 of Subpart A shall be applicable to this subpart as well. In addition, as used in this subpart:

(a) "Children" are persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law of the jurisdiction in which the research will be conducted.

(b) "Assent" means a child's affirmative agreement to participate in research. Mere failure to object should not, absent affirmative agreement, be construed as assent.

(c) "Permission" means the agreement of parent(s) or guardian to the participation of their child or ward in research.

(d) "Parent" means a child's biological or adoptive parent.

(e) "Guardian" means an individual who is authorized under applicable State or local law to consent on behalf of a child to general medical care.

§ 46.403 IRB duties.

In addition to other responsibilities assigned to IRBs under this part, each IRB shall review research covered by this subpart and approve only research which satisfies the conditions of all applicable sections of this subpart.

§ 46.404 Research not involving greater than minimal risk.

HHS will conduct or fund research in which the IRB finds that no greater than minimal risk to children is presented, only if the IRB finds that adequate provisions are made for soliciting the assent of the children and the permission of their parents or guardians, as set forth in § 46.408.

§ 46.405 Research involving greater than minimal risk but presenting the prospect of direct benefit to the individual subjects.

HHS will conduct or fund research in which the IRB finds that more than minimal risk to children is presented by an intervention or procedure that holds out the prospect of direct benefit for the individual subject, or by a monitoring procedure that is likely to contribute to the subject's well-being, only if the IRB finds that:

(a) The risk is justified by the anticipated benefit to the subjects;

(b) The relation of the anticipated benefit to the risk is at least as favorable to the subjects as that presented by available alternative approaches; and

(c) Adequate provisions are made for soliciting the assent of the children and permission of their parents or guardians, as set forth in § 46.408.

§ 46.406 Research involving greater than minimal risk and no prospect of direct benefit to individual subjects, but likely to yield generalizable knowledge about the subject's disorder or condition.

HHS will conduct or fund research in which the IRB finds that more than minimal risk to children is presented by an intervention or procedure that does not hold out the prospect of direct benefit for the individual subject, or by a monitoring procedure which is not likely to contribute to the well-being of the subject, only if the IRB finds that:

(a) The risk represents a minor increase over minimal risk;

(b) The intervention or procedure presents experiences to subjects that are reasonably commensurate with those inherent in their actual or expected medical, dental, psychological, social, or educational situations;

(c) The intervention or procedure is likely to yield generalizable knowledge about the subjects' disorder or condition which is of vital importance for the understanding or amelioration of the subjects' disorder or condition; and

(d) Adequate provisions are made for soliciting assent of the children and permission of their parents or guardians, as set forth in § 46.408.

§ 46.407 Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health or welfare of children.

HHS will conduct or fund research that the IRB does not believe meets the requirements of §§ 46.404, 46.405, or 46.406 only if:

(a) The IRB finds that the research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem affecting the health or welfare of children; and

(b) The Secretary, after consultation with a panel of experts in pertinent disciplines (for example: science, medicine, education, ethics, law) and following opportunity for public review and comment, has determined either: (1) That the research in fact satisfies the conditions of §§ 46.404, 46.405, or 46.406, as applicable, or (2) the following:

(i) The research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem affecting the health or welfare of children;

(ii) The research will be conducted in accordance with sound ethical principles;

(iii) Adequate provisions are made for soliciting the assent of children and the permission of their parents or guardians, as set forth in § 46.408.

§ 46.408 Requirements for permission by parents or guardians and for assent by children.

(a) In addition to the determinations required under other applicable sections of this subpart, the IRB shall determine that adequate provisions are made for soliciting the assent of the children, when in the judgment of the IRB the children are capable of providing assent. In determining whether children are capable of assenting, the IRB shall take into account the ages, maturity, and psychological state of the children involved. This judgment may be made for all children to be involved in research under a particular protocol, or for each child, as the IRB deems appropriate. If the IRB determines that the capability of some or all of the children is so limited that they cannot reasonably be consulted or that the intervention or procedure involved in the research holds out a prospect of direct benefit that is important to the health or well-being of the children and is available only in the context of the research, the assent of the children is not a necessary condition for proceeding with the research. Even where the IRB determines that the subjects are capable of assenting, the IRB may still waive the assent requirement under circumstances in which consent may be waived in accord with § 46.116 of Subpart A.

(b) In addition to the determinations required under other applicable sections of this subpart, the IRB shall determine, in accordance with and to the extent that consent is required by § 46.116 of Subpart A, that adequate provisions are made for soliciting the permission of each child's parents or guardian. Where parental permission is to be obtained, the IRB may find that the permission of one parent is sufficient for research to be conducted under § 46.404 or § 46.405. Where research is covered by §§ 46.406 and 46.407 and permission is to be obtained from parents, both parents must give their permission unless one parent is deceased, unknown, incompetent, or not reasonably available, or when only one parent has

legal responsibility for the care and custody of the child.

(c) In addition to the provisions for waiver contained in § 46.116 of subpart A, if the IRB determines that a research protocol is designed for conditions or for a subject population for which parental or guardian permission is not a reasonable requirement to protect the subjects (for example, neglected or abused children), it may waive the consent requirements in Subpart A of this part and paragraph (b) of this section, provided an appropriate mechanism for protecting the children who will participate as subjects in the research is substituted, and provided further that the waiver is not inconsistent with federal, state or local law. The choice of an appropriate mechanism would depend upon the nature and purpose of the activities described in the protocol, the risk and anticipated benefit to the research subjects, and their age, maturity, status, and condition.

(d) Permission by parents or guardians shall be documented in accordance with and to the extent required by § 46.117 of Subpart A.

(e) When the IRB determines that assent is required, it shall also determine whether and how assent must be documented.

§ 46.409 Wards.

(a) Children who are wards of the state or any other agency, institution, or entity can be included in research approved under § 46.406 or § 46.407 only if such research is:

(1) Related to their status as wards; or

(2) Conducted in schools, camps, hospitals, institutions, or similar settings in which the majority of children involved as subjects are not wards.

(b) If the research is approved under paragraph (a) of this section, the IRB shall require appointment of an advocate for each child who is a ward, in addition to any other individual acting on behalf of the child as guardian or in loco parentis. One individual may serve as advocate for more than one child. The advocate shall be an individual who has the background and experience to act in, and agrees to act in, the best interests of the child for the duration of the child's participation in the research and who is not associated in any way (except in the role as advocate or member of the IRB) with the research, the investigator(s), or the guardian organization.

Part V

General Services Administration

Assignment and Utilization of Space; Temporary Regulations

GENERAL SERVICES ADMINISTRATION

41 CFR Ch. 101

[FPMR Temp. Reg. D-68]

Temporary Regulations; Assignment and Utilization of Space

AGENCY: Public Buildings Service, General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This regulation provides revised procedures concerning the assignment and utilization of space in Federal facilities under the custody and control of GSA. It supersedes provisions in 41 CFR Part 101–17. The intent of the rule is to simplify and streamline GSA's space management regulations.

DATES: Effective date March 8, 1983. Expiration date January 31, 1984, unless sooner revised or superseded.

Comments due by: Comments may be submitted at any time; to ensure their consideration in drafting the final regulation, comments should be received by GSA no later than June 30, 1983.

ADDRESS: Comments should be submitted to the General Services Administration (PR), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Arthur O. Barton, Acting Assistant Commissioner for Space Management (202–566–1025).

SUPPLEMENTARY INFORMATION: GSA's authority for issuing this temporary regulation is contained in the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)).

The purpose of this regulation is to substantially improve the cost effectiveness of agencies' use of space and to simplify the process through which agencies acquire and dispose of space controlled by the General Services Administration. It reflects the President's announced goal to strengthen the management and improve the efficiency of the Federal Government. By improving the utilization of Government space, substantial cost savings may be achieved. Further, this regulation vests responsibility for improved controls with the top management of executive branch agencies with the goal of reducing Federal space to the absolute minimum necessary for employees to accomplish the tasks they must perform.

Prior Comments

In October 1982, GSA established an interagency advisory committee to redraft the Federal Property Management Regulations, 41 CFR Chapter 101. This regulation reflects comments and changes recommended by members of that committee. Further, GSA distributed working copies of this temporary regulation to the Assistant Secretaries for Management of Federal agencies in November 1982 and on January 4, 1983. In addition, guidance was received from the Executive Office of the President and key policy forums in December and again in early March.

One of major issues raised by commenters was whether the provisions of the new regulation would be retroactive with regard to space actions currently in process. GSA agrees that the provisions of the temporary regulation should not be applied, *in toto*, to pending space requests. However, the requirement to improve utilization and move towards the objective of 135 square feet per person is, for all space actions, effective immediately. Thus, reevaluation of certain pending requests submitted prior to the effective date of the regulation is appropriate.

Questions were also raised as to the process by which GSA will fulfill space requests during the interim period between the effective date of the regulation and the approval of agency space plans. Until plans are developed and approved, GSA will process requests as if each request were not contained in an approved plan. Therefore, all space requests submitted in the absence of a plan must be signed by the head of the agency or by his or her formally designated representative. This procedure is set forth in § 101–17.101(c) of the regulation.

A related concern was whether existing agency space allocation standards previously approved by GSA would remain in force. GSA agrees that existing standards will continue to apply until changed by the agencies. It should again be noted that this does not relieve an agency head of the responsibility to attempt to achieve an overall office utilization rate of 135 square feet as soon as possible. Rather, it requires agency heads to expeditiously review and modify existing space allocation standards.

Several commenters suggested improvements in the definitions of office space and utilization rates contained in the regulation. While agreeing that some points are well taken, GSA's position is that there should be no changes in the present methods by which GSA-controlled space is measured and categorized. During the course of the drafting process, GSA and the members of the advisory committee considered various modifications of the definitions. It was clear that departures from the existing criteria were likely to impose substantial additional workloads, would engender confusion among agencies, and would severely limit the utility of the existing "base line" data against which future progress must be evaluated.

Some concerns were expressed regarding procedures for the development of agency space plans. In response, GSA has instituted meetings with agencies and with regional GSA personnel to disseminate planning data, discuss the planning process, and provide guidance for the development of the plans.

A number of comments objecting to proposed procedures for relinquishment of space were received. Commenters suggested that the concept of making agencies responsible and accountable for space which could no longer be readily used did not adequately reflect the fact that changes to agency programs may change space needs. It is GSA's position that costs of changing space needs are direct results of decisions to change programs; as such, they should be identified with the programs. The provisions of § 101–17.203 of the regulation, pertaining to the responsibility for moving expenses, were interpreted by some commenters as representing a change in policy. It was not GSA's intent to effect policy changes in this area, and GSA has subsequently modified the language in several places for clarification.

One respondent observed that GSA regional personnel had been inconsistent in their initial application of the principles set forth in the regulation. GSA acknowledges that some uncertainty regarding implementation of new management concepts has occurred. When any broad initiative is undertaken, a certain amount of "slippage" is inevitable. GSA continues to monitor the space acquisition process in all regions in order to ensure as smooth a transition as possible.

GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has

chosen the alternative approach involving the least net cost to society.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter D to read as follows:

Federal Property Management Regulations; Temporary Regulation D-68

February 17, 1983.

To: Heads of Federal agencies

Subject: Assignment and utilization of space

1. *Purpose.* This regulation supersedes the material in 41 CFR Part 101-17 and provides revised instructions for assigning and using space.

2. *Effective date.* This regulation is effective March 8, 1983.

3. *Expiration date.* This regulation expires on January 31, 1984.

4. *Background.* The General Services Administration has started a program to streamline and simplify the Federal Property Management Regulations. GSA's Interagency Advisory Committee on Regulatory Review is assisting in this effort, and the material in this regulation was developed with the assistance on the Committee.

5. *Revised procedures.* Attachment A contains revised regulations concerning assignment and utilization of space.

6. *Comments.* Comments concerning the effect or impact of this regulation may be submitted to the General Services Administration (PR), Washington, DC 20405.

7. *Effect on other directives.* The provisions of Part 101-17 are superseded by the regulations in attachment A.

Gerald P. Carmen,

Administrator of General Services.

Section 101-17.000 Scope of Part

This part prescribes the policies and procedures for the assignment, utilization, and planning of space in buildings under the custody or control of GSA. The term "United States," as used in this subchapter, means the 50 States of the United States; the District of Columbia; and the Commonwealths, territories, and possessions of the United States

Section 101-17.001 Authority

This part implements the applicable provisions of the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended; the Act of July 1, 1898 (40 U.S.C. 285); the Act of August 27, 1935 (40 U.S.C. 304c); the Public Buildings Act of 1959, as amended (40 U.S.C. 601 et seq.); the Rural Development Act of 1972 (86 Stat. 674); Reorganization Plan No. 18 of 1950 (40 U.S.C. 490 note); the Public Buildings Cooperative Use Act of 1976 (90 Stat. 2505); Executive Order 12072 of August 16, 1978 (43 FR 36869); the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4201-4244); the Federal Urban Land-Use Act (40 U.S.C. 531-535); Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601); and the National Environmental Policy Act of 1969, as amended.

Section 101-17.002 Basic Policy

(a) GSA and other Federal agencies shall take all reasonable measures to assure the use of the absolute minimum space required to perform agency missions. For office space, the objective shall be to achieve an overall utilization rate of 135 square feet or less per person in a reasonable period of time. To accomplish this, each agency shall devise and implement a plan to improve the utilization of all space and shall indicate specific accomplishments to be realized within each year. GSA shall issue guidance and/or establish targets from time to time to assist agencies in improving space utilization. GSA and other Federal agencies shall work towards the most cost-effective solution practicable in each circumstance.

(b) Space in office buildings and other facilities required by Federal agencies shall be requested only when it is clearly demonstrated that additional space is essential to agency operations.

(c) Each agency shall determine the appropriate geographical area for its facilities. The agency shall define the broadest possible area compatible with its mission and functional requirements to ensure maximum utilization of Government-controlled space and to provide maximum potential for competitive offers of space. Agencies shall comply with all applicable statutes and Executive orders, including those cited in § 101-17.001. Plans for meeting space needs shall consider a social, economic environmental and cultural effects upon communities, and shall support local development and revitalization objectives wherever feasible.

(d) GSA will assign and reassign suitable space to Federal agencies and certain non-Federal organizations, and will issue criteria for the use of this space. To accomplish this, GSA will acquire and use federally owned and leased office buildings and space located in the United States. GSA will ascertain that agency-established geographical areas are sufficiently broad to ensure adequate consideration of available Government-owned space and adequate potential for competitive offers from the marketplace. GSA will then determine the appropriate delineated area for space assignments within established geographical areas.

(e) GSA will ensure that agencies use vacant available Government-controlled space which meets minimum agency requirements prior to acquiring new space. Whenever possible, agencies shall occupy this space without alteration. When alterations are required, alterations which are essential for performance of agency missions or which improve the utilization rate shall be given priority. Alterations solely for decorative or non-essential purposes shall be avoided.

(f) GSA may delegate authority to agencies to acquire and use federally owned or leased buildings; GSA will exercise oversight responsibility for agency actions under these delegations.

(g) GSA may require agencies to relinquish all or a portion of assigned space if this action is in the best interests of the Government and would not unreasonably interfere with the agency's performance of its mission. Under such forced relocations (as defined in § 101-17.003-6), GSA will be responsible for all expenses enumerated in § 101-17.203, and for moving and alteration expenses. GSA's responsibility for these expenses will commence at the time space is relinquished.

Section 101-17.003 Definition of Terms

The following definitions are established for terms used in this Subchapter D.

Section 101-17.003-1 Acceptance of Space

"Acceptance of space" means an authorization by an agency for GSA to award a lease, to make a commitment for initial alterations, and/or to establish a date of occupancy.

Section 101-17.003-2 Average Utilization Rate by Agency

"Average utilization rate by agency" means the utilization rate for a particular agency, calculated on a nationwide basis.

Section 101-17.003-3 Cost-Effective

"Cost-effective" means justified under an economic analysis which evaluates alternatives in terms of time-adjusted expenses incurred by the Government. GSA will publish bulletins specifying acceptable methods of analysis for evaluating space actions.

Section 101–17.003–4 Delineated Area

"Delineated area" means the specific boundaries, as determined by GSA, within which space will be obtained to satisfy an agency space requirement. It is based upon the agency's geographic service area, the amount of available Government-owned space, and the potential for competitive offers from the marketplace.

Section 101–17.003–5 Federal Agency

"Federal agency" means any executive agency or any establishment in the legislative or judicial branch of the Government execpt the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction.

Section 101–17.003–6 Forced Relocation

A "forced relocation" is any GSA-directed action, not initiated by agency request, that forces an agency to move from its present space assignment in whole or in part. Relocations included in "approved agency space plans" or resulting from the expiration of the term stated by the agency in the applicable SF–81, Request For Space, are not "forced relocations."

Section 101–17.003–7 General Purpose Space

"General purpose space" means space which is determined by GSA to be suitable for the use of agencies generally. General purpose space is categorized as office, storage, or special type. The physical characteristics of the space are the basis for determining the proper space category.

Section 101–17.003–8 Initial Space Layout

"Initial space layout" means the specific placement of work stations, furniture, and equipment for new space assignments. These initial services are provided by GSA at no cost to the agencies upon agency request.

Section 101–17.003–9 Joint-Use Space

"Joint-use space" means common space, such as cafeterias, conference rooms, credit unions, and snack bars, available for use by all occupants of the building. It does not include mechanical, custodial, or circulation areas.

Section 101–17.003–10 Non-Federal Organizations

"Non-Federal organizations" means organizations such as credit unions, concessions, and vending stands operated by the blind, and organizations under the direct sponsorship of a Federal agency such as grantees and contractors.

Section 101–17.003–11 Occupiable Area

"Occupiable area" means that portion of the gross area which is available for use by an occupant's personnel or furnishings, including space which is available jointly to the various occupants of the buildings, such as auditoriums, health units, and snack bars. Occupiable area does not include space in the building which is devoted to its operations and maintenance, including craft shops, gear rooms, and building supply storage and issue rooms. Nonpermanent ceiling-high corridors solely serving a single space assignment are occupiable. Occupiable area is computed by measuring from the occupant's side of ceiling-high corridor partitions or partitions enclosing mechanical, toilet, and/or custodial space to the inside finish of permanent exterior building walls or to the face of the convector if the convector occupies at least 50 percent of the length of the exterior wall. When computing occupiable area separated by partitions, measurements are taken from the center line of the partitions.

Section 101–17.003–12 Personnel

"Personnel," for purposes of computing utilization rates, means the peak number of persons to be housed in a given space assignment for which a work station must be provided. In addition to permanent Federal personnel, this may include temporaries, part time, seasonal, and contractual employees that cannot share existing workstations, as well as budgeted vacancies.

Section 101–17.003–13 Request for Space

"Request for space" ("space request") means a written document upon which an agency provides GSA with the information necessary to assign space. A request for space shall be submitted in a format designated by GSA. It shall at a minimum contain descriptions of amount of space, personnel to be housed, geographic area, and time period required.

Section 101–17.003–14 Space

"Space" means space in buildings, and land incidental to the use thereof, which is under the custody and control of GSA or for which a permit for use has been issued to GSA by another agency. It includes space acquired by other agencies under delegations of authority from GSA.

Section 101–17.003–15 Space Allocation Standards

"Space allocation standards" means agreements between GSA and an agency that are written upon the conclusion of a cooperative planning effort and are used:

(a) As a basis for establishing agency space requirements, and

(b) To document authorized variations from FPMR space utilization goals which result from specialized agency functional requirements or from particular characteristics of Government buildings.

Section 101–17.003–16 Space Assignment

"Space assignment" means an administrative action which authorizes the occupancy and use of space by a Federal agency or other eligible entity.

(a) "Office space" means space that provides an acceptable environment suitable in its present state for an office operation. This requirement includes, but is not limited to, adequate heating, ventilation, air-conditioning, floor covering, finished walls, and accessibility. The space may consist of a large open area or may be partitioned into rooms. Private corridors, closets, and similar areas which have been created within office space through the erection of partitions shall be classified as office space. Office space is further defined in Subpart 101–17.47.

(b) "Storage space" means space generally consisting of concrete, woodblock, or unfinished floors; bare block or brick interior walls; unfinished ceilings; and similar construction containing minimal lighting and heating. This type of space includes attics, basements, warehouses, sheds, unimproved areas of loft buildings, and unimproved building cores. All storage space will be classified under the subsets of general storage area, inside parking area, or warehouse areas. These categories are further defined in Subpart 101–17.47.

(c) "Special space" means space which has unique architectural features, requires the installation of special equipment, or necessitates the expenditure of varying sums to construct, maintain, and/or operate as compared to office and storage space. Special space is further defined in Subpart 101–17.47.

Section 101–17.003–17 Space Inspection

"Space inspection" means a reconnaissance-type evaluation of the manner in which assignments are being utilized to determine whether immediate

or scheduled corrective action is warranted.

Section 101–17.003–18 Space Planning

"Space planning" means the process of using recognized professional techniques to determine the best location and the most efficient configuration for agency facilities.

Section 101–17.003–19 Space Utilization Survey

"Space utilization survey" means a detailed analysis, using recognized space management procedures and techniques, of the manner in which an agency is utilizing its space.

Section 101–17.003–20 Special Purpose Space

"Special purpose space" means space which is designed for unusual functions of an agency and is determined by GSA to be generally unsuitable for the use of other agencies. Special purpose space is further defined in Part 101–18.

Section 101–17.003–21 Unique Agency Space

"Unique agency space" means space which is classified as special purpose space, which contains a substantial amount of special purpose space, or which is located where use by other agencies is impractical.

Section 101–17.003–22 Utilization Rate

"Utilization rate" is an indicator of the efficiency with which space is used. It is developed by dividing the total square footage of that portion of occupiable area (excluding joint-use space) which is defined as office space assigned to an agency by the total number of personnel occupying that space.

Subpart 101–17.1—Assignment of Space

Section 101–17.101 Requests for Space

(a) Federal agencies shall express their space needs by submitting a Standard Form 81, Request for Space, to the GSA regional office responsible for the geographic area in which the space is required. GSA may also require the submission of Standard Form 81–A Space Requirements Worksheet, in appropriate circumstances. A listing of GSA regional offices and the areas they service is shown in Subpart 101–17.4801.

(b) When appropriate, GSA will advise agencies to submit Requests for Space in buildings to be constructed on GSA Form 144, Net Space Requirements for Future Federal Buildings Construction. GSA will also advise agencies when space requested is classified as unique agency space.

(c) Space requests shall be in accordance with the requirements of the agency space plan. (See Subpart 101–17.303.) Space requests not in conformity with the agency space plan shall contain a statement describing the nature and effect of all modifications to the plan, and they shall be signed by the head of the agency.

(d) The need for space requested, the number of personnel housed, and the availability of funds for reimbursement to GSA shall be certified by an authorized official of the requesting agency on the Standard Form 81.

(e) Space requests for the U.S. Postal Service will be processed in accordance with the U.S. Postal Service—GSA Agreement.

(f) GSA will not process any request for space if the request does not reflect a judicious and austere use of Government funds and resources.

Section 101–17.102 Delegations of Authority

(a) GSA may delegate authority to acquire space by lease or to procure parking accommodations when, in GSA's sole opinion, the delegation is in the best interests of the requesting agency and the Government. GSA will specify the terms and conditions of any delegation in writing at the time the delegation is made.

(b) Agencies acting under delegations shall make every reasonable effort to utilize existing Government-controlled facilities prior to acquiring new space. Agencies shall make inquiries regarding the availability of existing space to GSA regional offices, and shall document their lease files if alternative space is not available. Such documentation shall include the date of contact and the name and position of the GSA individual contacted.

(c) Agencies acting under delegations from GSA are required to comply with all other relevant sections of this Part 101–17.

Section 101–17.103 Action When Existing Space Is Not Available

If no suitable Government-controlled space is available, GSA will so advise the requesting agency by the return of a signed copy of the Standard Form 81, showing thereon the action to be taken.

(a) When the agency has acquisition authority or has been delegated such authority by GSA, it may proceed to acquire the requested space. The signed copy of the Standard Form 81, if required, shall be attached to the leasing or related instrument made available to the General Accounting Office.

(b) GSA may take necessary action to acquire space for agencies having acquisition authority when the latter so request by checking the appropriate block on Standard Form 81.

(c) GSA will take the necessary action to acquire the space for agencies having no acquisition authority.

Section 101–17.104 Space for Short-Term Use

Agencies having a need for facilities for short-term use (such as conferences and meetings, judicial proceedings, and emergency situations) shall make every reasonable effort to utilize Government-owned or leased facilities. If no suitable Government-controlled facilities are available, an agency may arrange for the use of privately owned facilities for a period not to exceed 120 days, provided that the agency has authority to contract for such facilities. Agencies shall make inquiries regarding space availability to GSA regional offices documenting such inquiries as outlined in Section 101–17.102(b).

Section 101–17.105 Space Requirements for ADP Equipment

Agencies requiring space for the installation of data processing equipment shall provide information as set forth in Subpart 101–17.47. This information must be forwarded to GSA as far as possible in advance of equipment delivery so that space can be provided in a timely and efficient manner.

Section 101–17.106 Location of Space

(a) Federal use of space shall encourage growth and economic development and redevelopment in rural areas, consistent with the provisions of section 801(b) of the Rural Development Act of 1972 (86 Stat. 674).

(b) In locating facilities, after due consideration of the provisions of the Rural Development Act, agencies shall give preference to the centralized business area and adjacent areas of similar character in the central city of Standard Metropolitan Statistical Areas (SMSA's) as defined by the Department of Commerce. In addition, GSA may consider other specific areas of a city recommend by the elected chief executive officer of the local government or a designee, except where this type of consideration is otherwise prohibited. GSA will advise local officials of the availability of data on GSA plans and programs, and will agree upon the exchange of planning information with local officials.

(c) The presence of the Federal Government in the National Capital Region is such that the distribution of Federal installations will continue to be a major influence in the extent and

character of development. Consequently, these policies shall be applied in the National Capital Region, on the most cost-effective basis feasible, in conjunction with regional policies established by the National Capital Planning Commission and consistent with the general purposes of the National Capital Planning Act of 1952 (66 Stat. 781) as amended.

(d) Consistent with the policies cited in paragraphs (a), (b), and (c) of this section, alternative sources for meeting Federal space needs will consider the use of buildings of historic, architectural, or cultural significance within the meaning of section 105 of the Public Buildings Cooperative Use Act of 1976 (90 Stat. 2507).

Section 101–17.107 Application of Socio-Economic Considerations

Whenever actions are proposed to accomplish the reassignment or utilization of space through the relocation of an existing major work force, the impact on low- and moderate-income and minority employees shall be considered. Under these circumstances, the Department of Housing and Urban Development shall be consulted by the requesting agency in accordance with the memorandum of understanding between the Department of Housing and Urban Development and the General Services Administration.

Section 101–17.108 Reviews and Appeals of Space Assignment Actions

Section 101–17.108 Formal Review

A request for a formal review of a space assignment or space acquisition action shall initially be submitted to the appropriate GSA regional office by the agency official authorized to sign the Standard Form 81, Request for Space. A request for a formal review shall be in writing and shall include all pertinent information and supporting documentation. The GSA regional offices will verify the data and perform additional investigation as necessary. The Regional Director, Real Estate Division, will review all data and make a written determination within 30 calendar days after receipt of the request. A copy of the decision will be sent to the requesting agency.

Section 101–17.108–2 Initial Appeal

(a) Within 15 calendar days after receipt of the decision, the regional agency head (or his designee) may submit an appeal of the decision to the Regional Administrator, GSA. In the appeal the agency official shall state, in writing, the basis for the original request for formal review. Only information provided with that request will be considered. Any new or additional information or facts introduced at this level will require that the appeal undergo another formal review.

(b) Within 15 calendar days the Regional Administrator, GSA, will notify the agency of his or her decision. In cases requiring more detailed analysis than can be accomplished within 15 days, the Regional Administrator will notify the agency and establish a date on which his or her decision will be rendered.

Section 101–17.108–3 Further Appeals

Within 15 calendar days after the agency has been notified of the Regional Administrator's decision, a further appeal may be filed by the agency head with the Administrator of General Services. The Administrator will render the agency's decision within 15 calendar days of receipt of the appeal whenever possible; if additional time is required, the Administrator shall notify the agency of the date a decision will be made.

Subpart 101–17.2—Utilization of Space

Section 101–17.201 Responsibility of GSA

GSA will conduct space inspections and space utilization surveys to promote and ensure efficient utilization, recapturing for release or reassignment any space which the agencies do not justify to the satisfaction of GSA as being required. The agency will be provided with a written summary of significant findings and recommendations, together with data concerning improvements which can be effected by the agency, and those which are planned by GSA.

Section 101–17.202 Responsibility of Agencies

Agencies shall cooperate with GSA in the assignment and utilization of space. Agencies shall:

(a) Furnish information regarding the use of assigned space;

(b) Furnish data on personnel consistent with budget submissions to the Office of Management and Budget and with existing appropriations;

(c) Continuously study and survey space occupied to ensure efficient and economical utilization of office space consistent with the minimum amount required to perform the agency mission; and

(d) Promptly report to GSA any space which is excess to their needs for assignment to other agencies.

Section 101–17.203 Procedures for Agency-Initiated Relinquishment of Space

(a) An agency occupying GSA-assigned space shall notify the appropriate GSA regional office as soon as possible, but at least 120 calendar days before vacating, whenever space is no longer needed. Notification shall be in writing, giving a description of the space and the estimated date of release.

(b) When a portion of space is relinquished, that space shall be consolidated, accessible, and readily assignable or marketable. Expenses required to make relinquished space consolidated, accessible, and readily assignable or marketable shall be borne by the agency, unless otherwise agreed to by the Administrator of GSA.

(c) The agency shall be responsible for Standard Level User Charge (SLUC) until the date of release specified in the notification, or until the date space is actually vacated, whichever occurs later. When an agency has not made timely notification to GSA, that agency shall be responsible for SLUC for a period of 120 calendar days following the date of notification or until the space has been reassigned, whichever occurs first.

(d) When the space relinquished is unique agency space, the agency shall also be responsible for out-of-pocket expenses for a period after 120 days following notification. This responsibility shall continue until:

(i) The space is assigned or otherwise disposed of by GSA, or

(ii) The expiration of the term specified on the most recent Request for Space applicable to the area in question, or

(iii) Notification by the Office of Management and Budget that agency responsibility for the space is no longer required, whichever occurs earliest.

(e) Agencies accepting space which is never occupied are similary responsible for all out-of-pocket expenses whenever the space in question is unique agency space.

(f) When an agency is responsible for the operation, maintenance, and protection of Government-owned space assigned by GSA, and the agency determines that this space is no longer needed, the agency shall so notify GSA at least 6 months prior to relinquishing the space. The operation, maintenance, and protection of the space shall continue to be the responsibility of the agency until the beginning of the next fiscal quarter following the end of the 6-month period.

Subpart 101–17.3—Space Standards and plans

Section 101–17.301 Space Allocation Standards

Space allocation standards are derived from specific studies of agency operations or facilities, and are directed toward providing each employee with the minimum amount of space to work efficiently. Where applicable, space allocation standards are to be used in space planning and assignment for agencies or components thereof. Standards shall be authorized and agreed to by GSA, and shall be developed to achieve the minimum practical cost-effective office space utilization rate. In each circumstance, the study should attempt to achieve a utilization rate of 135 square feet or less, if possible.

Section 101–17.302 Space Planning and Layout.

(a) Upon agency request, GSA will be responsible for preparing the initial space layout. When an agency requires subsequent layout assistance from GSA, a request for assistance shall be made to the appropriate GSA regional office. GSA will consult with the agency, will determine the scope of assistance required, and provide assistance on a reimbursable basis either by existing staff or by contract.

(b) No Federal agency shall contract for interior office design or space layout without first consulting with GSA. Upon agency request, GSA will enter into the contract and supervise performance. GSA may require agencies to use existing GSA space planning contracts or new contracts negotiated by GSA if this action is necessary to meet contractual commitments, to eliminate duplicative work, or to ensure cost-effectiveness in planning. GSA will also ensure that proposed design changes have no adverse effect upon mechanical systems, electrical systems, and safety requirements. However, GSA will not unreasonably insist upon the use of GSA-supervised contracts by agencies which have their own contracting authorities.

Section 101–17.303 Submission of Space Plans

(a) Each agency shall submit a space plan to GSA containing projected space requirements throughout the United States. GSA will provide technical assistance in the development and execution of plans, and will monitor the progress of the agencies in improving space management.

(b) At a minimum, each plan shall contain a forecast of agency personnel, and shall relate requirements to space presently occupied or under request by the agency. Agency plans shall also indicate utilization rates for all projected space assignments, shall detail agency efforts to improve space utilization, and shall include specific goals to be achieved.

(c) Each agency shall update its space plan annually. The plan shall in each instance be signed by the agency head.

(d) GSA will review and approve agency targets and plans, specifically considering the availability of Government-owned space, the timing of commitments for Government-controlled leased space, the cost-effectiveness of relocations and alterations, the adaptability of existing space to efficient layout, the operating requirements of the agency, and any space allocation standards which are applicable.

(e) GSA will publish bulletins specifying the timing, format, process, and data for review of each agency space plan. GSA may establish targets from time to time for agencies to assist in improving space utilization. For the initial space plan, the target for office space utilization shall be to achieve by September 30, 1984, 135 square feet per person or a minimum improvement of 10 percent in each agency's utilization rate compared with the utilization rate which exists as of the date of issuance of this regulation. This utilization improvement should be accomplished with *minimum space alterations* and within existing agency resource constraints.

(f) This report has been cleared in accordance with FPMR 101.11 and assigned interagency report control number 0307–GSA–AN.

Subpart 101–17.47—Exhibits

Section 101–17.4701 Supplemental Definitions.

This section contains information to supplement the definitions of office, storage, and special space in § 101–17.003–16.

(a) The following are representative of uses of office space.

(1) General purpose office space.

(2) Private corridors.

(3) Conference rooms (without special equipment and additional heating, ventilation, and air-conditioning (HVAC).

(4) Training rooms (without special equipment and HVAC).

(5) Libraries (with extensive built-in stacks and special floor loading).

(6) Dry laboratories.

(7) Storage in office space.

(8) Credit unions (without fixed equipment).

(9) Lounges (other than toilet areas).

(10) Reception areas.

(11) Hearing rooms (without special equipment and HVAC).

(12) Telephone switchboard rooms.

(13) Mail rooms.

(14) Health rooms (without special equipment).

(b) All storage space will be classified under subsets of general storage area, inside parking area, or warehouse areas, as follows:

(1) General storage areas (storage in general purpose buildings) including:

(i) Basements.

(ii) Attics.

(iii) Closets (not finished to office standards).

(iv) Supply rooms (not finished to office standards).

(v) Storerooms (not finished to office standards).

(vi) File rooms (not finished to office standards).

(vii) Warehouse areas of multiuse buildings.

(2) Inside parking areas (garage space located in either a federally owned or leased building which is utilized for the parking of motor vehicles) including:

(i) Garages.

(ii) Parking area.

(iii) Motor pool parking.

(3) Warehouse areas (entire buildings with warehouse features, including minor amounts of supporting office space).

(c) Special space is further defined as follows:

(1) Laboratory and clinic areas (space containing built-in equipment and utilities required for the qualitative or quantitative analysis of matter, experimentation, the processing of materials, and/or the physical welfare of employees or the public) including:

(i) Wet laboratories.

(ii) Clean laboratories.

(iii) Photographic laboratories.

(iv) Clinics.

(v) Health units and rooms (with special equipment).

(vi) Private toilets.

(2) Food service areas (space in building devoted to the preparation and dispensing of foodstuffs) including:

(i) Cafeterias (kitchen and table areas).

(ii) Snack bars.

(iii) Mechanical vending areas.

(iv) Private kitchens.

(3) Structurally changed areas (areas having architectural features differing form normal office or storage areas, such as sloped floors, high ceilings, and increased floor loading) including:

(i) Auditoriums.

(ii) Gymnasiums.

(iii) Libraries (with special stacks and floor loading).
(iv) Target ranges.
(v) Security vaults.
(vi) Courtrooms.
(vii) U.S. Postal Service workrooms.
(4) Automatic data processing areas (areas having special features such as humidity and temperature control, raised flooring, and special wiring) including:
(i) Computer rooms.
(ii) Support areas (with special flooring and wiring).
(iii) Tape vaults.
(5) Conference and training areas (areas used for conferences, training, and hearings with special equipment and supplemental HVAC) including:
(i) Conference rooms.
(ii) Hearing rooms.
(iii) Training rooms.
(iv) Exhibit areas.
(v) Small courtrooms (no structural changes).
(6) Light industrial areas including:
(i) Records storage (with humidity control).
(ii) Storage type space (with air-conditioning).
(iii) Printing plants.
(iv) Product classifying laboratories.
(v) Motor Pool service areas.
(vi) Postal workrooms, swingrooms, locker rooms, mailing vestibules and platforms, and lock box lobbies.
(vii) Shops (other than PBS).
(viii) Loading docks and shipping platforms.
(ix) Canopy areas.
(x) Vertical improved mail system areas.
(7) Quarters and residential housing areas (housing and quarters that do not logically fall in the other categories).

Section 101–47–4702 Space for Data Processing Equipment

This section sets forth the information required on space requests for data processing equipment.

(a) Agencies requiring space for the installation of data processing equipment must provide the following information in addition to the requirements of § 101–17.101–1:

(1) Type of equipment (including make, model number, manufacturer, and number of units of each);
(2) Space and environmental requirements, including:
(i) Floor weight (lbs.);
(ii) Machine dimensions (width, depth, and height in inches);
(iii) Service clearance (front, rear, right and left sides);
(iv) Power in voltage and kv.-a. (starting loads and operating loads);
(v) Heat dissipation in B.t.u./hr. and air flow (c.f.m.);
(vi) Environmental factors of temperature range (F) and relative humidity; and
(vii) Need for raised floor, acoustic ceiling, and air-conditioning;
(3) Related requirements, such as storage space for supplies, tapes, and disks, work space, including desk and aisle, space; and future expansion needs;
(4) Agency responsibility for funding; and
(5) Required occupancy date.
(b) The above information should be provided as separate supplemental data to Standard Form 81, Request for Space, and forwarded to the GSA office. The space requirements indicated on Standard Form 81 must include the space requirements for all components of ADPE. The ADPE suppier should be consulted prior to establishing space needs in order to ascertain any specific or peculiar space requirements of the ADPE involved.
(c) It is essential that this information regarding the requirement for ADP space be transmitted to GSA as far as possible in advance of delivery of equipment so that space can be provided in a timely and economical manner.

Subpart 101–17.48—GSA Regional Offices

Section 101–17.4801 GSA Regional Offices

GSA Region	Area served	Mailing address
1	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.	General Services Administration, John W. McCormack Post Office and Courthouse, Boston, MA 02109.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Executive Order 12409 of March 7, 1983

Nuclear Cooperation With EURATOM

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 126a(2) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2155(a)(2)), and having determined that, upon the expiration of the period specified in the first proviso to Section 126a(2) of such Act and extended by Executive Orders No. 12193, 12295, and 12351, failure to continue peaceful nuclear cooperation with the European Atomic Energy Community would be seriously prejudicial to the achievement of the United States non-proliferation objectives and would otherwise jeopardize the common defense and security of the United States, and having notified the Congress of this determination, I hereby extend the duration of that period to March 10, 1984.

Ronald Reagan

Proclamation 5024 of March 7, 1983

National Children and Television Week, 1983

By the President of the United States of America

A Proclamation

Television has the power to shape thoughts, stir emotions, and inspire actions. It teaches, it sells, it entertains, it informs, and it has the capacity to influence powerfully the lives and values of our children. They learn much from television about the world, our society, and their place in it.

Television can communicate values that are consistent with our heritage and traditions and can portray those actions and attitudes that make for better citizens. It also can depict themes that are destructive of these values. Recognizing that children are at a formative and vulnerable stage in their lives, many individuals and groups have a great interest in television programming. These concerned citizens are working to improve the quality of television programs viewed by their families.

By Senate Joint Resolution 264 (P.L. 97–443), the Congress has designated the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week" and has authorized and requested the President to issue a proclamation in observance of that week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week." I commend all those persons concerned about the quality of children's television programming, and I call upon all government agencies and the people of the United States to observe the week with appropriate activities supporting television programs which are attentive to the needs and interests of children.

IN WITNESS WHEREOF, I have hereunto set my hand this 7th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Proclamation 5025 of March 7, 1983

National Poison Prevention Week, 1983

By the President of the United States of America

A Proclamation

The annual observance of National Poison Prevention Week affords communities across America a special opportunity to increase citizen awareness of the dangers of accidental poisoning.

In recent years the number of poisonings among children has fallen dramatically, due in large measure to the introduction of child-protective packaging. At the community level, poison centers are an essential resource in reducing the incidence of serious injury resulting from accidental ingestions. By providing timely diagnostic and treatment information to medical practitioners and first aid instruction to anxious parents, poison centers have successfully worked to save lives.

While poison centers have proved invaluable, they often provide "after-the-fact" treatment. This year, National Poison Prevention Week will underscore the equally important role poison centers can play in preventing child poisonings "before the fact."

Working together as sponsors of National Poison Prevention Week are national medical, pharmacy, nursing, dental, and hospital associations; health and safety groups; organizations representing manufacturers, packagers, and distributors of consumer products, including medicines; the media; and government agencies. Most of these groups have State and local chapters and affiliates that, along with community organizations, are the backbone of what has become a successful nationwide poison prevention program.

To aid in encouraging the American people to learn of the dangers of accidental poisoning and to take appropriate preventive measures, the Congress, by a joint resolution approved September 26, 1961 (75 Stat. 681), requested the President to issue annually a proclamation designating the third week in March as National Poison Prevention Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning March 20, 1983, as National Poison Prevention Week.

IN WITNESS WHEREOF, I have hereunto set my hand this 7th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Proclamation 5026 of March 7, 1983

National Agriculture Day, 1983

By the President of the United States of America

A Proclamation

The history of American agriculture is an inspiring story of progress and sacrifice, high technology and individual effort, and frustration and success. It reflects the growth of our country from an untamed wilderness to the highly productive nation and world leader it is today.

Despite flood, frost, heat, hail, drought, and disease, Americans enjoy an abundance of diverse and high quality products. Our 2.4 million farms are the foundation for a trillion-dollar agricultural industry which employs 19 million farm people and which is the primary source of food and fiber for a third of a billion of the world's population. Each American farm worker produces enough food and fiber to support nearly 80 people—a production achievement unmatched anywhere in the world and unparalleled in history.

The courage, tenacity, and know-how of the American farmer make it possible for our citizens to spend a smaller share of their income on food than do people living in any other country.

To honor those who sustain our agricultural prowess and to achieve a greater understanding of each American's dependence upon a reliable food and fiber supply, the Congress of the United States, by Senate Joint Resolution 235, has authorized and requested the President to proclaim March 21, 1983, as "National Agriculture Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 21, 1983, as "National Agriculture Day" and call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 7th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Proclamation 5027 of March 7, 1983

National Coin Week, 1983

By the President of the United States of America

A Proclamation

Since the beginning of history, coins have played an important role in the story of civilization. They reflect the economic development of their country of origin, as well as the scientific advancement and artistic values of the people who produce and use them. Today, millions of Americans collect coins for both pleasure and profit.

To help foster the public's interest in coin collecting, the United States Mint annually offers proof sets of the current year's coinage. In 1982, the United States Mint struck a commemorative silver half-dollar marking the 250th anniversary of the birth of George Washington. In 1983–1984, the first commemorative Olympic coinage ever issued by our country will be introduced in gold and silver.

Recognizing that coin collecting has educational and cultural value, promotes greater understanding of our history and heritage, and is enjoyed by millions of Americans, the Congress, pursuant to House Joint Resolution 516 (Public Law 97–239), has authorized and requested the President to issue a proclamation designating the week beginning April 17, 1983, as "National Coin Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning April 17, 1983, as "National Coin Week" and call upon the people of the United States to observe this week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 7th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Proclamation 5028 of March 7, 1983

Small Business Week, 1983

By the President of the United States of America

A Proclamation

Our Founding Fathers envisioned a nation whose strength and vitality would emerge from the ingenuity of its people and their commitment to individual liberty. They understood that a nation's prosperity is dependent on the freedom of its citizens to pursue their hopes, dreams, and creative ambitions. American entrepreneurs and small business owners enthusiastically embraced the challenges of freedom and through the miracle of the marketplace set in motion the forces of economic growth that made our Nation uniquely productive. This pattern of economic development has inspired people throughout the world to look to America for a better life.

The Nation grew as our free enterprise system became the mainspring of American progress by encouraging entrepreneurs to compete in meeting the demand for new products and methods of production. Competition enabled us to develop our human resources more effectively and enrich our society. With each new discovery, our perception of what could be achieved expanded.

Today small business plays an even more vital role in our national life and is responsible for the creation of well over half of the new jobs in our economy. Small business is also in the forefront of utilizing technological advances.

America's entrepreneurs and small business owners are among the most dynamic and innovative leaders of the business community. Their willingness to confront uncertainty with creativity and determination to succeed helps our Nation meet the challenges we face today. This spirit of accomplishment inspires Americans to look toward tomorrow with confidence and anticipation to the new opportunities open to future generations. By taking steps to encourage the formation and success of small businesses, America can help ensure its economic standing in the world.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning May 8, 1983, as Small Business Week. I call upon every American to join me in this tribute.

IN WITNESS WHEREOF, I have hereunto set my hand this 7th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Rules and Regulations

Federal Register
Vol. 48, No. 47
Wednesday, March 9, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 303

Applications, Requests, Submittals, Delegations of Authority and Notices of Acquisition of Control

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: FDIC is amending its regulations to announce existing agency procedure for reconsideration of a denied request for relief from the requirement for making reimbursements for violations of the Truth in Lending Act or any other requests, applications or petitions where authority to act has been delegated to the Board of Review.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: James L. Meador, Senior Attorney, Legal Division, Federal Deposit Insurance Corporation, 550–17th Street, NW., Washington, D.C. 20429; (202) 389–4171.

SUPPLEMENTARY INFORMATION: On March 8, 1982, the Board of Directors of the FDIC delegated authority to the FDIC's Board of Review to act on requests for relief from the requirement for making reimbursements for violations of the Truth in Lending Act. (12 CFR 303.11(f)) (47 FR 9811 (March 8, 1982)). The authority to act includes the authority to deny such requests. It also includes the authority and responsibility to consider any petition for reconsideration of denial of such requests.

The amendments provide that any petition for reconsideration of a denied request, application, or petition must be addressed to the Board of Review where the initial request, application, or petition has been denied by the Board of Review acting pursuant to authority delegated by the Board of Directors. The amendments also provide that action by the Board of Review on any enforcement matter brought under section 8 of the Federal Deposit Insurance Act shall be subject to review by the Board of Directors in accordance with section 303.13(o)(7) of FDIC's rules and regulations.

Regulatory Factors

The requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) are inoperative here because the amendments do not affect the recordkeeping or reporting burdens on any insured bank or other person.

The amendments are rules of FDIC practice and procedure. They inform the public of existing agency procedure for processing petitions for reconsideration of requests, applications, or petitions denied by the Board of Review under authority delegated by the Board of Directors. Therefore, in accordance with the Administrative Procedure Act (5 U.S.C. 553), the Board of Directors suspends the requirements for notice of proposed rulemaking and public comment and delayed effective date.

List of Subjects in 12 CFR Part 303

Administrative practice and procedure, Authority delegations, Banks, banking, Insurance.

PART 303—APPLICATIONS, REQUESTS, SUBMITTALS, DELEGATIONS OF AUTHORITY, AND NOTICES OF ACQUISITION OF CONTROL

Part 303 of Chapter III of title 12 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 303 reads as follows:

Authority: Secs. 2(5), 2(6), 2(7)(j), 2(8), 2(9), "Seventh" and "Tenth"), 2(18), 2(19), Pub. L. 797, 64 Stat. 876, 881, 891, 893 as amended by Pub. L. No. 86–463, 74 Stat. 129; sec. 2, Pub. L. No. 87–827, 76 Stat. 953; Pub. L. No. 88–593, 78 Stat. 940; Pub. L. No. 89–79, 79 Stat. 244; sec. 1, Pub. L. No. 89–356, 80 Stat. 7; sec. 12(c), Pub. L. No. 89–485, 80 Stat. 242; sec. 3, Pub. L. No. 89–597, 80 Stat. 824; title II, secs. 201, 205, Pub. L. No. 89–695, 80 Stat. 1055; sec. 2(b), Pub. L. No. 90–505, 82 Stat. 846; secs. 6(c)(7), (12), (13), Pub. L. No. 95–369, 92 Stat. 616–620; Title III, secs. 306, 309 and title VI, sec. 602, Pub. L. No. 95–630, 92 Stat. 3677, 3683 (12 U.S.C. 1815, 1816, 1817(j), 1818, 1819 "Seventh" and "Tenth", 1828, 1829); title I, sec. 108, Pub. L. No. 90–321, 82 Stat. 150 as amended by title IV, sec. 403, Pub. L. No. 93–495, 88 Stat. 1517 and title VI, sec. 606, Pub. L. No. 96–221, 94 Stat. 171 (15 U.S.C. 1607).

2. Section 303.10 is amended by revising paragraph (d) to read as follows:

§ 303.10 Procedure on applications.

* * * * *

(d) *Opportunity to petition for reconsideration of a denied application, petition, or request.* Within 15 days of its receipt of notice that its application, petition, or other request has been denied, any applicant may petition the Board of Directors, or the Board of Review where such application, petition, or request has been denied by the Board of Review acting pursuant to delegated authority, for reconsideration of such application, petition, or request (except an application, petition, or request already previously denied upon reconsideration) and, in connection therewith, may request an opportunity to amend its application, petition, or request or to submit information in rebuttal of the denial, either in writing or in the form of an oral presentation before one or more representatives of the FDIC designated for that purpose. Upon the filing of such petition for reconsideration, the applicant shall be given 60 days in which to amend its application, petition, or request or to make its presentation to the FDIC. If the applicant requests an opportunity to make oral presentation, it shall be advised of the date, time, place, and person or persons before whom such presentation shall be made. Notwithstanding the first sentence of this paragraph, any action taken by the Board of Review pursuant to § 303.13(o) shall be subject to review by the Board of Directors in accordance with § 303.13(o)(7).

By order of the Board of Directors on February 28, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 509a

[No. 83-128]

Removals, Suspensions, and Prohibitions Where a Crime Is Charged or Proven

March 3, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is adopting amendments to its rules of practice and procedure concerning expedited hearings to administratively challenge a suspension notice or removal order affecting participation in the conduct of the affairs of an insured institution by a director, officer, or other person charged with or convicted of certain crimes. The amended rules of practice and procedure (1) clarify the powers and duties of the hearing officer, (2) clarify that the person subject to the notice or order has the burden of proving that grounds exist for the termination or modification thereof, (3) clarify that the nature of the publicity concerning the individual's indictment is a consideration that is relevant to the decision of whether the notice or order should be terminated or modified, and (4) formally incorporate certain of the Board's adjudicative rules. The amended rules are intended to improve processing and eliminate uncertainty in the conduct of these hearings.

EFFECTIVE DATE: April 8, 1983.

FOR FURTHER INFORMATION CONTACT: Steven A. Rosenberg, Attorney, Office of General Counsel, (202) 377-6958, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: Where a director, officer, or person participating in the conduct of the affairs of an insured institution or affiliate thereof is a defendant in certain criminal lawsuits and continued service or participation by the individual in the conduct of the affairs of the institution may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution, the Board may suspend the individual from office or prohibit the individual's further participation in any manner in the conduct of the affairs of the institution; that suspension or prohibition is effective only until the criminal action is finally disposed of. Thereafter, if the individual has been found guilty and the judgment is not subject to further appellate review, the Board may upon certain findings permanently remove the individual from office or prohibit him from further participation in any manner in the conduct of the affairs of the institution, except with the prior consent of the Board. Such Board action is pursuant to the authority of Section 5(d)(5) of the Home Owners' Loan Act, as amended ("HOLA"), and Section 407(h) of the National Housing Act, as amended ("NHA") (12 U.S.C. 1464(d)(5), 1730(h) (1976, Supp. IV 1980)). The affected individual may administratively appeal the Board's action in the manner provided by Section 5(d)(5)(C) of the HOLA and Section 407(h)(2) of the NHA.

On November 4, 1982, the Board proposed to amend Part 509a of the Board's General Regulations to clarify the procedures concerning (1) the Board's issuance of temporary notices of suspension or prohibition and permanent orders of removal or prohibition, and (2) the conduct of administrative appellate hearings allowed. (*See* Board Resolution No. 82-727, 47 FR 50918, published on November 10, 1982.) A public comment period was provided through January 10, 1983. Based on the comments received and other available information, the Board has determined to adopt the amendments substantially as proposed.

Discussion of Comments

The Board received a total of six comment letters in response to Resolution No. 82-727. Three were from federally chartered savings and loan associations; one was from a state-chartered savings and loan association the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("FSLIC"); the remaining two were from savings and loan trade associations. Five of the commenters recommended adoption of the proposed amendments, although three of them recommended some substantive changes, which are discussed below. One commenter recommended against adoption of the proposals on the ground that the existing rules are adequate.

One commenters suggested that a provision be added providing that the affected individual be reinstated to his position if that individual is acquitted or the conviction is reversed on appeal. Pursuant to Section 5(d)(5)(A) of the HOLA and Section 407(h)(1) of the NHA, a *notice* of suspension or prohibition is effective only until the criminal case is finally disposed of or until terminated by the Board; an *order* or removal or prohibition, which may be issued following conviction not subject to further appellate review, is permanent unless the Board determines otherwise. Accordingly, where the individual is acquitted or a conviction is reversed the notice of suspension or prohibition has no further effect. Although the statutes set this forth, for purposes of clarification the Board has modified proposed § 509a.3(a) by adding to the end thereof the following sentence: "The Notice shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Board."

Another commenter recommended that proposed § 509a.3(a) have deleted therefrom the word "information" in the phrase stating "where the individual is charged in any information, indictment, or complaint authorized by a United States attorney." An information is a document formally initiating criminal prosecution that is filed by a competent public official rather than by a grand jury. *See Black's Law Dictionary* 918 (rev. 4th ed. 1968). Because the proposed language of the rule follows the statutory language, the recommended change will not be adopted.

Another commenter proposed changing the phrase in proposed § 509a.3 (a) and (b) from the "the Board is of the opinion" to "the Board, upon due deliberation, has determined." Because the Board will make a determination that the grounds exist for these suspensions, removals, and prohibitions, before it takes action requiring compliance, the Board is adopting this recommendation.

It was also recommended that proposed § 509a.7(b) be revised to require disclosure of the names of rebuttal witnesses and a summary of their proposed testimony if a party intends to call such witnesses. Because it is the Board's view that the difficulty in complying with such a requirement upon short notice exceeds the potential for surprise where rebuttal witnesses are concerned, this recommendation has not been adopted.

A further recommendation was that proposed § 509a.7(e) be modified to provide that any of the parties may move for the correction of the administrative record. The recommendation is well-considered and has been adopted.

A commenter recommended that proposed § 509a.9 provide that the Federal Rules of Evidence apply in these proceedings. Those rules apply in Federal court proceedings, but generally are not applicable to administrative proceedings. *See* Section 7(d) of the Administrative Procedure Act, 5 U.S.C. 556(d). It is well established that the Due

Process Clause of the Fifth Amendment to the Constitution does not require administrative proceedings to follow the formal rules of evidence. *Calhoun v. Bailar*, 626 F. 2d 145 (9th Cir. 1980), *cert. denied*, 452 U.S. 906 (1981). The relevant statutory provisions provide that these proceedings are to be informal and expedited in nature. Moreover, the petitioner has the burden of persuasion, and the Federal Rules of Evidence provide for the exclusion of evidence that otherwise would be admissible. Accordingly, the Board is of the view that requiring the adoption of such evidentiary rules would unnecessarily impair the ability of the petitioner to prove his case. Therefore, the Board has not adopted this recommendation.

Finally, it was recommended that proposed § 509.13(b) be revised by requiring a statement for the basis of all decisions concerning these removal, suspension, and prohibition proceedings, rather than limiting such statements to decisions adverse to the petitioner. The proposed rule would have followed the language of Section 5(d)(5)(C) of the HOLA and Section 407(h)(2) of the NHA, but those sections do not preclude the Board from providing a statement in all cases. The Board believes that it would be beneficial to set forth its reasoning in these matters so as to provide a permanent record of the bases for its decisions for the future guidance of the Board, the savings and loan industry, and the bar. Therefore, the Board has adopted this recommendation.

Regulatory Flexibility

The Board certifies that the rules will not have a substantial economic impact on a substantial number of small entities. The rules do not have general effect, as they only apply to individuals who have been served with a suspension notice or removal order where such individuals have been charged with certain crimes. Accordingly, no final regulatory flexibility analysis is required as provided by 5 U.S.C. 605(b).

List of Subjects in 12 CFR Part 509a

Savings and loan associations, Administrative practice and procedure.

Accordingly, the Board hereby amends Subchapter A, Chaper V of Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER A—FEDERAL HOME LOAN BANK BOARD

Revise Part 509a as follows:

PART 509a—REMOVALS, SUSPENSIONS, AND PROHIBITIONS WHERE A CRIME IS CHARGED OR PROVEN

Sec.

509a.1 Scope.
509a.2 Definitions.
509a.3 Issuance of notice or order.
509a.4 Contents and service of the notice or order.
509a.5 Petition for hearing.
509a.6 Initiation of hearing.
509a.7 Conduct of hearings.
509a.8 Default.
509a.9 Rules of evidence.
509a.10 Burden of persuasion.
509a.11 Relevant considerations.
509a.12 Proposed findings and conclusions and recommended decisions.
509a.13 Decision of the Board.
509a.14 Miscellaneous.

Authority: 12 U.S.C. 1437, 1464, 1725, 1728, 1730, 1731; Reorganization Plan No. 3 of 1947, 12 CFR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 509a.1 Scope.

The rules in this part apply to hearings, which are exempt from the adjudicative provisions of the Administrative Procedure Act, afforded to any officer, director, or other person participating in the conduct of the affairs of an insured institution, affiliate service corporation, savings and loan holding company, or subsidiary of such a holding company, where such person has been suspended or removed from office or prohibited from further participation in the conduct of the affairs of one of the aforementioned entities by a Notice or Order served by the Board upon the grounds set forth in Section 5(d)(5) of the Home Owners' Loan Act (12 U.S.C. 1464(d)(5)) or Section 407(h) of the National Housing Act (12 U.S.C. 1730(h)).

§ 509a.2 Definitions.

As used in this part—

(a) The term "Board" means the Federal Home Loan Bank Board, or, where appropriate, the Federal Saving and Loan Insurance Corporation.

(b) The term "Secretary" means the Secretary to the Federal Home Loan Bank Board and any Assistant or Acting Secretary to the Board.

(c) The term "Notice" means a Notice of Suspension or Notice of Prohibition issued by the Board pursuant to Section 5(d)(5) of the Home Owners' Loan Act or Section 407(h) of the National Housing Act.

(d) The term "Order" means an Order of Removal or Order of Prohibition issued by the Board pursuant to Section 5(d)(5) of the Home Owners' Loan Act or Section 407(h) of the National Housing Act.

(e) The term "institution" means a Federally-chartered association within the meaning of Section 2(d) of the Home Owners' Loan Act, an institution whose accounts are insured by the Federal Savings and Loan Insurance Corporation ("insured institution") within the meaning of Section 401(a) of the National Housing Act, an affiliate service corporation within the meaning of Section 5(d)(2)(C) of the Home Owners' Loan Act and Section 407(e)(3) of the National Housing Act, a savings and loan holding company within the meaning of Section 408(a)(1)(D) of the National Housing Act, and a subsidiary of a savings and loan holding company (other than an insured institution) within the meaning of Section 408(a)(1)(H) of the National Housing Act.

(f) The term "subject individual" means a person served with a Notice or Order.

(g) The term "petitioner" means a subject individual who has filed a petition for informal hearing under this Part.

§ 509a.3 Issuance of Notice or Order.

(a) The Board may issue and serve a Notice upon an officer, director, or other person participating in the conduct of the affairs of an institution, where the individual is charged in any information, indictment, or complaint authorized by a United States Attorney with the commission of or participation in a crime involving dishonesty or breach of trust that is punishable by imprisonment for a term exceeding one year under State or Federal law, if the Board, upon due deliberation, determines that continued service or participation by the individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution. The Notice shall remain in effect until the information, indictment, or complaint is finally disposed of or until terminated by the Board.

(b) The Board may issue and serve an Order upon a subject individual against whom a judgment of conviction, with respect to the aforementioned crime, has been rendered, where such judgment is not subject to further appellate review, and the Board, upon due deliberation, has determined that continued service or participation by the subject individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution.

§ 509a.4 Contents and service of the Notice or Order.

(a) The Notice or Order shall set forth the basis and facts in support of the Board's issuance of such Notice or Order, and shall inform the subject individual of his right to a hearing, in accordance with this part, for the purpose of determining whether the Notice or Order should be continued, terminated, or otherwise modified.

(b) The Secretary shall serve a copy of the Notice or Order upon the subject individual and the related institution in the manner set forth in § 509.18 of this subchapter.

(c) Upon receipt of the Notice or Order, the subject individual shall immediately comply with the requirements thereof.

§ 509a.5 Petition for hearing.

(a) To obtain a hearing, the subject individual must file two copies of a petition with the Secretary within 30 days of being served with the Notice or Order.

(b) The petition filed under this section shall admit or deny specifically each allegation in the Notice or Order, unless the petitioner is without knowledge or information, in which case the petition shall so state and the statement shall have the effect of a denial. Any allegation not denied shall be deemed to be admitted. When a petitioner intends in good faith to deny only a part of or to qualify an allegation, he shall specify so much of it as is true and shall deny only the remainder.

(c) The petition shall state whether the petitioner is requesting termination or modification of the Notice or Order, and shall state with particularity how the petitioner intends to show that his continued service to or participation in the conduct of the affairs of the institution would not, or is not likely to, pose a threat to the interests of the institution's depositors or to impair public confidence in the institution.

§ 509a.6 Initiation of hearing.

(a) Within 10 days of the filing of a petition for hearing, the Board shall notify the petitioner of the time and place fixed for hearing, and it shall designate one or more agency employees to serve as presiding officer.

(b) The hearing shall be scheduled to be held no later than 30 days from the date the petition was filed, unless the time is extended at the request of the petitioner.

(c) A petitioner may appear personally or through counsel, but if represented by counsel, said counsel is required to comply with § 509.3 of this subchapter.

(d) a representative(s) of the Board's Office of General Counsel also may attend the hearing and participate therein as a party.

§ 509a.7 Conduct of hearings.

(a) Hearings provided by this section are not subject to the adjudicative provisions of the Administrative Procedure Act (5 U.S.C. 554–557). The presiding officer is, however, authorized to exercise all of the powers enumerated in § 509.6 of this subchapter.

(b) Witnesses may be presented, within time limits specified by the presiding officer, provided that at least 10 days prior to the hearing date, the party presenting the witnesses furnishes the presiding officer and the opposing party with a list of such witnesses and a summary of the proposed testimony. However, the requirement for furnishing such a witness list and summary of testimony shall not apply to the presentation of rebuttal witnesses. The presiding officer may ask questions of any witness, and each party shall have an opportunity to cross-examine any witness presented by an opposing party.

(c) Upon the request of either the petitioner or a representative of the Office of General Counsel, the record shall remain open for a period of 5 business days following the hearing, during which time the parties may make any additional submissions for the record. Thereafter, the record shall be closed.

(d) Following the introduction of all evidence, the petitioner and the representative of the Office of General Counsel shall have an opportunity for oral argument; however, the parties may jointly waive the right to oral argument, and, in lieu thereof, elect to submit written argument.

(e) All oral testimony and oral argument shall be recorded, and transcripts made available to the petitioner upon payment of the cost thereof. A copy of the transcript shall be sent directly to the presiding officer, who shall have authority to correct the record *sua sponte* or upon the motion of any party.

(f) The parties may, in writing, jointly waive an oral hearing and instead elect a hearing upon a written record in which all evidence and argument would be submitted to the presiding officer in documentary form and statements of individuals would be made by affidavit.

§ 509a.8 Default.

If the subject individual fails to file a petition for a hearing, or fails to appear at a hearing, either in person or by attorney, or fails to submit a written argument where oral argument has been waived pursuant to § 509a.7(d) or (f) of this part, the Notice shall remain in effect until the information, indictment, or complaint is finally disposed of and the Order shall remain in effect until terminated by the Board.

§ 509a.9 Rules of evidence.

(a) Formal rules of evidence shall not apply to hearing, but the presiding officer may limit the introduction of irrelevant, immaterial, or unduly repetitious evidence.

(b) All matters officially noticed by the presiding officer shall appear on the record.

§ 509a.10 Burden of persuasion.

The petitioner has the burden of showing, by a preponderance of the evidence, that his or her continued service to or participation in the conduct of the affairs of the institution does not, or is not likely to, pose a threat to the interests of the institution's depositors or threaten to impair public confidence in the institution.

§ 509a.11 Relevant considerations.

(a) In determining whether the petitioner has shown that his or her continued service to or participation in the conduct of the affairs of the institution would not, or is not likely to, pose a threat to the interests of the institution's depositors or threaten to impair public confidence in the institution, in order to decide whether the Notice or Order should be continued, terminated, or otherwise modified, the Board will consider: (1) The nature and extent of the petitioner's participation in the affairs of the institution; (2) the nature of the offense with which the petitioner has been charged; (3) the extent of the publicity accorded the indictment and trial; and (4) such other relevant factors as may be entered on the record.

(b) When considering a request for the termination or modification of a Notice, the Board will not consider the ultimate guilt or innocence of the petitioner with respect to the criminal charge that is outstanding.

(c) When considering a request for the termination or modification of an Order which has been issued following a final judgment of conviction against a subject individual, the Board will not collaterally review such final judgment of conviction.

§ 509a.12 Proposed findings and conclusions and recommended decision.

(a) Within 30 days after completion of oral argument or the submission of written argument where oral argument has been waived, the presiding officer

shall file with the Secretary and certify to the Board for decision the entire record of the hearing, which shall include a recommended decision, the Notice or Order, and all other documents filed in connection with the hearing.

(b) The recommended decision shall contain:

(1) A statement of the issue(s) presented,

(2) A statement of findings and conclusions, and the reasons or basis therefor, on all material issues of fact, law, or discretion presented on the record, and

(3) An appropriate recommendation as to whether the suspension, removal, or prohibition should be continued, modified, or terminated.

§ 509a.13 Decision of the Board.

(a) Within 30 days after the recommended decision has been certified to the Board, the Board shall issue a final decision.

(b) The Board's final decision shall contain a statement of the basis therefor. The Board may satisfy this requirement where it adopts the recommended decision of the presiding officer upon finding that the recommended decision satisfies the requirements of § 509.12(b).

(c) The Secretary shall serve upon the petitioner and the representative of the Office of General Counsel a copy of the Board's final decision and the related recommended decision.

§ 509a.14 Miscellaneous.

The provisions of §§ 509.17, 509.18, 509.20, 509.21, and 509.22 of this subchapter shall apply to proceedings under this part.

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

[FR Doc. 83-6060 Filed 3-8-83; 8:45 am]

BILLING CODE 6720-01-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1215

Tracking and Data Relay Satellite System (TDRSS); Use and Reimbursement Policy for Non-U.S. Government Users

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: This final rule establishes an equitable basis for use of and reimbursement for Tracking and Data Relay Satellite System (TDRSS) and service by non-U.S. Government users. The tracking, telemetry, and command services provided by the TDRSS will represent a significant growth in the capability of presently available services provided via the ground tracking station network. Once the TDRSS is declared operational by NASA, TDRSS services will be made available to non-U.S. Government users.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Robert O. Aller, 202-755-2340.

SUPPLEMENTARY INFORMATION: The TDRSS space segment consists of two satellites in geostationary orbit. A third satellite is in geostationary orbit to be operated as a spare for additional service as required. The ground segment consists of a single ground terminal and the necessary operational control and interface devices and interconnecting communications circuit services located at White Sands, New Mexico. NASA published its proposed rule in 47 FR 35228-35232, August 13, 1982. One comment was received but was not adopted. The Chief Counsel for Advocacy of the U.S. Small Business Administration indicated the proposed rule failed to comply with Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*). By letter dated November 19, 1982, the Chief Counsel for Advocacy was informed that the proposed rule was being established to set rates, prices and practices relating to the use of TDRSS and was therefore excluded from compliance with the RFA by 5 U.S.C. 601(2).

Appendix A has been updated to reflect CY 1984 reimbursement rates for use of TDRSS service.

List of Subjects in 14 CFR Part 1215

Satellites, Tracking and data relay satellite, Communications equipment, Government contract.

14 CFR Chapter V is amended by adding a new Part 1215 reading as follows:

PART 1215—TRACKING AND DATA RELAY SATELLITE SYSTEM (TDRSS)

Subpart 1215.1—Use and Reimbursement Policy for Non-U.S. Government Users

Appendix C—Typical User Activity Timeline.

Authority: Sec. 203, Pub. L. 85-568, 72 Stat. 429, as amended; 42 U.S.C. 2473.

Subpart 1215.1—Use and Reimbursement Policy for Non-U.S. Government Users

§ 1215.100 General.

The Tracking and Data Relay Satellite System represents a major investment by the U.S. Government with the primary goal of providing improved tracking and data acquisition services to spacecraft in low earth orbit or to terrestrial users. It is the objective of NASA to operate as efficiently as possible with the TDRSS. This is to the mutual benefit of all users. Such user consideration will permit NASA and non-NASA services to be delivered without compromising the mission objectives of any individual user. To encourage users toward achieving efficient TDRSS usage, a reimbursement policy has been established which is designed to influence users to operate in the most efficient and orderly manner possible. Additionally, the reimbursement policy is designed to comply with the Bureau of the Budget Circular A-25 on User Charges, dated September 23, 1959, which requires that a reasonable charge should be made to each identifiable recipient for a measurable unit or amount of Government service or property from which a special benefit is derived.

§ 1215.101 Scope.

This Subpart sets forth the policy governing TDRSS services provided to non-U.S. Government users and the reimbursement for rendering such services. It excludes TDRSS services provided as standard or optional services to Space Transportation System (STS) users under existing policy for Shuttle and Spacelab (14 CFR 1214.1 and 1214.2); that is user command and telemetry support which utilizes and is a part of the Shuttle or Spacelab communications system is a Shuttle/Spacelab service. Cooperative missions are also not under the purview of this Subpart. The arrangements for TDRSS

services for cooperative missions will be covered in a Memorandum of Understanding (MOU), as a consequence of negotiations between NASA and the other concerned parties. Any MOU which includes provision for any TDRSS service will require signatory concurrence by the Associate Administrator for Space Tracking and Data Systems prior to dedicating Office of Space Tracking and Data Systems resources for support of a cooperative mission.

§ 1215.102 Definitions.

(a) *User.* Any non-U.S. Government representative or entity who contracts with NASA to use TDRSS services.

(b) *TDRSS.* The Tracking and Data Relay Satellite System including Tracking and Data Relay Satellites (TDRS), the White Sands Ground Terminal (WSGT), and the necessary TDRSS operational areas, interface devices and NASA communication circuits to unify the above into a functioning system. It specifically excludes the user ground system/TDRSS interface.

(c) *Bit Stream.* The digital electronic signals acquired by TDRSS from the user craft or the user generated input commands for transmission to the user craft.

(d) *Flexible Support.* Support requests which permit NASA, at its option, to schedule service at any time during the period of a single orbit of the user mission. Missions requiring multiple support periods during a single orbit may be classified as constrained support.

(e) *Constrained Support.* Support requests which specify the exact times NASA is to provide service, or conditions of support which can be translated into exact times for service, such as sub-satellite positions, apogee/perigee position, etc., for which support is needed.

(f) *Scheduling Service Period.* One scheduled contact utilizing a single TDRS whereby the user by requesting service is allotted a block of time for operations between the user satellite and TDRSS.

§ 1215.103 Services.

(a) *Standard Services.* These are services which the TDRSS is capable of providing to low-earth orbital user spacecraft or other terrestrial users.

(1) Tracking services.

(2) Data acquisition service.

(3) Command transmission service.

(4) Emergency line outage recording in the event of a communications failure between White Sands, Goddard Space Flight Center (GSFC), and Johnson Space Center (JSC).

(5) A weekly user spacecraft orbit determination in NASA standard orbital elements as determined by NASA for TDRSS target acquisition purposes.

(6) Delivery of user data at the NASA Ground Terminal (NGT) located at White Sands.

(7) Pre-launch support for data flow test and related activities which require use of a TDRS.

(8) Pre-launch support planning and documentation.

(9) Scheduling user services via TDRSS.

(10) Access to tracking data to enable users to perform orbit determination at their option.

(b) *Mission Unique Services.* Other tracking and data services desired by the user beyond the standard service and the charges therefor, will be identified and assessed on a case-by-case basis.

§ 1215.104 Apportionment and assignment of services.

No user may apportion, assign, or otherwise convey to any third party its TDRSS service. Each user may obtain service only through contractual agreement with NASA.

§ 1215.105 Delivery of user data.

(a) As a standard service, NASA will provide to the user its data from the TDRSS as determined by NASA in the form of one or more digital or analog bit streams synchronized to associated clock streams at the NGT.

(b) User data handling requirements beyond the NGT interface may be provided as a service without charge to the user, to the extent that NASA determines that it does not exceed NASA's standard communications system. Any additional data transport or handling requirements exceeding NASA's capability will be dealt with as a mission-unique service.

(c) No storage of the user data is provided in the standard service. NASA will provide short-term temporary recording of data at White Sands, only in event of a NASA Communications Network (NASCOM) link outage.

(d) NASA will provide TDRSS service on a "best efforts" basis and does not assume the risk of liability for damage to the user or third parties for failure to provide contracted-for services because of damage to the user's payload or other damage to the user or to third parties. The price for TDRSS service does not include a contingency or premium for this potential damage. The user will assume this risk of damage or obtain insurance to protect against that risk.

§ 1215.106 User command and tracking data.

(a) User command data may enter the TDRSS via the NASCOM interface at one of three locations:

(1) For Shuttle payloads which utilize the Shuttle commanding system, command data must enter the system via the Johnson Space Center (JSC) and is governed by the policies established for STS services (see § 1215.101).

(2) For free flyers and other payloads, command data must enter the system at the Goddard Space Flight Center (GSFC) if it is to be a standard service.

(3) The use of other command data entry points [e.g., the NASA Ground Terminal (NGT) at White Sands, NM, or Johnson Space Center (JSC), for payloads using an independent direct link from TDRS to the user payload] is considered to be a mission unique service.

(b) NASA is required to maintain the user satellite orbital elements to sufficient accuracy to permit the TDRS system to establish and maintain acquisition. This can be accomplished in two ways:

(1) The user can provide the orbital elements in a NASA format to GSFC to meet TDRSS operational requirements.

(2) The user shall insure that a sufficient quantity of tracking data is received at GSFC to permit the determination of the user satellite orbital elements. The charges for this service will be determined by using the on-orbit service rates.

§ 1215.107 User data security.

User data security is not provided by the TDRSS. Responsibility for data security resides solely with the user. User desiring data safeguards shall provide and operate, external to the TDRSS, the necessary equipment or systems to accomplish data security. Any such user provisions must be compatible with data flow through TDRSS and not interfere with other users.

§ 1215.108 Defining user service requirements.

Potential users should become familiar with TDRSS capabilities and constraints, which are detailed in the TDRSS User's Guide (GSFC document, STDN No. 101.2), as early as possible. This action allows the user to evaluate the trade-offs available among various TDRSS services, spacecraft design, operations planning, and other significant mission parameters. When these user evaluations have been completed, and the user desires to use

TDRSS, the user should initiate a request for TDRSS service.

(a) Initial requests for TDRSS service from non-U.S. Government users should be addressed to NASA Headquarters, Code TX, TDRSS Program, Washington, D.C. 20546. Upon review and preliminary acceptance of the service requirements by NASA Headquarters, the appropriate areas of GSFC will be assigned to the project to produce the detailed requirements, plans and documentation necessary for support of the mission. Changes to user requirements shall be made as far in advance as possible and shall be submitted in writing to both NASA Headquarters, Code TX, TDRSS Program, and GSFC, Code 804, Greenbelt, Maryland 20771.

(b) Acceptance of user requests for TDRSS service is the sole prerogative of NASA. Although TDRSS represents a significant increase to current support capabilities, service capacity is finite, and service will be provided in accordance with operational priorities established by NASA. Request for services within priority groups shall be negotiated with non-NASA users on a first come, first service basis for inclusion into the TDRSS mission model.

§ 1215.109 Scheduling user service.

(a) User service shall be scheduled only by NASA. Scheduling refers to that activity occurring after the user has been accepted and placed in the TDRSS mission model as specified in § 1215.108(b). See Appendix C for a description of a typical user activity timeline.

(b) Schedule conflict will be resolved in general by application of principles of priority to user service requirements. Services shall be provided either as normally scheduled service or as emergency/disruptive update service. Priorities will be different for emergency/disruptive updates than for normal services.

(1) Normally scheduled service is service which is planned and ordered under normal operational conditions and is subject to schedule conflict resolution under normal service priorities. Priorities are established by the NASA Administrator or his/her designee. Requests for normally scheduled service must be received by the schedulers at the GSFC Network Control Center (NCC) no later than 45 minutes prior to requested support time.

(2) Normal scheduling principles of priority are generally ordered as follows beginning with the highest priority:

(i) Launch, reentry, landing of the STS Shuttle or launch of a NASA expendable launch vehicle.

(ii) NASA payloads/spacecraft.

(iii) Other payloads/spacecraft of interest to the United States.

(iv) Other payloads/spacecraft launched by a NASA launch vehicle.

(v) Other payloads/spacecraft.

(vi) Support of other launches.

(3) Exceptions to these priorities may be determined on a case-by-case basis with the NASA Administrator or his/her designee as the priorities stated in paragraph (b)(2) of this section are indicative of general rather than specific cases.

(4) Emergency service conditions are those requiring rapid response to changing user service requirements. Emergency service may be instituted under the following conditions:

(i) Circumstances which pose a threat to the security of the United States.

(ii) Circumstances which threaten human life.

(iii) Circumstances which threaten user mission loss.

(iv) Other circumstances of such a nature which make it necessary to preempt normally scheduled services.

(5) At times, emergency service requirements will override normal schedule priority. Under emergency service conditions, disruptions to schedule service will occur. As a consequence, users requiring emergency service shall be charged for emergency service at rate factors set forth in Appendix B.

(6) Disruptive updates are scheduled updates which by virtue of priorities, causes previously scheduled user's services to be rescheduled or deleted or are requested by the user less than 45 minutes prior to the scheduled support period.

(i) Disruptive updates will be charged at the same rates as emergency service. User initiated schedule requests which are received less than 45 minutes prior to the requested schedule support time will be considered a disruptive update.

(ii) User initiated schedule requests which are received more than 45 minutes and less than 12 hours prior to the scheduled support period will be acted upon as a routine input provided other users are unaffected. If other users are affected, the scheduling input will be considered a disruptive update and the appropriate charge factor will be applied.

(iii) The Network Control Center (NCC) at GSFC reserves the sole right to schedule, reschedule or cancel TDRSS service. Schedule changes brought about through no fault of the user are not charged the factor for a disruptive update.

(7) While the priority listing remains the general guide for establishing support availability, the NASA schedulers will exercise judgment and endeavor to see that lower priority users are not excluded from a substantial portion of their contracted-for service due to the requirements of higher priority users.

(8) When a user contracts for TDRSS service for an "operational satellite" which interfaces with a significant number of national and world-wide users on a regularly scheduled basis as opposed to a "research and development satellite," NASA will place special emphasis on the operational requirement when planning schedules. This should reduce the probability of losing perishable operational data such as meteorological, climate, or earth resources information.

(c) General user service requirements, which will be used for preliminary planning and mission modeling, should include as a minimum, the following:

(1) Date of service initiation.

(2) Expected date of service termination.

(3) The type of TDRSS services desired [e.g., multiple access, tracking, etc.].

(4) The frequency and duration of each service, including orbital position or time constraints on service delivery from a given spacecraft where appropriate.

(5) Orbital or trajectory parameters and tracking data requirements.

(6) Spacecraft events affecting tracking, telemetry or command requirements.

(7) Signal parameters and data rates by type of service, type and location of antennas and other related information dealing with user tracking, command, and data systems.

(8) Special test requirements, compatibility testing, data flows, simulations, etc.

(9) Identification of type and quantity of user information necessary for control functions, location of user control facility, and identification of communications requirements.

(10) Identification of ground communications requirements and interface points, including the level of support to be requested from NASCOM.

(d) To provide for effective planning, general service requirements should be provided at least 3 years before initiation of service. With these data NASA will determine whether the requested services can be provided.

(e) Detailed requirements for user services must be provided 18 months before the initiation of service. These data will be the basis for the technical definition of the Interface Control

Document (ICD). If requirements are received late, necessitating extraordinary NASA activities [e.g., overtime, special printing of documents], such activities will be considered to be mission unique and their cost charged the user.

§ 1215.110 User cancellation of all services.

The user has the right to terminate its service contract with NASA at any time. A user who exercises this right after contracting for service shall pay the charge agreed upon for services previously rendered, and the cost incurred by the Government for support of pre-launch activities, services, and mission documentation not included in that charge. The user will remain responsible for the charges for any services actually provided.

§ 1215.111 User postponement of service.

The user may postpone the initiation of contract service (user launch date) by delivery of written notification to NASA Headquarters, Code TX. If NASA's written approval is not obtained for postponements which delay the initial contract start of service date by more than 6 months, the quantity of service provided may be affected due to changes in other support requirements. Therefore, the validity of previous estimates of predicted support availability may no longer be applicable.

§ 1215.112 User/NASA contractual arrangement.

(a) The NASA Administrator reserves the right to waive any portion of the reimbursement due to NASA under the provisions of the reimbursement policy.

(b) When NASA has determined that a potential user has not made sufficient progress toward concluding a contractual arrangement for service, after being placed in a mission model, NASA shall have the unilateral right to remove that user from the mission model.

(c) NASA shall have the right to determine unilaterally that the potential user has failed to make progress toward concluding a contractual arrangement.

§ 1215.113 User charges.

(a) The user shall reimburse NASA the sum of the charges for standard and mission unique services. Charges will be based on the service rates determined at the beginning of each calendar year and the service time scheduled for the user.

(b) For standard services the user shall be charged only for services rendered, except that if a total cancellation of service occurs, the users shall be charged in accordance with the provisions of § 1215.110.

(1) Standard services which are scheduled, and then cancelled by the user less than 12 hours prior to the start of that scheduled service period, will be charged as if the scheduled service actually occurred.

(2) The time scheduled by the user project shall include the slew time, set up and/or configuration time, TDRSS contact time, and all other conditions for which TDRSS services were allocated to the user.

(3) Charges will be accumulated by the minute, based on the computerized schedule/configuration messages which physically set up the TDRSS equipment at the start of a support period and free the equipment for other users at the end of a support period.

(c) The user shall reimburse NASA for the costs of any mission unique services provided by NASA for the user's benefit unless NASA obtains full cost reimbursement from another user for these mission unique services.

(d) Any person or entity which pays to NASA the initial administrative charge (see § 1215.115) does so with the understanding that it is not refundable whether or not an agreement is entered into with NASA for TDRSS services.

§ 1215.114 Service rates.

(a) Non-U.S. Government user rates will reflect TDRSS total operational and maintenance costs prorated to a per-minute basis.

(b) Rates for TDRSS services will be set by NASA Headquarters each October for the following year, January through December. Rate variations will reflect changes in operating costs, loading formulas and escalation.

(c) Projected estimates will include escalation bases on the Bureau of Labor Statistics Index for compensation per hour—total private.

(d) Appendix A is provided for preliminary planning purposes only. It delineates the rate per minute by service and type of user. These rates are subject to change.

(e) The per minute charge for TDRSS service is computed by multiplying the charge per minute for the appropriate service by the number of minutes scheduled and the appropriate factor (for flexible, constrained or disruptive/emergency service).

§ 1215.115 Payment and billing.

(a) To each user there will be an initial non-refundable administrative charge of $25,000 which is applicable toward TDRSS operational services.

(b) The procedure for billing and payment of standard TDRSS services is as follows:

(1) The calendar year is divided into two service periods, January through June and July through December. The charge for TDRSS service will be determined in October for the succeeding calendar year.

(2) The estimated cost of service, January through June period, will be due the previous July 1, and will be billed 60 days prior to the payment due date.

(3) The estimated cost of service, July through December period, will be due the previous January 1, and will be billed 60 days prior to the payment due date.

(4) Adjustments to the amounts prepaid will be made to the succeeding billings as the actual service time is tabulated. Amounts due to the user will be credited to the next service period or refunded to the user if no more service is to be provided.

(5) The total estimated cost of all standard pre-launch services such as mission planning, documentation, link analysis, testing, computer, human resources, etc., with the exception of TDRSS operational services, will be paid to the Government prior to NASA rendering such services. This advance payment will be applied as a credit to the charges billed for post-launch TDRSS operational services as specified in paragraphs (b) (1) through (4) of this section.

(c) Payment schedules for mission unique services will be mutually developed between NASA the user on a case-by-case basis, dependent upon level of engineering effort, long-lead items, special communication services or other considerations. Payment will generally be made prior to NASA incurring a cost for mission unique service.

(d) Late payments by the user will require the user to pay a late payment charge equal to 1½% per month of the unpaid balance calculated daily from the date the payment was due until the date payment is made.

Appendix A—Estimated Service Rates in 1984 Dollars for TDRSS Standard Services (Based on NASA Escalation Estimate)

TDRSS user service rates for services rendered in CY–84 based on current projections in 1984 dollars are as follows:

Single Access Service—forward command, return telemetry, or tracking, or any combination of these, the base rate in $110.00 per minute for non-U.S. Government users.

Multiple Access Forward Service—Base rate is $24.00 per minute for non-U.S. Government users.

Multiple Access Return Service—Base rate is $8.00 per minute for non-U.S. Government users.

Appendix B—Factors Affecting Standard Charges

Charges for services shall be determined by multiplying the factors below by the base rates for standard services set forth in Appendix A.

	Flexible	Time or position constrained	Emergency service, disruptive updates
Single access service	.5	1	2
Multiple access forward (command) service	.67	1	2

	Normally scheduled support	Emergency service, disruptive updates
Multiple access return (telemetry) service	1	2

Appendix C—Typical User Activity Timeline

Time (approximate)	Activity
Project conceptualization (At least 3 years before launch; Ref. § 1215.108(a)).	Request NASA Headquarters perform study to determine availability of TDRSS. $25,000 non-refundable charge for this service. Placement into mission model if accepted.
3 year before launch (Ref. § 1215.109(c)).	Submit general user requirements to permit preliminary planning. Begin payment for pre-mission activities. (Ref. § 1215.115(b)(5).)
15 months before launch (earlier if interfacing is expected).	Provide detailed requirements for technical definition and development of operational documents and ICD's. (Ref. § 1215.109(e).)
3 weeks prior to a scheduled support period (SSP).	Submit scheduling request to GSFC covering a weekly period.
2 weeks prior to an SSP.	Receive schedule from GSFC based on principles of priority (§ 1215.109(b)(2)). Acknowledgement to GSFC required.
Up to 12 hours prior to an SSP.	Can cancel an SSP without charge. (Ref. § 1215.113(a)(1).)
Up to 45 minutes prior to an SSP.	Can schedule an SSP if a time slot is available without impacting another user.
Between SSP minus 45 minutes and the SSP.	Schedule requests will be charged at the disruptive update rate (Ref. § 1215.109(b)(5)).
Real Time	Emergency service requests will be responded to per the priority system (Ref. § 1215.109(b)(3)) and assessed the emergency service rate.

James M. Beggs,
Administrator.

BILLING CODE 7510-01-M

UNITED STATES METRIC BOARD

15 CFR Ch. V

Removal of Chapter

In a letter to the Chairman, United States Metric Board dated February 25, 1982, the Deputy Director of the Office of Management and Budget assigned responsibility for metric policy and coordination to the Secretary of Commerce upon the phase out of the Board.

As of October 1, 1982, responsibility for metric policy was transferred to the Secretary of Commerce, and the regulations of the U.S. Metric Board, appearing in Chapter V of the Code of Federal Regulations became obsolete. The regulations in 15 CFR Chapter V are being removed based on a letter to the Office of the Federal Register from the Director, Office of Administration, U.S. Department of Commerce.

CHAPTER V—[REMOVED]

Accordingly, in Title 15, Code of Federal Regulations, Parts 500–504 appearing in Chapter V—United States Metric Board, are removed and the chapter is removed.

BILLING CODE 1505-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 145

Commission Headquarters Office and Western and Southwestern Offices; Change and Address; Correction

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rules, correction.

SUMMARY: This document corrects telephone numbers for the Division of Economics and Education in New York and the Division of Trading and Markets in Chicago, which were published on January 21, 1983 (48 FR 2735).

FOR FURTHER INFORMATION CONTACT: Donald L. Tendick, Acting Executive Director, Commodity Futures Trading Commission, 2033 K Street, NW., Washington. D.C. 20581, (202) 254–7556.

The Commodity Futures Trading Commission is correcting the following telephone numbers in § 145.6:

On page 2735, column 1, line 55, the telephone number for the Division of Economics and Education in New York is (212) 466–2061. On page 2735, column 1, line 60, the telephone number for the Division of Trading and Markets in Chicago is (312) 353–5990.

Issued in Washington, D.C. on March 3, 1983.

Jane K. Stuckey,
Secretary of the Commission.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 34

[Docket No. RM81-18-000]

Order Denying Application for Rehearing and Clarifying Regulatory Provision

Issued March 3, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Denying Application for Rehearing and Clarifying Regulatory Provision.

SUMMARY: The Federal Energy Regulatory Commission (Commission) denies an application for rehearing or reconsideration of the final rule which revised the Commission's Regulations regarding applications for authorization of the issuance of securities or the assumption of liabilities. The final rule was issued October 7, 1981 (Order No. 182, 46 FR 50511, October 14, 1981), and clarified and simplified those regulations as part of the Commission's ongoing program to reevaluate its information requirements. The rehearing request is denied because it does not raise any issues nor present any new data that were not fully considered by the Commission during this rulemaking, or which now having been considered, warrant any modification of the final rule with respect to that request.

The Commission also amends its regulations in § 34.1(c)(1) in order to insert text previously omitted in that provision.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Cathy Ciaglo, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 (202) 357–8033.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Energy Regulatory Commission issued a final rule on October 7, 1981, to revise its regulations at 18 CFR Part 34, "Application for Authorization of the Issuance of

Securities or Assumption of Liabilities" (Order No. 182, 46 FR 50511, October 14, 1981). Part 34 provides requirements for any issuance of a security or assumption of liability by a public utility, licensee or other entity for which approval is required under sections 19, 20 and 204 of the Federal Power Act (16 U.S.C. 812, 813, 824c). The final rule clarified and simplified the Part 34 provisions and deleted or reduced certain of the specified requirements. The revisions were made as part of the Commission's ongoing program to reevaluate all of its information requirements and to eliminate the reporting of data that are not necessary for Commission regulatory purposes.

B. Rehearing Application

On November 6, 1981, Simpson, Thacher and Bartlett (Applicant) filed a timely application for rehearing or reconsideration of the final rule. By that application, the applicant objected to the revised language of § 34.1(c)(1) adopted in the rule. That provision reads as follows:

(c) *Exemptions*—(1) *If a State regulates securities prior to issuance.* A utility whose security issuances are regulated by a State agency, shall be exempted from the provisions of sections 19, 20 and 204 of the Federal Power Act, and from the provisions of this part: *Provided, however,* that the State agency is required to exercise its regulatory authority with respect to the issuance of *such securities* prior to issuance, and that the utility must obtain written authorization or approval from the State agency prior to the issuance of such securities. (Emphasis provided by Applicant.)

The essence of the Applicant's objection is that this provision, exempting security issuances from Commission jurisdiction under section 204 of the Federal Power Act by reason of the exercise of state regulation, is in conflict with section 204(f) of the Federal Power Act. Section 204(f) provides as follows:

(f) The provisions of this section shall not extend to a *public utility* organized and operating in a State under the laws of which its security issues are regulated by a State commission. (Emphasis provided by Applicant.)

The Applicant stated that the implicit premise of the proviso to § 35.1(c)(1) is that "every security issued by a public utility which is not approved by a state commission" must be authorized by the Commission under section 204 and that this conflicts with section 204(f). According to the Applicant, the Commission incorrectly construed the language of section 204(f) as providing exemptions for specific security issues, and that, in fact, section 204(f) should be broadly construed to exempt the public utilities that are regulated by states irrespective of whether individual securities are so regulated.

The Applicant, citing to legislative history and court cases, argued that the purpose of section 204(f) is to preserve the states' jurisdiction to regulate utility issuances where state laws provide for such regulation. The Applicant concluded that section 204(f) was designed to exempt from federal regulation "*public utilities* whose security issues were subject to a general structure of state regulation, without regard to the state-to-state nuances and variations in exempting particular transactions * * *" (Emphasis provided by Applicant.) That is, section 204(f) reflects the clear intention that the Commission should regulate security issuances only in states that did not provide for any regulation.

For the reasons given below, the Commission believes that the proviso of § 34.1(c)(1) of the revised regulations is consistent with section 204(f) of the Federal Power Act and with the overall intent of the Act. For this reason, the application for rehearing is denied.

The primary purpose of Part II of the Federal Power Act has been succinctly stated by the Supreme Court:

"* * * to curb abusive practices of public utility companies by bringing them under effective control, and to provide effective federal regulation of the expanding business of transmitting and selling power in interstate commerce." [1]

To adopt the Applicant's interpretation of the section 204(f) exception would result in no federal or state control over certain security issuances. Under its interpretation, the mere fact that a state or state commission *could* regulate a security issuance, whether or not it does so regulate, would be enough to preclude the exercise of federal authority.

Although the issue in this Application was not specifically addressed in the legislative history, this Commission does not believe that the Congress intended that the authority of state commissions should be so broad that they could unilaterally decide by regulatory inaction which issuances should and should not be regulated by federal authority. This would violate the very spirit of the Federal Power Act and would also contradict section 204(f) which provides that the exemption applies when a utility security issues are "regulated" by a state commission.

With respect to the Applicant's assertion that the § 34.1(c)(1) proviso would supplant state regulation of its utilities' security issuances, the Commission notes that in no instances would the Commission and the states regulate the *same* issuances in a particular state. This would be consistent with the statement in the report of the House Committee on Interstate and Foreign Commerce that: "[t]he new parts are so drawn as to be a complement to and in no sense a usurpation of State regulatory authority * * *" (H. Rep. No. 1318, 74th Cong., 1st Sess. at 8 (1935).) The Commission would never usurp the state authority when the state actively regulated security issues, but would only regulate in those instances where the states themselves chose not to regulate.

The Commission's determination that it is authorized to regulate specific security issuances that are not regulated by the states is entirely consistent with previous Commission decisions dating to 1949. Three of these early decisions were cited by the Applicant [2] and each of them reflects the Commission's long-standing practice of interpreting section 204(f) as exempting from federal regulation under the Federal Power Act only the specific security issuances that are regulated by the States. This practice is implemented in the proviso at § 34.1(c)(1) of the Commission's regulations. This provision is consistent with section 204(f) of the Federal Power Act and with the stated purpose of that Act which requires the Commission to regulate in the "public interest".

In conclusion, the Applicant has not raised any issues nor presented any data that were not fully considered by the Commission during this rulemaking or, which now having been considered, warrant any modification of the final rule with respect to that request.

Accordingly, the application for rehearing or reconsideration of the final rule that was filed in this docket by Simpson, Thacher and Bartlett is denied.

II. Clarification of Regulatory Provision

Subsequent to the issuance of the final rule in this docket, the Commission was notified by an interested person of an omission in the revised regulations. The omission pertains to the language in § 34.1(c)(1), that appears before the proviso discussed in the rehearing application. The reference to a utility that is "organized and operating" in a State appeared in the notice of proposed rulemaking but was not included in the

[1] *Gulf States Utilities Co. v. FPC*, 411 U.S. 717, 758 (1973) (citations omitted).

[2] *Newport Electric Co. of New Hampshire* (Docket No. E-6250) 8 FPC 1369 (1949); *Florida Power Corp.* (Docket No. E-6386) 10 FPC 1550 (1951); and *Public Service Co. of New Hampshire* (Docket No. E-6521) 12 FPC 1199 (1953).

final rule. The omission of this phrase from the final rule was inadvertent. The Commission, therefore, reinserts this language and the provision now reads,

A utility whose security issuances are regulated by a State agency, in a State in which it is organized and operating, shall be exempted from the provisions of sections 19, 20 and 204 of the Federal Power Act, and from the provisions of this Part. * * *

In accordance with section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)) (APA), the Commission finds that public notice and comment on this amendment are unnecessary because the phrase was inadvertently omitted from the final rule. For this same reason, the Commission finds good cause, in accordance with section 553(d) of the APA, to make the amendment effective immediately.

(Department of Energy Organization Act, 42 U.S.C. 7101–7352; E.O. 12009, 3 CFR Part 142; Federal Power Act, 16 U.S.C. 792–828(c); Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2635)

List of Subjects in 18 CFR Part 34

Electric power, Electric utilities, Reporting requirements, Securities.

In consideration of the foregoing, Part 34 of Subchapter B, Chapter 1, Title 18, Code of Federal Regulations, is amended as set forth below, effective March 3, 1983.

By the Commission.

Kenneth F. Plumb,
Secretary.

PART 34—[AMENDED]

§ 34.1 [Amended]

Section 34.1(c)(1) is amended by inserting the phrase "in a State in which it is organized and operating," between the words "State agency," and "shall".

18 CFR Part 250

[Docket No. RM83-51-000; Order No. 285]

Discontinuance of FPC Form 334, Reserves Dedication Report

Issuance: March 4, 1983.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) discontinues FPC Form 334, "Reserves Dedication Report," and deletes the Commission's regulation which prescribes the form, 18 CFR 250.13. The Commission is taking this action because Form 334 and its prescribing regulation no longer serve any regulatory function or purpose for the Commission. The effect of this action will be to remove an unnecessary portion of the Commission's regulations and to avoid possible confusion or uncertainty.

EFFECTIVE DATE: April 8, 1983.

FOR FURTHER INFORMATION CONTACT: Ellen Brown, Office of Program Management, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357–5250.

SUPPLEMENTARY INFORMATION: By this rule, the Federal Energy Regulatory Commission (Commission) is discontinuing FPC Form 334, "Reserves Dedication Report," and the regulation prescribing that form, 18 CFR 250.13. The Commission is eliminating Form 334 and its corresponding regulation because they no longer serve any regulatory purpose.

I. Background

In *Phillips Petroleum Co. v. Wisconsin*, 347 U.S. 672 (1954), the Supreme Court held that the jurisdiction of the Federal Power Commission[1] encompassed the regulation of independent producers of natural gas, *i.e.*, producers not affiliated with an interstate pipeline. The *Phillips* decision resulted in a dramatic increase in the number of natural gas producers to be regulated by the Commission. In response to this increased administrative burden, the Commission instituted proceedings to regulate the wellhead prices charged by independent producers. These "area rate" proceedings individually addressed the various geographical areas throughout the United States.[2]

While the area rate proceedings were pending, the Commission permitted many independent producers to sell their gas at their requested rates. Each producer was on notice, however, that it would be required to make appropriate refunds if the Commission later found that the rate charged was not just and reasonable, in whole or in part.

The area rate proceeding first completed by the Commission was that regarding the Texas Gulf Coast Area. On May 6, 1971, the Commission issued Opinion No 595 [3] establishing the just and reasonable area rates for natural gas produced in that area. Opinion No. 595 also included two provisions designed to encourage independent producers to dedicate more gas produced in the Texas Gulf Coast Area to the interstate market.

Under the first incentive provision, a producer that owed refunds to any of its purchasers of Texas Gulf Coast Area gas could elect to discharge those refund obligations by making new dedications, prior to January 1, 1978, of Texas Gulf Coast Area gas reserves for sale in the interstate market. Producers' pipeline purchasers were responsible for reporting newly dedicated gas reserves to the Commission. A producer's refund obligation was reduced by one cent for each Mcf of newly dedicated gas reserves.

The second incentive provision included in Opinion No. 595 provided for automatic increases in the Texas Gulf Coast Area rates for gas sold under contracts dated prior to October 1, 1968, as the gas reserves newly dedicated by producers reached certain specified volumes. Thus, for example, while Opinion No. 595 established an initial area base rate of 19.0 cents per Mcf for Texas Gulf Coast Area gas sold during the period October 1, 1968, through September 30, 1973, Opinion No. 595 also provided for an increase to 19.5 cents per Mcf at such time as the combined new dedications of Gulf Coast Area gas reserves of all producers totalled 4 trillion cubic feet (excluding both gas already dedicated as of the effective date of Opinion No. 595 and gas dedicated after the effective date of Opinion No. 595 to reduce refund obligations).

Refund credit provisions like those in Opinion No. 595 for the Texas Gulf Coast Area were eventually adopted for the Southern Louisiana Area,[4] the Other

---

[1] The term "Commission" is used in this Order to refer to either the Federal Power Commission or its successor, the Federal Energy Regulatory Commission.

[2] Initially, the Commission attempted to set producer rates on a case-by-case basis. This approach proved to be administratively unacceptable.

Southwest Area,[5] and the Permian Basin Area II.[6] The Southern Louisiana Area and the Permian Basin Area orders also provided for the escalation of area rates as producers' combined new dedications reached specified levels in a manner similar to that in Opinion No. 595.

II. Discussion

A. Creation of Form 334

On November 10, 1972, the Commission promulgated 18 CFR 250.13,[7] which prescribes FPC Form 334, "Reserves Dedication Report," as the form to be used to report new dedications of gas reserves implementing refund credit and contingent rate escalation provisions in the Commission's area rate opinions.

As indicated above, Opinion No. 595 provided that only dedications made prior to January 1, 1976, would qualify for either the refund credit or application toward the contingent escalation of area rates based on the combined new dedications of all producers. Similarly, Opinion No. 598 required that new dedications in the Southern Louisiana Area be made before October 1, 1977, to receive this special treatment. The dedication cut-off dates for the Other Southwest and Permian II Basin Areas were January 1, 1976, and January 1, 1978, respectively.

On September 27, 1976, the Commission established the termination dates for filing reserve dedication reports.[8] Producers seeking to discharge refund obligations through credits for additional dedications of gas reserves in the Texas Gulf Coast and Other Southwest Areas had to have their pipeline purchasers file Form 334 by December 1, 1976. Reserve dedication reports for the Southern Louisiana and Permian II Basin Areas were to be filed by October 1, 1977, and January 1, 1978, respectively.

Thus, January 1, 1976, was the latest date for new dedications to qualify either as a credit against a producer's refund obligations or toward contingent area rate escalations based on producers' combined new dedications. The use of Form 334 also stopped on that date. However, the Commission subsequently permitted the refiling of revised Forms 334 until June 29, 1979, for certain limited purposes related to refund credits.[9]

B. Limited Use of Form 334 after January 1, 1976

In 1975–76, the Commission established nationwide rates, effective January 1, 1976, for "flowing gas," *i.e.*, gas dedicated to interstate commerce prior to January 1, 1973.[10] These new, nationwide rates were higher than existing area rates. The Commission ordered that flowing gas currently being sold by a producer to discharge a refund obligation, or dedicated by the producer for such purpose, could be sold at the higher national rates going into effect on January 1, 1976, only if the producer waived its refund credits on and after that date. In *Tenneco Oil Co. v. Federal Energy Regulatory Commission*, 571 F. 2d 834 (5th Cir. 1978), the Court of Appeals set aside that portion of the Commission's decision requiring waiver of refund credits for sales of gas made at the rate established in Opinion No. 749. Thus, producers were allowed to recoup the excess refund payments and the refund credits that had to be waived earlier under Opinion No. 749.

To accommodate the *Tenneco* decision, the Commission established procedures for recoupment of excess refund payments.[11] The Commission required that the necessary refilings of Form 334 be made within 120 days, by March 28, 1979. On January 25, 1979, the Commission extended the time for refiling Form 334 until May 29, 1979. On April 10, 1979, the Commission again extended the refiling period to June 29, 1979. At that time, the use of Form 334 ended.

C. Current Status of 18 CFR 250.13 and Form 334

Form 334 has not been in use since June 29, 1979, because all claims for recoupment of excess refund payments under *Tenneco* had to be filed by that date. In addition, the incentive provisions of the area rate opinions leading to the adoption of § 250.13 and Form 334 have no current effect. Therefore, there is no longer any ongoing regulatory purpose or function to be served by 18 CFR 250.13 or Form 334, at least on a generic basis.[12]

The Commission has determined that the interests of the Commission, the regulated gas industry, and the public will be served by the elimination of 18 CFR 250.13 and Form 334, since such action would eliminate possible uncertainty and confusion that might occur from the continued existence of § 250.13 and Form 334. This result is consistent with the Commission's ongoing efforts to reduce filing and reporting burdens.

It is the Commission's further determination that this rule to discontinue Form 334 and delete 18 CFR 250.13 constitutes a minor change of no substantive effect since it merely removes provisions that no longer are needed by the Commission to carry out its regulatory responsibilities. Therefore, the Commission believes that good cause exists for finding that prior notice and opportunity for public comment are unnecessary for this rulemaking under 5 U.S.C. § 553(b)(B).

(Natural Gas Act, as amended, 15 U.S.C. 717–717w (Supp. IV 1980); Department of Energy Organization Act, 42 U.S.C. 7101–7352; E.O. 12009, 42 FR 46,267, 3 CFR Part 142; 5 U.S.C. 553)

[7] Order No. 498, 37 Fed. Reg. 24,342 (Nov. 16, 1972), *rehearing denied* 49 FPC 80 (Jan. 5, 1973).

[8] "Order Setting Deadline for Filing Dedication Reports," 56 FPC 1829 (Sept. 27, 1976).

[9] Producers' combined new dedications of natural gas reserves never reached the specified levels for any geographical production area which, if met before the applicable cut-off date, would have triggered area rate increases.

[10] Docket No. R–478, Just and Reasonable National Rates for Sales of Natural Gas, Opinion No. 749, 54 FPC 3090 (Dec. 31, 1975), Opinion No. 749–A, 55 FPC 825 (Feb. 27, 1976), Opinion No. 749–B, 55 FPC 1525 (March 31, 1976), Opinion No. 749–C, 56 FPC 303 (July 19, 1976), *affirmed in part, and set aside in part*, Tenneco Oil Company v. FPC, 571 F. 2d 834 (5th Cir. 1978).

[11] Area Rate Proceeding, et al., Order Establishing Procedures for Claiming Recoupment of Excess Refund Payments, 5 FERC ¶ 61,189 (Nov. 28, 1978).

[12] Form 334 has been used where its format was well-suited for reporting new reserve dedications, as required in a Commission opinion directed at a single firm. In Tennessee Gas Pipeline Company, Opinion No. 607, 50 FPC 1194 (Oct. 24, 1973), the Commission approved a settlement involving the lease-sale of certain gas reserves from Amoco Production Company (Amoco) to Tennessee Gas Pipeline Company (Tennessee). The settlement, which required Amoco to refund $6 million to Tennessee, provided that Amoco would receive a credit against its refund obligation at the rate of one cent per Mcf of new gas reserves committed by Amoco to Tennessee during the eight years following the issuance of the order approving the settlement. Since the refund credit provisions of the Amoco/Tennessee settlement were so similar to the area rate refund credit provisions, Form 334 was used by Amoco in reporting its new reserves dedications in order to obtain refund credit.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 19

[T.D. 83-56]

Fee To Establish Container Stations

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to authorize Customs to implement a fee schedule to establish a container station. It provides that such a fee schedule will be published periodically to revise this fee to reflect increased costs. It also requires that a fee, which will remain in effect until revised, must accompany any new application to establish a container station after the effective date of this document.

These fees are necessary because a Federal agency is required to charge appropriate fees to recover the costs of services provided by that agency.

EFFECTIVE DATE: April 8, 1983.

FOR FURTHER INFORMATION CONTACT: John Holl, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5354).

SUPPLEMENTARY INFORMATION:

Background

Under 31 U.S.C. 9701, a Federal agency is required to charge appropriate fees to recover the costs of services provided by that agency. The fees must be fair and based on the costs to the Government, value to the recipient, public policy or interest served, and other pertinent facts.

Although imported merchandise ordinarily is subject to entry and the payment of duty at the time and place the merchandise arrives in the United States, entry and payment of duty may be postponed in certain circumstances. For example, merchandise may be removed from the place of arrival to a container station before entry and the payment of duty.

A container station is a secured area within the United States into which containers of merchandise may be moved for the purpose of opening the container and delivering the contents before any entry is filed or duty is paid. A container station is important because it serves as a central location at a port for processing containerized merchandise which otherwise could not be handled timely at the dock, wharf, pier, or bonded carrier's terminal. Sections 19.40 through 19.49, Customs Regulations (19 CFR 19.40-19.49), provide the procedure for the establishment and use of container stations.

Section 19.40, Customs Regulation (19 CFR 19.40), provides that a container station, independent of either the importing carrier or bonded carrier, may be established at any port or other area under the jurisdiction of a district director of Customs. To establish a container station, an application must be filed with, and approved by, the district director. However, even though the administrative costs to Customs to process the application are similar to an application to establish a bonded warehouse, no fee is presently required to accompany the application.

Before an application may be approved, Customs must—

(1) Determine that the application is in proper form;

(2) Survey the premise to determine that all physical requirements are met;

(3) Perform a background investigation of the applicant and the applicant's officers and employees;

(4) Prepare a report of that investigation; and

(5) Review the application, survey, and background investigation report and prepare a response to the applicant.

Proposed Rule

On July 10, 1980, a notice was published in the Federal Register (45 FR 46442 (proposing to amend §§ 19.2, 19.3, 19.40, and 24.12, Customs Regulations (19 CFR 19.2, 19.3, 19.40, 24.12)—

(1) To delete the reference in § 19.2(a) to the $80 fee required to accompany an application to establish a Customs bonded warehouse;

(2) To provide in § 19.3(a) for a fee to accompany an application to alter a Customs bonded warehouse;

(3) To provide in § 19.40 for a fee to accompany an application to establish a container station; and

(4) To provide in § 24.12(a) for publication of a general notice in the Federal Register and the Customs Bulletin on or about August 31 of each year which will establish the fees for the next fiscal year.

The notice indicated that the fee schedule will be based on the actual current costs to Customs of processing an application to establish or to alter a Customs bonded warehouse, or to establish a container station. These costs are related closely to Customs employees' salaries and, therefore, are subject to change annually.

Interested parties were given until September 8, 1980, to submit written comments regarding the proposal.

Discussion of Comments

One comment was received regarding the proposed changes. The commenter suggested that when a general notice setting the fees for services provided is published in the Federal Register, Customs provide for "the submission of comments on the fairness of the fees proposed to be charged and that such comments be given consideration before the final establishment of fees."

As indicated above, the fee schedule will be based on the actual current costs to Customs of processing an application to establish a container station. The costs are directly related to the salary of each Customs officer performing the service and, therefore, are subject to change annually. Therefore, Customs believes it is inappropriate to entertain comments on the fairness of the fees on an annual basis as this would merely result in additional administrative expenses and delay in processing the general notice. Of course, Customs will consider any suggestions received to improve upon the procedures established by this document, including the fee structure.

Other Changes

Upon its review, Customs has made changes in the proposed amendment. The notice proposed to amend the Customs Regulations to increase the fee that must accompany an application to establish a bonded warehouse, and to require a fee to accompany an application to alter an existing bonded warehouse or to establish a container station. However, this document pertains only to container stations. Fees relating to bonded warehouses were included in a separate document concerning changes in the supervision of those warehouses which was published in the Federal Register on November 1, 1982, as T.D. 82-204 (47 FR 49355). Therefore, only § 19.40 is amended by the document. It is noted that this section was amended by T.D. 82-135, published in the Federal Register on July 27, 1982 (47 FR 32414), to provide that bonded carriers may transport

containerized cargo in-bond to container stations at ports of destination.

The notice advised that a general notice would be published in the **Federal Register** and Customs Bulletin on or about August 31 of each year which would establish the fee for the next fiscal year.

This document amends the Customs Regulations to authorize Customs to implement a fee schedule to establish a container station. It provides that a general notice shall be published in the **Federal Register** and Customs Bulletin setting forth a fee schedule to be revised periodically to reflect increased costs to establish a container station. It also requires that a fee of $852.00 must accompany any new application to establish a container station after the effective date of this document. This fee will remain in effect until revised.

Explanation

Customs has determined that the service to establish a container station is provided by the following Customs officers:

1. Clerk in the fifth step of a GS–5;
2. Inspector in the fifth step of a GS–11 (performing physical security);
3. Agent in the fifth step of a GS–12 (performing the investigation);
4. Administrator in the fifth step of a GS–13.

The fee charged for the service would be based upon the amount of time the service requires of each of the above Customs officers and equal the sum of individual charges plus a charge for mileage incurred by the applicable Customs officer in using a vehicle to visit the premises to perform his respective task. The average mileage associated with performing the necessary tasks is 60 miles. Currently, mileage costs are reimbursed at 20 cents per mile.

The (1) estimated length of time reflected in the fee schedule required by each of the above Customs officers to perform his or her respective service; (2) the adjusted hourly rate of pay utilized which is 137 percent of the hourly rate of pay of the respective Customs officer; (3) the charge of each respective service based on the hourly rate of pay of each Customs officer performing his or her respective service; and (4) the total fee for the service rendered rounded off to the nearest dollar follow:

FEE TO ESTABLISH A CONTAINER STATION

Customs officer	Time in hours	Adjusted hourly rate	Individual charge
1. Clerk	8	$9.36	$49.90
2. Inspector	14	18.29	256.92

FEE TO ESTABLISH A CONTAINER STATION—Continued

Customs officer	Time in hours	Adjusted hourly rate	Individual charge
3. Agent	22	21.92	482.24
4. Administrator	8	28.07	52.14

Therefore, the total fee to establish a container station is $852.00 ($840.00 for Customs officers fee plus $12.00 for mileage).

Section 24.17(d), Customs Regulations (19 CFR 24.17(d)), provides the computation for regular compensation for reimbursable charges. The charge shall be computed at a rate per hour equal to 137 percent of the hourly rate of regular pay of the particular employee. The ratio of the annual number of working hours charged to Customs appropriation to the net number of annual working days is 137 percent.

Inapplicability of Regulatory Flexibility Act

This document is not subject to the provisions of sections 603 and 604 of Title 5, United States Code, relating to the Regulatory Flexibility Act, because it was the subject of a notice of proposed rulemaking published in the **Federal Register** before January 1, 1981, the effective date of the Act.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Drafting Information

The principal author of this document was Charles D. Ressin, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Customs duties and inspection, Imports, Freight, Container stations.

Amendment to the Customs Regulations

Part 19, Customs Regulations (19 CFR 19), is amended as set forth below.

Alfred R. De Angelus,

Acting Commissioner of Customs.

Approved: February 17, 1983.

John M. Walker, Jr.,

Assistant Secretary of the Treasury.

PART 19—CUSTOMS WAREHOUSES, CONTAINER STATIONS AND CONTROL OF MERCHANDISE THEREIN

Section 19.40, Customs Regulations (19 CFR 19.40), is amended by designating the existing text as paragraph (a), revising the introductory text of newly designated paragraph (a), and adding a new paragraph (b) after the bond format to read as follows:

§ 19.40 Establishment of container stations.

(a) A container station, independent of either the importing carrier or bonded carrier, may be established at any port or portion of a port, or any other area under the jurisdiction of a district director upon the filing of an application therefor, accompanied by the fee required by paragraph (b) of this section, and its approval by the district director. The applicant also must post a bond in the following format in the sum of $25,000 or such larger amount as the district director shall determine:

* * * * *

(b)(1) Customs shall charge a fee to establish a container station, and publish a general notice in the **Federal Register** and Customs Bulletin setting forth a fee schedule, to be revised periodically to reflect increased costs, to establish the container station. The published revised fee schedule shall remain in effect until changed.

(2) The fee, rounded off to the nearest dollar, shall be calculated in accordance with section 24.17(d) of this chapter. The fee shall be based upon the amount of time the average service requires of the Customs officers performing the service.

(R. S. 251, as amended (19 U.S.C. 66), section 624, 46 Stat. 759 (19 U.S.C. 1624); 96 Stat. 1051 (31 U.S.C. 9701))

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 70

[DoD Directive 1332.28]

Discharge Review Board (DRB) Procedures and Standards

AGENCY: Office of the Secretary, DoD.

ACTION: Amendment of final rule.

SUMMARY: This amendment corrects Part 70 to correspond with the new application form for review of discharge, DD Form 293, which was revised and issued after the effective date of this Part. This amendment clarifies the DRBs' decisional principles, how records of proceedings are to be stored and revises the information required in the statistical report submitted semiannually by the DRBs. These amendments will correct and clarify discharge proceedings and reporting requirements.

EFFECTIVE DATE: November 3, 1982.

FOR FURTHER INFORMATION CONTACT: Colonel Thomas Cuthbert, USA, Office of the Deputy Assistant Secretary of Defense (Military Personnel and Force Management), Washington, D.C. 20301, telephone 202–697–3387.

SUPPLEMENTARY INFORMATION: In FR Doc. 82–23283, appearing in the Federal Register on August 26, 1982 (47 FR 37770) this part was revised and reissued as part of the Settlement Agreement in *Urban Law Institute of Antioch College, Inc.* v. *Secretary of Defense*, Civ. No. 76–0503 (D.D.C.) (Stipulation of Dismissal, Jan 31, 1977) (Order and Settlement Agreement, July 30, 1982). The Supplementary Information accompanying the final rule described the changes that were made in the proposed rule in response to public comments and final formulation of the rule.

This amendment ensures that Part 70 corresponds with the new application form for review of discharge, DD Form 293, which was issued after the effective date of this Part. In addition, this amendment clarifies the DRBs' application of a specific decisional principle and storage of the record of proceedings. Finally, this amendment revises the information required in the statistical report submitted semiannually by the DRBs.

List of Subjects in 32 CFR Part 70

Military personnel, Discharge review boards, Administrative practice and procedures.

Accordingly, 32 CFR, Chapter 1, Part 70, is amended as follows:

PART 70—DISCHARGE REVIEW BOARD (DRB) PROCEDURES AND STANDARDS

1. Section 70.8 is amended by revising paragraph (a)(3)(i), (ii), and (iii) reading as follows:

§ 70.8 [Amended]

* * * * *

(a) * * *

(3) * * *

(i) *Character of discharge.* Block 7 of DD Form 293 provides an applicant an opportunity to request a specific change in character of discharge (for example, General Discharge to Honorable Discharge; Other than Honorable Discharge to General or Honorable Discharge). A person separated on or after 1 October 1982 while in an entry level status may request a change from Other than Honorable Discharge to Entry Level Separation. A request for review from an applicant who does not have an Honorable Discharge shall be treated as a request for a change to an Honorable Discharge unless the applicant requests a specific change to another character of discharge.

(ii) *Reason for discharge.* Block 7 of DD Form 293 provides an applicant an opportunity to request a specific change in the reason for discharge. If an applicant does not request a specific change in the reason for discharge, the DRB shall presume that the request for review does not involve a request for change in the reason for discharge. Under its responsibility to examine the propriety and equity of an applicant's discharge, the DRB shall change the reason for discharge if such a change is warranted.

(iii) The applicant must ensure that issues submitted to the DRB are consistent with the request for change in discharge set forth in block 7 of the DD Form 293. If an ambiguity is created by a difference between an applicant's issue and the request in block 7, the DRB shall respond to the issue in the context of the action requested in block 7. In the case of a hearing, the DRB shall attempt to resolve the ambiguity under paragraph (a)(5) of this section.

* * * * *

2. Section 70.8 is amended by revising paragraph (e)(3)(ii)(B)(*2*) and (e)(6)(ii)(B)(*2*) to read as follows:

§ 70.8 [Amended]

* * * * *

(e) * * *

(3) * * *

(ii) * * *

(B) * * *

(*2*) If a finding of fact is made after consideration of contradictory evidence in the record (including information cited by the applicant or otherwise identified by members of the DRB), the decisional document shall set forth the conflicting evidence and explain why the information relied upon was more persuasive than the information that was rejected. If the presumption of regularity is cited as the basis for rejecting such information, the decisional document shall set forth the basis for relying on the presumption of regularity and explain why the contradictory evidence was insufficient to overcome the presumption. In an appropriate case, the explanation as to why the contradictory evidence was insufficient to overcome the presumption of regularity may consist of a statement that the applicant failed to provide sufficient corroborating evidence, or that the DRB did not find the applicant's testimony to be sufficiently credible to overcome the presumption.

* * * * *

(6) * * *

(ii) * * *

(B) * * *

(*2*) If a finding of fact is made after consideration of contradictory evidence in the record (including information cited by the applicant or otherwise identified by members of the DRB), the decisional document shall set forth the conflicting evidence and explain why the information relied upon was more persuasive than the information that was rejected. If the presumption of regularity is cited as the basis for rejecting such information, the decisional document shall set forth the basis for relying on the presumption of regularity and explain why the contradictory evidence was insufficient to overcome the presumption. In an appropriate case, the explanation as to why the contradictory evidence was insufficient to overcome the presumption of regularity may consist of a statement that the applicant failed to provide sufficient corroborating evidence, or that the DRB did not find the applicant's testimony to be

sufficiently credible to overcome the presumption.

* * * * *

3. Section 70.8 is amended by revising paragraph (k) reading as follows:

§ 70.8 [Amended]

* * * * *

(k) *Final Disposition of the Record of Proceedings.* The original record of proceedings and all appendices thereto shall in all cases be incorporated in the Military Service record of the applicant and the Military Service record shall be returned to the custody of the appropriate records holding facility. If a portion of the original record of the proceedings cannot be stored with the Military Service record, the Military Service record shall contain a notation as to the place where the record is stored. Other copies shall be filed and disposed of in accordance with appropriate Military Service regulations.

4. Section 70.10 is amended by revising paragraph (d)(4)(v)(B)(*2*) and (C)(*3*) to read:

§ 70.10 [Amended]

* * * * *

(d) * * *
(4) * * *
(v) * * *
(B) * * *

(*2*) notifying the applicant and counsel, if any, of the opportunity to obtain a priority review using the letter providing at attachment 6. * * *

(C) * * *

(*3*) If a decisional document concerning an initial record review under Pub. L. 95–126 is otherwise defective and corrective action is taken after a request by the applicant for a priority review in response to the letter at attachment 6, the new decisional document shall address all issues previously raised by the applicant during the SDRP.

* * * * *

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications under the International Regulations for Preventing Collisions at Sea, 1972, (72 COLREGS) to reflect that the Secretary of the Navy has determined that USS HAYLER (DD 997) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special function as a destroyer. The intended effect of this rule is to warn mariners in waters where the 72 COLREGS apply.

EFFECTIVE DATE: March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Captain Richard J. McCarthy, JAGC, USN, Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332. Telephone Number: (202) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in Executive Order 11964 and 33 U.S.C. 1605, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USS HAYLER (DD 997) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: 72 COLREGS Annex I, Section 3(a) pertaining to the placement of the forward masthead light in the forward quarter of the ship; 72 COLREGS Annex I, Section 3(a) pertaining to the placement of the after masthead light and the horizontal distance between the forward and after masthead lights, without interfering with its special function as a naval ship. The Secretary of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements. Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary and contrary to the public interest since it is based on technical findings that the placement of lights on this ship in a manner differently from that prescribed herein will adversely affect the ship's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (Water), Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR Part 706 is amended as follows:

§ 706.2 [Amended]

1. Table Five of § 706.2 is amended by adding the following naval ship to the list of vessels therein to indicate the certifications issued by the Secretary of the Navy.

TABLE 5

Vessel	Number	Forward masthead light not required; height above hull. Annex I, Section 2(a)(i), (c), (d).	Aft masthead light less than 4.5 meters above forward masthead light. Annex I, Section 2(a)(ii).	Masthead lights not over all other lights and obstructions. Annex I, Section 2(f).	Vertical separation of masthead lights used when towing less than required by Annex I, Section 2(a)(i).	Aft masthead lights not visible over forward light 1/000 meters ahead of ship in all normal degrees of trim. Annex I, Section 2(b).	Forward masthead light not in forward quarter of ship. Annex I, Section 3(a).	After masthead light not less than ½ ship's length aft of forward masthead light, Annex I, Section 3(a).	Percentage horizontal separation attained.
USS Hayler	DD 997						X	X	48.4.

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) to reflect that the Secretary of the Navy: (1) Has determined that USS ALBUQUERQUE (SSN 706) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special function as a naval submarine; and (2) has found that USS ALBUQUERQUE (SSN 706) is a member of the SSN 688 class of ships, exemptions for which have previously been granted under 72 COLREGS, Rule 38. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Captain Richard J. McCarthy, JAGC, USN, Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332. Telephone Number: (202) 325-9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605 and Executive Order 11964, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USS ALBUQUERQUE (SSN 706) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Rule 21(c) requiring that the sternlight show an unbroken light over an arc of the horizon of 135 degrees and so fixed as to show the light 67.5 degrees from right aft on each side of the vessel; Annex I, Section 2(a)(i) pertaining to the height of the masthead light; 72 COLREGS, Annex I, Section 2(k) pertaining to the height and relative positions of the anchor lights; 72 COLREGS, Annex I, Section 3(b) pertaining to the location of the sidelights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the ship. The Secretary of the Navy has also certified that the above-mentioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements. Notice is also provided to the effect that USS ALBUQUERQUE (SSN 706) is a member of the SSN 688 class of ships for which certain exemptions, pursuant to 72 COLREGS, Rule 38, have been previously authorized by the Secretary of the Navy. The exemptions pertaining to that class, found in the existing tables of section 706.3 are equally applicable to USS ALBUQUERQUE (SSN 706). Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary and contrary to public interest since it is based on technical findings that the placement of lights on this ship in a manner differently from that prescribed herein will adversely affect the ships's ability to perform its military function.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (Water), Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR Part 706 is amended as follows:

§ 706.2 [Amended]

1. Table Three of § 706.2 is amended to indicate certifications issued by the Secretary of the Navy by inserting the following entry:

Vessel	Number	Masthead light, arc of visibility; Rule 21(a).	Sidelights, arc of visibility; Rule 21(b).	Stern light, arc of visibility; Rule 21 (c).	Sidelights, distance inboard of ship's sides in meters; section 3(b), Annex I.	Stern light, distance forward of stern in meters; Rule 21 (c).	Forward Anchor light, height above hull in meters; section 2(k), Annex I.	Anchor lights, relationship of aft light to forward light in meters; section 2(k), Annex I.
•	•	•	•	•	•	•	•	
USS Albuquerque	SSN-706		114°		4.2	6.1	3.5	1.7 below.

§ 706.2 [Amended]

2. Table One of §706.2 is amended to indicate certifications issued by the Secretary of the Navy by insertion of the following entry:

Vessels	Number	Distance in meters of forward masthead light below minimum required height, Section 2(a)(i) Annex I
•	•	•
USS Albuquerque	SSN 706	3.5

BILLING CODE 3810-AE-M

32 CFR Part 770

Rules Limiting Public Access to Particular Installations—Base Entry Regulations for Puget Sound Naval Shipyard, Bremerton, Washington

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is adding Subpart F to 32 CFR Part 770 in order to set forth regulations governing entry upon Puget Sound Naval Shipyard, Bremerton, Washington. It is intended that these regulations will apprise members of the public of the rules governing access to Puget Sound Naval Shipyard, Bremerton, Washington.

EFFECTIVE DATE: February 24, 1983.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Steven L. Seaton, JAGC, U.S. Navy (Code 107), Puget Sound Naval Shipyard, Bremerton, Washington 98314. Telephone: (206) 476–2120.

SUPPLEMENTARY INFORMATION: Pursuant to the authority cited below, the Commander, Puget Sound Naval Shipyard, Bremerton, Washington, on February 18, 1983, adopted entry regulations entitled "Shipyard Entry Policy" (NAVSHIPYDPUGETINST 5510.38). These regulations were subsequently amended on February 24, 1983. Puget Sound Naval Shipyard is a major naval ship repair facility, with operational requirements to complete repairs and overhaul of conventionally powered and nuclear powered naval vessels. It is vital to national defense that the operation and use of the shipyard be continued without undue or unnecessary interruptions. Additionally, most of Puget Sound Naval Shipyard is dedicated to heavy industrial activity where potentially hazardous conditions exist. It is vital to the national defense that the operation of the shipyard contipue without undue interruption. Accordingly, these regulations limit entry upon Puget Sound Naval Shipyard to authorized personnel and those persons who have obtained advance consent pursuant to these regulations. It has been determined, in accordance with the public rulemaking provisions of 32 CFR Parts 295 and 701, that publication of these regulations for public comment prior to adoption would be impracticable, unnecessary, and contrary to the public interest since the nature and national importance of Puget Sound Naval Shipyard mandate the immediate and uninterrupted effectiveness of these regulations.

List of Subjects in 32 CFR Part 770

Federal buildings and facilities, National defense, Restricted access areas, Security measures.

Accordingly, 32 CFR Part 770 is amended by adding a new Subpart F as follows:

PART 770—[AMENDED]

Subpart F—Base Entry Regulations for Puget Sound Naval Shipyard, Bremerton, Washington

Sec.

770.47 Purpose.
770.48 Definition.
770.49 Background.
770.50 Entry restrictions.
770.51 Entry procedures.
770.52 Violations.

Authority: 50 U.S.C. 797; DoD Directive 5200.8 of July 29, 1980; SECNAVINST 5511.36 of December 30, 1980; OPNAVINST 5510.45B of April 18, 1971; 5 U.S.C. 301; 10 U.S.C. 6011; 32 CFR 700.702; 32 CFR 700.714.

Subpart F—Base Entry Regulations for Puget Sound Naval Shipyard, Bremerton, Washington

§ 770.47 Purpose.

The purpose of this subpart is to promulgate policy governing entry upon Puget Sound Naval Shipyard.

§ 770.48 Definition.

For the purpose of this subpart, Puget Sound Naval Shipyard is defined as follows:

(a) Beginning at a point, latitude 122°39′37″W, longitude 47°33′05″N, a point on the MHHW line of Sinclair Inlet on an East-West line approximately 100 yards clear off the Southerly end of the Naval Shipyard shoreline, piers or drydock facilities; thence Northeasterly to the South margin of Primary State Highway No. 21, thence Northeasterly on the Southeasterly margin of Primary State Highway No. 21 to the Easterly margin of Cambrian Avenue; thence Northerly to the Southerly margin of Farragut Street; thence Easterly to the line common to Sections 22 and 23, Township 24 North, Range 1 East, W.M. which is approximately 100 feet East of the East margin of Montgomery Street; thence Northerly to the corner common to Sections 14, 15, 22, and 23, Township 24 North, Range 1 East, W.M., which is the South margin of First Street; thence Easterly on the line common to Sections 14 and 23 to the Easterly margin of Chester Avenue; thence Northerly approximately 335 feet on the Easterly margin of Chester Avenue to the Southerly margin of the East-West alley in Block 21, Original Town of Bremerton as recorded in Volume 2 of Plats, page 30, Records of Kitsap County, Washington; thence Easterly to the Easterly margin of Warren Avenue; thence Northerly to the Southerly margin of Burwell Avenue; thence Easterly approximately 1315 feet to a point approximately 90 feet West of the West margin of Pacific Avenue, to the line common to Lots 22 and 23, Block 13, said Original Town of Bremerton; thence Southerly to the Northerly margin of the East-West alley in said Block 13; thence Easterly to the Northerly extension of the Westerly margin of the North-South alley in Block 12, said Original Town of Bremerton; thence Southerly to the Southerly margin of First Street; thence Easterly to the Westerly margin of First Street; thence Easterly to the Westerly margin of the North-South alley in Block 10, said Original Town of Bremerton; thence Southerly to the Northwesterly margin of Washington Avenue; thence Southeasterly to the Northwesterly corner of Lot 9, Block 1, said Original Town of Bremerton; thence Southeasterly on the line common to Lots 8 and 9, Block 1, and its Southeasterly extension to a point near the Washington State Ferry Terminal at the MHHW line of Sinclair Inlet located at Latitude 122°37′27″W, longitude 47°33′44″N.

§ 770.49 Background.

(a) Puget Sound Naval Shipyard is a major naval ship repair facility, with operational requirements to complete repairs and overhaul of conventionally powered and nuclear powered naval vessels. It is vital to national defense that the operation and use of the shipyard be continued without undue or unnecessary interruptions. Additionally, most of Puget Sound Naval Shipyard is dedicated to heavy industrial activity where potentially hazardous conditions exist.

(b) For prevention of the interruption of the stated use of Puget Sound Naval Shipyard by the presence of any unauthorized person within the boundaries of Puget Sound Naval Shipyard and prevention of injury to any such unsupervised person as a consequence to the hazardous conditions which exist, as well as for other reasons, it is essential to restrict entry upon Puget Sound Naval Shipyard to authorized persons only.

§ 770.50 Entry restrictions.

Except for military personnel and

civilian employees of the United States in the performance of their official duties, entry upon Puget Sound Naval Shipyard, or remaining thereon by any person whoever for any purpose without the advance consent of the Commander, Puget Sound Naval Shipyard, or his authorized representative, is prohibited. *See* 18 U.S.C. 1382; the Internal Security Act of 1950, Section 21 (50 U.S.C. 797); Chief of Naval Operations Instruction 5510.45B of April 19, 1971; Secretary of the Navy Instruction 551.36 of December 20, 1980; and Department of Defense Directive 5200.8 of July 29, 1980.

§ 770.51 Entry procedures.

(a) Any person or group of persons desiring the advance consent of the Commander, Puget Sound Naval Shipyard, or his authorized representative, shall, in writing, submit a request to the Commander, Puget Sound Naval Shipyard, at the following address: Commander, Puget Sound Naval Shipyard, Bremerton, Washington 98314.

(b) Each request for entry will be considered on an individual basis weighing the operational, security and safety requirements of Puget Sound Naval Shipyard with the purpose, size of party, duration of visit, destination, and military resources which would be required by the granting of this request.

§ 770.52 Violations.

(a) Any person entering or remaining on Puget Sound Naval Shipyard, without the consent of the Commander, Puget Sound Naval Shipyard, or his authorized representative, shall be subject to the penalties prescribed by 18 U.S.C. 1382, which provides in pertinent part: "Whoever, within the jurisdiction of the United States, goes upon any military, naval * * * reservation, post, fort, arsenal, yard, station or installation, for any purpose prohibited by law or lawful regulation * * * shall be fined not more than $500.00 or imprisoned not more than six months or both."

(b) Moreover, any person who willfully violates this subpart is subject to a fine not to exceed $5000.00 or imprisonment for not more than one (1) year or both as provided in 50 U.S.C. 797.

Dated: March 4, 1983.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.

[FR Doc. 83-6008 Filed 3-8-83; 8:45 am]

BILLING CODE 3810-AE-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-4-FRL-2279-7; AL-004]

Approval and Promulgation of Implementation Plans; Alabama: New Source Review for Nonattainment Areas

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA is conditionally approving implementation plan revisions submitted by Alabama on March 31, 1981, to satisfy changes made by EPA in 40 CFR 51.18(j). The changes relate to new source review requirements for sources in or near nonattainment areas. Alabama has revised definitions and added definitions, as well as eliminated requirements in order to make their rules consistent with EPA's rules.

DATE: This action is effective April 8, 1983.

Material needed to satisfy the condition attached to the approval must be submitted by March 9, 1984.

ADDRESSES: Copies of the materials submitted by Alabama may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Steet, SW., Washington, D.C. 20460;

Library, Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C. 20005;

Air Management Branch, EPA Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30365;

Air Program, Alabama Department of Environmental Management, State Capitol, Montgomery, Alabama 36130.

FOR FURTHER INFORMATION CONTACT: Archie Lee of the Region IV Air Planning Section at 404/881-3286 (FTS 257-3286)

SUPPLEMENTARY INFORMATION: On July 15, 1982 (47 FR 30798), EPA proposed approval of the regulation changes made by the Alabama Air Pollution Control Commission (now the Air Program of the Alabama Department of Environmental Management) to meet the requirements of 40 CFR 51.18(j), as promulgated on August 7, 1980 (45 FR 52743 ff.), for new source review in nonattainment areas. The revisions include definitions of "source," "potential to emit," "major source," "major modification" and other terms which have been changed to make them consistent with EPA's definitions. In addition several definitions have been added, including "net emissions increase," "significant," "actual emissions," and "commenced." Alabama has deleted certain requirements from its regulations that EPA deleted from the Interpretative Ruling. These requirements related to sources constructing or modifying in increments; applicability determinations based on increase in allowable emissions by specific hourly, daily, our annual amounts; disallowing of credit for emission reduction elsewhere in a facility; and other similar requirements. Finally, exemptions for sources obtaining permits prior to certain dates have been included.

Alabama's revised SIP does not contain provisions on federal enforceability or limiting offset credits for source shutdowns to replacement units only. On February 22, 1982, EPA signed a settlement agreement in which it agreed to propose to delete these requirements from its Interpretative Ruling *Chemical Manufacturers Ass'n* v. *EPA*, No. 79-1112 (9th Cir.). The Agency expects to publish this proposal within the next few months. Therefore, EPA is not requiring Alabama to include these requirements in its SIP at this time. However, EPA is conditioning its approval of the Alabama SIP on the state's commitment to add the requirements to its regulations if EPA does not withdraw them within one year. Alternatively, Alabama may ask the Administrator to extend the deadline for meeting this condition.

No comments were received on EPA's proposal of July 15, 1982 on the Alabama revisions.

Action. EPA is today conditionally approving these changes in the Alabama plan based on the State's submitting the necessary conforming amendments by March 9, 1984. These amendments will require that new source permits are federally enforceable and that offset credits for source shutdowns are limited to replacement units only. During the interim the State has committed to implement its Part D new source review regulations, in a manner consistent with current EPA requirements.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA and any

response are available for public inspection at the EPA Region IV office (see address above).

Incorporation by reference of the Alabama State implementation Plan was approved by the Director of the Federal Register on July 1, 1982.

List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

(Secs. 110 and 172 of the Clean Air Act (42 U.S.C. 7410 and 7502))

Dated: February 25, 1983.

Anne M. Burford,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart B—Alabama

1. In § 52.50, paragraph is amended by adding (c)(37) as follows:

§ 52.50 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified. * * *

(37) Provisions for new source review in nonattainment areas (changes in Chapter 10 of the regulations), submitted on March 31, 1981, by the Alabama Air Pollution Control Commission.

2. A new § 52.56 is added as follows:

§ 52.56 Review of new sources and modifications.

Part D conditional approval. The plan's provisions for review of new sources and modifications in nonattainment areas are approved on condition that the State submit any necessary corrections by March 9, 1984 and, during the interim, implement these regulations in a manner consistent with EPA requirements.

[FR Doc. 83-6041 Filed 3-8-83; 8:45 am]

BILLING CODE 6560-50-M

---

40 CFR Part 52

[A-5-FRL 2276-3]

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: EPA announces final rulemaking on a revision to the Total Suspended Particulates (TSP) portion of the Wisconsin State Implementation Plan (SIP). The SIP revision consists of Wisconsin Administrative Code (WAC) Section NR 154.11, Control of Particulate Emissions, as amended on June 10, 1981, and published in final form in the Wisconsin Register 308 in August, 1981. The State submitted this revision to EPA pursuant to the requirements of Part D of the Clean Air Act (Act). A notice of proposed rulemaking on this revision appeared in the June 1, 1982 (47 FR 23778) **Federal Register**. The June 1, 1982, **Federal Register** described the background and nature of the SIP revision, discussed the provisions which EPA determined do not comply with the requirements of the Act and requested comments from the State and public on EPA's proposed rulemaking action and the State's plan to control TSP emissions. Subsequent to publication of the notice of proposed rulemaking, the State of Wisconsin submitted additional information for inclusion in its SIP. This information is intended to satisfy, in part, the deficiencies noted in EPA's notice of proposed rulemaking.

Based on the State's response, EPA is today disapproving one provision of Wisconsin's submittal, contained in NR 154.11, relating to the control of TSP emissions from coke batteries. EPA is approving the remaining provisions of Wisconsin's submittal as a revision to its SIP. Wisconsin has failed to submit a plan for attainment of the TSP National Ambient Air Quality Standards (NAAQS) in Columbia, Brown, Dane, Douglas, Kenosha, Manitowoc, Marathon, Racine, Winnebago, and Wood Counties.

DATE: The final rulemaking becomes effective on April 18, 1983.

ADDRESSES: Copies of the revision to the Wisconsin SIP and other materials relating to this rulemaking are available for inspection at the following addresses:

The Office of the Federal Register, 1101 L Street, NW., Room 8401, Washington, D.C. 20408

Environmental Protection Agency, Region V, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Wisconsin Department of Natural Resources, Bureau of Air Management, 101 South Webster, Madison, Wisconsin 53707

FOR FURTHER INFORMATION CONTACT: Sharon Reinders (312) 886-6034

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978 (43 FR 8962), pursuant to the requirements of Section 107 of the Act, EPA designated portions of the following counties in the State of Wisconsin as nonattainment for the primary TSP standard and other portions as nonattainment for the secondary TSP standard: Columbia County, Milwaukee County, Rock County, and Waukesha County. Additionally, EPA also designated the following counties or portions thereof as nonattainment for the secondary TSP standard: Brown County, Dane County, Douglas County, Kenosha County, LaCrosse County, Manitowoc County, Marathon County, Racine County, Winnebago County, and Wood County. (For the specific nonattainment areas of each county see 40 CFR 81.350). LaCrosse County was redesignated as attainment for TSP on August 14, 1981 (46 FR 41056).

Part D of the Act requires each state to revise its SIP to meet specific requirements for the areas designated as nonattainment. These SIP revisions must demonstrate attainment of the primary TSP NAAQS as expeditiously as practicable, but no later than December 31, 1982, and attainment of the secondary TSP NAAQS as expeditiously as practicable. If attainment of the NAAQS cannot be demonstrated for an area designated as nonattainment for TSP by the required date, an acceptable alternative SIP for that area must include provisions for applying reasonably available control technology (RACT) to traditional sources of particulate emissions and studying the nature and extent of the nontraditional particulate sources in the area. This study would then be used in designing a control strategy for such sources. The requirements for an approvable SIP are further described in a **Federal Register** notice published April 4, 1979 (44 FR 20372). Supplements to the April 4, 1979, notice were published on July 2, 1979 (44 FR 38583), August 28, 1979 (44 FR 50371), September 17, 1979 (44 FR 53761), and November 23, 1979 (44 FR 67182).

Summary of Wisconsin's Actions

In response to the requirements of Part D of the Act, the State of Wisconsin submitted revisions to its TSP SIP to EPA on November 27, 1979, and May 1, 1980. The revisions consisted of amendments to NR 154.11, Control of Particulate Emissions, applying RACT to control TSP emissions from process and fuel burning installation sources and fugitive dust. EPA proposed rulemaking action to conditionally approve

Wisconsin's TSP SIP, in the Federal Register on April 4, 1980 (45 FR 22982) and July 3, 1980 (45 FR 45318). However, on November 6, 1980, the Director of the Bureau of Air Management of the Wisconsin Department of Natural Resources (DNR) withdrew several amendments to the TSP plan. The following regulations were withdrawn: NR 154.11(2)(b), (3)(c) and (e), and (4)(c), (e) and (f). On April 9, 1981, EPA notified the public of this withdrawal in the Federal Register at 46 FR 21165.

On June 10, 1981, the Wisconsin DNR again submitted revisions to the Wisconsin TSP SIP. The submittal included amendments to NR 154.11 which were previously withdrawn, as well as additional revisions. NR 154.11 is divided into the following major sections: (1) General Limitations, (2) Fugitive Dust, (3) Particulate Emission Limits for Processes, (4) Particulate Emission Limits for Fuel Burning Installations, (5) Particulate Emission Limits for Incinerators, (6) Visible Emissions and (7) RACT Requirements for Coking Operations. Amended NR 154.11 was published in final form in the Wisconsin Register 308 in August 1981. The regulations were effective in Wisconsin as of September 1, 1981.[1]

In a rulemaking action on June 1, 1982, at 47 FR 23778, EPA reproposed conditional approval of NR 154.11, as submitted to EPA on November 27, 1979, and amended on June 10, 1981. Additionally, EPA withdrew the April 4, 1980 (45 FR 22982) proposed rulemaking (inadvertently printed as April 9, 1981, 46 FR 21165) and the July 3, 1980 (45 FR 45318) proposed rulemaking as they relate to NR 154.11.

In the June 1, 1982, notice of rulemaking action, EPA discussed several deficient areas of Wisconsin's proposed SIP revision. Specifically, deficiencies were noted in the areas of:

- lack of nontraditional fugitive dust studies;
- lack of a list of sources subject to the RACT control requirements contained in NR 154.11;
- opacity reading procedures;
- criteria and evaluation procedures relating to fugitive dust emission control, rule NR 154.11(2);
- lack of RACT-level numerical visible emissions limitation for coke battery charging, rule NR 154.11(7); and,
- lack of a plan for attainment of the standards in the nonattainment areas in Columbia County and in the secondary nonattainment areas in Brown, Dane, Douglas, Kenosha, Manitowoc, Marathon, Racine, Winnebago, and Wood Counties.

On May 13, December 7, and December 29 1982, Wisconsin submitted additional information to EPA intended to satisfy, in part, the deficiencies noted above and a commitment to correct the remaining deficiencies. The information included studies of sources of nontraditional fugitive dust.

Wisconsin submitted a list of sources, located in the Milwaukee, Waukesha, and Rock County primary and secondary TSP nonattainment areas, which are subject to the RACT regulations contained in NR 154.11. This list is an integral part of the State's plan because TSP RACT emission limitations become applicable to a nonattainment area only when Wisconsin identifies it in a document issued under Section NR 154.03. EPA notes that this list is effective as of January 1980. Thus, final compliance with NR 154.11 is required no later than 33 months from this date. EPA finally approved and incorporates the listing into the Wisconsin SIP. Any subsequent modification of this list of affected facilities must be submitted to EPA for approval. Of course, Wisconsin's existing regulations continue to apply to those sources to which RACT regulations do not apply.

Wisconsin also submitted a list of sources subject to the RACT requirements contained in NR 154.11 and adequate information which satisfies EPA's concern about opacity reading and the criteria and evaluation procedures the State will use to enforce fugitive dust controls in NR 154.11(2). Finally, Wisconsin made a commitment to adopt a RACT-level numerical visible emission limitation for coke battery charging operations, Rule NR 154.11(7), and submit the revised rule to EPA as a SIP revision by December 31, 1983.

No public comments on EPA's proposed rulemaking action on the State's plan to control TSP emissions were received. Therefore, based on the State's response, EPA is taking final rulemaking action to approve the revisions to the TSP SIP for Wisconsin with the exception of NR 154.11(7)(b), which EPA is disapproving. EPA's disapproval is based on the determination that the SIP revision does not contain an enforceable RACT-level emission limitation for the source subject to Rule NR 154.11(7).

As a result of today's rulemaking action, EPA finds that the SIP revision for Rock and Waukesha Counties meets the requirements for a Part D TSP SIP. Therefore, the moratorium contained in Section 110(a)(2)(I) of the Act on the construction and modification of major stationary sources of TSP emissions is lifted in these areas. However, the moratorium remains in effect in the Milwaukee County TSP nonattainment area as a result of EPA's disapproval of Rule 154.11(7)(b) pertaining to the control of emissions from the coke batteries located in Milwaukee.

EPA is taking no action on Wisconsin's SIP to attain and maintain the TSP primary and secondary NAAQS in Columbia County and the TSP secondary NAAQS in Brown, Dane, Douglas, Kenosha, Manitowoc, Marathon, Racine, Winnebago, and Wood Counties because the State did not submit a plan for attainment and maintenance of the TSP NAAQS in these areas.

The existing federally-approved SIP regulations for any source will apply, and be fully enforceable, until the source complies with those new regulations which EPA is approving today. Further, the existing SIP will continue in force if there is any delay or lapse in the applicability of the new regulations. However, if (but only if) the existing and new regulations conflict, so that a source cannot comply with the existing SIP while moving toward compliance with the new regulations, the State may exempt the source from the existing SIP. EPA will review and act on any such exemption.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

Note.—Incorporation by reference of the State Implementation Plan for the State of Wisconsin was approved by the Director of the Federal Register on July 1, 1982.

(Secs. 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502))

[1] Wisconsin held public hearings on the technical support documents for the TSP SIP in Beloit on May 21, 1979, and January 8, 1980; and in Milwaukee on June 20, 1979, and January 22, 1980. Public hearings on NR 154.11 were held in Beloit, Milwaukee, and Wausau in February, 1978; in Superior, Green Bay, Madison, and Milwaukee in January, 1980; and, in Madison and Waukesha in October, 1980.

Dated: February 25, 1983.

Anne M. Burford,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS—WISCONSIN

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, Subpart YY—Wisconsin is amended as follows:

1. Section 52.2570 is amended by adding paragraph (c)(28) as follows:

§ 52.2570 Identification of plan.

* * * * *

(c) * * *

* * * * * *

(28) On November 27, 1979, the State of Wisconsin submitted implementation plan revision to satisfy the Part D, Title I of the Clean Air Act for attainment and maintenance of the national ambient air quality standards for particulate matter. The revision consists of NR 154.11, Wisconsin Administrative Code, Control of Particulate Matter. Amendments to the plan were submitted by the State on November 6, 1980, and June 10, 1981. Supplemental information and commitments were submitted on May 1, 1980, May 13, 1982, and December 7, 1982. No attainment plan was submitted for Columbia, Brown, Dane, Douglas, Kenosha, Manitowoc, Marathon, Racine, Winnebago, and Wood Counties.

* * * * *

2. Section 52.2577 is revised to read as follows:

§ 52.2577 Attainment dates for national standards.

The following table presents the latest dates by which the national standards are to be attained. The dates reflect the information presented in Wisconsin's plan, except where noted.

Air Quality Control Region	Pollutant						
	TSP		SO_2		NO_2	CO	O_3
	Primary	Secondary	Primary	Secondary			
Duluth (Minnesota)-Superior (Wisconsin Interstate (AQCR 129):							
a. Primary/Secondary nonattainment areas.	a	f	b	a	c	c	c
b. Remainder of AQCR	b	c	c	c	c	c	c
North Central Wisconsin Intrastate (AQCR 236):							
a. Primary/Secondary nonattainment areas.	b	f	d	c	c	c	d

Metropolitan Dubuque Interstate (AQCR 68):							
a. Primary/Secondary nonattainment areas.	a	a	c	c	c	c	c
b. Remainder of AQCR	b	c	c	c	c	c	g

a. July, 1975.
b. Air quality levels presently below primary standard or is unclassifiable.
c. Air quality levels presently below secondary standard or is unclassifiable.
d. December 31, 1982.
e. December 31, 1987.
f. 18-Month extension granted for plan submission and identification of attainment data.
g. No attainment plan was submitted.

Note.—Sources subject to the plan requirements and attainment dates established under Section 110(a)(2)(A) prior to the 1977 Clean Air Act Amendments remain obligated to comply with these requirements by the earlier deadlines. The earlier attainment dates are set out at 40 CFR 52.2577(1978).

For actual nonattainment designations refer to 40 CFR Part 81.

Dates or footnotes which are italicized are prescribed by the Administrator because the plan did not provide a specific date or the date provided was not acceptable.

(Secs. 110 and 172 of the Clean Air Act as amended 46 FR 25300, May 6, 1981)

3. Section 52.2584 is added as follows:

§ 52.2584 Control strategy; Particulate matter.

(a) Part D—Disapproval—USEPA disapproves Regulation NR 154.11(7)(b) of Wisconsin Administrative Code (RACT Requirements for Coking Operations), which is part of the control strategy to attain and maintain the standards for particulate matter, because it does not contain an enforceable RACT-level numerical visible emission limitation for charging operations.

40 CFR Part 180

[PP 2F2632/R496; PH-FRL 2317-5]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Acephate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the insecticide acephate and its metabolite in or on the raw agricultural commodities peanuts and peanut hulls. This regulation to establish maximum permissible levels for the combined residues of the pesticide in or on the commodities was requested, pursuant to a petition, by the Chevron Chemical Company.

EFFECTIVE DATE: Effective on March 9, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: William Miller, Product Manager (PM) 16, Registration Division (TS–767C); Office of Pesticide Programs, Environmental Protection Agency, Rm. 211, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2600).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of February 24, 1982 (47 FR 8089) which announced that Chevron Chemical Company, 940 Henley St., Richmond, CA 94804, had submitted pesticide petition 2F2632 proposing that 40 CFR 180.108 be amended by the establishment of tolerances for the combined residues of the insecticide acephate (*O,S*-dimethylacetyl-phosphoromidothioate) and its cholinesterase-inhibiting metabolite methamidophos (*O,S*-dimethyl phosphoromidothioate) in or on the raw agricultural commodities peanuts at 0.2 part per million (ppm) and peanut hulls at 5.0 ppm.

There were no comments received in response to the notice of filing.

The scientific data submitted in this petition and other relevant material have been evaluated. The toxicological data considered in support of the regulation included a 90-day rat feeding study with a no-observed-effect level (NOEL) of 5.0 ppm (0.25 mg/kg) based on the inhibition of cholinesterase activity in plasma, red blood cell (RBC), and brain; a 2-year dog feeding study with a NOEL of 30.0 ppm (0.75 mg/kg), based on the inhibition of plasma, RBC, and brain cholinesterase activity and a NOEL of 100.0 ppm (2.5 mg/kg) for systemic toxicity; a 28-month rat feeding/oncogenic study with a NOEL of 5.0 ppm (0.25 mg/kg), based on the inhibition of cholinesterase activity in plasma, RBC, and brain; a rabbit teratogenic study with a NOEL of 10.0 mg/kg (highest dose tested); a rat teratogenic study with a NOEL of 200.0 mg/kg (highest dose tested); and a supplemental acute delayed neuroctoxicity study with no effects observed (no leg paralysis) at the 375 mg/kg level.

In a recently conducted micronucleus test (mouse bone marrow), acephate did not display mutagenic activity. There are studies available, however, in which acephate did display such activity (gene mutations in microorganisms and DNA repair). Additional mutagenic studies have since been submitted and are currently under review by the Agency.

Desirable data that are currently lacking include (1) a mouse oncogenic study, (2) a rat reproduction study, and (3) a delayed neurotoxicity study.

Although there are significant data gaps for the chemical, the available toxicity data are adequate to support the tolerances because the use will result in an insignificant increase (0.24 percent) in the TMRC to the human diet. As stated in the **Federal Register** of May 11, 1979 (44 FR 27932), the Agency will generally consider as insignificant an increase in the TMRC of 1.0 percent or less. Furthermore, most peanuts are roasted before consumption and heat treatment such as roasting reduces or eliminates acephate residues in peanuts.

Based on the 28-month rat feeding/oncogenic study with a NOEL of 5.0 ppm (0.25 mg/kg) and using a safety factor of 10, the acceptable daily intake (ADI) for humans is 0.025 milligram (mg)/kilogram (kg) of body weight (bw)/day and the maximum permissible intake (MPI) is 1.500 mg/day for a 60-kg human.

The theoretical maximum residue contribution (TMRC) in the human diet from the regulation is 0.0011 mg/day/1.5 kg. This value represents a 0.24 percent increase in the existing TMRC. The existing tolerances and this regulation utilize a total of 30.43 percent of the ADI.

The established tolerances for the combined residues of acephate and its cholinerase-inhibiting metabolite, methamidophos in meat, milk, poultry, and eggs at 0.1 ppm are adequate to cover any secondary residues occurring in these commodities from the use of acephate on peanuts. The metabolism of the insecticide is adequately understood and an adequate analytical method, gas chromatography with a thermionic detector, is available for enforcement purposes. There are no regulatory actions pending against continued registration of the insecticide, and no other considerations are involved in establishing the tolerances.

The pesticide is considered useful for the purpose for which the tolerances are sought. Based on the above considerations, it is concluded that the establishment of the tolerances will protect the public health and are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedures, Raw agricultural commodities, Pesticides and pests.

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Chlorpyrifos

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for the combined residues of the insecticide chlorpyrifos and its metabolite in or on the raw agricultural commodity cranberries. This regulation to establish a maximum permissible level for residues of chlorpyrifos was requested, pursuant to a petition, by the

Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: Effective on March 9, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response Section, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of January 12, 1983 (48 FR 1320), that announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 2E2682 to the Agency proposing to amend 40 CFR 180.342 by establishing a tolerance for the combined residues of the insecticide chlorypriſos (*O-O*-diethyl-*O*-(3,5,6,-trichloro-2-pyridyl) phosphorothioate) and its metabolite 3,5,6-trichloro-2-pyridinol in or on the raw agricultural commodity cranberries at 1.0 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated and discussed in the notice of proposed rulemaking. The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560–50–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6362

[M 41581]

Montana; Revocation of Stock Driveway Withdrawal No. 227, Montana No. 13

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a Secretarial order which withdrew public lands for use as a stock driveway. This action will restore 2,722.28 acres to operation of the public land laws generally.

EFFECTIVE DATE: March 30, 1983.

FOR FURTHER INFORMATION CONTACT: Roland F. Lee, Montana State Office, 406–657–6291.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Secretarial Order dated March 24, 1932, which withdrew the following described lands for a stock driveway is hereby revoked:

Principal Meridian

T. 13 S., R.10 W.,

Sec. 15, W½;
Sec. 21, E½;
Sec. 22., W½;
Sec. 28, All;
Sec. 29, SE¼;
Sec. 31, lots 3, 4, E½SW¼, SE¼;
Sec. 32, All;

The area described contains 2,722.28 acres in Beaverhead County, Montana.

2. At 8 a.m. on March 30, 1983, the lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8 a.m. on March 30, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands have been and continue to be open to location under the mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

Garrey E. Carruthers,

Dated: February 22, 1983.

Assistant Secretary of the Interior.

BILLING CODE 4310–84–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[Docket No. 21502; RM–2737; FCC 83–10]

Subscription Television Service

AGENCY: Federal Communications Commission.

ACTION: Final rule; denial of petitions for partial reconsideration.

SUMMARY: By this action the Commission denies two petitions for partial reconsideration of the Third Report and Order in Docket No. 21502. Petitioners seek reversal of that part of the Third Report allowing subscription television decoder sales. The restriction prohibiting sales inhibited competition. Its removal will foster the development of subscription television, a relatively new communications outlet providing consumers with programming meeting their specific demands. The petitions for partial reconsideration were filed by Subscription Television Association and Wometco Home Theatre, Inc.

FOR FURTHER INFORMATION CONTACT: Freda Lippert Thyden, Mass Media Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

In the Matter of, Amendment of Part 73 of the Commission's Rules and Regulations In Regard to Section 73.642(a)(3) and Other Aspects of the Subscription Television Service; Docket No. 21502, RM–2737 Petitions for Partial Reconsideration; Memorandum Opinion and Order.

Adopted: January 13, 1983.

Released: March 3, 1983.

Introduction

1. The Commission has before it two petitions for partial reconsideration of its *Third Report and Order* (*"Third Report"*), 47 FR 30089, published July 12, 1982, in the captioned proceeding. Petitioners Subscription Television Association ("STVA") and Wometco Home Theatre, Inc. ("Wometco"), request reconsideration of that portion of the Commission's *Order* deleting Rule 73.642(f)(3) which prohibited the selling of subscription television ("STV") decoders to subscribers. Comments in response to the petitions were filed by Cox Communications, Inc. ("Cox"), and Channel 57 Corporation ("Channel 57") with STVA submitting further comments in reply to Channel 57's pleading.

2. The *Third Report* essentially deregulated the STV service.[1] In that document the Commission eliminated the rule restricting STV operation to communities within the Grade A contour of at least five commercial television stations, including that of the STV operator; deleted the requirement that an STV station broadcast at least 28 hours of conventional programming per week; abolished the requirement that an applicant for STV authorization ascertain the needs and interests of the community specifically with regard to subscription programming; and eliminated the rule permitting only the leasing of decoder equipment by subscribers. This action was taken because of the Commission's expectation that it would accelerate the utilization of unused channels, allow for additional specialized programming, provide financial support for small market stations, and offer a unique broadcast service that directly responds to consumer desires.

3. More specifically, our decision to rescind the "lease only" restriction on STV decoders was intended to benefit both the businessman and consumer. As noted by the Commission, decoder sales can provide working capital to establish securely subscription operations. Further, the elimination of the restriction gives the STV operator the ability to change business practices on demand, thus serving himself and his subscribers. Although some commenters opposed decoder sales because of the threat of increased signal piracy, the Commission was not convinced by this argument. Rather, it noted that individuals who seek to duplicate a decoder may purchase the components for such equipment from companies manufacturing and soliciting their sale as well as utilizing boxes that are sold or rented to others.

4. In its petition, STVA contends that: (1) The factual record does not support elimination of the "lease-only" rule; (2) elimination of the "lease-only" rule will lead to increased signal piracy; and (3) the sale of decoders anywhere will increase entry barriers to further STV development. According to STVA, 25 of the 26 STV operators now on the air in 22 markets serving 1.4 million subscribers oppose decoder sales. It submits that those commenters who generally favored equipment sales confined their comments to the issues of perceived consumer savings or operator cash flows.[2] As to the few who did address the piracy issue, petitioner submits that they failed to analyze the technical questions surrounding signal piracy.

5. STVA states that it is unaware of, and questions whether, any technology can be developed capable of making STV systems truly pirate-proof. It submits that even if such a technology could be developed, the 1.4 million decoders currently in use would require years to upgrade or replace at a considerable cost to STV operators. In the interim, petitioners asserts that decoders moving freely on the open market would make it virtually impossible to detect and prevent signal piracy.[3]

6. According to STVA, under the "lease-only" rule, any decoder found on the market that was not the property of an STV operator was presumed to be a pirate device marketed in violation of Sections 302 and 303 of the Communications Act. Petitioner asserts that permitting decorder sales would make it virtually impossible for STV operators to ferret out unauthorized pirate devices from those being lawfully offered for sale. STVA further alleges that pirate decoders may well gravitate toward other technologically compatible STV market systems where the only recourse against pirates is to move against individual viewers caught in the act of stealing the scrambled signal.

7. Petitioner asserts that when entertainment is stolen off the air, creative artists, programmers and distributors are denied fair compensation for their product efforts. This artificially skews the ratio of revenues to costs and forces these groups to charge more for their intellectual property. Ultimately, STVA believes the public thus will find STV and other pay television services priced beyond the financial reach of the ordinary household.[4]

8. In its petition for partial reconsideration, Wometco Home Theatre contends that the Commission failed to address the problems associated with decoder sales, including the subsequent inability of STV operators to control the resale of legally manufactured and acquired decoders. Wometco also alleges that decoder purchase creates a situation where subscribers who have legally acquired a decoder may stop paying for or cancel the subscription service without the STV operator being able to reclaim the privately owned decoder. Also, petitioner is not convinced that the addressable feature of newer decoders cannot solve this problem.[5] It further expressed concern, as did STVA, that the piracy problem would be compounded by the inevitable growth of STV operations on low power stations throughout the country.

---

[1] Briefly described, subscription television broadcasting involves the broadcasting of a television signal that subscribers are authorized to unscramble through use of a decoder on payment of a fee.

[2] Rather than selling decoders in order to increase operator cash flow, petitioner suggests that STV operators who are strapped for funds increase subscriber deposit and installation fees.

[3] To support its position, STVA submit an affidavit by John Thompson, developer of the SSAVI–I addressable decoder, stating that while it is not usually a trivial matter to defeat the addressability function of most modern decoders, it is not beyond the skills of an electronics engineer or technician. Until more sophisticated technology is implemented around the country, Mr. Thompson recommends that the "lease-only" rule be retained.

[4] In an affivadit attached to STVA's petition for reconsideration, Werner R. Koester, President of Oak Communications, Inc., attests that the widespread sale of pirate STV decoders has placed considerable strain on Oak's relationships with its entertainment program suppliers. Because program producers derive their income from license fees based on the total number of subscribers, petitioner asserts that potential subscribers lost to piracy means an effective revenue loss both to programmers as well as to the creative artists whose work is being distributed. Therefore, STVA maintains that signal piracy adds to the program supplier's cost of doing business and forces them to raise the price of their products tending to "price-out" substantial segments of the viewing public who cannot afford higher STV rates.

[5] In an affidavit submitted by Wometco, Alex MacDonald, petitioner's Vice President for Engineering, asserts that it is possible for a layman with access to common household tools and easy-to-follow instructions to bypass the addressable features of these decoders.

9. Wometco also contends that the Commission was incorrect in concluding that parity between various sellers of pay services requires allowing STV operators to sell decoders. Petitioner asserts that not only do STV and cable differ in terms of their delivery system, but that cable operators do not sell equipment. Further, it submits that in the MDS service, receiving equipment must be under the control of the MDS operator and the decorder must be owned by the MDS operator to ensure security. Thus, under the "parity of services" rationale originally advanced by the Commission, Wometco believes STV operators should be required to own or control reception and decoding equipment.

10. Wometco next argues that although established STV stations are likely to continue their operations, there is no reason to suppose that all or even most STV entrants have the capitalization necessary to be viable. Wometco contends that STV operators reach a cash flow breakeven point at a figure far higher than the one cited by either the Commission or STVA, and that STV penetration levels may well continue to run far below the originally projected 10 percent level, given the likelihood of accelerating MDS activities and increasing cable penetration.[6] Thus, Wometco contends that there remains a substantial risk of cessation of service, requiring a lease-only restriction to protect consumers. Petitioner also submits that accumulation of rental fees need not exceed the purchase price of STV decoders. Wometco contends that decoder sales will cause increased security costs to STV operators as well as subscribers, thus reducing any alleged benefits from subscriber ownership.

11. In conclusion, Wometco argues that the Commission intended STV operators alone to be able to sell decoders. However, by deleting the rule requiring the lease of decoders (73.642(f)(3)), the Commission failed to so provide. Therefore, if the Commission is not persuaded to reimpose a "lease-only" provision, Wometco requests that § 73.642(f)(3) be modified to reflect that intent. Petitioner maintains that this would aid in private enforcement against signal piracy.

12. Cox Communications, Inc. ("Cox"), the parent company of Miami Valley Broadcasting Corporation, licensee of STV Station KDNL, St. Louis, Missouri, filed comments supporting both petitions for reconsideration. Cox reiterates many of the arguments made by petitioners. Essentially, Cox contends that having already expressed its sensitivity to the signal piracy problem, the Commission should continue to do so. To illustrate the Commission's concern in this regard, Cox cites the *Michael R. Reynolds* case, 89 FCC 2d 450 (1982). In that decision, the Commission held decoder technological information submitted with an application for STV system approval to be confidential and exempt from disclosure under the Freedom of Information Act. Cox argues that in keeping with the spirit of *Reynolds*, the Commission should restore the "lease-only" rule to minimize signal piracy. If the Commission reaffirms its decision to authorize decoder sales, however, Cox suggests that it be made clear by rule that STV operators alone may exercise the sale option.

13. Channel 57 Corporation contends that decoder sales should be permitted, but only by STV operators.[7] It submits that the Commission correctly found the elimination of the "lease-only" restriction would aid capital formation and business flexibility. It further contends that the freeing of financial resources by allowing decoder purchases will permit STV operators to offer subscribers higher quality programming service and will ultimately promote the establishment of a secure and thriving STV industry throughout the whole country.[8] It also regards STVA's suggestion that STV operators generate this additional working capital through an increase in the required deposit or installation fees charged subscribers as in total disregard of today's competitive marketplace. In many situations, states Channel 57, subscriber prices are already as high as the market will bear.

14. Channel 57 particularly takes issue with petitioners' views that decoder sales will aggravate signal piracy. Channel 57 believes that whether decoders are purchased or leased, signal piracy will continue to be a significant problem. It argues that retaining a "lease-only" restriction will not effectively remedy piracy. Channel 57 is convinced that the efficacy of such a restriction is outweighed by the benefits to be gained through the promotion of new sources of capital and the provision of market flexibility. It argues that STV operators should explore new avenues and more effective methodologies for dealing with the piracy problem. Channel 57 submits that addressable decoders can be utilized so as to minimize the extent of piracy operations. For example, the addressable component of Oak's decoder currently used by commenter is sealed in plastic and, according to Channel 57, virtually impervious to tampering. Finally, Channel 57 asserts that the possibility of an active resale market in those decoders capable of modification is remote. The profitability and practicability of obtaining, modifying and transporting a substantial number of decoders in a market is seriously questioned by Channel 57.[9]

Discussion

15. Once again, we have carefully weighed the advantages and disadvantages of the "lease-only" rule. On balance, we do not believe that our decision to allow decoder sales should be modified. Petitioners' major objection to the sale of decoders is their concern that it will aggravate signal piracy.[10] Our decision to allow decoder sales does not signify a lack of concern with this problem. However, as we stated in *Michael Reynolds*, "[I]t has long been the Commission's view that the initial responsibility for signal protection

[6] In the proceeding establishing the basis for nationwide STV service (Docket No. 11279), some commenting parties projected a 10 percent penetration level. See *Fourth Report and Order*, 15 FCC 2d 466, 488 (1968). However, at that time the Commission concluded that the question of STV penetration and what it might take to obtain greater penetration was one about which there could only be speculation. 15 FCC 2d at 482. In 1981, in its *Further Notice of Proposed Rule Making*, 86 FCC 2d 213, the Commission noted that STV penetration levels were running at 4.0 percent.

[7] Channel 57 Corporation is the licensee of STV Station WWSG, Philadelphia, Pennsylvania.

[8] According to Channel 57, it has expended $2.3 million for the acquisition of decoders and it currently maintains an inventory of 2, 000 decoders that costs $100,000 per year to carry.

[9] In reply STVA asserts that the Commission misunderstood the current state-of-the-art in STV decoder technology. STVA argues that an abandonment of the "lease-only" rule at today's level of addressable decoder technology will unfairly penalize the dozens of STV operators who have come to rely on industry-supported Commission regulations and policies of the past. STVA requests retention of a "lease-only" rule for the moment and revisiting the question of decoder sales in three to five years or when a more secure addressable technology emerges. Petitioner also argues that it is more likely that a purchased decoder will make its way into the hands of a signal pirate (not back to the STV operator as Channel 57 apparently believes) and lead to an undermining rather than stabilization of the financial base of the STV industry. Finally, attached to STVA's reply comments are a number of newspaper items and advertisements submitted to demonstrate that even in a climate where decoder sales are illegal, large scale distribution networks and mail order operations for pirate decoders have grown and thrived.

[10] STVA further argues that STV licensees may have come to rely on the "lease-only" rule. We note, however, that it has been almost five years since the Commission first propqsed a relaxation of the restriction. That is certainly more than adequate notice to STV operators of a possible change in the decoder equipment provision.

should be on the signal originator who is in the best position to protect the signal against unauthorized interception and use." [11] Although Section 605 of the Communications Act prohibits signal piracy, civil actions against STV signal pirates generally have been more successful than Commission intervention and can continue to be so even if different methods of proof become necessary.[12] We believe that technology, as well as legal procedures, can be employed to deal with the signal piracy dilemma. The problem did not originate with decoder sales nor would it be eliminated if decoder purchases were not allowed.

16. On the other hand, the sale of STV decoders has certain benefits that must be considered in reaching our decision. As indicated in the *Third Report and Order*, decoder sales could provide a new licensee with alternative methods of raising start-up capital, reducing capital expenditures or reducing capital tied up in decoder inventories. Under these circumstances, decoder purchase may reduce the cost of service to the customer. This is not to say that STV licensees necessarily will make use of the new opportunities made possible by elimination of the "lease-only" rule. Rather the rule change gives them the flexibility to sell or lease decoders according to what they, as businesspeople, believe to be in their own and their customers' best interest.

17. Our conclusion that the benefits of decoder sales outweigh the potential risks is not based on any conclusion that the action is necessary to put STV at parity with other pay services. Cable is not subject to a "lease-only" restriction, but Wometco alleges that cable companies do not offer converters for sale. This may be true, but what is crucial is that cable systems *may* offer converters to their customers on a sale or lease basis, not whether they do offer such arrangments.[13] Further, our conclusion is not based on the belief that STV operations are financially stable. Both Wometco and STVA have alleged that STV stations break even at between 70,000 and 100,000 subscribers, but our staff study indicated a break even point at between 25,000 and 40,000. Petitioners' higher estimates do not indicate that the STV industry is in a precarious position. On the contrary, the industry has experienced substantial growth in the past five years, from two stations in 1977 to 31 in October 1982. In any event, we do not believe that it is appropriate for this Commission to limit the options of the overall industry and the public because there is a possibility that a few licensees may go out of business. Finally, our conclusion is not based on any presumption that decoder rental fees will necessarily exceed the sale price of decoders. The price of decoders offered for sale will be determined by the marketplace and, in some instances, the sale price might be less than accumulated rentals.

18. On balance, we have provided a regulatory framework that allows the marketplace to govern the issue of whether STV decoders are offered for sale. Once again we emphasize that we have not mandated that decoders be so offered. We merely allow it.

19. As an alternative to reinstating the "lease-only" restriction Wometco has requested that we amend the rules to make it clear that the decision to sell or lease decoders is within the sole discretion of the STV licensee. We do not believe that further amendment of the rules is necessary or appropriate. As to the issues raised in this proceeding, the *Third Report and Order*, as affirmed herein, is sufficient as written.

20. Accordingly, it is ordered, That the petitions for partial reconsideration filed by Subscription Television Association and Wometco Home Theatre, Inc., are denied.

21. For further information concerning this proceeding, contact Freda Lippert Thyden, Mass Media Bureau, (202) 632–7792.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

[11] 89 FCC 2d 450, 455 (1982).

[12] Two federal appellate court decisions interpreting 47 U.S.C. 605 clarified that STV is not a form of broadcasting intended for the use of the general public and that therefore the unauthorized manufacture, sale or distribution of STV signal decoding equipment violates the protection of section 605. See *National Subscription Television* v. *S&H TV*, 644 F. 2d 820 (9th Cir. 1981); and *Chartwell Communications Group* v. *Westbrook*, 637 F. 2d 459 (6th Cir. 1980).

[13] In a number of recent cable franchises, operators are required to offer their subscribers purchase of converters.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1331

[Ex Parte No. 297 (Sub-6)]

Bus Rate Bureau Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: Section 10 of the Bus Regulatory Reform Act of 1982 establishes new standards for bus industry rate bureaus. In general, section 10 applies 49 U.S.C. 10706(b), formerly applicable only to motor carriers of property, to the passenger bus industry. In addition, new provisions are adopted and made applicable only to motor carriers of passengers. Section 10 adds three new subsections defining the scope of antitrust immunity for passenger motor carriers. Following consideration of comments on our proposed interpretations of the new statutory provisions, this decision adopts binding rules (Appendix) to implement the statutory provisions. To retain interim antitrust immunity under section 10(f) of the Bus Act: (1) New or amended agreements must be submitted to the Commission for approval on or before March 19, 1983; (2) The bureau(s) must comply with 49 U.S.C. 10706 and the standards issued in this proceeding during the period new or amended agreements are being prepared, submitted to, and considered by the Commission.

DATES: New or amended agreements must be filed by March 19, 1983. These rules are effective on March 9, 1983.

ADDRESS: All documents (original and 15 copies) must be submitted to: Interstate Commerce Commission, Room 5344, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: This proceeding was initiated by Notice of Proposed Rulemaking (NPR or notice) served September 28, 1982 (47 FR 42916 September 29, 1982), to implement the provisions of section 10 of the Bus Regulatory Reform Act of 1982 (Bus Act), which was adopted on September 20, 1982, and became effective on November 19, 1982. Section 10 establishes new criteria for the operation of bus industry rate bureaus. In general, it applies the Motor Carrier Act (MCA) [1] guidelines [49 U.S.C. 10706(b)], formerly applicable only to motor common carriers of property, to the passenger bus industry. Section 10 also adds three new provisions [2] applicable solely to passenger motor carriers which define the scope of antitrust immunity.

In the notice we invited public comments on our interpretations and proposed standards, and indicated that we will adopt binding norms to implement the statutory provisions.

[1] Motor Carrier Act of 1980, Pub. L. No. 96-296, 94 Stat. 793.

[2] These specific provisions are now codified at 49 U.S.C. 10706 (b)(3)(E), (b)(3)(F) and (b)(5).

Because many of our proposed standards are the same as the final standards adopted for motor carriers of property, we also sought comments delineating differences between the motor carrier of property and passenger industries. We indicated that if those differences or any other factors so justify, appropriate changes in the final standards and procedures would be made.

In response to the NPR, comments were filed by the National Bus Traffic Association, Inc. (NBTA), the Department of Justice (DOJ), and the Commission's Office of Special Counsel (OSC). These comments have been thoroughly considered, as noted below. Because several of the new statutory provisions are self-executing and should be reflected in amended agreements, this decision addresses only those issues requiring interpretations. We are adopting final rules which are set out in the Appendix.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free 800–424–5403.

Energy and Environmental Considerations

We affirm our preliminary determination that this decision will not significantly affect the quality of the human environment or conservation of energy resources.

Regulatory Flexibility Analysis

In our initial notice, we determined that our proposed standards may benefit smaller entities by granting them greater freedom to set rates independently. Moreover, the Bus Act allows carriers to use the rate bureau process to establish innovative or promotional fares. Both of these provisions will benefit individual, and groups of, passengers, as well as carriers. We acknowledged that these procedures can also be employed by larger carriers to the detriment of smaller ones. However, no comments have been received addressing regulatory flexibility issues.

This is a statutorily-mandated proceeding, and the overall purpose of the Bus Act is to establish a new regulatory scheme that will assure a viable intercity bus industry and benefit both small and large carriers, as well as passengers. In framing these rules, we have attempted to minimize the burdens on small entities consistent with Congressional intent. We affirm our prior conclusion that we anticipate no significant impact on small entities as a result of these final rules.

Authority: Section 10 of the Bus Regulatory Reform Act of 1982, 49 U.S.C. 10321 and 10706, and 5 U.S.C. 553.

List of Subjects in 49 CFR Part 1331

Buses, Freight forwarders, Maritime carriers, Motor carriers, Pipelines, Railroads.

Dated: March 2, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison. Commissioner Andre dissented. Commissioner Simmons did not participate.

Agatha L. Mergenovich,

Secretary.

Appendix

PART 1331—[AMENDED]

49 CFR Part 1331 is amended by adding § 1331.5:

§ 1331.5 Additional standards and procedures required for passenger bus industry rate bureaus to retain antitrust immunity.[3]

(a) Rate bureau agreements must provide each carrier the absolute right of independent action. This must include the right to decide whether or when an independent action, or rate within the zone of freedom, will be docketed. In the absence of explicit instructions from the independent actor, the bureau may not docket the item until the proposal has been filed with the Commission. There may be no bureau discussion of the independent action prior to the effective date of the tariff item. The Bureau may cancel or change a rate established by independent action only for the purpose of tariff simplification, removal of discrimination, or elimination of obsolete items. The bureau must have the written permission of the independent actor to do so. General increases and decreases and broad tariff restructuring are not subject to these notice and consent requirements.

(b) Rate bureau employees and employee committees are restricted from initiating a tariff proposal or determining whether to adopt, reject or otherwise dispose of proposals. Upon request, they may provide the proponent of a rate change with expert analysis and technical assistance. Any advice concerning an independent action proposal shall remain confidential.

(c) Upon request, bureaus will promptly divulge the name of the proponent of a tariff matter and the vote cast by any member on any proposal. Bureaus will provide detailed and timely public notice of meetings and their agenda. Discussion or voting on rate-related matters will not be permitted unless the meeting is reasonably noticed. Any person requesting admittance to a meeting at which rates or rules are being discussed shall be admitted immediately. Note taking and sound recording by attendees are permissible, provided the conduct of the meeting is not disrupted. If mail voting and telephonic communications are employed, they cannot be used to circumvent rate bureau restrictions. Any abuses will be investigated.

(d) Any carrier voting for another must possess a written proxy. The proxy must be dated and contain the grantor's signature, the specific items for which the vote is released, direction on voting, and certification of authority. A copy of the proxy and the written certification of authority executed by the proxy holder for the grantor will be made part of the voting record and ballot. Proxies may not be accepted for the purpose of certifying permission to cancel any item established by independent action which the carrier represented by proxy either initiated or joined. A proxy may be revoked at any time, either by subsequent written verification or by the member carrier appearing at a meeting and voting on its own behalf.

(e) The quorum for holding meetings of the organization or a committee is 30 percent of the membership.

(f) The bureaus are required to maintain detailed minutes of all meetings where tariff items are discussed. The bureaus will be subject to withdrawal of their immunity for serious continuing violations of Commission standards, and individual tariff publications will be subject to rejection, suspension or investigation for improprieties in the rate bureau process.

(g) Rate bureaus shall not file a protest or complaint with the Commission.

(h) Rate bureaus shall make a final disposition of a rate or rule by the 120th day after the proposal is docketed, except that if unusual circumstances require, the organization may extend such period, subject to review by the Commission. If the 120th day falls on a Saturday, Sunday, or public holiday, the final day for disposition will be the next working day.

(i) There can be no discussion of or voting on rates proposed *under the authority* of the zone of rate freedom.

[3] Rate Bureaus must also comply with 49 CFR 1331.1–.4 and guidelines adopted in Ex Parte No. 297 (Sub-No. 5), *Motor Carrier Rate Bureaus-Implementation of P.L. 96–296*, 46 FR 30092, June 5, 1981, and applied to the bus industry in Ex Parte No. 297 (Sub-No. 6), *Bus Rate Bureau Procedures*, served ——.

(j) For the purposes of this subsection the following definitions shall apply:

(1) A "general increase" is a proposed general adjustment of substantially all the rates published in a rate bureau's tariff or tariffs.

(2) A "broad change in tariff structure" modifies in a relatively non-uniform fashion the relationship between most rates published in a rate bureau's tariff, and applies to a large area, either nationally or regionally.

(3) An "innovative fare" will be determined on a case-by-case basis; the Commission will, on request, issue formal or informal opinions on whether particular rate proposals may be regarded as innovative. Two examples of an innovative fare are (i) a fare for unlimited passenger travel and (ii) an experimental fare which provides for transportation, at the option of the passenger, over the line of one or more than one carrier.

(4) A "promotional fare" generally has three characteristics: (i) Limited duration; (ii) attractive price or level of service quality; and (iii) some added feature in addition to those normally offered.

Proposed Rules

Federal Register
Vol. 48, No. 47
Wednesday, March 9, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 563

[No. 83-129]

Amendment Concerning Conflicts of Interest Involving Mortgage Insurance

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Board is proposing to limit the scope of an exception to a regulation that prohibits an insured institution from insuring loans with a mortgage insurance company in which the institution, its service corporation(s) or insiders have an investment in excess of specified limits. The proposed amendment would grandfather existing investment in certain mortgage insurance companies and would terminate the special exception allowing new investment in those mortgage companies in excess of the limits applicable to investment in all other mortgage insurance companies. The proposed amendment is intended to create competitive parity among all mortgage insurance companies and reduce the potential for conflicts of interest.

DATE: Comments must be received by: May 5, 1983.

ADDRESS: Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Gregory B. Smith (202) 377-6451, Attorney, or John Soukenik, Acting Director, Corporate and Regulatory Structure Division, (202) 377-6411, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: Section 563.44(b)(4) of the Rules and Regulations for the Federal Savings and Loan Insurance Corporation (12 CFR 563.44(b)) prohibits an insured institution, as defined in section 561.1 (12 CFR 561.1), from insuring loans with a mortgage insurance company ("MIC") or parent thereof in which the institution, its service corporation(s), or affiliated persons (i.e. officers, directors, and controlling persons) have a sufficient ownership interest to give rise to an appearance of a conflict of interest in the placement or renewal of mortgage insurance. Paragraph (b)(4) of that section also establishes a rebuttable presumption that such a conflict of interest exists when (1) the insured institution, its service corporation(s) or affiliated persons have an ownership interest in the aggregate of $100,000, or more than two percent of the equity securities of a MIC with assets up to $50 million, or more than one percent of the equity securities of a MIC with assets in excess of $50 million; or (2) the insured institution, a service corporation or affiliated person thereof individually has an ownership interest in excess of $50,000, or more than one percent of the equity securities of a MIC with assets up to $50 million or one-half of one percent (.5%) where the MIC has assets in excess of $50 million.

The limitation is intended to prevent an insured institution with a significant ownership interest in an MIC from basing its loan-making decisions on the potential profits that would be derived from mortgage insurance policies written for such loans by its associated MIC. The interrelationship between the insured institution and the MIC could also cause an insured institution to require unnecessary mortgage insurance in the interest of generating profits and to develop a lack of "discipline" in the the evaluation of loans by both the insured-institution/owner and its "captive" MIC. The Board also was concerned that the "self insurance" aspect of such an arrangement would be inconsistent with the Board's requirement that part of the risk of high down-to-value ratio loans be assumed by other than the lending institution.

When the § 563.44(b)(4) limitation was promulgated in 1976, paragraph (c) of § 563.44 provided an exception for investment in any MIC in existence on March 11, 1976, which was entirely owned, directly or indirectly, by insured institutions, no one of which owned more than twenty-five percent of any class of equity securities of such MIC. The only MIC qualifying for the exception at that time was the Pennsylvania Mortgage Insurance Company ("PAMICO"). The Board grandfathered investment in PAMICO through this exception because of the serious adverse impact the new prohibition would have had on PAMICO and because the Board believed that the concept of an MIC wholly-owned by home mortgage lending institutions was worth studying and monitoring.

In 1976, the Board, by Resolution No. 76-732 (47 FR 60571; December 28, 1976), amended the exception to its present form, which limits investment by new investors to two percent of PAMICO's equity securities and permits an existing investor in PAMICO to make additional investments only if that investor's resulting total investment would be less than two percent of PAMICO's equity securities. The effect of that amendment was to ratchet down the ownership interests of PAMICO's original investors and thereby minimize the risk of spreading it among a greater number of investors.

The Board is now proposing to modify paragraph (c) to grandfather investments that conform with previous versions of this paragraph, and to rescind the authorization for new investment in excess of the levels specified in paragraph (b)(4). If the Board takes final action on this proposal, the date of this proposal (March 3, 1983); this would ensure that additional investments exceeding current (b)(4) levels would not be made during the public comment period, in contravention of the intent of the proposal.

Thus, under the proposal any new or additional investments in PAMICO would have to conform to the levels in paragraph (b)(4). While existing investments in PAMICO under the previous authorization would be grandfathered under the proposal, any reduction in those investments could not subsequently be increased beyond the (b)(4) levels.

As a result of the proposed amendment, PAMICO would no longer be required to be wholly owned by insured institutions, since that requirement is only imposed on investment in PAMICO under paragraph (c) and is not imposed under the general limitations on investments in other MICs

under paragraph (b)(4). Since new investment in PAMICO would only be authorized on the same basis applicable to investment in other MICs under the limitations in paragraph (b)(4), there would no longer by any need for the ownership restriction.

The Board believes that the proposed amendment would create competitive parity among all MICs as to the maximum authorized investment by insured institutions under § 563.44, and at the same time it would relieve PAMICO of the requirement that its stock be wholly owned by insured institutions. As a result of the proposed amendment, the market for PAMICO's stock would be significantly expanded, thereby enhancing its ability to raise capital. In addition, the Board believes that this proposed amendment would continue the "ratcheting" down of the ownership interests of the original owners of PAMICO, enable the ownership base of PAMICO to become diversified, and minimize the potential for conflicts of interest, consistent with the basic thrust of § 563.44 and the 1978 amendment to that regulation.

Initial Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1164 (September 19, 1980), that Board is providing the following regulatory flexibility analysis:

1. *Reasons, objective, and legal basis underlying the proposed rule.* These elements have been incorporated elsewhere into the supplementary information regarding the proposal.

2. *Small entities to which the proposed rule will apply.* The proposed rule will apply to all insured institutions.

3. *Impact of the rule on small businesses.* The rule would not have a disproportionate effect on small businesses. By creating competitive parity between all MICs as to investment by insured institutions, the rule would benefit small insured institutions. Thus, it is expected that the proposed rule would have no significant adverse economic impact on a substantial number of small entities.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap, or conflict with the proposal.

5. *Alternatives to the proposed rule.* The reasons for proposing to change the current limitation have been discussed above; the Board also has not proposed the alternative of an increased investment opportunity in order to avoid the "self insurance" problem and the appearance of conflicts of interest as previously described.

List of Subjects in 12 CFR Part 563

Savings and loan associations, Mortgage insurance companies.

Accordingly, the Board hereby proposes to amend Part 563, Subchapter D, Chapter V of Title 12, Code of Federal Regulations, as set forth below:

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

Amend § 563.44 by revising paragraph (c), as follows:

§ 563.44 Loans involving mortgage insurance.

* * * * *

(c) *Exception.* Paragraph (b)(4) of this section does not apply to any previously authorized investment made prior to March 3, 1983, in a mortgage insurance company in existence on March 11, 1976, which was entirely owned, directly or indirectly, by insured institutions on the date of the investment. However, if such investment has been reduced it may not subsequently be increased after March 3, 1983, beyond the levels specified in paragraph (b)(4).

(Secs. 402, 403 407, 48 Stat. 1256, 1257, 1260, as amended 12 U.S.C. 1725, 1726, 1730). Reorg. Plan No. 3 of 1947, 12 FR 4981,. 3 CFR 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

BILLING CODE 6720–01–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR–262–76]

Partner's Distributive Share

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations under section 704 (b) of the Internal Revenue Code of 1954, relating to the determination of a partner's distributive share of income, gains, loss, deduction, or credit. Changes to the applicable law were made by the Tax Reform Act of 1976. The regulations would provide the public with the guidance needed to comply with the law as amended by the Act. The proposed regulations provide rules and examples relating to the substantial economic effect test and to the determination of a partner's interest in the partnership.

DATES: Written comments and requests to speak at the public hearing must be delivered or mailed by April 20, 1983. The amendments are proposed to be generally effective for partnership taxable years beginning after December 31, 1983.

ADDRESS: Send comments and requests to speak at the public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR–262–76), Washington, D.C. 20024.

FOR FURTHER INFORMATION CONTACT: John G. Schmalz of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3829).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 704(b) of the Internal Revenue Code of 1954. Generally, these amendments are proposed to conform the Income Tax Regulations to section 213(d) of the Tax Reform Act of 1976 (95 Stat. 1548), and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

In General

Section 704(b), as amended by the Tax Reform Act of 1976, provides that a partner's distributive share of income, gain, loss, deduction, or credit (or item thereof) is determined in accordance with such partner's interest in the partnership (determined by taking into account all facts and circumstances) if either the partnership agreement does not provide for the distributive share, or the allocation to the partner under the partnership agreement does not have substantial economic effect.

These proposed regulations provide rules and examples relating to the substantial economic effect test and to the determination of a partner's interest in the partnership. An allocation that fails to meet the substantial economic effect test will not be disturbed to the extent the allocation is consistent with the partners' interest in the partnership. Special rules provide that certain allocations will be deemed to be consistent with the partners' interests in the partnership without such a showing even though the allocation does not have substantial economic effect.

Substantial Economic Effect

The proposed regulations provide that the determination of whether an allocation has substantial economic

effect involves a two-part test. First, the allocation must have economic effect. An allocation to a partner can have economic effect only if, in the event there is a corresponding economic benefit or burden, the allocation will actually affect the dollar amount received by such partner. Generally, an allocation will not have economic effect unless the allocation is reflected by an appropriate adjustment to the partner's capital account, liquidation proceeds are to be distributed in accordance with the partners' capital account balances, and following the distribution of such proceeds partners are liable to the partnership to restore any deficit in their capital accounts. The proposed regulations provide rules regarding the proper maintenance of the partners' capital accounts and certain optional and required adjustments thereto.

Second, the economic effect must be substantial when weighed against the shifting of tax consequences resulting from the allocation. The proposed regulations provide rules and examples relating to the substantial economic effect test. The fundamental principles contained in the proposed regulations which relate to the substantial economic effect test are generally applicable for partnership taxable years beginning after December 31, 1975. To the extent an allocation fails the substantial economic effect test and is inconsistent with the partners' interests in the partnership it will be reallocated in accordance with the partners' interests in the partnership.

Partner's Interest in the Partnership

The proposed regulations provide rules and examples for determining a partner's interest in the partnership. Section 704(b) provides that this shall be determined by taking into account all the facts and circumstances. The proposed regulations provide that a partner's interest in the partnership is to be determined with reference to the underlying economic arrangement of the partners relating to the particular allocation under consideration. If that economic arrangement cannot be determined, each partner's interest in the partnership will be presumed to be equal. See Uniform Partnership Act section 18 (1914). This presumption can be rebutted by facts and circumstances which show that the economic arrangement is otherwise. The examples contained in the proposed regulations specify how, in certain situations, the Treasury will determine the partners' interests in the partnership. In those examples in which it has not made such a determination, the Treasury is interested in how tax practitioners would assess the partners' interests in the partnership.

In particular, the Treasury seeks comments concerning the proper determination of the partners' interests in the partnership in example (19)(iii) of the proposed regulations, taking into consideration the determination made in example (19)(iv) of the proposed regulations.

Special Rules

The proposed regulations contain special rules concerning allocations where there are disparities between tax and book capital accounts, allocations of credits, percentage depletion, and loss and deduction attributable to nonrecourse debt. Under these rules certain allocations are deemed to be in accordance with the partners' interests in the partnership. The proposed regulations contain rules relating to the determination of the partners' allocable shares of adjusted basis and amount realized under section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3.

Comments and Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing has been scheduled and will be held on May 4, 1983. Notice of the time and place of the hearing appears in the Proposed Rules section of this issue of the **Federal Register.**

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Although this document is a notice of proposed rulemaking which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these proposed regulations is John G. Schmalz of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in developing these regulations both on matters of substance and style.

List of Subjects in 26 CFR Parts 1.701–1—1.771–1

Income taxes, Partnerships.

Proposed Amendments to the Regulations

PART 1—[AMENDED]

The proposed amendments to 26 CFR Part 1 would revise paragraph (b) of § 1.704–1 to read as follows, proposed to be generally effective for partnership taxable years beginning after December 31, 1983:

§ 1.704–1 Partner's distributive share.

* * * * *

(b) *Distributive share determined in accordance with partner's interest in the partnership*—(1) *In general*—(i) *General rules.* Under section 704(b), for partnership taxable years beginning after December 31, 1975, if a partnership agreement makes no specific provision for the allocation of income, gain, loss, deduction, or credit (or any item of income, gain, loss, deduction, or credit), or if the allocation of income, gain, loss, deduction, or credit (of item thereof) does not have substantial economic effect, then each partner's distributive share of such income, gain, loss, deduction, or credit (or item thereof) shall be determined in accordance with such partner's interest in the partnership (determined by taking into account all facts and circumstances). If the partnership agreement provides for an allocation of income, gain, loss, deduction, or credit (or item thereof), there are three ways in which such allocation can satisfy section 704(b) and this paragraph. (Although the provisions of this paragraph are generally effective for partnership taxable years beginning after December 31, 1983, the fundamental principles contained in paragraph (b)(2) of this section relating to the substantial economic effect test are generally applicable for partnership taxable years beginning after December 31, 1975.) First, the allocation can have substantial economic effect in accordance with paragraph (b)(2) of this section. Second, the partner or partners can show that, taking into account all facts and circumstances, the allocation is in accordance with the partners' interests in the partnership. See paragraph (b)(3) of this section. Third, the allocation can be deemed to be in accordance with the partners' interests in the partnership if one of the special

rules contained in paragraph (b)(4) of this section applies. To the extent an allocation of income, gain, loss, deduction, or credit (or item thereof) does not have substantial economic effect, is not in accordance with the partners' interests in the partnership, and is not deemed to be in accordance with the partners' interests in the partnership, such income, gain, loss, deduction, or credit (or item thereof) shall be reallocated in accordance with the partners' interest in the partnership (determined under paragraph (b)(3) of this section). Section 704(b) and this paragraph are applicable to allocations of specific items of income, gain, loss, deduction, or credit and to distributive shares of taxable income or loss under section 702(a)(8).

(ii) *Effect of other sections.* A determination made under section 704(b) and this paragraph does not affect any limitation concerning the tax treatment of a partner with respect to the income, gain, loss, deduction, or credit that is allocated. For example, an allocation of loss or deduction to a partner that is valid under this paragraph may not be deductible by such partner if the partner lacks the requisite profit motive (see, *e.g.*, section 183 and § 1.183–2), or may be disallowed for that taxable year (and held in suspense) if the limitations of section 465 or section 704(d) are applicable, or may be disallowed and reallocated under the provisions of section 704(e)(2) or section 706. If a partnership has a section 754 election in effect, a partner's distributive share of partnership income, gain, loss, or deduction may be affected as provided in § 1.743–1. Section 704(b) and this paragraph do not apply if the recipient of a purported allocation is not a partner of the partnership (see section 7701(a)(2) and paragraph (d) of § 301.7701–3), or is not receiving the purported allocation in his capacity as a partner (see section 707(a) and paragraph (a) of § 1.707–1).

(iii) *Determinations under section 704(c).* Section 704(c) and paragraph (c) of this section provide certain alternatives for determining the partners' distributive shares of depreciation, depletion, or gain or loss with respect to property contributed to the partnership in order to account for the precontribution appreciation or diminution in the value of such property. A determination made in accordance with section 704(c) and paragraph (c) of this section shall not be subject to the provisions of section 704(b) and this paragraph. However, section 704(b) and this paragraph shall govern the determination of the partners' distributive shares of all other income, gain, loss, deduction, or credit (or item thereof) of the partnership.

(2) *Substantial economic effect*—(i) *General rule.* The determination of whether an allocation of income, gain, loss, deduction, or credit (or item thereof) to a partner has substantial economic effect involves a two-part test. First, the allocation must have economic effect (within the meaning of paragraph (b)(2)(ii) of this section). Second, the economic effect must be substantial (within the meaning of paragraph (b)(2)(iii) of this section).

(ii) *Economic effect.* In order to have economic effect an allocation must be consistent with the underlying economic arrangement of the partners. Thus, the partner to whom an allocation is made must receive the economic benefit or bear the economic burden or risk associated with the allocation. An allocation to a partner can have economic effect only if, in the event there is an economic benefit or economic burden which corresponds to the allocation, the allocation will actually affect (to the same extent) the dollar amount received by such partner. Thus, an allocation of income, gain, loss, or deduction (or item thereof) to a partner generally has economic effect only if—

(*a*) The allocation is reflected as an appropriate increase or decrease in that partner's capital account (as described in paragraph (b)(2)(iv)(*a*) of this section), and

(*b*) Liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, and

(*c*) Any partner with a deficit in his capital account following the distribution of liquidation proceeds is required to restore the amount of such deficit to the partnership, which amount shall be distributed to partners in accordance with their positive capital account balances of paid to creditors.

If these requirements are not complied with, an allocation will nevertheless have economic effect if the capital account equivalence test described in paragraph (b)(2)(iv)(*b*) of this section is satisfied. Rules concerning the proper maintenance of the partners' capital accounts are contained in paragraph (b)(2)(iv)(*a*) of this section. The determination of whether an allocation has economic effect is made as of the end of the partnership taxable year to which the allocation relates. Thus, the fact that a partner is not required to restore the deficit in his capital account (requirement (*c*) above) does not invalidate an allocation (or that portion of an allocation) to such partner to the extent the allocation does not create a deficit in such partner's capital account at the end of the partnership's taxable year provided the other requirements of this subdivision are satisfied. For purposes of the preceding sentence, any cash and property held by the partnership at the end of the taxable year which there is a reasonable expectation will be distributed to a partner (other than in liquidation of the partnership) prior to a corresponding increase in the partner's capital account shall be treated as having been distributed to such partner on the last day of such taxable year. Factors that will be considered in determining whether such reasonable expectation exists include: The terms of the partnership agreement, the partnership's historical practice concerning distributions, and the expected working capital needs of the partnership. An allocation that has economic effect under this subdivision may nevertheless be invalid if that economic effect is not substantial (within the meaning of paragraph (b)(2)(iii) of this section). If a partner receives an economic benefit or bears an economic burden or risk of only a portion of the allocation, that portion shall be recognized as having economic effect and the remainder of the allocation shall, to the extent inconsistent with the partners' interests in the partnership, be reallocated in accordance with the partners' interests in the partnership (within the meaning of paragraph (b)(3) of this section). See examples (1)(iv) and (15) of paragraph (b)(5) of this section.

(iii) *Substantiality*—(*a*) *General rule.* The economic effect of an allocation, when considered together with all prior and expected allocations (for all taxable years), must be substantial. In determining whether the economic effect is substantial, the likelihood and magnitude of a shift in the economic consequences among partners must be weighed against the shifting of tax consequences resulting from the allocation (or allocations), particularly tax consequences which result from the interaction of the allocation (or allocations) with the partners' nonpartnership tax attributes. If at the beginning of the taxable year to which an allocation (or allocations) relates there is a strong likelihood that such allocation (or allocations) would cause a shift in tax consequences that is disproportionately large in relation to the shift in economic consequences, such allocation (or allocations) does not have substantial economic effect. Furthermore, if at the end of the taxable

year to which an allocation (or allocations) relates such allocation (or allocations) has caused a shift in tax consequences that is disproportionately large in relation to the shift in economic consequences it will be presumed that there was a strong likelihood that this would occur, which presumption may be overcome by a showing of facts and circumstances which prove otherwise. See examples (5), (6), and (7)(ii) of paragraph (b)(5) of this section. The economic effect of an allocation (or allocations) which would significantly reduce the overall tax liabilities of the partners shall not be considered substantial if at the time such allocation (or allocations) is provided for in the partnership agreement there is a strong likelihood that the economic effect of the allocation (or allocations) will be transitory due to a largely offsetting allocation (or allocations). See examples (2)(ii) and (8)(ii) of paragraph (b)(5) of this section.

(*b*) *Additional factors.* In weighing the likelihood and magnitude of a shift in the economic consequences against the shifting of tax consequences, the following factors will also be considered: whether the partnership or a partner individually has a non-tax business purpose for the allocation; whether related items of income, gain, loss, deduction, and credit from the same source are subject to the same allocation; whether the allocation was made without recognition of normal business factors; whether the allocation was made only after the amount thereof could reasonably be estimated; the duration of the allocation; and the overall tax consequences of the allocation.

(*c*) *Effect of economic performance.* The substantiality of the economic effect of an allocation is determined by assuming that the corresponding economic benefit or burden will occur without regard to the probability of such occurrence. For example, the fact that an allocation of an accelerated cost recovery deduction to a partner may not be matched by a corresponding decrease in the recovery property's value shall not be considered in determining the substantiality of the economic effect of the allocation. Thus, there cannot be a strong likelihood that the economic effect of an allocation of an accelerated cost recovery deduction to a partner will be transitory due to a largely offsetting allocation to such partner of gain attributable to the disposition of the recovery property since in determining whether the original allocation has substantial economic effect the economic burden of the accelerated cost recovery deduction is deemed to occur. See examples (1)(vii) and (2) of paragraph (b)(5) of this section. Similar principles apply to depreciation, depletion, amortization, and other forms of cost recovery deduction.

(iv) *Capital accounts*—(*a*) *Proper maintenance of capital accounts.* The economic effect test described in paragraph (b)(2)(ii) of this section requires an examination of the capital accounts of the partners of a partnership. Similarly, the rules contained in pargraph (b)(4)(iv) of this section concerning allocations of loss and deduction attributable to nonrecourse debt which is secured by partnership property require an examination of the partners' capital accounts. These are the capital accounts which, under the terms of the partnership agreement, govern the underlying economic arrangement of the partners. Except as provided in paragraphs (b)(2)(iv)(*b*), (b)(2)(iv)(*c*)(*2*), and (b)(4)(i) of this section, an allocation of income, gain, loss, or deduction cannot have economic effect and shall not be deemed to be in accordance with the partner's interests in the partnership unless the governing capital accounts of the partners follow tax accounting principles. Thus, a partner's capital account generally must be credited with the cash and the adjusted basis of property contributed to the partnership (net of liabilities assumed by the partnership and liabilities to which such contributed property is subject), and his distributive share of partnership income (including income exempt from tax) and gain (or item thereof), and must be debited with the cash and the partnership's adjusted basis of property distributed to him (net of liabilities assumed by such partner and liabilities to which such distributed property is subject), his distributive share of partnership loss and deduction (or item thereof), and his distributive share of expenditures of the partnership described in section 705(a)(2)(B) (which share shall be determined in accordance with the partners' interests in the partnership). In addition, paragraph (b)(2)(iv)(*c*) of this section provides for certain mandatory and optional adjustments to the partners' capital accounts.

(*b*) *Capital account equivalence.* If either capital accounts are not maintained for the partners of a partnership in accordance with paragraphs (b)(2)(iv)(*a*) and (b)(2)(iv)(*c*) of this section or capital accounts do not govern the distribution of liquidation proceeds, but the agreement among the partners would in all cases (irrespective of the economic performance of the partnership) produce the same results as if the requirements of paragraph (b)(2)(ii) of this section (or, in the case of allocations of loss or deduction attributable to nonrecourse debt which is secured by partnership property, paragraph (b)(4)(iv) of this section) had been satisfied, then the requirements of paragraph (b)(2)(ii) of this section (or, in the case of allocations of loss or deduction attributable to nonrecourse debt which is secured by partnership property, paragraph (b)(4)(iv) of this section) shall be deemed satisfied. See examples (16)(ii) and (19)(iii) of paragraph (b)(5) of this section.

(*c*) *Special capital account adjustments*—(*1*) *Transfers of partnership interests.* Generally, upon the sale or exchange of a partnership interest the capital account of the transferor partner which is attributable to such interest will carry over to the transferee partner. However, if the transfer causes a termination of the partnership within the meaning of section 708 (b)(1)(B), the capital accounts of the partners shall govern the constructive liquidation under paragraph (b)(1)(iv) of § 1.708–1, and upon constructive reformation the capital account of each partner shall be redetermined in accordance with paragraph (b)(2)(iv)(*a*) of this section. See example (1)(ix) of paragraph (b)(5) of this section. In the case of a nonterminating sale or exchange of an interest in a partnership which has a section 754 election in effect, the partner who receive the benefit or detriment of the special basis adjustment under section 743 may, if authorized under the partnership agreement, make a corresponding adjustment to his capital account. See example (1)(viii) of paragraph (b)(5) of this section However, when a partnership interest is transferred more than once, appropriate adjustments shall be made to avoid double counting of basis adjustments in a partner's capital account. See paragraph (b)(2)(iv) of § 1.743–1.

(*2*) *Preliquidation adjustments.* Upon liquidation and winding up of the partnership, unsold partnership property may be valued to determine the gain or loss which would have resulted if such property were sold, and the governing capital accounts of the partners, which have otherwise been maintained in accordance with this paragraph (b)(2)(iv), may be adjusted to reflect how such gain or loss would have been allocated if such property had been sold at the assigned values. This preliquidation adjustment to capital

accounts shall have no effect on the validity of any allocation recognized under this paragraph so long as partnership property is distributed in accordance with the partners' capital account balances with reference to the assigned values of such property and such assigned values are reasonable and can be supported by the partnership. See example (14)(iii) of paragraph (b)(5) of this section. If it cannot be established that such assigned values are reasonable, the provisions of this paragraph (b)(2)(iv)(*c*)(*2*) shall not apply.

(*3*) *Adjustments relating to section 613A(c)(7)(D).* Notwithstanding the provisions of section 613A(c)(7)(D) and § 1.613A–3, solely for purposes of maintaining capital accounts under this paragraph, depletion with respect to oil and gas wells shall be computed at the partnership level. The partnership shall compute a simulated depletion allowance on each oil or gas property using that method, as between the cost depletion method or the percentage depletion method (without regard to limitations which theoretically could apply to less than all the partners such as the quantity limits of section 613A(c)(3)), which results in the greatest simulated depletion allowance. The partnership's simulated depletion allowance shall reduce the partners' capital accounts in the same proportion as such partners (or their predecessors in interest) were allocated adjusted basis under section 613A(c)(7)(D), paragraph (e) of § 1.613A–3, and paragraph (b)(4)(v) of this section with respect to such property. In no event shall the partnership's aggregate simulated depletion allowances with respect to an oil or gas property exceed the partnership's adjusted basis in such property (maintained solely for capital account purposes). Upon the taxable disposition of an oil or gas property by a partnership, such partnership's gain or loss shall be determined (solely for capital account purposes) by subtracting its adjusted basis in such property (maintained solely for capital account purposes) from the amount realized from such disposition. Any resultant simulated gain shall be allocated to the partners in the same manner as that portion of the amount realized from such disposition which exceeds the partnership's adjusted basis in such property (maintained solely for capital account purposes) is allocated to such partners (as determined under paragraph (b)(4)(v) of this section) and shall increase such partners' capital accounts accordingly. Any resultant simulated loss shall be allocated to the partners in the same proportion as such partners (or their predecessors in interest) were allocated adjusted basis under section 613A(c)(7)(D), paragraph (e) of § 1.613A–3, and paragraph (b)(4)(v) of this section with respect to such property and shall reduce such partners' capital accounts accordingly. See example (19)(vi) of paragraph (b)(5) of this section.

(3) *Partner's interest in the partnership.* References in section 704(b) and this paragraph to a partner's interest in a partnership, or to the partners' interests in the partnership, signify the manner in which the partners have agreed to share the economic benefit or burden with respect to the income, gain, loss, deduction, or credit (or item thereof) that is allocated. This sharing arrangement may or may not correspond to the overall economic arrangement of the partners. Thus, a partner who has a 50 percent interest in the partnership overall may have a 90 percent interest in a particular item of income or deduction. The determination of a partner's interest in a partnership shall be made by taking into account all facts and circumstances relating to the economic arrangement of the partners. All partners' interests in the partnership are presumed to be equal (determined on a per capita basis). However, this presumption may be rebutted by the taxpayer or the Internal Revenue Service proving facts and circumstances which show that the partners' interests in the partnership are otherwise. The following facts and circumstances may be relevant:

(i) The partners' relative contributions to the partnership;

(ii) The interests of the partners in economic profits and losses (if different from that in taxable income or loss);

(iii) The interests of the partners in cash flow and other distributions; and

(iv) The rights of the partners to distributions of capital and other property upon liquidation.

See examples (1)(i) and (v), (4), (5)(i), (10)(ii), (15), (17)(i), and (19)(iv) and (v) of paragraph (b)(5) of this section.

(4) *Special rules*—(i) *Allocations where there are disparities between tax and book capital accounts.* Cases may arise in which, under the economic arrangement of the partners, appreciation or diminution in the value of partnership property (including property which is being contributed to or distributed by the partnership) is reflected by upward or downward adjustments to the capital accounts of the partners prior to the recognition for tax purposes of the taxable gain or loss attributable thereto. When the taxable gain or loss attributable to such adjustments is recognized for tax purposes, allocations thereof cannot, to the extent of the such adjustments, properly give rise to additional adjustments to the partners' capital accounts. Thus, under paragraphs (b)(2)(iv)(*a*) and (b)(2)(ii)(*a*) of this section, such allocations cannot have economic effect. This subdivision shall apply only if such capital account adjustments are made in accordance with sound financial accounting principles, are made principally for a non-tax business purpose, are the sole reason for the disparity between tax capital accounts and the governing book capital accounts, and are made in connection with the contribution of property by a partner, the distribution of property to a partner, the sale, exchange or retirement of all or a portion of a partner's interest, or the admission of a new partner. However, in the case of capital account adjustments made to reflect the appreciation or diminution in the value of property contributed by a partner, this subdivision shall not apply if the depreciation, depletion, or gain or loss with respect to such property is determined under section 704(c)(1) and paragraph (c)(1) of this section. See example (13(i) of paragraph (b)(5) of this section. If this subdivision applies, an allocation of depreciation, depletion, or gain or loss with respect to the property that gave rise to the capital account adjustments, which allocation is not governed by section 704(c)(2) and paragraph (c)(2) of this section, must be made in accordance with the partner's interests in the partnership and shall be deemed to be made in accordance therewith if such allocation is designed to eliminate, to the extent possible, the disparity between tax capital accounts and the governing book capital accounts. Generally, this will require the application of principles the same as those contained in section 704(c)(2) and paragraph (c)(2) of this section. If (*a*) the provisions of this paragraph (b)(4)(i) apply, (*a*) the requirements of the previous two sentences are satisfied, and (*c*) the requirements of paragraph (b)(2)(ii) of this section (or, in the case of allocations of loss or deduction attributable to nonrecourse debt which is secured by partnership property, paragraph (b)(4)(iv) of this section) are satisfied with reference to the governing book capital accounts of the partners, then the upward or downward capital account adjustments referred to in the first sentence of this subdivision shall not affect the validity of any prior allocation recognized under this paragraph. Furthermore, in such cases

subsequent allocations of income, gain, loss, deduction, or credit for item thereof) of the partnership (other than those which are recognized in satisfying requirement (*b*) above) shall be deemed to be made in accordance with the partners' interests in the partnership to the extent the allocation either would have been so deemed or could have had substantial economic effect if paragraph (b)(2)(iv)(*a*) of this section had permitted such upward or downward adjustments to be made to capital accounts. See examples (13)(ii), (14)(i), and (18) of paragraph (b)(5) of this section. See paragraph (b)(2)(iv)(*c*)(*2*) of this section concerning preliquidation adjustments to capital accounts.

(ii) *Credits.* Allocations of tax credits (and credit recapture) do not properly give rise to adjustments to the partners' capital accounts. Thus, under paragraphs (b)(2)(iv)(*a*) and (b)(2)(ii)(*a*) of this section, such allocations cannot have economic effect and the tax credits (and credit recapture) must be allocated in accordance with the partners' interests in the partnership at the time the tax credit (or credit recapture) arises. For credits other than the investment tax credit provided by section 38, if all income, gain, loss, and deduction (or item thereof) from the property or activity which gives rise to the credit is allocated among the partners in the same manner, and if those allocations have substantial economic effect, then an allocation of the credit (or the cost giving rise to such credit) in such manner shall be deemed to be made in accordance with the partners' interests in the partnership. See example (11) of paragraph (b)(5) of this section. For rules applicable to the allocations with respect to the investment tax credit allowable by section 38, see § 1.46–3(f)(2). Allocations made in accordance with § 1.46–3(f)(2) shall be deemed to be made in accordance with the partners' interests in the partnership.

(iii) *Percentage depletion.* Allocations of percentage depletion after the adjusted basis of the depletable property has been reduced to zero do not properly give rise to adjustments to the partners' capital accounts. Thus, under paragraphs (b)(2)(iv)(*a*) and (b)(2)(ii)(*a*) of this section, such allocations cannot have economic effect and such percentage depletion must be allocated in accordance with the partners' interests in the partnership. (Special rules relating to oil and gas properties are contained in paragraphs (b)(2)(iv)(*c*)(*3*) and (b)(4)(v) of this section.) If all items of income, gain, loss, and deduction from the depletable property are allocated among the partners in the same manner, and if those allocations either have substantial economic effect or are deemed to be in accordance with the partners' interests in the partnership, then an allocation of percentage depletion in excess of the adjusted basis of such property in such manner shall be deemed to be made in accordance with the partners' interests in the partnership. See example (12) of paragraph (b)(5) of this section.

(iv) *Nonrecourse debt.* Allocations of loss or deduction (or item thereof) attributable to nonrecourse debt which is secured by partnership property do not have substantial economic effect since the creditor bears the economic burden of any losses attributable thereto. Thus, such allocations must be made in accordance with the partners' interests in the partnership. A loss or deduction (or item thereof) is attributable to nonrecourse debt which is secured by partnership property to the extent of the excess of the outstanding principal balance of such debt (excluding any portion of such principal balance which would not be treated as an amount realized under section 1001 and paragraph (a) of § 1.1001–2 if such debt were foreclosed upon) over the adjusted basis of such property. This excess represents the minimum taxable gain (whether taxable as capital gain or as ordinary income) which would be recognized by the partnership if the nonrecourse debt were foreclosed upon and the partnership property securing such debt were transferred to the creditor in satisfaction thereof; it is hereinafter referred to as the "minimum gain." Allocations of loss or deduction (or item thereof) attributable to nonrecourse debt which is secured by partnership property shall be deemed to be made in accordance with the partners' interests in the partnership if requirements (*a*), (*b*), and (*c*) of paragraph (b)(2)(ii) of this section are satisfied, or if the capital account equivalence test of paragraph (b)(2)(iv)(*b*) of this section is satisfied, or if requirements (*a*) and (*b*) of paragraph (b)(2)(ii) of this section are satisfied and:

(*a*) The allocation of loss or deduction (or item thereof) attributable to nonrecourse debt which is secured by partnership property does not cause the sum of the deficit capital account balances of the partner or partners receiving such allocations (excluding the portion of such deficit balances that must be restored to the partnership upon liquidation) to exceed the minimum gain (determined at the end of the partnership taxable year to which the allocations relate), and

(*b*) The partnership agreement provides that the partner or partners with deficit capital account balances resulting in whole or in part from allocations of loss or deduction (or item thereof) attributable to nonrecourse debt which is secured by partnership property shall, to the extent possible, be allocated income or gain (or item thereof) in an amount no less than the minimum gain and at a time no later than the time at which the minimum gain is reduced below the sum of such deficit capital account balances. See example (17) of paragraph (b)(5) of this section. If the partners' interests in allocations of loss or deduction (or item thereof) attributable to nonrecourse debt which is secured by partnership property are varied among taxable years in order to reduce the overall tax liabilities of the partners (other than variations resulting solely from the admission or retirement of a partner), allocations made pursuant to such variation shall not be deemed to be in accordance with the partners' interests in the partnership under this subdivision. See example (17)(vi) of paragraph (b)(5) of this section. For purposes of computing the sum of the partners' deficit capital account balances referred to in requirement (*a*) above, if any property (including cash) is held by the partnership at the end of the partnership taxable year and there is a reasonable expectation that such property will be distributed to a partner (other than in liquidation of the partnership) prior to a corresponding increase in such partner's capital account, such property shall be treated as having been distributed to such partner on the last day of such taxable year. Also, for purposes of requirement (*a*) above, the minimum gain shall be reduced by the cost of any capital improvements to be made to the subject property and the amount of any principal payments to be made with respect to the nonrecourse debt secured by such property to the extent there is a reasonable expectation that such improvements or payments will, without regard to this sentence, reduce the minimum gain below the sum of the deficit capital account balances referred to in requirment (*a*) above. If, after the application of the previous two sentences, an event nonetheless causes the sum of the partners' deficit capital account balances referred to in requirements (*a*) above to exceed the minimum gain, requirements (*a*) and (*b*) above shall be deemed satisfied provided partnership income, gain, loss, and deduction (or item thereof) are thereafter allocated in a manner which

reduces and eliminates the excess as rapidly as possible. For purposes of this paragraph, the term "nonrecourse debt" means a partnership liability with respect to which none of the partners has any personal liability as determined under paragraph (e) of § 1.752–1.

(v) *Allocations relating to section 613A(c)(7)(D).* If the partnership agreement provides for an allocation of the adjusted basis of an oil or gas property among the partners, that allocation shall be deemed to be made in accordance with the partners' interests in partnership capital or income under section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3 provided all partnership allocations of income, gain, loss, and deduction (or item thereof) are valid under this paragraph. Otherwise, such adjusted basis must be allocated pursuant to section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3 in accordance with the partners' actual interests in partnership capital or income. In determining the partners' allocable shares of the amount realized from the partnership's taxable disposition of an oil or gas property under paragraph (e) of § 1.613A–3, the portion of the amount realized that represents recovery of the partnership's adjusted basis in the property (maintained solely for capital account purposes) shall be allocated to the partners in the same proportion as such partners (or their predecessors in interest) where allocated adjusted basis with respect to such property. An allocation of the portion of the amount realized which exceeds the partnership's adjusted basis in the property (maintained solely for capital account purposes) shall be deemed to be made in accordance with the partners' allocable shares of such amount realized for purposes of paragraph (e) of § 1.613A–3 provided all partnership allocations of income, gain, loss, and deduction (or item thereof) are valid under this paragraph. Otherwise, the partners' allocable shares of such amount realized shall for purposes of paragraph (e) of § 1.613A–3 be determined in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. See example (19) of paragraph (b)(5) of this section. Allocations of basis and amount realized under this subdivision shall have no effect on the partners' capital accounts, as capital account adjustments relating to section 613A(c)(7)(D) are made under paragraph (b)(2)(iv)(*c*)(3) of this section.

(vi) *Amendments to partnership agreement.* For purposes of this paragraph the partnership agreement includes all agreements among the partners concerning the affairs of the partnership, whether oral or written, and whether or not embodied in the document referred to as the partnership agreement. If an allocation has substantial economic effect or is deemed to be made in accordance with the partners' interests in the partnership under this paragraph because of the terms of the partnership agreement in effect during the taxable year to which such allocation relates, and the terms of the partnership agreement are thereafter modified, (*a*) the tax consequences of the modification will be closely scrutinized, (*b*) the facts and circumstances surrounding the modification will be closely examined to determine whether it was part of the original agreement, (*c*) prior allocations may be reallocated in a manner consistent with the modified terms of the agreement, and (*d*) subsequent allocations may be reallocated in a manner consistent with the original terms of the partnership agreement. A reallocation made under (*c*) or (*d*) above shall be deemed to be made in accordance with the partners' interests in the partnership. See example (17)(vii) of paragraph (b)(5) of this section.

(vii) *Recapture.* For special rules applicable to the allocation of recapture income or credit, see §§ 1.1245–1(e), 1.1250–1(f), 1.1254–1(c) and 1–47–6(a).

(5) *Examples.* The operation of the rules in this section is illustrated by the following examples:

Example (1). (i) A and B form a general relationship with cash contributions of $40,000 each which are used to purchase depreciable personal property at a cost of $80,000. The partnership agreement provides that A and B will have equal shares of taxable income and loss (computed without regard to cost recovery deductions) and cash flow and that all cost recovery deductions on the property are to be allocated to A. The agreement further provides that all allocations are reflected in the capital accounts of A and B maintained in accordance with paragraph (b)(2)(iv) of this section) but that each partner will be entitled to equal distributions upon liquidation regardless of capital account balances. In the partnership's first taxable year it recognizes no taxable income or loss from operations except for a $20,000 cost recovery deduction which is allocated entirely to A. The fact that A and B will be entitled to equal distributions on liquidation despite the fact that A is allocated the entire $20,000 cost recovery deduction indicates that A does not bear the full risk of loss represented by such deduction. Therefore, the allocation lacks economic effect and will be disregarded. The fact that the partners made equal contributions to the partnership, share equally in other taxable income and loss and cash flow, and will share equally in liquidation proceeds indicates that their actual economic arrangement was to bear the risk imposed by the potential decrease in the value of the property equally. Thus, under paragraph (b)(3) of this section, the partners' interests in the partnership are equal and the cost recovery deduction will be so allocated between A and B.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that liquidation proceeds will be distributed in accordance with capital account balances if the partnership is liquidated during the first five years of its existence but that liquidation proceeds will be distrubuted equally if the partnership is liquidated thereafter. Since capital accounts do not govern the distribution of liquidation proceeds during the entire term of the partnership the partnership allocations have no economic effect and must be reallocated in accordance with the partners' interests in the partnership.

(iii) Assume the same facts as in (i) except that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, and that following the liquidation no partner is required to fund any deficit in his capital account for distribution to partners with positive capital accounts balances.

	A	B
Capital account upon formation	$40,000	$40,000
Less: cost recovery deduction	(20,000)	0
Capital account at end of year 1	20,000	40,000

If the property were then sold for $60,000 (its adjusted basis), $40,000 would be distributed to B and $20,000 would be distributed to A. The allocation of the $20,000 cost recovery deduction to A has substantial economic effect.

(iv) Assume the same facts as in (iii) and that in the partnership's second taxable year it again recognizes no taxable income or loss from operations except for a $25,000 cost recovery deduction which is allocated entirely to A. Assume further that the partnership does not expect to make any distributions prior to liquidation.

	A	B
Capital account at beginning of year 2	$20,000	$40,000
Less: cost recovery deduction	(25,000)	0
Capital account at end of year 2	(5,000)	40,000

If the property were then sold for $35,000 (its adjusted basis) the $35,000 would be distributed to B. Since B, and not A, bears the economic burden or risk of $5,000 of the $25,000 cost recovery deduction, that portion will be allocated to B under paragraph (b)(3) of this section. The allocation of $20,000 of the $25,000 cost recovery deduction to A has substantial economic effect since he bears the economic burden or risk associated with that portion of the deduction.

(v) Assume the same facts as in (iv) except that the cost recovery deduction for the year is $20,000 instead of $25,000 and that the property is sold at the end of the year for $35,000 for a $5,000 taxable loss of ($40,000 adjusted basis less $35,000 sales price).

	A	B
Capital account at beginning of year 2	$20,000	$40,000
Less: cost recovery deduction	(20,000)	0
Less: loss on sale	(2,500)	(2,500)
Capital account at end of year 2	(2,500)	37,500

Under the agreement, the $35,000 sales proceeds would be distributed to B. However, since B bears the entire economic burden of the $5,000 loss on the sale of the property, the allocation of $2,500 of that loss to A will not be recognized and the entire $5,000 taxable loss will, under paragraph (b)(3) of this section, be reallocated to B.

(vi) Assume the same facts as in (iv) except that the partnership agreement also provides that, following the distribution of liquidation proceeds, partners are required to restore to the partnership the deficit balance in their capitals accounts (as set forth in paragraph (b)(2)(ii)(*c*) of this section). Thus, if the property were sold for $35,000 at the end of year 2, the $35,000 would be distributed to B, A would contribute $5,000 to the partnership (the deficit balance in his capital account), and an additional $5,000 would be distributed to B. The allocation of the $25,000 cost recovery deduction to A has substantial economic effect. But see section 704(d) and section 465.

(vii) Assume the same facts as in (vi) except that the partnership agreement also provides that any gain (whether ordinary income or capital gain) upon the sale of the property will be charged back to A to the extent of the prior allocations of cost recovery deductions to him, and additional gain will be allocated equally between A and B. The gain chargeback provision affects the economic arangement between A and B even though it means that A will suffer a loss only to the extent that the partnership suffers a loss due to the decrease in the value of the property. Thus, the gain chargeback provision has substantial economic effect and will not render valid or invalid the prior allocations of cost recovery deductions to A. This is the result even if, at the time of the allocations of cost recovery deductions to A, there was a strong likelihood that there will be gain on the sale of the property in an amount sufficient to offset the cost recovery deductions allocated to A.

(viii) Assume the same facts as in (iii) except that the property is not sold and that at the beginning of year 2 A and B each sell 30 percent of their respective partnership interests to LK for $15,000 apiece. If the partnership does not have a section 754 election in effect, A's adjusted capital account will be $14,000 (70 percent of $20,000), B's adjusted capital account will be $28,000 (70 percent of $40,000), and LK's adjusted capital account will be $18,000 (the sum of 30 percent of $20,000 and 30 percent of $40,000). If the partnership has a section 754 election in effect, A's and B's capital accounts will again equal $14,000 and $28,000, respectively, but LK's adjusted capital account may under the partnership agreement be reflected at $30,000 representing the sum of the adjusted capital accounts of the purchased interests ($12,000+$0,000=$18,000) plus the amount of his section 743 basis adjustment ($12,000). Assume that the section 754 election is in effect, the section 743 basis adjustment is reflected in LK's capital account, and prior to the end of year 2 the property is sold for $60,000. Although there is no partnership taxable gain or loss allocable among the partners (since the partnership's common adjusted basis in the property is $60,000), pursuant to section 743 and § 1.743–1 LK will recognize a taxable loss of $12,000 attributable to his special basis adjustment. LK's capital account will be reduced accordingly and the liquidation proceeds of $60,000 will be distributed in accordance with the partners' capital account balances ($14,000 to A, $28,000 to B, and $18,000 to LK). If the partnership agreement does not provide for capital account adjustments to reflect section 743 basis adjustments, LK's capital account will equal $18,000. When the property is sold for $60,000 LK's capital account will not be adjusted downward $12,000 to reflect the loss attributable to his special basis adjustment and the liquidation proceeds will be distributed in accordance with the partners' capital account balances ($14,000 to A, $28,000 to B, and $18,000 to LK).

(ix) Assume the same facts as in (iii) except that the property is not sold and that at the beginning of year 2 A and B each sell 70 percent of their respective partnership interests to LK for $35,000 each. Assume further that the partnership's property is real property and that cost recovery deductions on such property are determined on a straight line basis. The partnership will terminate under section 708(b)(1)(B) and there will be a constructive liquidation and reformation under paragraph (b)(1)(iv) of § 1.708–1. The capital accounts of A, B, and LK in the reconstituted partnership will be redetermined under paragraph (b)(2)(iv)(*c*)(*1*) of this section with reference to the cash and the adjusted basis of the property deemed contributed by each of them. The adjusted basis of the property deemed contributed to the partnership by LK is equal to the $70,000 paid to A and B. The adjusted basis of the property deemed contributed to the partnership by A and B is equal to $6,000 and $12,000, respectively, representing 30 percent of the pre-sale adjusted bases of their respective partnership interests. Thus, the redetermined capital accounts of A, B, and LK will be $6,000, $12,000, and $70,000, respectively.

Example (2). (i) C and D form a general partnership solely to acquire and lease a computer. Each contributes $50,000 and the partnership obtains a $900,000 recourse loan. The partnership agreement provides that the partners may not liquidate the partnership without unanimous consent, that the first $300,000 of taxable loss (determined under section 702(a)(8)) is to be allocated to C, and that all other taxable income and loss (determined under section 702 (a)(8)) is shared equally between C and D. The partnership agreement further provides that the allocation of $300,000 of taxable loss to C and all other allocations will be properly reflected in the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, and any partner with a deficit balance in his capital account will be liable to the partnership to restore that deficit balance (as set forth in paragraph(b)(2)(ii)(*c*) of this section). The allocation of the $300,000 of losses to C has substantial economic effect. The result would be the same if the liability to restore deficit capital account balances is omitted from the partnership agreement but an identical liability is imposed under state law. The result would be the same if the partnership agreement also provides that upon sale of the computer the first $300,000 of gain (whether ordinary income or capital gain) will be allocated to C.

(ii) Assume the same facts as in (i) except that instead of allocating the first $300,000 of taxable loss (determined under section 702(a)(8)) to C, the partnership agreement provides that taxable loss will be allocated 99 percent to C and one percent to D until such time as the partnership has taxable income (determined under section 702(a)(8)). Thereafter, C will be allocated 99 percent of such taxable income until he has been allocated taxable income equal to the taxable loss previously allocated to him. Assume further that the computer is 3-year property for purposes of section 168. The partnership enters into a 6 year lease with a major corporation under which the partnership expects to have a taxable loss in each of the first 3 taxable years due to accelerated cost recovery deductions attributable to the computer and taxable income in each of the following 3 taxable years due to the absence of such cost recovery deductions. Assume that there is a strong likelihood that the aggregate taxable loss in the second 3 year period will exceed the aggregate taxable loss in the first 3 year period and that the allocations will result in a reduction in the overall tax liabilities of the partners. Under these facts, the allocations have substantial economic effect. There cannot have been a strong likelihood at the time the allocations were provided for in the partnership agreement that the economic effect of such allocations would be transitory due to largely offsetting allocations, since the computer is deemed to decrease in value to zero at the end of year 3 in accordance with its accelerated cost recovery deduction schedule.

Example (3). E and F, each of whom is engaged as a sole proprietor in the business of developing and marketing experimental electronic devices, enter into a partnership agreement to develop and market experimental electronic devices. E contributes $2,500 cash and agrees to devote his full-time services to the partnership. F contributes $100,000 cash and agrees to obtain a loan for the partnership for any

additional capital needs. The partnership agreement provides that the full amount of any research and experimental expenditures and any interest expense on partnership loans are to be allocated to F and will reduce F's capital account. Furthermore, F's distributive share is 90 percent of all other partnership income or loss (computed without regard to such research and experimental expenditures and such interest expense), until F has been allocated income equal to the sum of such research and experimental expenditures, such interest expense, and his share of any partnership losses. During this time, E's distributive share will be 10 percent. Thereafter, E and F will share income and loss equally. These allocations are properly reflected in E's and F's capital accounts (maintained in accordance with paragraph(b)(2)(iv) of this section). The partnership agreement provides that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with capital account balances and that each partner is liable to restore to the partnership any deficit balance in his capital account (as set forth in paragraph(b)(2)(ii)(*c*) of this section). The allocations described above have economic effect. Furthermore, that economic effect is substantial since there was not a strong likelihood at the time the allocation of research and experimental expenditues and interest expense on partnership loans to F was provided for in the partnership agreement that the economic effect of such allocations would be transitory due to largely offsetting allocations.

Example (4). G and H contribute $75,000 and $25,000, respectively, in forming a general partnership. The partnership agreement provides that income, gain, loss, and deduction will be allocated equally even though cash flow from operations and cash proceeds from a sale or a refinancing of partnership assets will, regardless of capital account balances, be distributed 75 percent to G and 25 percent to H. Partners are not required upon liquidation to restore deficit capital account balances to the partnership for distribution to partners with positive capital accounts balances. The allocations in the partnership agreement do not have economic effect. Because the partnership agreement indicates that all economic profits and losses of the partnership are to be shared in a 75–25 ratio, G's interest in the partnership's income, gain, loss and deduction is 75 percent; H's interest in the partnership's income, gain, loss and deduction is 25 percent.

Example (5). (i) Partners I and J generally share equally in the profits and losses of their general partnership. The partnership agreement provides that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances (maintained in accordance with paragraph (b)(2)(iv) of this section) and that any partner with a deficit in his capital account following the liquidating distribution must restore the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). For a taxable year in which I expect to have a large amount of income from other sources but J does not, the partnership agreement is amended (at the beginning of the taxable year) to allocate all the capital gain to I and all the ordinary income to J for that year only. The partnership has $4,900 of net capital gain and $5,100 of ordinary income for the taxable year. The partnership makes no distribution during the year. The capital accounts of the partners continue to be adjusted on a 50–50 basis to reflect an increase of $5,000, indicating that I and J are continuing to share equally in the economic proceeds of the partnership. These allocations do not have economic effect because the allocations are not reflected by appropriate adjustments to capital accounts. Therefore, the allocations will be disregarded and both types of income will be reallocated (under paragraph (b)(3) of this section) in accordance with the partners' interests in the partnership. Since I and J generally share equally in the profits and losses of the partnership, and will be entitled to equal distributions upon liquidation, they will each be allocated $2,450 of net capital gain and $2,550 of ordinary income.

(ii) Assume the same facts as in (i) except that I's capital account is credited with $4,900, while J's is credited with $5,100, and the capital accounts are otherwise maintained in accordance with paragraph (b)(2)(iv) of this section. Assume further that at the time the partnership agreement is amended (at the beginning of the taxable year) there is a strong likelihood that the difference between the amount of expected partnership capital gain and the amount of expected partnership ordinary income for the taxable year will be relatively insignificant. Although each partner receives the full economic benefit of the allocation received, the actual dollar amount of the partner's shares is affected by only $200. J has increased receipts of $100, and I has decreased receipts of $100. This is a minor shift in economic consequences when compared to the shift in tax consequences resulting from the allocations (taking into account the partners' nonpartnership tax attributes). Consequently, although the allocations have economic effect, the economic effect is not substantial when weighed against the effect on tax consequences. Therefore, the allocations will be disregarded and both types of income will be reallocated in accordance with the partners' interests in the partnership.

(iii) Assume the same facts as an (ii) except that at the time the partnership agreement is amended (at the beginning of the taxable year) there is not a strong likelihood that the relative difference between the amount of expected partnership ordinary income for the taxable year will be insignificant. (See the presumption described in paragraph (b)(2)(ii)(*a*) of this section.) The allocations of the $4,900 capital gain to I and the $5,100 ordinary income to J have substantial economic effect.

Example (6). (i) K and L are equal partners in a general partnership formed to acquire and operate property described in section 1231(b). For a year in which the partnership expects to incur losses on the sale of a portion of such property, the partnership agreement is amended (at the beginning of the taxable year) to allocate such losses to K, who expects to have no gains from the sale of depreciable property described in section 1231(b), and to allocate an equivalent amount of partnership loss or deduction for that year of a different character to L, who expects to have such gains. Any deductions or losses in excess of these allocations are allocated equally between K and L. The amendment is effective only for that taxable year. All allocations are properly reflected by appropriate adjustments to each partner's capital account (maintained in accordance with paragraph (b)(2)(iv) of this section), the partnership agreement provides that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with capital account balances and that any partner with a deficit in his capital account following the liquidating distribution must restore the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). Although these provisions signify the presence of economic effect, whether that economic effect is considered substantial depends on the likelihood that the partnership will incur deductions or losses in the taxable year other than from the sale of property described in section 1231(b) in an amount that will largely offset the expected amount of losses from the sale of such property. If at the beginning of the taxable year there is a strong likelihood that this will occur, the economic effect of the allocations will not be considered substantial.

(ii) Assume the same facts as in (i) except that the amendment to the partnership agreement provides that K will be allocated losses attributable to the sale of the property described in section 1231(b) and that all other deductions and losses of the partnership will be allocated to L. Assume further that at the beginning of the taxable year there is not a strong likelihood that there will be little or no difference between the amount of losses from the sale of the property described in section 1231(b) for the taxable year and the amount of other losses and deductions for such year. (See the presumption described in paragraph (b)(2)(ii)(*a*) of this section.) The allocations have substantial economic effect.

Example (7). (i) Rather than impair the credit standing of the MN general partnership by a distribution, the partners agree to invest surplus partnership funds in equal dollar amounts in tax-exampt municipal bonds and corporate stock. The partners further agree that M is to be allocated 90 percent and N 10 percent of the interest income and gain or loss from the sale of the tax-exempt bonds, and that M is to be allocated 10 percent and N 90 percent of the dividend income and gain or loss from the sale of the corporate stock. These allocations will be reflected by appropriate adjustments to capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances and any partner with a deficit in his capital account following the liquidating distribution will contribute the amount of such deficit to the partnership (as set forth in paragraph

(b)(2)(ii)(*c*) of this section). These allocations have substantial economic effect.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that the allocations only apply to the first $10,000 of interest income from the municipal bonds and dividend income from the corporate stock and are effective only for the partnership's first taxable year. All other income, gain, loss, and deduction will be allocated equally between M and N. Assume that at the beginning of its first taxable year there is a strong likelihood that in such taxable year the partnership will earn more than $10,000 with respect to both investments. Under these facts, the allocations have economic effect, but the economic effect is not substantial when weighed against the likelihood that the allocation will merely affect the character for tax purposes of the income that is earned by each partner. If at the beginning of its first taxable year there is not a strong likelihood that (*a*) the partnership will earn more than $10,000 of income with respect to both investments in such taxable year, and (*b*) that the relative difference between the amounts of income earned from the two investments in such taxable year will be insignificant, then the economic effect of the allocations is substantial. In this regard, see the presumption described in paragraph (b)(2)(ii)(*a*) of this section.

Example (8). (i) O and P are equal partners in the OP general partnership. Partner O has a net operating loss carryover from another venture which is due to expire in the current taxable year. The partnership agreement provides that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances and further provides that any partner with a deficit in his capital account following the liquidating distribution will contribute the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). The partnership agreement is amended (at the beginning of the taxable year) to allocate all the taxable income for the year to O. Future losses are to be allocated to O, and future income to P until the excess allocation of income to O is offset. It is further orally agreed that, in the event that the partnership is liquidated prior to such recovery, O's capital account will be adjusted downward to the extent the excess income allocations to O have not been offset and the proceeds of the liquidation will be distributed in accordance with adjusted capital account balances. The allocations described in this example lack economic effect and will be disregarded.

(ii) Assume the same facts as in (i) except that there is no agreement that O's capital account will be adjusted downward to the extent of any unrecovered excess income allocation to O. Assume also that the partnership agreement prohibits a liquidation in the absence of unanimous consent and that the income of the partnership is generated entirely by fixed interest payments received from AAA rated corporate bonds. Notwithstanding the fact that the allocation has economic effect, as evidenced by adjustments to the partners' capital accounts, the allocation would significantly reduce the overall tax liabilities of the partners and at the time the allocation is provided for in the partnership agreement there is a strong likelihood that the economic effect of the allocation will be transitory due to largely offsetting allocations to O and P. Consequently, the economic effect of the allocation of income to O is not substantial. If, based upon the attendant business factors (*e.g.*, rating of the debt instrument, amounts of income stream, agreement concerning liquidation, etc.) there is not a strong likelihood that the economic effect of the allocation of income to O will be offset by allocations to O and P, such allocation has substantial economic effect.

Example (9). Q and R form QR general partnership, a law firm. The partnership agreement provides that fees for acting as a fiduciary are to be allocated 90 percent to Q and 10 percent to R, and all remaining income and loss is to be allocated to Q and R equally. The partnership agreement also provides that all allocations of income and loss will be properly reflected in the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, and that any partner with a deficit balance in his capital account following the distribution of such proceeds will contribute the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section. The allocations made under the partnership agreement have substantial economic effect.

Example (10). (i) S and T form a general partnership to operate a travel agency. The partnership agreement provides that T, a nonresident alien, is to be allocated all income and loss derived from operations conducted by him within his country, and all remaining income and loss is to be allocated equally. The partnership agreement provides that allocations of income and loss will be reflected in the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with capital account balances, and that any partner with a deficit balance in his capital account following the distribution of such proceeds will contribute the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). The allocations made under the partnership agreement have substantial economic effect.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that all income and loss is to be shared equally, but that T will be allocated all income and loss from operations conducted by him within such country as a part of his equal share up to the amount of his share. The allocation to T of the foreign source income does not have substantial economic effect. The foreign source income shall, along with the other income of the partnership, be allocated equally between S and T.

Example (11). U and V equally share all the income gain, loss, and deduction of the UV general partnership. The agreement provides that allocations will be reflected by appropriate adjustments to U's and V's capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with capital account balances, and that any partner with a deficit balance in his capital account following the liquidating distribution will restore the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). For one taxable year the partnership has qualified first-year wages of $6,000 and is entitled to a $3,000 targeted jobs tax credit under sections 44B and 51 of the Code. The partnership agreement allocates the credit to U. The allocation lacks substantial economic effect because the wage expenses are shared equally. At the beginning of the next taxable year, the partnership agreement is amended to charge U with all wage payments whether or not such wages qualify for the credit. In that taxable year the UV partnership pays $8,000 in total wages to its employees. Assume that the partnership has no other income, gain, loss, or deduction for the year and that $6,000 of the $8,000 in wages constitutes qualified first-year wages. U is allocated the entire deduction attributable to the $6,000 of qualified first-year wages ($6,000−$3,000 reduction under section 280C=$3,000) as well as the deduction for the other $2,000 in wage expenses. His capital account is debited by that $5,000 ($3,000+$2,000). Assume that the allocations of the wage deductions have substantial economic effect. Under paragraph (b)(4)(ii) of this section, the allocation of the entire wage credit to U will be deemed to be in accordance with the partner's interests in the partnership. In addition, under paragraph (b)(3) of this section, U has a 100 percent interest in the $3,000 section 705(a)(2)(B) adjustment attributable to the $3,000 reduction in the deduction for qualified first-year wages, and his capital account is reduced accordingly.

Example (12). (i) W and X form a general partnership for the purposes of mining iron ore. W makes an initial contribution of $75,000, and X makes an initial contribution of $25,000. The partnership agreement provides that all items of income, gain, loss, and deduction will be allocated 75 percent to W and 25 percent to X, except that the entire percentage depletion deduction will be allocated to W. The agreement provides that the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section) will properly reflect these allocations, that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, and that any partner with a deficit balance in his capital account following the liquidating distribution must restore the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(c) of this section). Assume that for a taxable year when the adjusted basis of certain depletable property is $1,000, the percentage depletion deduction with respect to that property is $1,500. The allocation of the first $1,000 of such depletion to W has substantial economic effect and will be

recognized because such allocation is properly reflected in W's capital account. The allocation to W of the remaining $500 of depletion, representing the excess of percentage depletion over adjusted basis, does not have economic effect since such amount cannot be properly reflected in the partners' capital accounts. Furthermore, since W is allocated 100 percent of the cost depletion deduction and 75 percent of all other income, gain, loss, and deduction, the allocation to W of the $500 of percentage depletion over adjusted basis does not meet the test of paragraph (b)(4)(iii) of this section for being deemed to be made in accordance with partners' interests in the partnership. Therefore, this $500 excess is reallocated in accordance with the partners' interest in the partnership.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that 90 percent of all income, gain, loss, or deduction from the depletable property is allocated to W. Since the percentage depletion deduction is allocated in a manner consistent with valid allocations of all income, gain, loss, and deduction from the depletable property, the allocation of 90 percent of the percentage depletion in excess of adjusted basis to W will be deemed to be in accordance with his interest in the partnership under paragraph (b)(4)(iii) of this section.

Example (13). (i) Y and Z form a brokerage general partnership for the purpose of investing and trading in stock and securities. Y contributes cash of $10,000 and Z contributes securities of T corporation which have an adjusted basis of $3,000 and a fair market value of $10,000. The initial capital accounts of Y and Z are each fixed at $10,000. The partnership agreement provides that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances and that any partner with a deficit balance in his capital account following the liquidating distribution will contribute to the partnership an amount equal to such deficit (as set forth in paragraph (b)(2)(ii)(*c*) of this section). The agreement further provides that all income, gain, loss, deduction, and credit shall be shared equally between Y and Z. Thereafter, the partnership sells the securities of T corporation for $12,000, and the $9,000 gain ($12,000−$3,000) is allocated equally between Y and Z. The allocation of $7,000 of the $9,000 gain equally between Y and Z is not subject to section 704(b) or this paragraph but is governed by section 704(c) (1) and paragraph (c)(1) of § 1.704–1 and is valid thereunder. The allocation of the remaining $2,000 gain equally between Y and Z is subject to section 704(b) and this paragraph. Because the governing capital accounts of the partners are not based strictly on tax accounting principles (and thus are not maintained in accordance with paragraph (b)(2)(iv) of this section), the allocation of the $2,000 gain lacks substantial economic effect. Furthermore, since the $7,000 gain is allocated pursuant to section 704(c)(1) the allocation of the remaining $2,000 gain equally between Y and Z is not deemed to be made in accordance with the partners' interests in the partnership under paragraph (b)(4)(i) of this section. The $2,000 gain must be reallocated in accordance with the partners' actual interests in the partnership as determined under paragraph (b)(3) of this section to the extent the original allocation is inconsistent therewith.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that the taxable gain attributable to the precontribution appreciation in the value of the securities of T corporation will be allocated to Z and all other income, gain, loss, deduction, and credit shall be shared equally between Y and Z. When the securities of T corporation are sold for $12,000, $7,000 of the $9,000 gain is allocated to Z and the remaining $2,000 gain is allocated equally between Y and Z. The allocation of $7,000 of the $9,000 gain to Z is not subject to the provisions of section 704 (b) of this paragraph but is governed by section 704 (c)(2) and paragraph (c)(2) of § 1.704–1 and is valid thereunder. The allocation of the remaining $2,000 gain equally between Y and Z is subject to section 704(b) and this paragraph. Because the governing capital accounts of the partners are not based strictly on tax accounting principles (and thus are not maintained in accordance with paragraph (b)(2)(iv) of this section), the allocation of the $2,000 gain lacks substantial economic effect. However, since the $7,000 gain is allocated pursuant to section 704 (c)(2), and the requirements of paragraph (b)(4)(i) of this section are otherwise complied with, the allocation of the $2,000 gain equally between Y and Z is deemed to be made in accordance with the partners' interests in the partnership under paragraph (b)(4)(i) of this section.

(iii) Assume the same facts as in (ii) except that the initial capital accounts of Y and Z (maintained in accordance with paragraph (b)(2)(iv) of this section) are fixed at $10,000 and $3,000, respectively. When the securities of T corporation are sold for $12,000, $7,000 of the $9,000 gain is allocated to Z and the remaining $2,000 gain is allocated equally between Y and Z. The allocation of $7,000 of the $9,000 gain to Z is not subject to the provisions of section 704 (b) or this paragraph but is governed by section 704 (c)(2) and paragraph (c)(2) of § 1.704–1 and is valid thereunder. The allocation of the remaining $2,000 gain equally between Y and Z is subject to 704 (b) and this paragraph and has substantial economic effect.

Example (14). (i) MC and RW form a brokerage general partnership by each contributing $10,000. The $20,000 is invested in securities which appreciate to $50,000. At that time SK makes a $25,000 cash contribution to the partnership in order to become an equal one-third partner, which cash is placed in a bank account. Upon SK's admission to the partnership, the capital accounts of MC and RW (which were $10,000 each prior to SK's admission), are each adjusted upward (to $25,000) to reflect the appreciation in the partnership's assets occurring before SK entered the partnership. The partnership agreement provides that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances and that any partner with a deficit balance in his capital account following the liquidating distribution will contribute to the partnership an amount equal to such deficit (as set forth in paragraph (b)(2)(ii)(*c*) of this section). Subsequently, when the value of the securities has appreciated to $74,000, they are sold. Of the $54,000 taxable gain on the sale of the securities, $24,000 (the appreciation in value occurring after SK became a partner) is allocated in equal shares to MC, RW, and SK, in accordance with the ratio for sharing profits and losses generally. The $30,000 balance is, under the principles contained in section 704(c)(2) and § 1.704–1(c)(2), allocated to MC and RW in proportion to their interests in the partnership before SK became a partner. These latter allocations attribute to MC and RW the unrealized appreciation in value of the securities occurring before SK became a partner, and accurately reflect the adjustments previously made to the capital accounts upon the entry of SK. Although such allocations have no economic effect (since they will not be reflected in MC's and RW's capital accounts), the allocation will be deemed to be made in accordance with the partners' interests in the partnership under paragraph (b)(4)(i) of this section.

(ii) Assume the same facts as in (i) except that upon the admission of SK the capital accounts of MC and RW are not adjusted upward from $10,000 to $25,000 to reflect the appreciation in the partnership's assets occurring before SK entered the partnership. Rather, upon SK's admission to the partnership the partnership agreement is amended to provide that the first $30,000 of taxable gain upon the sale of such assets will be allocated equally between MC and RW, and that any additional gain will be allocated equally between MC, RW and SK. When the securities are sold for $74,000 the $54,000 of taxable gain is so allocated and the allocations are properly reflected in the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section). These allocations of taxable gain have substantial economic effect.

(iii) Assume the same facts as in (ii) except that instead of selling the securities, the partnership is liquidated. In winding up, the partnership makes a liquidating distribution of the securities (valued at $74,000) and the $25,000 cash. Prior to the distribution the partners' capital accounts are adjusted to reflect how the taxable gain ($54,000) would have been allocated if the securities had been sold for the $74,000 assigned value.

	MC	RW	SK
Capital account before adjustment	$10,000	$10,000	$25,000
Deemed sale adjustment	23,000	23,000	8,000
Pre-liquidation capital account	33,000	33,000	33,000

Pursuant to paragraph (b)(2)(iv)(*c*)(*2*) of this section liquidating distributions of the securities (with reference to their assigned values) and cash made in accordance with the preliquidation adjusted capital accounts

shall have no effect on the validity of prior partnership allocations.

Example (15). JB and CC form a limited partnership for the purpose of purchasing and leasing out residential real estate. JB, the limited partner, contributes $18,000, and CC, the general partner, contributes $2,000 and the partnership purchases a building for $100,000, assuming a recourse mortgage of $80,000 which requires the payment of interest only for a period of three years. The partnership agreement provides that JB need not contribute any further capital, that the partners' shares of taxable income and loss (determined under section 702(a)(8)) will be 90 percent for JB and 10 percent for CC, that the allocation of income or loss will be reflected in the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), and that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with capital account balances. In the partnership's first two taxable years it has no taxable income or loss except for cost recovery deductions of $15,000 in each year. At the end of the partnership's second taxable year it has no cash (or cash equivalents) on hand. Under the partnership agreement JB's and CC's distributive shares of the first year's loss are $13,500 and $1,500, respectively. Thus at the end of the first year the partners' capital accounts will be as follows:

	JB	CC
Capital account upon formation	$18,000	$2,000
Less: distributive share of loss for year 1	(13,500)	(1,500)
Capital account at end of year 1	4,500	500

Since the partnership agreement provides for distributions upon liquidation in accordance with these accounts, each partner will bear the full risk of economic loss which corresponds to the allocations of tax loss. If the actual economic loss is equal to the tax loss, upon liquidation the partnership would have only $5,000 to distribute: $4,500 to JB and $500 to CC. Thus the first year allocations possess substantial economic effect. The effect upon the capital accounts of the second year's allocation would be as follows:

	JB	CC
Capital account at beginning of year 1	$4,500	$500
Less: distributive share of loss for year 2	(13,500)	(1,500)
Capital account at end of year 2	(9,000)	(1,000)

Since JB is not required to contribute any further capital to the partnership, the allocation to JB in excess of his capital account represents a deduction with respect to which CC bears the economic risk of loss. Since JB only bears the risk of loss with respect to $4,500 of the allocation, the remaining $9,000 of the allocation lacks economic effect. The $9,000 loss will be reallocated in accordance with the partners' interests in the partnership. Since under the economic arrangement of the partners CC bears the risk of all other economic loss, such $9,000 of net taxable loss will, under paragraph (b)(3) of this section, be reallocated to CC. Similarly, for following years, absent an increase in JB's capital account, all taxable loss must be allocated (or reallocated) to CC. (But see section 704(d).)

Example (16): (i) KG and HS form a limited partnership for the purpose of investing in improved real estate. KG, the general partner, contributes $10,000 to the partnership and HS, the limited partner, contributes $990,000 to the partnership. The $1,000,000 is used to purchase an apartment building on leased land. Capital accounts are maintained in accordance with paragraph (b)(2)(iv) of this section but upon liquidation the limited partner, HS, is not required to restore any deficit balance in his capital account. The partnership agreement provides that (1) cash will be distributed first to HS until such time as he has received the amount of his original capital contribution ($990,000), next to KG until such time as he has received the amount of his original capital contribution ($10,000), and thereafter equally between HS and KG; (2) income, gain, loss, and deduction from operations will be allocated 99% to HS and 1% to KG until such time as HS has received the amount of his original capital contribution and thereafter will be allocated equally between HS and KG; and (3) upon sale of the property, gain or loss on the sale will (after distributing sales proceeds so that the partners have received, in the aggregate, distributions equal to their original capital contributions) be allocated in a manner which will (to the extent possible) make the partners' positive capital account balances equal. The allocation and distribution provisions may result in HS having a deficit balance in his capital account following liquidation and KG having a positive balance in his capital account following liquidation (in an amount equal to HS' deficit balance). Since HS is not required to restore the amount of such deficit to the partnership (for distribution to KG), the allocations provided in the partnership agreement do not have substantial economic effect.

(ii) Assume the same facts as in (i) except that each partner is liable to restore to the partnership any deficit balance in his capital account (as set forth in paragraph (b)(2)(ii)(*c*) of this section). Although liquidation proceeds are not required to be distributed in accordance with the partners' capital account balances, the capital account equivalence test of paragraph (b)(2)(iv)(*b*) of this section is satisfied. Thus, the allocations provided in the partnership agreement have substantial economic effect.

Example (17). (i) JS and WN form a general partnership to acquire and operate an apartment building. JS and WN each contribute $100,000 to the partnership which obtains an $800,000 nonrecourse mortgage and purchases the apartment building (on leased land) for $1,000,000. No principal payments with respect to the nonrecourse obligation are required for 5 years. The partnership agreement provides that all income, gain, loss, and deduction will be allocated equally between JS and WN, with the exception of cost recovery deductions which will be allocated entirely to JS. The agreement also states that allocations will be reflected by appropriate adjustments to the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section), and that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with capital account balances, but that upon liquidation neither partner is required to restore to the partnership the deficit balance in his capital account for distribution to partners with positive capital account balances. In year 1, there is a $100,000 cost recovery deduction, all of which is charged to JS' capital account, and the partnership has no other taxable income or loss for the year. In year 2 the partnership has another $100,000 cost recovery deduction and no other taxable income or loss. Since the principal balance of the nonrecourse mortgage does not exceed the adjusted basis of the property, neither the year 1 or year 2 cost recovery deduction is attributable to the nonrecourse obligation. The allocation for year 1 has substantial economic effect. The allocation in year 2 of the $100,000 cost recovery deduction to JS does not have substantial economic effect because the economic risk of loss associated with such cost recovery deduction is borne entirely by WN. Therefore, the $100,000 cost recovery deduction in year 2 is reallocated to WN pursuant to paragraph (b)(3) of this section.

(ii) Assume the same facts as in (i) except that the partnership agreement is amended to require any partner with a deficit capital account following the distribution of liquidation proceeds to restore the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). In this case, the allocation of an additional $100,000 cost recovery deduction in year 2 to JS has substantial economic effect. The result in this example would be the same if the liability to restore capital account deficits is omitted from the partnership agreement but an identical liability is imposed under State law.

(iii) Assume the same facts as in (i). In year 3, the partnership has no taxable income or loss except for another $100,000 cost recovery deduction. The allocation of this deduction to JS (or to WN) has no economic effect since the risk of depreciation in excess of the partners' aggregate investment in the property is borne solely by the nonrecourse lender. Since the partnership agreement does not require JS to be allocated subsequent income and gain under the rule contained in paragraph (b)(4)(iv)(*b*) of this section, the allocation of the $100,000 cost recovery deduction to JS will not be deemed to be in accordance with his interest in the partnership, and must be reallocated in accordance with the partners' interests in the partnership.

(iv) Assume the facts in (iii) except that the partnership agreement also provides that pursuant to paragraph (b)(4)(iv) of this section JS will be allocated partnership income and gain in an amount equal to the

deficit balance in JS' capital account and that such allocations will coincide, in amount and time, with any reduction of the principal balance of the nonrecourse debt. Since the principal balance of the nonrecourse obligation ($800,000) exceeds the adjusted basis ($700,000) by $100,000 and JS is bearing the burden of taxation of taxable income and gain in an amount at least equal to the deficit balance of his capital account, requirements (*a*) and (*b*) of paragraph (b)(4)(iv) of this section are satisfied and the allocation of the $100,000 cost recovery deduction to JS in year 3 is deemed to be in accordance with his interest in the partnership.

(v) Assume the same facts as in (iii) except that the partnership agreement is amended to require any partner with a deficit capital account following the distribution of liquidation proceeds to restore the amount of such deficit to the partnership (as set forth in paragraph (b)(2)(ii)(*c*) of this section). If the property were foreclosed upon at the end of year 3, there would be $100,000 gain ($800,000 nonrecourse debt less $700,000 adjusted basis), which would be allocated equally between JS and WN. JS would then have a deficit capital account of $50,000 which he would be required to contribute to the partnership to satisfy WN's positive $50,000 capital account. Accordingly, the allocation of the $100,000 cost recovery deduction to JS in year 3 will, under paragraph (b)(4)(iv) of this section, be deemed to be in accordance with the partners' interests in the partnership.

(vi) Assume the same facts as in (iv) and that in year 4 the partnership has no taxable income or loss except for another $100,000 cost recovery deduction. In order to reduce the overall tax liabilities of the partners, the partnership agreement is amended at the beginning of year 4 to allocate the year 4 cost recovery deduction to WN. In addition, the agreement is amended to allocate partnership income or gain to WN in an amount equal to the deficit balance in his capital account and to require that such allocations coincide, in amount and time, with any principal reduction in the amount of nonrecourse debt. Since the allocations of loss or deduction attributable to nonrecourse debt are varied in year 4 in order to reduce the overall tax liabilities of the partners, the year 4 allocation will not be deemed to be in accordance with the partners' interests in the partnership under paragraph (b)(4)(iv) of this section and the $100,000 cost recovery deduction must be reallocated in accordance with the partners' actual interests in the partnership.

(vii) Assume the same facts as in (iv) except that in a taxable year of the partnership after the cost recovery deductions have been taken by JS, but before the property is disposed of, the partnership agreement is amended by deleting the provisions which require gain and income to be charged back to JS. Thus, under the amended agreement, JS is no longer required to bear the burden of taxation of the taxable income and gain in an amount at least equal to his deficit capital account balance. Under these facts, any allocation of income, gain, loss, or deduction made after deletion of the chargeback provisions has no substantial economic effect. As a result, income, gain, loss, and deductions must be allocated in accordance with the partners' interests in the partnership. Under the rule of paragaraph (b)(4)(vi) of this section, the interest of JS in the partnership taxable gain and income is deemed to be that interest which is consistent with the original gain and income chargeback provisions, and, therefore, gain and income is allocated to JS and WN in accordance with those provisions.

(viii) Assume the same facts as in (ii). Any tax preference under section 57(a)(12) attributable to the partnership's year 1 and year 2 cost recovery deductions shall be taken into account solely by JS. If during year 1 and year 2 the partnership's cost recovery deductions are instead allocated 75 percent to JS and 25 percent to WN (and all other income, gain, loss, and deduction is allocated equally between JS and WN), the tax preference attributable to such cost recovery deductions shall be taken into account 75 percent by JS and 25 percent by WN. If the partnership agreement instead provides that all taxable income or loss is allocated equally between JS and WN, the tax preference attributabe to the cost recovery deductions shall be taken into account equally between JS and WN. In this case, if the partnership has a $100,000 cost recovery deduction in year 1 and an additional operating loss of $100,000 in year 1, and purports to categorize the $100,000 loss allocated to JS as being attributable to the cost recovery deduction and the $100,000 loss allocated to WN as being attributable to the operating loss, such allocations will not be recognized and each partner will be allocated one-half of such operating loss and one-half of such cost recovery deduction, and each partner shall take into account one-half of the tax preference attributable to the cost recovery deduction.

Example (18). (i) WM and JL form a general partnership by each contributing $300,000 thereto. The partnership uses the $600,000 to purchase tangible personal property which it leases out. The partnership agreement provides that (1) allocations of income, gain, loss, and deduction will be appropriately reflected in the partners' capital accounts (maintained in accordance with paragraph (b)(2)(iv) of this section) and liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, (2) upon liquidation no partner will be required to restore any deficit in his capital account for distribution to partners with positive capital account balances, and (3) all income, gain, loss, and deduction of the partnership will be shared equally. In the partnership's first two taxable years it recognizes no taxable income or loss except for a $200,000 cost recovery deduction in each year which is allocated equally between WM and JL.

	WM	JL
Capital account upon formation	$300,000	$300,000
Less: cost recovery deductions for years 1 and 2	(200,000)	(200,000)
Capital account at end of year 2	100,000	100,000

The allocations of the cost recovery deductions in the partnership's first two taxable years have substantial economic effect.

(ii) Assume the same facts as in (i) except that MK enters the partnership at the beginning of year 3. At the time of his entry all parties agree that the fair market value of the partnership property is $600,000. MK contributes $300,000 to the partnership in exchange for an equal one-third interest in the partnership and the partners' book capital accounts, which will govern liquidating distributions, are each adjusted to $300,000.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000

The agreement complies with requirement (*b*) of paragraph (b)(4)(i) of this section, by providing that any gain attributable to the unrealized appreciation in partnership property prior to MK's entry ($600,000 agreed fair market value less $200,000 adjusted basis = $400,000) will, under principles the same as those contained in section 704(c)(2) and § 1.704–1(c)(2), be allocated to WM and JL in the same amounts as they were allocated the cost recovery deductions giving rise to such gain. Any additional gain will be allocated equally among the partners. Thus, if the property is sold for $600,000 immediately after MK's entry to the partnership, the $400,000 of gain will be allocated equally between WM and JL. The $900,000 of cash in the partnership ($600,000 sales proceeds plus $300,000 contributed by MK) will be distributed equally between WM, JL and MK in accordance with their adjusted capital account balances (which will be identical for tax and book purposes).

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Gain chargeback to JL and WM	200,000	0	200,000	0	0	0
Capital account before liquidating distribution	300,000	300,000	300,000	300,000	300,000	300,000

Since the allocation of taxable gain follows the prior booking of the corresponding unrealized appreciation the allocation will, under paragraph (b)(4)(i) of this section, be deemed to be in accordance with the partners' interests in the partnership. If the property were instead sold for $900,000 the additional $300,000 of gain would be allocated equally among the partners and the partners would each receive a $400,000 distribution in satisfaction of their respective capital account balances.

(iii) Assume the same facts as in (ii) except that after MK enters the partnership the property devalues and is sold for $450,000 yielding a taxable gain of $250,000 ($450,000 less $200,000 adjusted basis) but a book loss of $150,000. WM and JL would each be allocated $125,000 of the $250,000 gain. Since these allocations are designed to eliminate, to the extent possible, the disparity between tax and book capital accounts, pursuant to paragraph (b)(4)(i) of this section such allocations will be deemed to be in accordance with the partners' interests in the partnership.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$200,000	$350,000
Plus: Gain chargeback	125,000	0	125,000	0	0	0
Less: Book loss		(50,000)		(50,000)		(50,000)
Capital account prior to liquidating distribution	225,000	250,000	225,000	250,000	200,000	250,000

The discrepancy between book and tax capital accounts is attributable entirely to the ceiling rule of § 1.704–1(c)(2). Under paragraph (b)(4)(i) of this section, the partnership may distribute liquidation proceeds ($675,000) in accordance with book capital account balances and no determination will be required as to whether the allocations made in year 1 and year 2 are in accordance with the partners' interests in the partnership.

(iv) Assume the same facts as in (iii) except that the property devalues and is sold for its adjusted basis of $200,000, yielding no taxable gain or loss and a book loss of $400,000.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$200,000	$311,000
Plus: Gain chargeback	0	0	0	0	0	
Less: Book loss		(133,333)		(133,333)		(133,333)
Capital account before liquidation distribution	100,000	166,667	100,000	166,667	200,000	155,667

Again, the discrepancy between book and tax capital accounts is attributable entirely to the ceiling rule of § 1.704–1(c)(2). Under paragraph (b)(4)(i) of this section, the partnership may distribute liquidation proceeds ($500,000) in accordance with book capital accounts and no determination will be required as to whether the allocations made in year 1 and year 2 are in accordance with the partners' interests in the partnership.

(v) Assume the same facts as in (iv) except that the property is not sold at the beginning of year 3. Assume further that during that year the partnership has no taxable income or loss except for a $100,000 Cost recovery deduction and a 300,000 book depreciation deduction attributable to the property purchased by the partnership in year 1. Although the book capital accounts of the partners are adjusted equally to reflect the book depreciation, pursuant to the partnership agreement MK is allocated cost recovery deductions under principles the same as those contained in § 1.704–1(c)(2). Under those principles, MK would be entitled to cost recovery deductions of $200,000 over the remaining recovery period of the property because the value of the property was for book purposes determined to be $600,000 upon MK's admission to the partnership. Since upon such admission the adjusted tax basis of the property is $200,000, all further cost recovery deductions attributable to the property are allocated to MK, and under paragraph (b)(4)(i) of this section such allocations will be deemed to be in accordance with the partners' interests in the partnership.

(vi) Assume the same facts as in (v) and that in year 3 the partnership purchases a second item of tangible personal property for $300,000. Such property produces no taxable income of loss that year except for a cost recovery deducction of $125,000 which is allocated intirely to WM and a book depreciation deduction of $125,000 which is charged to WM's book capital account.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$200,000	$100,000	$200,000	$200,000	$300,000
Less: Cost recovery deduction (a) attributable to year 1 property		(100,000)		(100,000)	(100,000)	(100,000)
(b) Attributable to year 3 property	(125,000)	(125,000)				
Capital Account at end of year 3	(25,000)	75,000	100,000	200,000	200,000	200,000

At the end of year 3 the adjusted tax bases of the partnership properties acquired in years 1 and 3 are $100,000 and $175,000, respectively. If the properties are disposed of at the beginning of year 4 for their adjusted bases, there would be no taxable gain or loss, there would be a book loss of $200,000, and there would be cash of $275,000.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account end of year 3	($25,000)	$75,000	$100,000	$200,000	$200,000	$200,000
Less: Book loss		(200,000)		(66,667)		(66,667)
Capital account following dispositions	(25,000)	(125,000)	100,000	133,333	200,000	133,333

If the partnership is then liquidated, the liquidation proceeds ($275,000) would be distributed in accordance with the partners' book capital accounts. Since the allocation of the $125,000 cost recovery deduction to WM would have had substantial economic effect if paragraph (b)(2)(iv)(*a*) of this section had permitted upward adjustments to be made to the capital accounts of WM and JL upon MK's admission to the partnership, and since the other requirements of paragraph (b)(4)(i) of this section are satisfied, such allocation will be deemed to be made in accordance with the partners' interests in the partnership.

(vii) Assume the same facts as in (vi) except that the properties are not disposed of at the beginning of year 4 and that the partnership agreement is amended to make WM liable for any deficits in his capital account (as set forth in paragraph (b)(2)(ii)(*c*) of this section). In year 4 the partnership again has no taxable income or loss except for cost recovery deductions. The cost recovery deductions in year 4 for the properties purchased in years 1 and 3 are $100,000 and $75,000, respectively, and are allocated to MK and WM, respectively. The Book depreciation deduction attributable to the property purchased in year 1 is $300,000 and is charged equally to the partners' book capital accounts and the book depreciation deduction attributable to the property purchased in year 3 is $75,000 and is charged to WM's book capital account.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 4	($25,000)	$75,000	$100,000	$200,000	$200,000	$200,000
Less: Cost recovery deduction (a) attributable to year 1 property		(100,000)		(100,000)	(100,000)	(100,000)
(b) Attributable to year 3 property	(75,000)	(75,000)				
Capital account at end of year 4	($100,000)	($100,000)	$100,000	$100,000	$100,000	$100,000

At the end of year 4 the adjusted tax bases of the partnership properties acquired in years 1 and 3 are zero and $100,000, respectively. If the properties are disposed of at the beginning of year 5 for their adjusted basis, there would be no taxable gain or loss, no book gain or loss, and there would be cash of $100,000. If the partnership is then liquidated, the $100,000 cash plus the $100,000 which WM would be required to contribute to the partnership (the deficit in his book capital account) would be distributed equally between JL and MK (in accordance with their book capital accounts). Since the allocation of the $75,000 cost recovery deduction to WM would have substantial economic effect if paragraph (b)(2)(iv)(*a*) of this section had permitted upward adjustments to be made to the captial accounts of WM and JL upon MK's admission to the partnership, and since the other requirements of paragraph (b)(4)(i) of this section are satisfied, such allocation will be deemed to be made in accordance with the partners' interests in the partnership.

Example (19). (i) DG and JC form a general partnership for the purpose of drilling oil wells on various tracts of land. DG contributes an oil lease with an adjusted basis of $100,000 and a fair market value of $1,000,000. JC contributes $1,000,000 in cash which is used to finance the drilling operations. The partnership agreement provides that DG is credited with a capital account of $100,000 and JC is credited with a capital account of $1,000,000 (which capital accounts are maintained in accordance with paragraph (b)(2)(iv) of this section), that liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partners' capital account balances, and that any partner with a deficit balance in his capital account following the liquidating distribution will contribute to the partnership an amount equal to such deficit (as set forth in paragraph (b)(2)(ii)(*c*) of this section). The agreement further provides that the deductions attributable to the contributions made by each partner shall be allocated to such partner, that all other income, gain, loss, and deduction shall be allocated equally between DG and JC, that all cash from operations shall be distributed equally between DG and JC, and that in the event oil is not found the oil lease will be distributed to the partners (in liquidation of the partnership) with reference to the adjusted basis of such lease. Pursuant to these terms, $800,000 of partnership intangible drilling expenses and $200,000 of cost recovery deductions on partnership equipment are allocated to JC, and the $100,000 basis of the lease is, for purposes of the depletion allowance under sections 611 and 613A(c)(7)(D), allocated to DG. Based on these facts, the allocations of income, gain, loss, and deduction provided in the partnership agreement have substantial economic effect. Furthermore, since such allocations have substantial economic effect the allocation of the adjusted basis of the lease to DG is, under paragraph (b)(4)(v) of this section, deemed to be in accordance with the partners' interests in partnership capital or income under section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3. Since based on these facts no partner can have a deficit balance in his capital account during the term of the partnership, the results would be the same even if the agreement provides that no partner is required to contribute the deficit balance in his capital account following liquidation for distribution to partners with positive capital account balances. In addition, the results would be the same if DG's adjusted basis in the lease is $1,000,000 and his capital account is so credited.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that the first $1,000,000 of cash from operations shall be distributed to JC and that until JC receives such $1,000,000 all income, gain, loss, and deduction will be allocated to him. All other cash from operations will be distributed and all other income, gain, loss, and deduction will be allocated equally between DG and JC. Under these facts, the allocations of income, gain, loss, and deduction provided in the partnership agreement have substantial economic effect. Furthermore, since such allocations have substantial economic effect the allocation of the adjusted basis of the lease to DG is, under paragraph (b)(4)(v) of this section, deemed to be in accordance with the partners' interests in partnership capital or income under section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3.

(iii) Assume the same facts as in (i) except that all distributions, including those made upon liquidation of the partnership, will be distributed equally between DG and JC and that no partner is required to contribute the deficit balance in his capital account to the partnership following the liquidating

distribution. Since liquidation proceeds will be distributed equally between DG and JC irrespective of their capital account balances and no partner is required to contribute to the partnership the deficit balance in his capital account upon liquidation, the allocations of income, gain, loss, and deduction provided in the partnership agreement do not have substantial economic effect and must be reallocated in accordance with the partners' interests in the partnership. Furthermore, since such allocations lack substantial economic effect the allocation of the adjusted basis of the lease to DG is not deemed to be in accordance with the partners' interests in partnership capital or income under paragraph (b)(4)(v) of this section, and such basis must be reallocated under section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3 in accordance with the partners' actual interests in partnership capital or income.

(iv) Assume the same facts as in (iii) except that DG's adjusted basis in the lease is $1,000,000. For the same reasons specified in (iii) the allocations of income, gain, loss, and deduction provided in the partnership agreement do not have substantial economic effect and must be reallocated in accordance with the partners' interests in the partnership. Similarly, the allocation of the adjusted basis of the lease entirely to DG is not deemed to be in accordance the partners' interests in partnership capital or income under paragraph (b)(4)(v) of this section, and such basis must be reallocated under section 613A(c)(7)(D) and paragraph (e) of § 1.613A–3 in accordance with the partners' actual interests in partnership capital or income. Assume that under section 613A(C)(7)(D) and paragraph (e) of § 1.613A–3 the adjusted basis of the lease is allocated equally between DG and JC and that the partnership's only net taxable income or loss is the $1,000,000 net loss attributable to the intangible drilling expenses and cost recovery deductions. Since the partners made equal capital contributions to the partnership and since the economic arrangement of the partners is to share all proceeds equally, under paragraph (b)(3) of this section all partnership income, gain, loss, and deduction (or item thereof) shall be reallocated equally between DG and JC.

(v) Assume the same facts as in (i) and that for its first taxable year the partnership's depletion deduction with respect to the lease (determined solely for capital account purposes under the method elected by the partnership) is $10,000. Since DG was properly allocated the entire depletable basis of the lease (such allocation having been deemed to be in accordance with the partners' interests in partnership capital or income), under paragraph (b)(2)(iv)(*c*)(*3*) of this section the partnership's $10,000 simulated depletion deduction shall be allocated to DG and shall reduce his capital account accordingly. If, prior to any additional partnership depletion deductions, the lease is sold for $100,000, the partnership gain of $10,000 (determined solely for capital account purposes) shall be allocated to the partners in the same manner as that portion of the amount realized which exceeds the partnership's adjusted basis in the property is allocated to the partners and shall increase the partners' capital accounts accordingly. The first $90,000 realized on the sale of the least (*i.e.*, the partnership's adjusted basis in the lease for capital account purposes) shall be allocated to DG. Since the allocations of income, gain, loss, and deduction provided in the partnership agreement have substantial economic effect the $10,000 of amount realized which exceeds the partnership's adjusted basis in the lease may be allocated as provided in the partnership agreement. If the lease is sold for $50,000, the $40,000 partnership loss (determined solely for capital account purposes) shall be allocated to DG and shall reduce his capital account accordingly, and the entire amount realized on the sale of the lease shall be allocated to DG.

[LR–262–76]

Determination of Partner's Distributive Share Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to determination of partner's distributive share.

DATES: The public hearing will be held on May 4, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by April 20, 1983.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 111 Constitution Avenue, NW., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR–262–76), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, 202–566–3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 704(b) of the Internal Revenue Code of 1954. The proposed regulations appear in the Proposed Rules section of this issue of the **Federal Register** (See FR Doc. 83–5874.)

The rules of § 601.601(a)(3) of the "Statement of Procedural Rule" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who desire to present oral comments at the hearing on the proposed regulations should submit not later than April 20, 1983 an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

George H. Jelly,

Director, Legislation and Regulations Division.

4-(2,4-Dichlorophenoxy)Butyric Acid Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the herbicide 4-(2,4-dichlorophenoxy)-butyric acid and its metabolite in or on the raw agricultural commodity mint hay. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 8, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2,

1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 6E1736 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Station of Oregon.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the 4-(2,4-dichlorophenoxy)butyric acid (2,4-DB) and its metabolite 2,4-dichlorophenoxyacetic acid (2,4-D) in or on the raw agricultural commodity peppermint hay at 1.5 ppm. The petition was later amended to propose a tolerance for the combined residues of the herbicide and its metabolite in or on the raw agricultural commodity mint hay at 0.2 ppm.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance included a 90-day dog feeding study with a no-observed effect level (NOEL) at 316 ppm (7.9 mg/kg/day) and a 90-day rat feeding study with a NOEL of 316 ppm (15.8 mg/kg/day). A teratology study on mice at a dosage level of 400 ppm (60 mg/kg/day) showed no potential to induce teratogenic effects but fetotoxic effects were observed at a higher level (2,000 ppm fed).

The acceptable daily intake (PADI), based on the 90-day dog feeding study (NOEL of 7.9 mg/kg/day) and using a 2000-fold safety factor, is calculated to be 0.004 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.2370 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.0038 mg/day; the current action will increase the TMRC by 0.00009 mg/day (2.34 percent). Published tolerances utilize 1.61 percent of the ADI; the current action will utilize an additional 0.04 percent. Although chronic studies for 2,4-DB are lacking, they are not considered necessary to support the tolerance since the Agency has concluded that the amount of 2,4-DB and its metabolite 2,4-D added to the diet from the proposed use will not significantly increase dietary exposure in humans. Thus, the tolerance that will be established by this proposed rule is considered to pose a negligible increment in risk.

The nature of the residues is adequately understood and an adequate analytical method, gas chromatography, is available for enforcement purposes. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that there is no reasonable expectation of secondary residues of 2,4-DB in meat and milk and the fact that currently established tolerances for residues of 2,4-D in meat and milk are adequate to cover any residues resulting from mint hay used as animal feed, the tolerance established by amending 40 CFR 180.331 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 6E1736/P285]. All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: February 28, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.331 be revised to read as follows:

§ 180.331 4-(2, 4-dichlorophenoxy) butyric acid; tolerances for residues.

Tolerances are established for combined residues of the herbicide 4-(2, 4-dichlorophenoxy) butyric acid and its metabolite 2, 4-dichlorophenoxyacetic acid in or on the following raw agricultural commodities:

Commodities	Parts per million
Alfalfa	0.2[illegible]
Clover	0.2[illegible]
Mint, hay	0.2
Peanuts	0.2[illegible]
Soybeans	0.2[illegible]
Soybeans, hay	0.2[illegible]
Trefoil, birdsfoot	0.2[illegible]

Ametryn; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the residues of the herbicide ametryn in or on the raw agricultural commodity cassava roots. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 18, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 2E2739 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Station of Puerto Rico.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide ametryn, 2-(ethylamino)-4-(isopropylamino)-6-(methylthio)-*s*-triazine, in or on the raw agricultural commodity cassava roots at 0.1 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance included a subacute 90-day dog feeding study with a no-observed-effect level (NOEL) of 25 mg/kg/day (1,000 ppm); a subacute 90-day rat feeding study with a NOEL of 50 mg/kg/day (1,000 ppm); a subacute 90-day rat intubation study with a NOEL of 5 mg/kg/day (100 ppm); a rat teratology study with a NOEL of 5 mg/kg; and mutagenicity studies which were negative for mutagenic potential using microbial reverse mutation and rec-assay techniques. A 24-month rat feeding study, a 2-year dog feeding study, and a 3-generation reproduction study, all of which were conducted at Industrial Bio-Test, have been reviewed and judged invalid.

Studies considered desirable but currently lacking include long-term oncogenic studies for two species, a 3-generation reproduction study, a second teratology study, and a mammalian mutagenicity study. Although there are significant data gaps for the chemical, the available toxicity data are adequate to support the proposed tolerance because the proposed use will result in an insignificant increase (0.07 percent) in the theoretical maximum residue contribution (TMRC) to the human diet. As stated in the **Federal Register** issue of May 11, 1979 (44 FR 27932), the Agency will generally consider as insignificant an increase in the TMRC of 1.0 percent or less.

The provisional acceptable daily intake (PADI), based on the 90-day dog feeding study (NOEL of 25.0 mg/kg/day) and using a 2000-fold safety factor, is calculated to be 0.0125 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.75 mg/day. The TMRC from existing tolerances for a 1.5-kg daily diet is calculated to be 0.0543 mg/day; the current action will increase the TMRC by 0.00004 mg/day. Published tolerances utilize 7.24 percent of the ADI; the current action will utilize an additional 0.005 percent.

The nature of the residues is adequately understood and an adequate analytical method, gas-liquid chromatography, is available for enforcement purposes. The product contains less than 1.0 ppm of nitrosoamines (i.e., below validated sensitivity of the analytical method). Based on an Agency policy that was published in the **Federal Register** of June 15, 1980 (45 FR 42854), this level of nitrosoamine falls below the currently acceptable risk criteria. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that residues are not expected in meat, milk, poultry and eggs as a result of this use, the tolerance established by amending 40 CFR 180.258 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulations. Comments must bear a notation indicating the document control number (PP 2E2739/P286). All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this affect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

40 CFR Part 180

[PP 9E2142/P284; PH-FRL 2315-8]

Sodium Chlorate; Proposed Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that the defoliant, desiccant, and fungicide sodium chlorate be exempted from the requirement of a tolerance for residues when used on the raw agricultural commodities flaxseed and flax straw. The proposed regulation to exempt this chemical from the requirement to establishment maximum permissible levels for residues in or on the commodities was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 8, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM No. 2,

1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 9E2142 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Minnesota and North Dakota.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of an exemption from the requirement of a tolerance for residues of sodium chlorate in or on flaxseed, wheat, and their fodder, forage, and straw when it is used in accordance with good agricultural practice as a desiccant in flaxseed and wheat production. The petition was later amended by withdrawing the request for wheat and proposing the exemption for flaxseed and flax straw only.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the exemption is sought.

Flaxseed is used primarily as the source material in the production of linseed oil, a non-edible product. While the straw could conceivably be used as animal feed, residues of sodium chlorate would not be expected to occur in meat, milk, poultry, and eggs from this use.

The metabolism of sodium chlorate is adequately understood for the proposed use. The analytical method is nonspecific and unsuitable for enforcement purposes. However, little need for enforcement action is anticipated under an exemption and the analytical method is suitable for determination of gross misuse. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, the exemption from the requirement of a tolerance for residues of sodium chlorate in or on flaxseed and flax straw established by amending 40 CFR 180.1020 would protect the public health. It is proposed, therefore, that the exemption be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number (PP 9E2142/P284). All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950),

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: February 24, 1983.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.1020 be revised to read as follows:

§ 180.1020 Sodium chlorate; exemption from the requirement of a tolerance.

Sodium chlorate is exempted from the requirement of a tolerance for residues in or on the following raw agricultural commodities when used as a defoliant, desiccant, or fungicide in accordance with good agricultural practice in the production of chili peppers, corn, cotton, flax, guar beans, rice, safflower seed, sorghum, soybeans, and sunflower seed.

Commodities	
Chili peppers	Cottonseed
Corn fodder	Flaxseed
Corn forage	Flax straw
Corn grain	Grain sorghum
Guar beans	Sorghum fodder
Rice	Sorghum forage
Rice straw	Soybeans
Safflower seed	Sunflower seed

FEDERAL COMMUNICATIONS COMMISSION—

47 CFR Part 15

[Docket No. 21010]

UHF Television Receiver Noise Figures; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule; Extension of comment/reply comment period.

SUMMARY: Comment and reply comment dates are extended in order to afford interested parties an opportunity to review a forthcoming staff report regarding UHF television receiver noise figures.

DATES: Comments must be received on or before May 2, 1983 and Reply Comments must be received on or before June 1, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Philip B. Gieseler, (202) 653–5940.

SUPPLEMENTARY INFORMATION:

Adopted: February 24, 1983.

Released: February 25, 1983.

1. On November 18, 1982, the Commission adopted a *Notice of Proposed Rulemaking* in this proceeding, and set comment and reply comment dates for March 1 and March 31, 1983, respectively. 47 FR 55251 (December 8, 1982).

2. We have received a request from the Consumer Electronics Group of the Electronic Industries Association (EIA/CEG) to extend the dates for comments and reply comment in this proceeding. In support of its request, EIA/CEG points out that the original comment dates were predicated in part on the belief that a Commission staff report on current noise figure performance would be available for review and comment prior to the comment date. This report, however, has not yet been released, and EIA/CEG has requested that the Commission extend the comment period to thirty days following the release of the report.

3. We wish to receive public comment on the results of the forthcoming staff report, which we expect to be available

in approximately one month. Therefore we will extend the comment periods to afford reasonable time for interested parties to consider the report when they submit their views. Accordingly, IT IS ORDERED that the deadline for comments in the Notice of Proposed Rulemaking be set for May 2, 1983, and the reply comment date set for June 1, 1983. This action is taken pursuant to Section 4(i) of the Communications Act of 1934, as amended.

Federal Communications Commission.

Peter K. Pitsch,

Chief, Office of Plans and Policy.

[PR Docket No. 83-90; FCC 83-88]

Commission's Rules To Provide for Facsimile Communications in the Maritime Mobile Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rules.

SUMMARY: This document proposes rules for the introduction and use of facsimile communications in the maritime mobile service and requests that interested persons provide certain information. This action was initiated by the Commission and is intended to extend the communications services available to the maritime industry.

DATES: Comments must be received by April 4, 1983, and reply comments must be received by April 19, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Walter E. Weaver, Private Radio Bureau (202) 632-7175.

SUPPLEMENTARY INFORMATION:

List of Subjects

47 CFR Part 2

Radio.

47 CFR Part 81

Coast stations, Communications equipment.

47 CFR Part 83

Communications equipment, Ship stations.

In the Matter of: Amendment of Parts 2, 81 and 83 to provide for facsimile communications in the maritime mobile service PR Docket No. 83-90.

Adopted: February 8, 1983.

Released: March 3, 1983.

1. In this Notice of Proposed Rule Making we are proposing to provide for facsimile communications between coast stations and vessels on the high seas. We are particularly interested in comments concerning the frequencies to be assigned to coast stations and the technical standards to be included in the rules to assure intercommunication capability between ship and coast stations.

Nature of Facsimile Service

2. Facsimile essentially involves the electronic transmission and reproduction of documents.[1] An image is scanned at the input terminal, transmitted to a receiving station and duplicated on paper. Section 2.201 of the Commission's rules provides two modes for the transmission of facsimile.[2] Whichever mode is used, the received signal is demodulated by the receiver to provide audio input to the facsimile machine for the reproduction of the document. Thus, for facsimile to be successfully employed in the maritime mobile service the facsimile equipment installed at coast stations and aboard ship must be capable of communicating one with the other. To be compatible the facsimile equipment at both terminals must do a substantial number of functions in the same way, at the same time, and in synchronization. Since equipment currently used aboard ship and at coast stations employs single sideband suppressed carrier (2.8F4 emission), we are proposing this mode for marine facsimile.

Ship Station Facsimile Frequencies

3. Currently, except for Government weather facsimile broadcasts, there are no provisions in the maritime mobile service for document transmission by facsimile between coast stations and vessels on the high seas. We have received a number of informal inquiries from the maritime industry concerning facsimile service for vessels on the high seas. We believe there is a need for facsimile communications in this service.[3] Therefore, we propose that two families of assigned frequencies be made available for use by ship stations for transmission to public coast stations as follows: Family #1: 2070.5, 4160.6, 6238.6, 8326, 12485, 16654 and 22186 kHz; and Family #2: 2076.5, 4168, 6242.6, 8341.5, 12489, 16658 and 22190 kHz.[4] Particulars of the emission are: occupied bandwidth, 3.0 kHz, emission designator 2.8F4 (suppressed carrier single sideband, modulated by a frequency-shifted sub-carrier of 1900 Hz). The two families of frequencies are in band which are currently allocated by FCC and ITU regulations to the maritime mobile service.[5] They will be available to government and industry on a coequal shared basis.

Coast Stations Facsimile Frequencies

4. As to which frequencies should be used by coast stations for transmission of facsimile to ship stations, we are describing two possible arrangements, although there may be others. First, there are the bands designated in Appendix 31 (App. 15 Mar2) of the ITU Radio Regulations as "Frequencies assignable to coast stations for wide-band A1A or A1B Morse telegraphy, facsimile, special and data transmission systems and direct-printing telegraphy systems". However, these were long ago assigned and registered for use by the world's coast stations for A1 Morse telegraphy. Clearing usable 3 kHz slots in these bands for facsimile appears to be impractical at this time. Second, there are the bands which were designated in the proceeding to implement the Final Acts of the World Administrative Radio Conference, Geneva, 1979,[6] available for use by stations in the maritime mobile service (Part 81). Generally, these band are shared with the Fixed Service, as well as with other services. These shared bands would become available upon finalization of the proceeding in General Docket 80-739. Regardless of whether frequencies are taken from the coast telegraph or from the shared bands (referred to above), responsibility for initial selection would rest with the public coast station licensee. However, if the selected frequency is determined

---

[1] The ITU Radio Regulations define facsimile as: "A system of telecommunication for the transmission of fixed image, with or without half-tones, with a view to their reproduction in a permanent form." The IEEE Dictionary provides more detail: "The process, or the result of the process, by which fixed graphic material including pictures or images is scanned and the information converted into signal waves that are used either locally or remotely to produce, in record form, a likeness (facsimile) of the subject copy."

[2] By modulation of the main carrier with a frequency-modulated audio frequency subcarrier or by direct frequency-modulation of the main carrier.

[3] We are presently investigating the possibility of permitting facsimile, data and other transmissions over non-exclusive maritime radiotelephone frequencies. For example, it may be possible to use any transmission mode that can be contained within a 3.0 kHz occupied bandwidth of a radiotelephone channel provided such transmissions do not increase interference.

[4] Carrier frequencies: 2019, 4159.2, 6237.2, 8324.6, 12483.6, 16652.6, 22184.6; 2075, 4166.6, 6241.2, 8340.1, 12487.6, 16656.6, 22188.6.

[5] See Section 2.106 Table of Frequency Allocations in the Commission's Rules.

[6] Gen. Docket No. 80-739, Implementation of the Final Acts of the 1979 WARC, released December 30, 1982 (FCC 82-606).

to be unavailable the staff will endeavor to suggest an alternate frequency. Therefore, at this time we have not included provision in the attached Appendix regarding the frequencies to be used by public coast stations. Comments on these two arrangements as well as other suggested arrangements are invited.

Transmission and Equipment Standards

6. As indicated in paragraph 2 above, sending and receiving terminals must share some common system parameters for successful document transmission. Comments are requested, however, as to what degree specified standards are necessary to provide compatability. We note that compatability on land line circuits exists in spite of multiple facsimile standards. Given the competitive pressures users face to provide adequate communications services, the investment in existing equipment, the availability of translation devices, and the speed with which technology changes, the advantages of mandated standards might be outweighed. Thus, we seek comments on which, if any, technical standards for facsimile equipment should be included in the rules. Commenters are also requested to examine the specifications listed in the Appendix and respond to the following questions:

(a) What level of compatability is necessary or desirable for facsimile systems? For example, it is noted that meteorological systems use a high modulating frequency to represent black and a low frequency to represent white while document systems use the reverse. CCIR Report 588–1 does not standardize this particular characteristic since most facsimile recorders can receive both. Similarly, CCITT Recommendations permit the use of more than one scanning line frequency, which affects document transmission speed. To what extent would the proposed standards unnecessarily limit operational flexibility?

(b) If standards are considered necessary, what are the advantages/disadvantages of establishing a "sunset" date after which the specified standards would no longer be effective?

Proposal

7. Accordingly, we propose to amend Parts 2, 81, and 83 of the Commission's rules as set forth in the attached Appendix to provide for the use of facsimile in the maritime mobile service. The amendment to Part 2, Section 2.106, will add a new U.S. footnote (USXX6). Footnote USXX6 covers the agreement with the Government regarding shared use of the facsimile frequencies proposed in the Appendix in Section 83.332(b). Interested parties are requested to provide comments in response to the specific subjects set forth in paragraphs 3 and 6 above. Other relevant comments are also welcome.

8. The proposed amendments to the Commission's rules set forth in the attached Appendix are issued under the authority contained in Sections 4(i) and 303 (b), (c), (3), (g) and (r) of the Communications Act of 1934, as amended.

Comments

9. Under procedures set out in Section 1.415 of the Rules and Regulations, 47 CFR 1.415, interested persons may file comments on or before April 4, 1983, and reply comments on or before April 19, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

10. In accordance with the provisions of Section 1.419 of the Rules and Regulations, 47 CFR 1.419, formal participants shall file an original and 5 copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

11. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any writtten or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of the oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231, of the Commission's rules, 47 CFR 1.1231.

12. The rules proposes herein would provide for facsimile service in the Maritime Mobile Service. It is intended that the communications offered by public coast stations and available to ships at sea be extended by the addition of facsimile. However, no additional equipment or expanded service would be mandated by their rules. Therefore, the Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–254) do not apply to this rulemaking proceeding, because the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

13. Regarding questions on matters covered in this document contact Walter E. Weaver, Private Radio Bureau, (202) 632–7175.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 2, 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

1. In § 2.106, under the heading "United States Footnotes", add a new USXX6, to read as follows:

§ 2.106 Table of Frequency Allocations.

* * * * *

USXX6 In the Bands designated for ship wideband telegraphy, facsimile and special transmission systems, the following assignable frequencies are available to non-Government stations on a shared basis with Government stations: 2070.5, 2072.5, 2074.5, 2076.5, 4160.6, 4168, 6238.6, 6242.6, 8326, 8341.5, 12485, 12489, 16654, 16658, 22186 and 22190 kHz.

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

1. In § 81.131, paragraphs (b)(2) and (b)(3) are amended to read as follows:

§ 81.131 Authorized frequency tolerance.

* * * * *

(b)(2) From 1605 to 4000 kHz:

For A3A, A3H, A3J and F4 emissions.....20 Hz
For other than A3A, A3H, A3J and F4 emissions.....50 Hz

(b)(3) From 400 to 27,500 kHz:

For A3A, A3B, A3H, A3J and F4 emissions.....20 Hz
For narrow-band direct-printing telegraph and data transmission systems.....15 Hz

* * * * *

2. In § 81.132, paragraph (a)(1) is amended and a new paragraph (g) is added, to read as follows:

§ 81.132 Authorized classes of emission.

(a) * * *

Frequency band	Classes of emission
(1) Coast stations using telegraphy:	
14 to 100 kHz	A1. A1, A2 or A2H for distress urgency and safety signals or any communications preceded by one of these signals.
400 to 535 kHz	A1 and A2 or A2H.
2035 to 27,500 kHz	A1 on frequencies listed in § 81.206; F1 on frequencies listed in § 81.204(c); only as authorized by the Commission on frequencies listed in § 81.206; and F4 on frequencies listed in § 81.213.

* * * * *

(g) For the purpose of this part, 2.8F4 emission means facsimile transmitted by a suppressed carrier single sideband, carrier modulated with a frequency-shifted audio frequency subcarrier.

3. In § 81.133, emission F4 (2.8F4) is added to the table of paragraph (a), to read as follows:

§ 81.133 Authorized bandwidth.

(a) * * *

Classes of emission	Emission designator	Authorized band width (kHz)
A1	0.16A1	0.4
A2	2.66A2	2.8
A3	6A3	8.0
F1	[1]0.3F1	[1]0.5
F1	[2]16F1	[2]20
F3	[2]16F3	[2]20
F4	[4]16F4	[4]20
F4	[5]2.8F4	[5]3.0
P0	Variable	Variable
A3A	2.8A3A	[6]3.0
A3H	2.8A3H	[6]3.0
A3J	2.8A3J	[6]3.0

[1] Narrow-band direct-printing telegraph and data transmission systems.
[2] Radiotelewriter in the band 216–220 MHz.
[3] Applicable when maximum authorized frequency deviation is 5 kHz.
[4] Facsimile in the band 216–220MH.
[5] Facsimile in the band 2035 to 27,500 kHz.
[6] Transmitters type accepted prior to December 31, 1988, for emissions A3A, A3H, and A3J and an authorized bandwidth of 3.5 kHz may continue to be operated. These transmitters will not be authorized in new installations.

* * * * *

4. A new § 81.144 is added to read as follows:

§ 81.144 Facsimile equipment.

Facsimile equipment operating on frequencies between 2035 kHz and 27,500 kHZ designated for use for facsimile shall fulfill the following conditions:

(a) Frequency-shifted audio frequency subcarrier: center frequency of 1900 Hz; frequency 2300 Hz corresponding to black; and frequency 1500 Hz corresponding to white. The frequency 1500 Hz is also used for the phasing signal.

(b) A drum diameter of 70 millimeters with a drum rotation speed of 90 revolutions per minute.

(c) Index of cooperation: 264.

(d) Factor of cooperation: 829.

(e) Scanning density: 3.77 lines per millimeter.

(f) Total length of scanning line: 220 millimeters.

(g) Total number of scanning lines for a document 297 millimeters in length: 1120.

(h) Synchronization: Standard of frequency which is better than ± 5 parts in 10^6.

(i) Phasing: As set forth in CCITT Recommendation T. 1.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. In § 83.131, subparagraphs (b)(4)(i), (b)(4)(ii), (b)(7)(iii) are amended to read as follows:

§ 83.131 Authorized frequency tolerance.

* * * * *

(b) * * *

(4) Ship stations from 1605–2070 and 2080 to 3500 kHz:

(i) For transmitters using other than A3A, A3H, A3J and F4 emissions, type accepted or type approved before November 30, 1977	100
(ii) For transmitters using A3A, A3H, A3J, and F4 emissions, type accepted or type approved before November 30, 1977	50Hz

* * * * *

(7) Stations when using frequencies within the band 4000–27500 kHz:

* * * * *

(iii) Ship stations using A3A, A3H, A3J, or F4 emissions with transmitter type accepted or type approved:	
(a) Before November 30, 1977	50Hz
(b) After November 30, 1977	20Hz

* * * * *

2. In § 83.132, subparagraph (a)(1)(i) is amended and a new paragraph (g) is added, to read as follows:

§ 83.132 Authorized classes of emission.

* * * * *

(a) * * *

Frequency band	Classes of emission
(1) Stations using radiotelegraphy:	
(i) 100 to 160 kHz	A1.
160 to 525 kHz	A1 and A2, or A2H.
2000 to 27,500 kHz	A1 or F4 Survival Craft stations may in addition use A2 or A2H.
2070 to 2080	F4. Wide-band telegraphy and special transmission systems. Manual international Morse code and telephony are excluded.
1605 to 2080 kHz in Alaska	A1.

* * * * *

(g) For the purpose of this part, 2.8F4 emission means facsimile transmitted by a suppressed carrier single sideband, carrier modulated with a frequency-shifted audio frequency subcarrier.

3. In § 83.133, emission F4 (2.8F4) is added to the table of paragraph (a), to read as follows:

§ 83.133 Authorized bandwidth.

(a) * * *

Classes of emission	Emission designator	Authorized bandwidth (kHz)
A1	0.16A1	0.4
A2	2.66A2	2.8
A3	6A3	8.0
A9	[1]3.2A9	[1]25.0
F1	[2]0.3F1	[2]0.5
F1	[3]16F1	[3]20.0
F3	[4]16F3	[4]20.0

Classes of emission	Emission designator	Authorized bandwidth (kHz)
F4	[1] 16F4	[1] 20.0
F4	[2] 2.8F4	[2] 3.0
F9	[1] 16.4F9	[1] 20.0
F9	[2] 20.000F9	[2] 30.000
P0	[1] Variable	[1] Variable
A3A	2.8A3A	[3] 3.0
A3H	2.8A3H	[3] 3.0
A3J	2.8A3J	[3] 3.0

[1] Applicable only to emergency position-indicating radiobeacon stations.
[2] Narrow-band direct-printing telegraph and data transmission systems.
[3] Radioteletypewriter in the band 216–220 MHz.
[4] Applicable when maximum authorized frequency deviation is 5 kHz. See paragraph (c) of this Section.
[5] Facsimile in the band 216–220 MHz.
[6] Facsimile within the band 2070 to 27,500 kHz.
[7] Transmitters type accepted prior to December 31, 1969, for emissions A3A, A3H, and A3J and an authorized bandwidth of 3.5 kHz may continue to be operated. These transmitters will not be authorized in new installations.
[8] Applicable to marine hand held radars.

4. A new § 83.147 is added to read as follows:

§ 83.147 Facsimile equipment.

Facsimile equipment operating on frequencies between 2070 kHz and 27,500 kHz designated for use for facsimile shall fulfill the following conditions:

(a) Frequency-shifted audio frequency subcarrier: center frequency of 1900 Hz; frequency 2300 Hz corresponding to black; and frequency 1500 Hz corresponding to white of 2300 Hz. The frequency 1500 Hz is also used for the phasing signal.

(b) A drum diameter of 70 millimeters with a drum rotation speed of 90 revolutions per minute.

(c) Index of cooperation: 264.

(d) Factor of cooperations: 829.

(e) Scanning density: 3.77 lines per millimeter.

(f) Total length of scanning line: 220 millimeters.

(g) Total number scanning lines for a document 297 millimeter in length: 1120.

(h) Synchronization: Standard of frequency which is better than ± 5 parts in 10^6.

(i) Phasing: As set forth in CCITT Recommendation T.1.

§ 83.324 [Amended]

5. In § 83.324, paragraph (h) is removed.

6. A new § 83.332 is added to read as follows:

§ 83.332 Assignable frequencies—Facsimile.

(a) Ship radiotelegraph working frequencies—facsimile—non-paired with coast station frequencies, for use in the bands between 2070 and 27,500 kHz are set forth in paragraph (b), below. The frequencies are available for use by radiotelegraph ship stations authorized to employ facsimile and are subject to the applicable provisions of Subpart E of this part.

(b) Ship transmit only:

Notices

Federal Register
Vol. 48, No. 47
Wednesday, March 9, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Federally Licensed Cotton Warehouses; Waiver of Fees

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of Waiver of Fees for Federally Licensed Cotton Warehouses.

SUMMARY: This action serves as notice to the warehousemen licensed under Regulations for Cotton Warehouses, U.S. Warehouse Act (7 U.S.C. 251) and all other interested parties that pursuant to section 156(d) of the Omnibus Budget Reconciliation Act (95 Stat. 374), the Secretary of Agriculture has determined that fees for cotton warehouses licensed pursuant to the U.S. Warehouse Act should be waived for fiscal year 1983 to insure that the licensing and inspection procedures for cotton warehouses are preserved.

FOR FURTHER INFORMATION CONTACT: Orval Kerchner, Chief, Warehouse Development Branch, Warehouse Division, Agricultural Marketing Service, Department of Agriculture, Washington, DC 20250 (202–447–3616).

SUPPLEMENTARY INFORMATION: On December 30, 1981, the Department of Agriculture published regulations 46 FR 63198 specifying fees to be charged warehousemen under provisions of the U.S. Warehouse Act for licenses and examination or inspection of warehouses. Such fees were mandated by section 156 of the Omnibus Budget Reconciliation Act of 1981—Pub. L. 97–35 (95 Stat. 375) which amended the U.S. Warehouse Act to require that such fees should be assessed for and should cover the costs of licensing persons to classify, inspect, grade, sample or weigh agricultural products and the examination or inspection of warehouses, annual warehouse licenses issued to warehousemen, and any changes thereto. The fees are to cover as nearly as practicable, the costs of providing such services or licenses, including administrative and supervisory costs.

Fee schedules were published for all commodities for which there were effective regulations as of October 1, 1981, execpt cotton. Pursuant to section 156(d) of the Omnibus Budget Reconciliation Act (95 Stat. 374), the Secretary determined that such fees and charges relating to the warehousing of cotton pursuant to the U.S. Warehouse Act should not be charged for fiscal year 1982 to insure that the licensing and inspection procedures for cotton warehouses were preserved. Appropriated funds were provided to accomplish this. Therefore, the proposal to amend Part 101 of the Regulations for Cotton Warehouses published in the September 4, 1981, issue of the Federal Register (46 FR 44680) was withdrawn.

The Secretary has reviewed the situation expected to exist in fiscal year 1983 and has determined that fees and charges to cotton warehouses licensed pursuant to the U.S. Warehouse Act should not be charged for fiscal year 1983 to insure that the licensing examination and inspection procedures for cotton warehouse are preserved. Appropriated funds have been provided to permit this; therefore, any such fees relating to the warehousing of cotton are not required for fiscal year 1983. Fees relating to the warehousing of other agricultural commodities will be charged as published at 46 FR 63198.

Done at Washington, D.C. March 3, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

Office of the Secretary

Forms Under Review by Office of Management and Budget

March 4, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listing should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Statistical Clearance Officer, (202) 447–6201.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 2-83; Foreign-Trade Zone 27]

Application for Expansion; Boston, Massachusetts

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the Massachusetts Port Authority (Massport), grantee of Foreign-Trade Zone 27 in Boston, Massachusetts, requesting authority to expand its zone project in Boston, within the Boston Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u) and the regulations of the Board (15 CFR Part 400). It was formally filed on March 1, 1983. The applicant is authorized to make this proposal under Chapter 711 of the Acts of the Commonwealth of Massachusetts, 1971.

On April 5, 1977, Massport received authority to establish a foreign-trade zone project (Board Order 116, 42 FR 18901, 4–11–77). The zone was expanded in 1979 (Board Order 144, 44 FR 19502, 4–3–79), and now involves public warehousing and 20-acres of open space in the Commonwealth Pier area and nearby Boston Marine Industrial Park. Since activation in September 1980, the zone has been used by a number of firms for a variety of items ranging from textiles to electronic products.

Massport now requests an expansion to include a site at the airport. It will cover 20 acres within the 90-acre Bird Island Flats section of Logan International Airport, which is being developed as a high-tech industrial park for the electronics and computer industries, called the Mass Tech Center. The proposed zone site is regarded as an important feature to serve the international trade needs of the Center.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer Street, Boston, Massachusetts 02110; and Colonel Carl B. Sciple, Division, Engineer, U.S. Army Engineer Division New England, 424 Trapelo Road, Waltham, Massachusetts 02154.

Comments concerning the proposed zone expansion are invited in writing from interested persons and organizations. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before April 8, 1983.

A copy of the application is available for public inspection at each of the following locations:

Office of the Director, U.S. Dept. of Commerce District Office, 441 Stuart Street, 10th Floor, Boston, Massachusetts 02116 Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania, NW., Room 1872, Washington, D.C. 20230.

Dated: March 4, 1983.

John J. Da Ponte, Jr.,

Executive Secretary, Foreign-Trade Zones Board.

[FR Doc. 83-5988 Filed 3-8-83; 8:45 am]

BILLING CODE 3510-25-M

[Docket No. 3-83; Foreign-Trade Zone 23, Erie County, New York]

Application for Subzone at Xerox Plant in Webster, New York

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the County of Erie, New York, grantee of Foreign-Trade Zone 23, requesting authority for a special-purpose subzone at the photocopier manufacturing plant of Xerox Corporation in Webster, Monroe County, New York, adjacent to the Rochester Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 1, 1983. Both Erie and Monroe Counties have authority to apply for zones within their jurisdictions under New York law. Because there is no public zone project in the latter county, the President of the Monroe County

Legislature requested that Erie make the application. County counsel for Erie issued an opinion that Erie has authority to apply under these circumstances.

The subzone would cover 102 acres of the Xerox Corporation's 465-acre photocopier manufacturing plant, located at 800 Phillips Road in the Village of Webster. The plant employs some 6,400 persons, one-fourth of which are involved in export-related operations. Although, the plant produces a full range of copiers, the subzone would be used primarily for production of small ones, for which 90 percent of the parts are imported. Foreign components include power supply and transformers, clutches, springs, lenses and other specialized copier components.

Zone procedures would exempt Xerox from duty payment on foreign components used for its exports, which now account for about 20 percent of plant production and is projected to amount to 40 percent by the end of 1984. On its domestic sales, the company will be able to take advantage of the same duty rate available to importers of complete copiers. The average duty rate for the copier parts Xerox imports is 6.1 percent, whereas the duty rate for complete copiers is 4.5 percent. This duty differential is one of the factors which is causing the company to consider importing small copiers rather than producing them domestically. Subzone status, would rationalize Customs costs, improving the competitiveness of this plant in relation to copier plants abroad.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report thereon to the Board. The committee consists of Dennis Puccinelli (Chairman), Foerign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer Street, Boston, Massachusetts 02110; and Colonel Robert R. Hardiman, District Engineer, U.S. Army Engineeer District Buffalo, 1776 Niagara Street, Buffalo, New York 14207.

Comments concerning the proposed zone expansion are invited in writing from interested persons and organizations. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before April 8, 1983.

A copy of the application is available for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, 100 State Street, Room 611 Rochester, New York 14614

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania, NW, Room 1872, Washington, D.C. 20230

Petitions by Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance; Frank Walter Sportswear Contractors, Inc., et al.

Petitions have been accepted for filing from the following firms: (1) Frank Walter Sportswear Contractors, Inc., 801 Crocker Street, Los Angeles, California 90021, producer of women's and girls' blouses, men's shirts, and girls' dresses and pants (accepted January 24, 1983); (2) B.C. Breakfield Enterprises, Inc., 265 Via Del Monte, Oceanside, California 92054, producer of women's coats (accepted January 25, 1983); (3) Gym Master Company, 3200 South Zuni Street, Englewood, Colorado 80110, producer of gymnasium equipment and outhouses (accepted January 31, 1983); (4) Boston Machine Works Company, 17 Willow Street, Lynn, Massachusetts 01903, producer of footwear machinery and parts (accepted January 31, 1983); (5) Plasco, Inc., 4080 Morrison Drive, Gurnee, Illinois 60031 producer of disposable plastic medical products (accepted February 2, 1983); (6) Seventeen South Garment Company, Inc., Box 1468, Elizabeth City, North Carolina 27909, producer of children's coats, jackets and rompers (accepted February 2, 1983); (7) Outdoor Venture Corporation, P.O. Box 337, Stearns, Kentucky 42647, producer of tents, awnings, canopies, screen houses and sleeping bags (accepted February 4, 1983); (8) Lakeside Vineyard, Inc., 13581 Red Arrow Highway, Harbert, Michigan 49115, producer of wine (accepted February 4, 1983); (9) Harry Levine Corporation, 20 West 33rd Street, New York, New York 10001, producer of handbags (accepted February 7, 1983); (10) Alloy Casting of Louisiana, Inc., P.O. Box 9389, Shreveport, Louisiana 71109, producer of steel casting for valves, pumps and fittings (accepted February 7, 1983); (11) Antietam Footwear, Inc., 113 Summit Avenue, Hagerstown, Maryland 21740, producer of men's, women's and children's footwear (accepted February 7, 1983); (12) Boston Digital Corporation, 86 South Street, Hopkinton, Massachusetts 01748, producer of machine tools (accepted February 7, 1983); (13) Cinderella Clothing Industries, Inc., 640 Allendale Road, King of Prussia, Pennsylvania 19406, producer of children's dresses, pants, tops and shorts (accepted February 7, 1983); (14) Quaker Stove Company, P.O. Box E, Trumbauersville, Pennsylvania 18970, producer of stoves and fireplace inserts (accepted February 7, 1983); (15) Vatco Industries Corporation, 184 Everett Street, Allston, Massachusetts 02134, producer of automobile seat covers and cushions (accepted February 7, 1983); (16) Vineland Fireworks Company, Inc., Main & Garden Roads, Vineland, New Jersey 08360, producer of fireworks (accepted February 7, 1983; (17) J.W. Gold Sculptors International, Inc., 1421 South Beretania Street, Honolulu, Hawaii 96814, producer of jewelry (accepted February 8, 1983); (18) Dame Belt & Bag Company, Inc., 636 11th Avenue, New York, New York 10036, producer of handbags and belts (accepted February 8, 1983); (19) Soundmates, Inc., 796 29th Avenue, S. E., Minneapolis, Minnesota 55414, producer of loudspeakers (accepted February 10, 1983); (20) Forest Hill Sportswear Company, Inc., 63 Endicott Street, Boston, Massachusetts 02113, producer of women's blazers (accepted February 10, 1983); (21) Western Stoneware Company, 521 West Sixth Street, Monmouth, Illinois 61462, producer of stoneware dishes (accepted February 11, 1983); (22) First Embroidery Corporation, P.O. Box 4499, Carolina, Puerto Rico 00628, producer of women's and girls' underwear, blouses and dresses (accepted February 14, 1983); (23) Sims Castings Corporation, 2170–76 East Erie Boulevard, Syracuse, New York 13224, producer of aluminum castings (accepted February 14, 1983); (24) Bullard Manufacturing Company, Inc., 726 Hiawatha Boulevard West, Syracuse, New York 13204, producer of stoves and fireplace inserts (accepted February 15, 1983); (25) Tel Ray Electronics Manufacturing Company, Inc., 6855 Vineland Avenue, North Hollywood, California 91605, producer of sound modification equipment (accepted February 14, 1983); (26) Isley Knitting Mills, Inc., P.O. Drawer 207, Graham, North Carolina 27253, producer of men's and women's sweaters and shirts (accepted February 16, 1983); (27) Page Accessories, Inc., 132 Dale Street,

West Babylon, New York 11704, producer of metal apparel belts and chains (accepted February 22, 1983); (28) Carolina Tables of Hickory, Inc., P.O. Box 2000, Hickory, North Carolina 28603, producer of household tables (accepted February 23, 1983); and (29) Mi-Li, Inc., 182 Washington Street, Quincy, Massachusetts 02169, producer of women's skirts (accepted February 23, 1983).

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93–618) and Section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Director, Certification Division, Office of Trade Adjustment Assistance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.309, Trade Adjustment Assistance. Insofar as this notice involves petitions for the determination of eligibility under the Trade Act of 1974, the requirements of Office of Management and Budget Circular No. A–05 regarding review by clearinghouses do not apply.

Jack W. Osburn, Jr.,

Director, Certification Division, Office of Trade Adjustment Assistance.

BILLING CODE 1515–01–M

Canned Mushrooms From the People's Republic of China; Postponement of Preliminary Antidumping Determination

AGENCY: International Trade Administration, Commerce.

ACTION: Postponement of Preliminary Antidumping Determination.

SUMMARY: The preliminary determination of canned mushrooms from the People's Republic of China is being postponed, and we intend to issue it not later than May 16, 1983.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Rick Herring or Michael Ready, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Telephone: (202) 377–3963 or 377–2613.

SUPPLEMENTARY INFORMATION: On November 8, 1982, we announced our initiation of an antidumping investigation to determine whether canned mushrooms from the People's Republic of China are being, or are likely to be, sold in the United States at less than fair value within the meaning of the antidumping law. The notice stated that we would issue a preliminary determination by March 28, 1983, if the investigation proceeded normally.

As detailed in the notice of initiation of the antidumping investigation, the petition alleges that imports from the People's Republic of China of canned mushrooms are being, or are likely to be, sold in the United States at less than fair value. On February 17, 1983, counsel for the petitioner, the Four "H" Company, requested that the Department extend the period for the preliminary determination until 210 days after the date of receipt of the petition in accordance with section 733(c)(1)(A) of the Tariff Act of 1930, as amended.

We have determined that additional time is necessary to make the preliminary determination. Accordingly, the period for determination in this case is hereby extended. We intend to issue a preliminary determination not later than May 16, 1983.

This notice is published pursuant to section 733(c)(2) of the Act.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration

March 1, 1983.

BILLING CODE 3510–25–M

Preliminary Determination of Sales at Less Than Fair Value; Greige Polyester Cotton Printcloth From the People's Republic of China

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Determination of Sales at Less than Fair Value: Greige Polyester/Cotton Printcloth from the People's Republic of China.

SUMMARY: We have preliminarily determined that Greige Polyester/Cotton Printcloth from the People's Republic of China is being sold,or is likely to be sold, in the United States at less than fair value. Therefore, we have notified the United States International Trade Commission (ITC) of our determination, and we have directed the United States Customs Service to suspend the liquidation of all entries of the subject merchandise which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice and to require a cash deposit or the posting of a bond for each such entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make a final determination by May 27, 1983.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Rick Herring or Michael Ready, Office of Investigations, Import Administration, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone: (202) 377–3963 or 377–2613.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminary determined that there is a reasonable basis to believe or suspect that greige polyester/cotton printcloth (printcloth) from the People's Republic of China (PRC) is being sold, or is likely to be sold, in the United States

at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act).

For the printcloth sold by China National Textiles Import and Export Corporation (Chinatex) the only exporter of the subject merchandise, we have found that the foreign market value exceeded the United States price on 100.0 percent of sales compared. These margins ranged from 20.0 percent to 30.8 percent. The weighted-average margin on all sales compared is 23.1 percent.

If this investigation proceeds normally, we will make a final determination by May 27, 1983.

Case History

On August 5, 1982, we received a petition from the American Textile Manufacturers Institute and certain member companies, filed on behalf of the United States industry producing greige polyester/cotton printcloth. The petition alleged that greige polyester/cotton printcloth from the People's Republic of China is being sold in the United States at less than fair value, and that such sales are materially injuring, or are threatening to materially injure, a United States industry.

After reviewing the petition, we determined that it contained sufficient grounds to initiate an antidumping investigation on greige polyester/cotton printcloth. We notified the ITC of our action and intitiated this investigation on August 20, 1982 (47 FR 36569). The ITC informed the Department on September 20, 1982, that there is a reasonable indication that imports of greige polyester cotton/printcloth from the People's Republic of China are materially injuring, or are threatening to materially injure, a United States industry. Therefore, we proceeded with this investigation. On December 9, 1982, we determined this case to be "extraodinarily complicated," as defined in section 733(c) of the Act. Therefore, we extended the period for making a preliminary determination from January 12, 1983, until March 3, 1983 (47 FR 56376).

Questionnaires were presented to counsel for Chinatex on November 17, 1982, and to counsel for Hauafang Trading Company (an importer related to Chinatex within the meaning of section 771(13) of the Act) on November 30, 1982. Responses of both companies were received January 17, 1983. As discussed under Foreign Market Value, we determined that the PRC is a state-controlled-economy country for the purpose of this investigation. On January 17, 1983, a questionnaire was presented to a printcloth manufacturer in Thailand who agreed to act as a surrogate for this investigation.

Scope of Investigation

The product covered by this investigation is unbleached and uncolored printcloth fabric (other than 80 x 80 type) in chief value of cotton, containing polyester, and currently provided for in items 328.26 through 328.40 of the Tariff Schedules of the United States. As of January 1, 1983, the appropriate statistical suffix is 32. Previously the appropriate statistical suffixes were 32 and 92. The term "printcloth" refers to plain-woven fabric, not napped, not fancy or figured, of singles yarn, not combed, of average yarn numbers 26 to 40, weighing not more than 6 ounces per square yard, of a total count of more than 85 yarns per square inch, of which the total count of the warp yarns per inch and the total count of the filling yarns per inch are each less than 62 percent of the total count of the warp and filling yarns per square inch.

Since Chinatex is the only exporter of greige polyester/cotton printcloth from the People's Republic of China, we limited our investigation to that company.

This investigation covers the period from March 1, 1982 through August 31, 1982.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used both the purchase price and the exporter's sales price of the subject merchandise to represent United States price. For sales by Chinatex made to unrelated purchasers prior to the importation of the merchandise into the United States, purchase price was used. For sales made through Huafang, the related trading company, the first sale to an unrelated purchaser occurred after importation of the merchandise into the United States; therefore, exporter's sales price was used.

We calculated purchase price based on the C&F price to the purchasers. Where appropriate, we made deductions for inland freight, ocean freight, and dock storage.

All exporter's sales price transactions were made from stock. We calculated exporter's sales price based on the price Huafang sold the merchandise to unrelated purchasers. Where appropriate, we made deductions from and adjustments to this price for commissions, customs duty, insurance, inland and ocean freight, and for selling expenses incurred by Huafang in the United States.

In the case of purchase price transactions, conversions of Chinese to United States currency were based on the rate of exchange in effect on the date of purchase. In the case of exporter's sales price transactions, currency conversions were based on the rate of exchange in effect on the date of exportation.

Foreign Market Value

In accordance with section 773 of the Act, we used surrogate country prices to third countries to determine foreign market value. Petitioners alleged that the economy of the People's Republic of China is state-controlled to the extent that sales of the subject merchandise from that country do not permit a determination of foreign market value under 19 U.S.C. 1677b(a). After an analysis of PRC's economy, and careful consideration of the briefs submitted by the parties, the Commerce Department concluded that the PRC is a state-controlled-economy country for purposes of this investigation. Some of the factors that were involved in determining the state-controlled issue are that the major input, cotton, has production targets and prices set or heavily influenced by the state, and that the textile industry has a dual pricing structure that is heavily influenced by the state.

As a result, section 773(c) of the Act requires us to use prices or the constructed value of such or similar merchandise in a "non-state-controlled-economy" country. Our regulations establish a preference for foreign market value based upon sales prices. They further stipulate that, to the extent possible, we should determine sales prices on the basis of prices in a "non-state-controlled-economy" country at a stage of economic development comparable to the country with the state-controlled economy.

It was determined, after an analysis of countries which produce printcloth, that Thailand would be the most appropriate surrogate. We then secured the cooperation of a producer of printcloth in Thailand.

We based foreign market value on the prices at which the Thai producer sold printcloth to third country markets, because the producer made no sales of such or similar merchandise for

consumption in the home market of Thailand. The terms of sale for all third country sales were C&F. From the C&F price we made deductions, where applicable, for inland freight in Thailand, ocean freight, foreign inland freight in the country of destination, and sales commissions to unrelated parties. In the case of exporter's sales price comparisons, a further adjustment was made for directly related sales expenses incurred by the Thai producer in making third country sales. This adjustment was made pursuant to § 353.15(c) of the Commerce Regulations to offset the adjustment made for Huafang's selling expenses in the United States.

Some of the third country sales were preliminarily found to be made at prices which were less than the cost of producing the merchandise. These sales were therefore disregarded in the determination of foreign market value pursuant to § 353.7(a) of the Commerce Regulations. The remaining sales above the cost of production were determined to be adequate as a basis for determining foreign market value. A weighted-average of these above-cost prices was then calculated.

The product sold by the Thai producer to third country markets and the preponderence of the PRC product sold to the United States were both greige printcloth, 50 percent polyester and 50 percent cotton, of construction 78 x 54, with average yarn numbers of 35s, both warp and filling. The only difference in the two products was width.

The Thai sales to third countries were in 62 and 64 inch widths, whereas the PRC sales to the United States were of 48 inch width. Therefore, the net foreign market value and the United States prices were converted from a linear yard basis to a square yard basis for the purpose of making our comparisons.

Verification

We verified the information received from the Thai producer used in this preliminary determination. In accordance with section 776(a) of the Act, we will verify all data used in reaching a final determination in this investigation.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of greige polyester/cotton printcloth from the People's Republic of China subject to this investigation which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the Federal Register. The Customs Service shall require a cash deposit or the posting of a bond equal to the estimated average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. This suspension of liquidation will remain in effect until further notice. The weighted-average margin for greige polyester/cotton printcloth is 23.1 percent.

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

Public Comment

In accordance with § 353.47 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10 a.m. on March 30, 1983, at the United States Department of Commerce, room 4830, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by March 23, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of publication of this notice, at the above address in at least 10 copies.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

March 3, 1983.

BILLING CODE 3510-25-M

Preliminary Affirmative Countervailing Duty Determination; Certain Carbon Steel Pipe and Tube Products From South Africa

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary affirmative countervailing duty determination.

SUMMARY: We have preliminarily determined that there is reason to believe or suspect that benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in South Africa of certain carbon steel pipe and tube products, as described in the "Scope of Investigation" section of this notice. We estimate the amount of the benefits to be 19.5 percent of the f.o.b. value of the merchandise for Tubemakers of South Africa and 23.3 percent for all other South African manufacturers of this merchandise.

Therefore, we are directing the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and to require a cash deposit or bond in the amount equal to the estimated bounties or grants. If this investigation proceeds normally, we will make our final determination by May 23, 1983.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Steven Morrison, Office of Investigations, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 377-3965.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon our investigation, we have preliminarily determined that there is reason to believe or suspect that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in South Africa of certain carbon steel pipe and tub products, as described in the "Scope of Investigation" section of this notice. We find the net bounty or grant to be as represented in the following table and consisting of the following benefit amounts:

	Manufacturer (percent)	
	Tubemakers of South Africa	All others (including Brollo)
• Export incentive program—category B	0.0	3.8
• Export incentive program—category D	0.0	0.0
• Iron/Steel Export Promotion Scheme	19.5	19.5
• Total	19.5	23.3

Case History

On October 6, 1982, we received a petition from counsel for the Committee on Pipe and Tube Imports. The Committee consists of domestic companies which produce carbon steel pipe and tube products. The petition alleged that manufacturers, producers, or exporters in South Africa of certain carbon steel pipe and tube products receive benefits which constitute bounties or grants within the meaning of the countervailing duty law. We found the petition to be sufficient, and on October 26, 1982, we initiated a countervailing duty investigation (47 FR 49057).

Since South Africa is not a "country under the Agreement" within the meaning of section 701(b) of the Act and the merchandise under investigation is dutiable, the domestic industry is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of this product cause or threaten material injury to the U.S. industry in question.

We presented a questionnaire in Washington, D.C., to the South African government of October 28, 1982. On November 19, 1982, we amended the scope of investigation and published notice of this amendment in the **Federal Register** (47 FR 53440). On December 10, 1982, we found that the case was extraordinarily complicated (47 FR 56377). The questionnaire response was received on January 31, 1983.

Scope of Investigation

For purposes of this investigation, the term "certain carbon steel pipe and tube products" includes electric resistance welded (ERW) carbon steel pipes and tubes with walls not thinner than 0.065 inch, of circular cross section, with an outside diameter of 0.375 inch or more but not exceeding 4.5 inches, as currently provided for in items 610.3241 and 610.3244 of the Tariff Schedules of the United States Annotated (TSUSA); ERW cold rolled carbon steel pipes and tubes with walls not thinner than 0.065 inch or not exceeding 0.1 inch, of any circular cross-sectional diameter with an outside diameter of 0.375 amd more, as currently provided for in item 610.3227 of the TSUSA; and ERW carbon steel pipes and tubes of any square or rectangular dimension with a wall thickness not less than 0.156 inch, as currently provided for in item 610.3955 of TSUSA; and ERW carbon steel pipes and tubes not suitable for use in the manufacture of ball or roller bearings of any square or rectangular dimension as currently provided for in item 610.4975 of the TSUSA.

Excluded from this investigation are ERW carbon steel pipes and tubes suitable for use in boilers, superheaters, heat exchangers condensers, feedwater heaters, or ball or rollers bearings, or conforming to A.P.I. specifications for oil well tubing and casing, or cold drawn pipes and tubes, or ERW carbon steel pipes and tubes imported with couplings.

Tubemakers of South Africa Limited (TOSA) and Brollo Africa Limited (Brollo) are the only known producers of products within the scope of investigation exported to the United States. According to responses from the respondents, no exports to the United States have been made of pipe and tube from South Africa under item 610.3227 of the TSUSA.

Analysis of Programs

The period for which subsidization is being measured is the corporate fiscal year ending September 30, 1982.

Based upon our analysis to date of the response and petition, we have preliminarily determined the following:

I. Programs Preliminarily Determined to Confer Bounties or Grants to Maufacturers, producers, or Exporters of certain Carbon Steel Pipe and Tube Products

We preliminarily determine that bounties or grants are being provided to manufacturers, producers, or exporters in South Africa of certain steel pipe and tube products under the programs listed below:

Export Incentive Program

The South African Department of Industries, Commerce and Tourism has a general export incentive program, two parts of which were used in 1982. these are described below.

Category B. This program consists of a credit against income taxes of 10 percent of the value-added component of the exported merchandise if there is a South African import duty on such merchandise. There is an import duty on carbon steel pipe and tube products. The value-added component is calculated by taking the average f.o.b. sales price per ton, increasing it by the rebate received under the Iron/Steel Export Promotion Scheme (see below), and subtracting the average raw materials costs. This figure is then multipled by 10 percent to obtain the amount of the credit. We preliminarily determine that the government of South Africa through this category B tax credit program provides a benefit which constitutes a bounty or grant. For programs involving income tax benefits, the Department generally determines the value of the bounty or grant by the value of the benefit received during the period for which subsidization is being measured.

Brollo receives a benefit under category B which was calculated to be 3.8 percent *ad valorem*. TOSA stated that it did not benefit from category B. Although we preliminarily determine the program to confer a bounty or grant, we find the estimated net bounty or grant for the period for which we are measuring subsidization to be 0.0 pecent *ad valorem* for TOSA.

Category D (Export Marketing Assistance Program). This program consists of a deduction from Taxable income of between 175 and 200 percent of export market development expenses. As we have found in previous investigations of this program, we preliminarily determine that the government of South Africa through this category D tax deduction program provides a benefit which constitutes a bounty or grant. Brollo stated that it did not benefit from this program. Stewarts and Lloyds and its subsidiary TOSA stated that no benefit was received because they had a tax loss. However, we understand that under this circumstance, the tax deduction can be carrried forward. Therefore, although we preliminarily determine the program to confer a bounty or grant, we find the estimated net bounty or grant for the period for which we are measuring subsidization to be 0.0 percent *ad valorem*.

Iron/Steel Export Promotion Scheme

The Iron/Steel Export Promotion Scheme rebate a fixed percentage of the f.o.b value of exports containing rolled, drawn, or forged steel to secondary producers if the exported product meets a value-added criterion. It is admistered by the South African Iron and Steel Industrial Corporation (ISCOR). The Department considers the Scheme to have provided an export subsidy, and therefore a countervailable bounty or grant under section 303(a)(1) of the Act. Section 771(5) of the Act equates "subsidy" with "bounty or grant" and provides illustrative examples of

subsidies. In the legislative history of the Act, the Senate Finance Committe in discussing section 771(5) said: "As under current law[. . . a subsidy may be provided either by a government or governmental entity, subdivision, or customs union, or by a private party or group of private parties." Primary steel producers in South Africa manage a special fund levied at a rate of 4 Rand per ton of steel sold in the domestic market. The South African government does not contribute to this fund. Direct payments from the fund are provided to exporters of fabricated articles containing iron or steel. The current value of the assistance is 19.5 percent of the f.o.b. value of the exported fabricated steel products. We have determined that the Iron/Steel Export Promotion Scheme provides a benefit which consititutes a bounty or grant. We have found that Brollo and TOSA take full advantage of this program on its exports of carbon steel pipe and tube.

II. Programs Preliminarily Determined Not to Confer Bounties of Grants to Manufacturers, producers, or Exporters of Certain Carbon Steel Pipe and Tube

We preliminarily derermine that no bounties or grants are being provided to manufacturers, producers or exporters in South Africa of certain carbon steel pipe and tube products under the programs listed below:

Preferential Prices for Primary Steel From ISCOR

ISCOR is South Africa's largest producer of primary steel. Over 99 percent of its stock is owned by the government of South Africa. We have no information that ISCOR sells primary steel to exporters at any rate other than that sold to manufacturers for domestic uses. The respondents purchase steel from ISCOR in arm's length transactions and are not related to ISCOR. Therefore, purchases of primary steel from ISCOR are preliminarily determined not to confer bounties or grants.

Reduced Ocean Freight Rates

The petition alleges that South African shippers benefitted from a program for reduced ocean freight rates if the products are disadvantaged with respect to foreign competition. We found no evidence of ocean freight rates for carbon steel pipe and tube products being reduced because of any program. In the Final Affirmative Countervailing Duty Determination on Certain Steel Products from South Africa, we said, "We did find evidence of variable ocean freight rates due to rate negotiation between shippers and carriers; however this variability does not constitute a bounty or grant under the Act," (47 FR 39379).

Preferential Railroad Rates

The South African Transport Services (SATS), a government-owned corporation, maintains a rate schedule that generally provides railroad rates for shipments of the pipe and tube products under investigation destined for export that are lower than domestic rates. These rates are charged per unit weight of cargo. The amount charged the shipper, the rate times the weight, is subject to a minimum weight requirement. The minimum weight associated with the export rate substantially exceeds the minimum weight for the domestic rate.

SATS has made the export rate available to all shippers after January 1, 1983, subject to the larger minimum weight requirement applicable to this rate. We determine that the rates afforded by SATS to exporters of certain carbon steel pipe and tube products are not provided on terms more favorable than those for domestic shippers and that they do not constitute a bounty or grant.

III. Program Preliminarily Determined Not To Be Used by Manufacturers, Producers, or Exporters of Certain Carbon Steel Pipe and Tube Products

We preliminarily determine that the followng programs are not used by the manufacturers, producers or exporters in South Africa of certain carbon steel pipe and tube products.

- Export incentive program—category A
- Allowances on harbor rates
- Pre- and Post-shipment financing
- Beneficiation allowances for base mineral processing, and
- Homeland develoment

IV. Programs Preliminarily Determined To Be No Longer in Existence

We preliminarily determine that the following program is no longer in existence.

Export Incentive Program—Category C (Finance Charges Aid Scheme)

The South African government provided for a tax-free rebate to certain firms increasing the value of their exports of all manufactured goods. The rebate was equal to 25 percent of the interest costs for financing exports.

The progam was discontinued on April 1, 1982. There is little likelihood that there are any exports of the subject merchandise shipped prior to that date, but not yet entered. Therefore, the benefit, it any, received for this program in the first quarter of 1982 is not included in the calculation of total estimated bounties or grants.

No other programs were found to confer bounties or grants.

Verification

In accordance with section 776(a) of the Act, we will verify the information relied upon for our final determination.

Suspension of Liquidation

We are directing the U.S. Customs Service to suspend liquidation of all entries of certain carbon steel pipe and tube products from South Africa which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to require a cash deposit or bond in the amount equal to the percentage of the f.o.b. value of the merchandise indicated at the beginning of this notice.

Public Comment

In accordance with § 355.35 of the Commerce Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on April 14, 1983, at the U.S. Department of Commerce, room 3080, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by April 7, 1982. Oral presentation will be limited to issues raised in the briefs.

All written views should be filed in accordance with 19 CFR 355.43, within 30 days of this notice's publication, at the above address and in at least 10 copies.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

March 4, 1983.

BILLING CODE 3510-25-M

Preliminary Results of Administrative Review of Countervailing Duty Order; Non-Rubber Footwear From Brazil

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of countervailing duty order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on non-rubber footwear from Brazil. The review covers the period December 7, 1979 through December 31, 1980. As a result of the review, the Department has preliminarily determined the amount of the net subsidy to be 4.77 percent of the f.o.b. invoice price of the merchandise for the period December 7, 1979 through December 31, 1979 and 3.48 percent for 1980. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or Laura Kneale, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On September 12, 1974, the Department of the Treasury ("Treasury") published in the **Federal Register** (39 FR 32903) a final countervailing duty determination concerning non-rubber footwear from Brazil. The notice stated that the Government of Brazil had provided bounties or grants on the manufacture, production or exportation of such merchandise within the meaning of section 303 of the Tariff Act of 1930 ("the Tariff Act").

On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 became effective. On January 2, 1980, the authority for administering the countervailing duty law was transferred from Treasury to the Department of Commerce ("the Department").

On January 4, 1980, T.D. 80–13 was published in the **Federal Register** (45 FR 1013) announcing the suspension of liquidation of all entries of such footwear exported from Brazil on or after December 7, 1979, and entered, or withdrawn from warehouse, for consumption on or after January 4, 1980. The Department published in the **Federal Register** of May 13, 1980 (45 FR 31455), a notice of intent to conduct administrative reviews of all outstanding countervailing duty orders. As required by section 751 of the Tariff Act, the Department has now conducted an administrative review of the countervailing duty order on non-rubber footwear from Brazil.

Scope of the Review

The merchandise covered by the review is non-rubber footwear, imported directly or indirectly from Brazil. Such imports are currently classifiable under items 700.0500 through 700.4575, 700.5400 through 700.5873, and 700.7200 through 700.9500 of the Tariff Schedules of the United States Annotated.

The review covers the period December 7, 1979, through December 31, 1980, and four programs found countervailable in the original investigation: preferential financing for exports, income tax exemptions for export earnings, and two export credit premiums, for the Goods Circulation Tax ("ICM") and the Industrial Products Tax ("IPI"). The review also covers eight programs which, although not included in the original investigation, are now alleged by the petitioner to confer subsidies on exports of non-rubber footwear from Brazil.

Analysis of Programs

(1) Preferential Financing for Exports. Under this program companies are declared eligible by the Department of Foreign Commerce of the Banco Central do Brasil ("CACEX") to receive working capital loans at preferential rates. These loans have a duration of up to one year. Each firm producing non-rubber footwear can obtain preferential financing for up to 40 percent of the value of its previous year's exports.

We calculated the subsidy under this program by multiplying the value of loans outstanding under the program during the period by the differential between the commercial interest rate and the preferential interest rate for each loan. In the absence of specific export data for the last three weeks of 1979, we calculated the outstanding principal for all of 1979 and included the portion of loans granted prior to 1979 that extended past January 1 of that year. For 1980, we prorated loans extending past December 31, 1980.

The commercial rate for short-term working capital is the rate established by the Banco do Brasil for discounting sales of accounts receivable. We choose this as the benchmark rate because information provided by the Government of Brazil indicates that working capital is normally raised within the Brazilian financial system through the sale of accounts receivable. The commercial rate includes the tax on financial transactions, from which loans under the preferential financing program are exempt, and varied from 26.40 to 37.98 percent during the period January 1, 1979, through December 31, 1980.

During the period of review, firms exporting non-rubber footwear had loans outstanding under Resolutions 515 (effective February 8, 1979), 602 (effective March 5, 1980) and 641 (effective October 22, 1980) of the Banco Central do Brasil. The effective annual rate for loans taken out under these resolutions ranged from 8.70 to 31.75 percent and the differential between the commercial and preferential rates ranged from 6.23 to 17.70 percent. We calculated the benefit conferred by the program to be 4.00 percent *ad valorem* for the period December 7, 1979 through December 31, 1979, and 2.32 percent *ad valorem* for the period December 7, 1979 through December 31, 1979, and 2.32 percent *ad valorem* for the period January 1, 1980 through December 31, 1980.

With the publication of successor Resolution 674 effective January 22, 1981, there was an increase in potential benefits under the program. The effective rate of interest for loans under this resolution is 44 percent. The comparable rate for discounting sales of accounts receivable is 72.00 percent plus the 4.60 percent tax on financial transactions. The differential is 32.6 percent.

To estimate the potential benefit and cash deposit of estimated countervailing duties for this program, we summed the prorated value of loans outstanding during the review period, and found an actual use rate of 22.46 percent. We then multiplied the differential between the new benchmark commercial and preferential interest rates by the loan use rate to find a potential benefit under this program of 7.32 percent *ad valorem*.

(2) Income Tax Exemptions for Export Earnings. Exporters of non-rubber footwear are eligible under this program for exemption from income tax of the percentage of profit attributable to export revenue. The Brazilian government calculates the tax-exempt fraction of profit as the ratio of export revenue to total revenue. The benefit equals the product of the amount of tax-exempt profit and the prevailing 35 percent corporate income tax rate. We therefore preliminarily determine the benefit from this program to be 0.43 percent *ad valorem* for the period December 7, 1979 through December 31, 1979, and 0.82 percent *ad valorem* for the period January 1, 1980 through December 31, 1980.

(3) IPI Export Credit Premium. The Brazilian government eliminated the IPI credit premium on December 7, 1979, but reinstated it on April 1, 1981. As a result, this program provided no benefit during the review period. Currently, the

Government of Brazil collects a tax on exports of non-rubber footwear to the United States which fully offsets the benefit received under this program. Therefore, for purposes of the cash deposit of estimated countervailing duties, the potential subsidy under this program is zero percent.

(4) ICM Export Credit Premium. This program, which provided Brazilian companies with an overrebate of a state value-added tax on goods destined for export, was eliminated by Convention 01–79 on January 12, 1979. Therefore, this program provided no benefit during the review period.

(5) Tax Reductions on Equipment Used in Export Production. Decree Law No. 1248 of December 2, 1975, authorizes the Commission for Export Incentives ("CIEX") to provide a reduction of up to 90% of the import duty and IPI tax on equipment and machinery imported by a company that makes minimum export commitments. One footwear exporter received a benefit under this program in 1980. Dividing this benefit by total exports of non-rubber footwear in 1980, we preliminarily determine an *ad valorem* benefit of 0.03 percent from this program. Because we have no information with regard to this program for 1979, we preliminarily applied the 0.03 percent benefit to that period as the best information available.

(6) Preferential Export Financing under CIC–CREGE 14–11. CIC–CREGE 14–11 is a program operated by the Banco do Brasil which provides preferential financing to exporters, who are then required to maintain a minimum fixed level of foreign exchange contracts with the Banco do Brasil. Exporters of non-rubber footwear participated in this program in 1980.

The Government of Brazil, in its questionnaire response, argues that the Banco do Brasil operates this program as a commercial endeavor in which it can make a profit and ensure access to foreign currency, satisfying its government-mandated foreign exchange obligations. However, the Brazilian government has not yet provided the Department with sufficient evidence to enable us to determine whether this program is operated in a manner consistent with commercial considerations. Therefore, we preliminarily determine this program to confer a subsidy.

To calculate the amount of benefit conferred under the program, we multiplied the prorated value of loans outstanding during 1980 by the differential between the commercial and preferential interest rates on each loan. Using the preferential rates for each loan (provided by the Brazilian government) and again using the rates for discounting accounts receivable as the commercial rates, the differential between the commercial and preferential rates ranged from 6.98 to 43.5 percent. We preliminarily determine the benefit conferred by the program to be 0.30 percent *ad valorem* for the period January 1, 1980 through December 31, 1980. We once again applied the 1980 rate to the portion of 1979 covered by the review as the best information available.

(7) Incentives for Trading Companies. Under Resolution 643, trading companies can obtain preferential export financing. One exporter of non-rubber footwear used the services of a trading company in 1980. However, the Government of Brazil did not provide us with information on whether the trading company received preferential financing on this transaction. Therefore, we calculated the benefit by multiplying the estimated loan amount by the estimated preferential interest rate differential. We estimated the loan amount by multiplying the amount of exports which the footwear exporter shipped through the trading company by the rate of maximum eligibility for preferential financing on exports of non-rubber footwear (40 percent). For the interest rate differential, we used the weighted-average differential for loans received in 1980 under Resolutions 602 and 641 (7.54 percent). We preliminarily determine the *ad valorem* benefit under this program to be 0.01 percent in 1980 and applied that figure to 1979.

(8) Fundo de Democratizacao do Capital das Empresas. This program, which provided Brazilian companies with export financing, was funded by the U.S. government through the Alliance for Progress. Under section 701(a) of the Tariff Act, the Department must determine whether "a country under the Agreement" or "a person who is a citizen or national of such a country, or a corporation, association, or other organization organized in such a country" is providing a subsidy with respect to a class or kind of merchandise. The United States, however, is not a "country under the Agreement," as defined by section 701(b). Therefore, the program is not countervailable.

(9) Other Programs. We also examined the following programs and preliminarily find them not to have been used by exporters of non-rubber footwear during the period of review:

a. The Commission for the Granting of Fiscal Benefits for Special Export Programs ("BEFIEX").

b. Preferential Financing for the Storage of Merchandise Destined for Export under Resolution 330.

c. Gold Draft of Exportation.

d. Export Credit Financing ("FINEX").

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the aggregate net subsidy conferred during the period December 7, 1979 through December 31, 1979 is 4.77 percent *ad valorem*, and 3.48 percent *ad valorem* for the period January 1, 1980 through December 31, 1980. Accordingly, the Department intends to instruct the Customs Service to assess countervailing duties of 4.77 percent of the f.o.b. invoice price on all shipments of Brazilian non-rubber footwear exported on or after December 7, 1979 and on or before December 31, 1979. The Department will instruct the Customs Service to assess countervailing duties of 3.48 percent for the f.o.b. invoice price on all shipments exported on or after January 1, 1980 and on or before December 31, 1980.

All unliquidated entries of this merchandise which were exported from Brazil before December 7, 1979 shall be liquidated at the applicable rates set forth in **Federal Register** notices dated May 17, 1977 (44 FR 28791), July 3, 1979 (44 FR 38839), September 28, 1979 (44 FR 55825), and February 26, 1980 (45 FR 12413).

Effective July 26, 1982, the Government of Brazil subjected exports of non-rubber footwear to the United States to an offseting export tax of 8 percent of the f.o.b. invoice price. Because of the increase in potential benefits under the preferential financing program and the reduction under the offsetting export tax, we calculate the potential aggregate net subsidy to be 0.48 percent. The Department considers this rate, since it is less than 0.50 percent, to be *de minimis*.

Therefore, the Department intends to instruct the Customs Service to waive the collection of a cash deposit of estimated countervailing duties, as provided by section 751 (a)(1) of the Tariff Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit waiver shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10

days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: March 4, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council's Salmon Plan Development Team; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The Pacific Fishery Management Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265, as amended). The Council has established a Salmon Plan Development Team which will meet to discuss recreational and troll fishery management options for the 1983 season.

DATES: The public meetings will convene on Wednesday, March 9, 1983, at approximately 10 a.m. to 6 p.m.; reconvene on Thursday, March 10, and Friday, March 11, at approximately 8:30 a.m., adjourning at approximately 6 p.m., both days. Oral comments or questions by the public will be invited beginning at approximately 5 p.m., on March 9 and 10, and at approximately noon, on March 11.

ADDRESS: The public meetings will take place at the Oregon Department of Fish and Wildlife, Beaver Room, 520 S.W. Mill Street, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Second Floor, Portland, Oregon 97201; Telephone: (503) 221-6352.

Dated: March 7, 1983.

Richard B. Stone,

Acting Chief, Operations Coordination Group, Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Department of the Navy

Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee will meet on April 13-14, 1983, from 9:00 a.m. to 5:00 p.m. each day, at 2000 North Beauregard Street, Alexandria, Virginia. All sessions will be closed to the public.

The entire agenda for the meeting will consist of discussions of key issues related to naval aspects of national security policy and related intelligence. These matters constitute classified information that is specially authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact Lieutenant Commander K. M. Cummings, Executive Secretary, CNO Executive Panel Advisory Committee, 2000 North Beauregard Street, Room 392, Alexandria, Virginia 22311. Telephone (703) 756-1205.

Dated: March 4, 1983.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.

Privacy Act of 1974; Addition of Systems of Records

AGENCY: Department of the Navy, Defense.

ACTION: Addition of a notice for system of records.

SUMMARY: The Department of the Navy proposes to add a new system of records to its inventory of systems of records subject to the Privacy Act of 1974.

DATES: The proposed action will be effective without further notice on April 8, 1983 unless comments are received which would result in a contrary determination.

ADDRESS: Any comments, to include written data, views or arguments concerning the action proposed should be addressed to the system manager identified in the system notice.

FOR FURTHER INFORMATION CONTACT: Mrs. Gwendolyn R. Aitken, Privacy Act Coordinator, Office of the Chief of Naval Operations (Op-09B1P), Department of the Navy, The Pentagon, Washington, DC 20350. Telephone: (202) 694-2004.

SUPPLEMENTARY INFORMATION: The Department of the Navy inventory of systems of records notices as prescribed by the Privacy Act have been published in the **Federal Register** at:

FR Doc. 81-674 (47 FR 2574) January 18, 1982
FR Doc. 81-9204 (47 FR 14944) April 7, 1982

SYSTEM NAME:

Naval Academy Cemetery Records

SYSTEM LOCATION:

U.S. Naval Academy, Administration Building, Annapolis, Maryland 21402

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Those eligible to reserve a lot for future burial in the Naval Academy Cemetery. Deceased individuals interred in the Naval Academy Cemetery.

CATEGORIES OF RECORDS IN THE SYSTEM:

State of Maryland Burial Transit Permit, Cemetery Interment Record (NDM-USNA-PWO-1170), U.S. Naval Academy Cemetery Records (NDW-USNA-DMC-5360/11) and correspondence to and from individuals.

Specifically, information contained on the forms or correspondence may be: full name, home address, rank, service, social security number, date and place of birth, date and place of death, marital status, name of father and mother, date and place of burial, lot number and other information relating to burial arrangements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031; Title 10, Secs 1481–88; 44 U.S.C. 3101

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To maintain official records of individuals holding gravesite reservations in the Naval Academy Cemetery. Records are used to respond to general inquiries from individuals holding gravesites reservations. Verifications of eligibility of widows of an officer or enlisted man of the Navy or Marine Corps who is buried in the Naval Academy Cemetery.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

Alphabetically by last name.

SAFEGUARDS:

Records are kept in a building not open to general visiting and are maintained in an area accessible only to authorized personnel. Buidling is under surveillance of security personnel during non-working hours.

RETENTION AND DISPOSAL:

Records are permanent. They are retained after the individual is deceased.

SYSTEM MANAGER(S) AND ADDRESS:

Superintendent, U.S. Naval Academy, Annapolis, Maryland 21402.

NOTIFICATION PROCEDURE:

Written requests may be made to the system manager.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information in this system comes from the individual to whom it applies and from the Register of Alumni.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Office of the Secretary

Defense Advisory Committee on Women in the Services (DACOWITS); Meeting

Pursuant to Pub. L. 92–463, notice is hereby given that a meeting of the Defense Advisory Committee on Women in the Services (DACOWITS) will be held 24–28 April 1983 at the Hotel Washington, Washington, D.C.

The purpose of the DACOWITS Committee is to assist and advise the Secretary of Defense on matters relating to women in the Services. The Committee meets semiannually.

Sessions will be conducted daily as indicated and will be open to the public. The agenda will include the following meetings and discussions:

Sunday, 24 April 1983—Hotel Washington
- 10:00 a.m.—3:00 p.m.—Registration
- 1:30 p.m.—Executive Committee Meeting
- 2:30 p.m.—3:30 p.m.—Chair's Orientation and Procedural Session for DACOWITS Members
- 3:30 p.m.—5:30 p.m.—Overview of the Military Services for DACOWITS Members and Military Representatives
- 5:30 p.m.—7:00 p.m.—Subcommittee Meetings
- 7:00 p.m.—8:30 p.m.—"No-Host" Cocktail Buffet

Monday, 25 April 1983—Pentagon/Hotel Washington
- 8:00 a.m.—8:30 a.m.—Official Opening
- 8:30 a.m.—12:05 p.m.—Keynote Addresses by Service Chiefs of Staff
- 12:45 p.m.—2:15 p.m.—Official Department of Defense Luncheon (By invitation only)
- 2:15 p.m.—3:45 p.m.—OSD/Service Briefings
- 3:45 p.m.—6:15 p.m.—Subcommittee Meetings

Tuesday, 26 April 1983—Hotel Washington
- 8:30 a.m.—12:30 p.m.—Briefings by Service Personnel Directors
- 12:30 p.m.—2:00 p.m.—"No Host" Luncheon
- 2:00 p.m.—4:00 p.m.—OSD/Service Briefings
- 4:00 p.m.—4:30 p.m.—Presentations by Members of the Public
- 4:30 p.m.—7:00 p.m.—Subcommittee Meetings

Wednesday, 27 April 1983—Pentagon/Hotel Washington
- 8:00 a.m.—11:30 a.m.—Field Trip to National Military Command Center (By invitation only)
- 12:00 noon—1:30 p.m.—"No Host" Luncheon
- 1:30 p.m.—4:30 p.m.—Subcommittee Meetings
- 7:00 p.m.—10:30 p.m.—Official Department of Defense Reception and Dinner (By invitation only)

Thursday, 28 April 1983—Hotel Washington
- 8:00 a.m.—9:45 a.m.—General Business Session—Adjourn

The following rules and regulations wilkl govern the participation by members of the public at the meeting:

(1) Members of the public will not be permitted to go on the field trip or attend the official social functions.

(2) All business sessions, to include the Executive Committee Meetings, will be open to the public.

(3) Interested persons may submit a written statement and/or make an oral presentation for consideration by the Committee during the meeting.

(4) Persons desiring to make an oral presentation or submit a written statement to the Committee must notify Captain Mary J. Mayer, USAF, DACOWITS Executive Secretary, OASD (Manpower, Reserve Affairs and Logistics), Room 3D769, the Pentagon, Washngton, D.C. 20301; (202) 697–2122 by 15 April 1983.

(5) Length and number of oral presentations to be made will depend on the number of requests received from the members of the public.

(6) Oral presentations by members of the public will be permitted only from 4:00 p.m. to 4:30 p.m. on Tuesday, 26 April 1983, before the full Committee.

(7) Each person desiring to make an oral presentation or submit a written statement must provide the DACOWITS Secretariat with 60 copies of the presentation/statement by 15 April 1983.

(8) Persons submitting a written statement only for inclusion in the minutes of the meeting must submit one (1) copy either before or during the meeting or within five (5) days after the close of the meeting.

(9) Any new items from the Tuesday Members of the Public Session MAY be added to the subcommittee agendas, after consideration and approval by the Executive Committee.

(10) Other new items from members of the public may be presented in writing to any DACOWITS member for transmittal to the DACOWITS Chair or Executive Secretary to consider, as feasible.

(11) Members of the public will not be permitted to enter into oral discussion conducted by the Committee members at any of the sessions; however, they will be permitted to reply to questions directed to them by the members of the Committee.

(12) Members of the public will be permitted to orally question the scheduled speakers if recognized by the Chair and if time allows after the official participants have asked questions and/or made comments.

(13) Questions from the public will not be accepted during the Subcommittee Sessions, the Executive Committee Meetings, or the Business Session on Thursday, 28 April 1983.

Additional information regarding the Committee and/or this meeting may be obtained by contacting the DACOWITS Executive Secretary, OASD (MRA&L), the Pentagon, Room 3D769, Washington, D.C. 20301; (202) 697–2122.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Intergovernmental Advisory Council on Education; Hearing Changes

AGENCY: Interegovernmental Advisory Council on Education.

ACTION: Amendment of Notice.

SUMMARY: This document is intended to notify the public of changes in the Notice of Hearing of the Intergovernmental Advisory Council on Education, published Wednesday, February 23, 1983, on page 7629.

The times, location, and agenda remain the same except the Executive Committee of the Intergovernmental Advisory Coouncil on Education will meet in closed session from 4 p.m. to 6 p.m. in Suite 2221, Department of Education, 101 Marietta Tower Building, Atlanta, Georgia 30323, to discuss issues involving Council personnel, including performance and qualifications of Council staff. These discussions will touch upon matters that would disclose information of a personal nature, which disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. The public is being given fewer than 15 days' notice of this meeting due to the aforementioned personnel issues which have arisen subsequent to the publication of the original notice.

The meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C., Appendix (1) and under exemptions (2) and (6) contained in the Government in the Sunshine Act (Pub. L. 94–409; 5 U.S.C. 552b(c) (2) and (6)).

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b(c) will be available to the public within 14 days of the meeting.

Signed at Washington, D.C., on March 3, 1983.

Wendy Borcherdt,

Acting Deputy Under Secretary for Intergovernmental and Interagency Affairs.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Hawthorne Oil & Gas Corp.; Proposed Consent Order

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of Proposed Consent Order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Hawthorne Oil and Gas Corporation and provides an opportunity for public comment on the proposed Consent Order.

DATE: Comments By: April 8, 1983.

ADDRESS: Send comments to: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, One Allen Center, 500 Dallas Street, Suite 610, Houston, Texas 77002.

FOR FURTHER INFORMATION CONTACT: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, One Allen Center, 500 Dallas Street, Suite 610, Houston, Texas 77002, [phone] (713) 229–3715. Copies of the Consent Order may be obtained free of charge by writing or calling this office.

SUPPLEMENTARY INFORMATION: On February 3, 1983, the ERA executed a proposed Consent Order with Hawthorne Oil and Gas Corporation of Lafayette, Louisiana. Under 10 CFR 205.199J(b), a proposed Consent Order which involves a sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication in the **Federal Register** requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

I. The Consent Order

Hawthorne Oil and Gas Corporation (Hawthorne), with its home office located in Lafayette, Louisiana, is a firm engaged in the production and marketing of crude oil, and was subject to the Mandatory Petroleum Price and Allocation Regulations during the period covered by this Consent Order. To resolve certain potential civil liability arising out of the Mandatory Petroleum Price and Allocation Regulations and related regulations, 10 CFR Parts 205, 210, 211 and 212, in connection with Hawthorne's transactions involving the sale of crude oil during the period September 1, 1973 through November 30, 1976 ("the period covered by this Consent Order"), the ERA and Hawthorne entered into a Consent Order, the significant terms of which are as follows:

Hawthorne was engaged in the production and marketing of crude oil during the period September 1, 1973 through November 30, 1976 and was subject to the price regulations codified in 10 CFR Part 212 and its predecessors.

DOE has conducted an audit to determine the Hawthorne's compliance with the regulations, which audit resulted in the issuance of a Remedial Order. (10 DOE ¶ 83,005).

Nothwithstanding DOE's view as to the application of the regulations to Hawthorne's activities during the settlement period, Hawthorne maintains that it calculated its costs and determined its prices in accordance with the applicable statutes and regulations. In order to avoid the expense of additional litigation and disruption of its business functions, however, Hawthorne agreed to enter into a Consent Order. Execution of the Consent Order does not constitute an admission by Hawthorne.

II. Refund

Under the Consent Order, Hawthorne will pay the sum of $520,000 to the U.S. Department of Energy. That sum is payable in 18 monthly payments, although the company may prepay the balance at any time. Installment interest on the unpaid balance wil be based upon the average prime rates.

III. Submission of Written Comments

Interested parties are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation "Comments on Hawthorne Oil and Gas Corporation Consent Order." The ERA will consider all

comments it receives by 4:30 p.m., local time April 8, 1983. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures of 10 CFR 205.9(f).

Issued in Houston, Texas, on the 15th day of February, 1983.

Sandra K. Webb,

Director, Houston ERA Office.

BILLING CODE 6450-01-M

Petro-Thermo Corp.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Petro-Thermo Corporation at Suite 260, Broadmoor Building, Hobbs, New Mexico 88240. This proposed Remedial Order alleges pricing violations in the amount of $314,261.34 plus interest in connection with the resale of crude oil at prices in excess of those permitted by 10 CFR Parts 205, 210, and 212, Subparts F and L during the time period November 1973 through December 1979.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from James F. Murphy, Manager, Crude Reseller Program, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75237, or by calling (214) 767–7432. Within fifteen (15) days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, Federal Building, Room 3304, 12th & Pennsylvania Ave., N.W., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 18th day of February, 1983.

Ilen L. Lemos,

Director, Dallas Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Record of Decision for New England Power Company Salem Harbor Generating Station Units 1, 2 and 3

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Decision to issue final floodplain statement of findings and final prohibition orders to Salem Harbor Units 1, 2 and 3.

SUMMARY: Pursuant to the Council on Environmental Quality Regulations (40 CFR Part 1505) implementing the procedural provisions of the National Environmental Policy Act (NEPA) and the Department of Energy's (DOE) NEPA guidelines (45 FR 20694, March 28, 1980), the Economic Regulatory Administration (ERA) of DOE is issuing a Record of Decision on the environmental impact statement (EIS) prepared for the Salem Harbor Generating Station Units 1, 2, and 3. DOE is also issuing the floodplain statement of findings for the proposed action pursuant to 10 CFR 1022.18.

Decision

The DOE will finalize and issue prohibition orders for Units 1, 2 and 3 of the Salem Harbor Generating Station, located in Salem, Massachusetts as requested by the New England Power Company (NEP). The final prohibition orders will prohibit using either natural gas or petroleum as the primary energy source for the three units. The owner of the generating station plans to return the three units to burning low-sulfur coal.

Project Description

On April 3, 1980 (45 FR 22183), DOE published proposed prohibition orders for Salem Harbor Units 1, 2 and 3 under the Powerplant and Industrial Fuel Use Act of 1978 (FUA) as amended. Following enactment of the Omnibus Budget Reconciliation Act of 1981 (OBRA), which amended FUA to allow powerplant owners and operators to certify to FUA's required technical and economic feasibility findings, to convert to coal as fuel, NEP elected to so certify. DOE then reissued proposed prohibition orders to Units 1, 2 and 3 on December 7, 1981. The final prohibition orders will prohibit NEP from using either natural gas or petroleum as a primary energy source in the affected units. On March 1, 1982, NEP began limited coal burning at the plant under the provisions of a Clean Air Act Delayed Compliance Order (DCO) issued by the U.S. Environmental Protection Agency (EPA) on February 9, 1982 (47 FR 5893).

A Massachusetts Draft Environmental Impact Report pursuant to the Massachusetts Environmental Policy Act was filed with the Massachusetts Office of Environmental Affairs in January 1982 and was publicly available on March 22, 1982.

DOE published a Draft Environmental Impact Statement (DEIS) (DOE/EIS–0086–D) in February 1982 and a Final Environmental Impact Statement (FEIS) in October 1982 (DOE/EIS–0086–F).

Description of Alternatives

In the EIS, DOE has assessed the environmental impacts of:

A. No DOE action, i.e., no prohibition order—NEP elects to continue burning oil, or retire the plant.

B. DOE issues prohibition order—NEP elects to convert to another fuel (low sulfur coal).

The "no action" alternative would allow NEP continued use of oil at the units, and so would not change the present impacts to the environment. Thus the "no action" alternative is considered the environmentally preferable alternative. However, continued operation with oil would not satisfy the purpose and goal of FUA to use energy other than oil or gas.

Fuels other than low sulfur coal considered as potential major energy sources under the B option were high-sulfur coal, coal-oil mix, refuse-derived fuel and wood/wood chips. None of these is considered preferable to the use of low sulfur coal either because they are not available in sufficient quantities or because they necessitate additional construction, transportation, or storage, or create environmental concern while reducing oil consumption by only 20%.

The major issues of concern in the environmental impact assessment were air and water quality, noise, increased traffic, and land use problems due to ash

disposal. Impacts to regional or site geology, aquatic or terrestrial biota, housing labor market or other socioeconomic factors were of lesser significance.

A prohibition order has enabled NEP to obtain a DCO allowing the use of coal as fuel under prescribed conditions while refurbishing the existing electrostatic precipitators.

Air Quality

Conversion to coal under the DCO allows slightly negative impacts due to the increased particulate matter emission for up to 46 months (during refurbishing of the precipitator). Following the DCO period particulate emissions will again be within Clean Air Act state implementation plan limits. SO_2 emissions remain within allowable limits and equivalent to current SO_2 emissions on oil firing. NO_2 emissions were estimated to increase by 180 tons per year, well under the 250 tons per year exemption allowed by the Massachusetts Department of Environmental Quality Engineering. Mitigative measures such as wetting down of construction areas and the coal pile to reduce impacts of increased dust will be taken.

Water Quality

The Salem Harbor Generating Station currently operates under a National Pollutant Discharge Elimination System (NPDES) permit which will remain essentially unchanged. Conversion to coal will increase the size of the existing coal pile, and therefore increase the potential for contamination of ground water from coal pile runoff.

The principal sources of wastewater will include coal pile runoff, excess water from the bottom ash sluice water treatment system, and an increased solids content in equipment washwaters and boiler seal water, due to the larger amounts of ash involved in coal firing. Each of these sources will be routed through the existing wastewater treatment system.

Solid Waste Disposal

Approximately 164 tons of fly and bottom ash per day will be produced at Salem Harbor after conversion to coal. The utility will either market the ash or dispose of it in permitted commercial landfills located within 30 miles of the plant.

Transportation

Various methods of transportation of coal to the site were analyzed. The plant does not now have rail facilities, and reactivation of such rail routes would be difficult. No coal-slurry pipelines were available or planned in this area during the life of the plant. There are existing dock facilities currently in use. While converson will result in a slight net increase in dock use, existing facilities remain sufficient due to the more rapid unloading rate for coal. Conversion of Units 1, 2, and 3 will result in 25 unloadings per year of the 36,000 ton collier. Due to the displacement of oil by coal, about one half of the present barge/tanker unloadings will be eliminated to be replaced by collier unloadings. No dredging or other work requiring a permit from the U.S. Army Corps of Engineers is required.

Floodplain Determination

Since the generating station is an existing facility whose dock and tank farm portions are located within the 100-year floodplain, as delineated on the appropriate HUD floodplain map for the City of Salem, DOE was required to comply with its floodplain management regulations (10 CFR Part 1022).

DOE prepared a preliminary floodplain assessment which is included as Section 2.5 of the FEIS for Salem Harbor (October 1982). Alternatives to this proposed action were identified, environmental impacts evaluated and mitigation measures were proposed. In addition, the preliminary floodplain statement of findings concluded that no practicable alternatives exist to the continued location of the generating station in the floodplain. No substantive comments on this issue, either during the review period for the DEIS or during the 30 day hold period of the FEIS were received by DOE.

Several of the modifications to the facility necessary to allow conversion to coal involved existing structures which are built in the floodplain, including the coal pile and settling basins. The structures cannot be relocated within the generating site boundary.

The proposed action includes all practicable measures to minimize harm to the floodplain. Facilities constructed in the floodplain that are subject to hurricane storm waves (V3 zone) will be floodproofed to withstand wave forces and inundation. Floodproofing will include such items as diking and reinforcement to reduce storm damage.

Since October 1982 DOE has further evaluated the matter and has determined that the proposed conversion will not change the existing character of the floodplain or alter the risk of loss due to flooding of adjacent property.

The Department has determined, based on the floodplain assessment, that there is no practicable alternative to the continued use of the existing facilities. The Floodplain Statement of Findings is attached.

Basis for Decision

NEP is desirous of converting Salem Harbor, Units 1, 2, and 3 as evidenced by its certification pursuant to Section 1021 of OBRA and its current burning of coal by those units pursuant to the DCO issued in February 1982.

Conclusion

While the no-action alternative can be described as environmentally preferred (40 CFR 1505.2), benefits derived from this conversion have been balanced against the potential environmental impacts. In addition, reasonably available alternatives have been considered. As a result of these evaluations, the proposed conversion to coal is the preferred alternative of the EIS, and DOE will issue the final prohibition orders to Salem Harbor Units 1, 2, and 3. In addition, as a result of its review of alternatives and evaluation of the environmental impacts, DOE has determined there is no practicable alternative to the existing location of the generating station in the 100-year floodplain. All practical means to avoid or mitigate harm in the floodplain will be used.

Issued in Washington, D.C., on March 3, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Department of Energy, Floodplain Statement of Findings

The Department of Energy proposes to finalize prohibition orders under the Powerplant and the Industrial Fuel Use Act of 1978 (FUA) for the Salem Harbor Generating Station Units 1, 2, and 3. The final prohibition orders will prohibit using either natural gas or petroleum as the primary energy source for the three units. The owner of the generating station plans to return the units to burning low-sulfur coal.

The generating station is located in Salem, Massachusetts on a 60 acre site adjacent to the Harbor (See Attachment A). The station has been in operation since 1952. The units were designed to burn coal, and did burn coal until 1969. Most of the facilities needed to handle coal already exist. This includes the unloading pier, the coal storage area, and the ash settling basins.

Conversion of the units to burning coal will necessitate modification of existing facilities, including the coal storage area and the settling basins, which are located in a 100-year floodplain and which, because of

physical constraints, cannot be relocated within the site to avoid the floodplain (See Attachment B). Accordingly, the Department prepared a floodplain assessment for the proposed action pursuant to 10 CFR Part 1022. The floodplain assessment is incorporated in the final environmental impact statement the Department prepared for the proposed finalization of the prohibition orders (DOE/EIS–0066, October 1982).

As part of the floodplain assessment, the Department considered alternate locations within the site and "no action" as alternatives to locating the proposed action in the floodplain. Alternate locations within the site that would avoid the floodplain are precluded by physical constraints. The "no action" alternative would not serve the purposes of FUA. In addition, it would not necessarily avoid the floodplain action since the utility could convert to coal without the final prohibition orders.

The necessary modifications to the coal pile and settling basins will not change the existing character of the floodplain nor alter the risk of loss due to flooding. Facilities in the floodplain will be flood-proofed to withstand wave action and inundation in conformance with applicable floodplain protection standards. Flood-proofing will include such measures as diking and structural reinforcement.

The Department has determined, on the basis of the floodplain assessment, that there is no practicable alternative to the proposed facility modifications in the floodplain and that the proposed action has been designed to minimize potential harm to or within the floodplain.

Issued in Washington, D.C. on March 2, 1983.

William A. Vaughan,

Assistant Secretary, Environmental Protection, Safety, and Environmental Preparedness.

[Docket No. TC83-4-000]

Arkansas Louisiana Gas Company, a Division of Arkla, Inc.; Tariff Filing

March 4, 1983.

Take notice that on February 22, 1983, Arkansas Louisiana Gas Company, a Division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, tendered for filing in Docket No. TC83-4-000 6th Revised Sheet No. 3B, superseding 5th Revised Sheet No. 3B, to Arkla's FERC Gas Tariff, First Revised Volume No. 1, to be effective 30 days after filing.

The tariff sheet is said to change the definition of the two interruptible priorities in Arkla's curtailment plan in order to modify the order of curtailment as among interruptible customers only and is said to make no changes in any of the firm priorities. The present curtailment plan is said to distinguish between the two interruptible priorities solely on a volumetric basis, the dividing point being 3,000 Mcf of gas per day. The new definitions would place in Priority 7 interruptible customers who have agreed to purchase at least a specified minimum volume of gas if it is tendered to them and would place in Priority 8 interruptible customers who have not agreed to purchase a specified minimum volume of gas if it is tendered to them.

Arkla states that although it presently has only one interruptible customer, it is attempting to negotiate additional interruptible sales to replace lost industrial loads upon which the efficient operation of its system has been historically dependent. These interruptible industrial loads are contemplated to be a benefit to Arkla in that it may have industrial sale outlets for its gas as needed from time to time while at the same time it may maintain control over the magnitude of such interruptible deliveries as and when it is desirable to reduce those deliveries in the course of monitoring their impact on Arkla's firm retail customers.

Any person desiring to be heard or to make any protest with reference to said tariff sheet should on or before March 21, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-336-000]

Consumers Power Co.; Filing

March 4, 1983.

Take notice that Consumers Power Company (Consumers) on February 18, 1983, tendered for filing Amendment No. 7 to the Operating Agreement dated March 1, 1966 among Consumers, The Detroit Edison Company (Detroit) and The Toledo Edison Company (Toledo). Consumers and Detroit will be collectively denoted "Michigan Companies". The Operating Agreement dated March 1, 1966 was amended July 28, 1975, August 1, 1979, July 1, 1980, May 1, 1981, March 1, 1982 and June 1, 1982 by Amendments Nos. 1, 2, 3, 4, 5 and 6, respectively.

Amendment No. 7 does not contain a change in terms and conditions; the demand charge for Weekly Short Term Power remains at $0.85 per kilowatt per week as contained in Amendment No. 3 and as filed in Docket No. ER80-600 and made effective August 1, 1980 by letter Order dated December 5, 1980. The Amendment includes a new provision which shall allow either party to sell Short Term Power on a daily basis at the rate of one-fifth of the existing weekly demand rate. The supplying party may be either party named in the Operating Agreement or may be parties not directly part of this Agreement.

Consumers states that the terms and conditions of the provision to allow either party to sell Short Term Power on a daily basis at the rate of one-fifth of the current weekly Short Term Power demand rate are substantially the same as the recently filed Operating Agreement, Amendment No. 22, among Consumers, Detroit and Indiana & Michigan Electric Company (Docket No. ER82-431-000) which has been accepted by the Commission and made effective March 10, 1982 by letter Order dated June 2, 1982.

Consumers requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon Detroit, Toledo and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER83-328-000]

CP National Corp.; Filing

March 4, 1983.

Take notice that on February 17, 1983, CP National Corporation (CP National) tendered for filing its Phase II rate—a rate decrease—for transmission service to the Fort Mohave Indian Tribe.

CP National requests an effective date of January 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-333-000]

Dayton Power and Light Co.; Filing

March 4, 1983.

Take notice that on February 18, 1983, the Dayton Power and Light Company (Dayton) tendered for filing proposed changes in rates and terms and conditions to its FERC Electric Tariffs, Original Volumes No. 1 and 2, applicable for firm service to municipal resale customers. The proposed changes would increase revenues from jurisdictional sales and service by approximately $3,735,055, based on the 12-month period ending December 31, 1983. Dayton proposes that the rates and charges and terms and conditions of service revised by this filing become effective April 19, 1983; however, in order to make the proposed increases coincide with Dayton's currently pending, general retail rate increase presently anticipated to become effective in late April 1983.

Dayton requests that the effectiveness of this increase be suspended until the date the rates established in that decision become effective, if later than April 19, 1983.

Copies of the filing were served upon each affected customer and mailed to the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Rules 211 and 214 of the of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6004 Filed 3-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-337-000]

Edison Sault Electric Co.; Filing

March 4, 1983.

Take notice that on February 18, 1983, Edison Sault Electric Company (Edison) tendered for filing a Supplemental Agreement No. 8, between Edison and Upper Peninsula Power Company (Upper Peninsula), dated February 1, 1983, which agreement will supplement an existing Contract for Electric Service, dated September 10, 1976, between same two parties. The contract between the parties, dated September 10, 1976, has been designated FPC Rate Schedule No. 7 (Docket No. ER77-98). The proposed supplemental agreement provides for a change in Section 12, TERM, for termination of Agreement under new conditions and provisions for recovery of cost to Edison.

Copies of the filing were served upon Upper Peninsula Power Company and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-338-000]

New York State Electric & Gas Corporation; Filing

March 4, 1983.

Take notice that New York State Electric & Gas Corporation (NYSEG), on February 22, 1983, tendered for filing proposed changes in its FERC Rate Schedule Nos. 27, 28, 30, 33 and 35. It is estimated that the proposed changes would increase revenues from jurisdictional sales and service by about $10,300 based on the 12 month period ended December 31, 1982.

NYSEG states that after the extensive hearings in Case No. 28167, "New York State Electric & Gas Corporation Electric Rates", and pursuant to Opinion 83-1 issued by the Public Service Commission of the State of New York on January 11, 1983, NYSEG filed revised leaves to Schedule PSC No. 115—Electricity, which the above Opinion allowed to become effective January 18, 1983. Rate Schedule PSC No. 115 is incorporated in the previously noted FERC schedules.

NYSEG requests an effective date of January 18, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon NYSEG's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practic and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6007 Filed 3-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-321-000]

Portland General Electric Company; Filing

March 4, 1983.

Take notice that Portland General Electric Company (PGE) on February 14, 1983, tendered for filing a Peak Sale-

Energy Exchange Agreement and rate schedule under which PGE has agreed to supply City of Seattle, City Light Department (Seattle), at Seattle's request, 125 megawatts of firm peaking capacity not to exceed 10,500 megawatt hours during any seven-day period. The term of the agreement is from December 1, 1982 to February 28, 1983. Seattle shall pay PGE $441,750 in installments of $147,250 per month for firm peaking capacity plus an amount equal to $1.50 times each kilowatt of capacity scheduled. Energy delivered to Seattle shall be returned within seven days and Seattle shall be obligated to schedule such returns at a time within seven days of delivery when PGE's decremental cost savings equal or exceed PGE's incremental cost for the energy delivered. PGE will deliver energy at PGE's interconnection points with Bonneville Power Administration.

PGE requests an effective date of December 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon City of Seattle.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6008 Filed 3-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-335-000]

Public Service Company of New Mexico; Filing

March 4, 1983.

Take notice that Public Service Company of New Mexico (PNM), on February 16, 1983, tendered for filing as an initial rate schedule an Interconnection Agreement, Service Schedules A, B and D, thereto, between PNM and Southwestern Public Service Company (SPS).

PNM states that the Interconnection Agreement provides for the installation of approximately 200 miles of 345 kV alternating current back-to-back converter to complete an asynchronous intertie of the PNM and SPS electric systems. Commencing in 1985 and continuing through 1989, SPS will purchase 200 MW of interruptible energy from PNM. During the period June 1, 1991, through April 30, 1995, PNM will purchase 100 MW of interruptible power and energy from SPS. This purchase will increase to 200 MW on May 1, 1995, and is anticipated to remain at this level for the remaining term of the agreement, May 31, 2011. Additionally, the Interconnection Agreement provides for emergency service and economy energy transactions between the two parties.

Copies of the filing were served upon the SPS and the New Mexico Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6009 Filed 3-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2789-001]

Raft River Rural Electric Cooperative, Inc.; Intent To Prepare Environmental Impact Statement, and Notice of Scoping Session and Public Hearing

March 4, 1983.

The Raft River Rural Eelectric Cooperative, Inc. filed on February 25, 1982 an application for license for the Eagle Rock Hydroelectric Project, FERC Project No. 2789-001. The project would be located on the Snake River near American Falls, Idaho.

Public notice of the application was issued by the Commission on November 2, 1982. The application has been mailed to interested agencies for their review and comment. The Commission's staff has determined that issuance of a license for the proposed hydroelectric project would constitute a major federal action significantly affecting the quality of the human environment. The staff therefore intends to prepare an environmental impact statement in accordance with the National Environmental Policy Act. Possible alternatives to the proposed action will be addressed.

Scoping Session

Interested persons and agencies are invited to participate in a scoping meeting to discuss the environmental impacts expected from the proposed Eagle Rock Hydroelectric Project. The scoping session will be held on Thursday, April 20, 1983, commencing at 10:00 a.m., and will be held at the Power County Senior Citizens Center, 180 Idaho Street, American Falls, Idaho 83211. The scoping session will be convened by the Commission's staff. The purpose of the scoping session is to enable interested persons and agencies to discuss with the Commission staff environmental impacts and other matters which they believe should be included in the environmental impact statement.

Public Hearing

Interested officials and members of the public are invited to express their views about the project in a public hearing. The public hearing will be held on Wednesday evening, April 20, 1983, commencing at 6:30 p.m., and will be held at the Hillcrest Elementary School Multipurpose Room, 100 Bennett Avenue, American Falls, Idaho. The public hearing will be conducted by the Commission's staff.

At the public hearing, persons may give their statements orally or in writing. The hearing will be recorded by a stenographer, and all statements (oral and written) will become part of the public hearing record. In addition, the public hearing record will remain open until May 20, 1983, and anyone may submit written comments on the project until that time. Comments should be addressed to Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, and should clearly show the project name and number (Project No. 2789-001) on the first page.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6010 Filed 3-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EF82-3041-000]

Southeastern Power Administration (Kerr-Philpott Projects); Order Confirming and Approving Rates

Issued: March 4, 1983.

By letter filed on September 3, 1982, the Assistant Secretary of Energy for Conservation and Renewable Energy (AS/CE), on behalf of the Southeastern Power Administration (SEPA), submitted a request for final confirmation and approval of Rate Schedule JHK–1–D (which replaces Rate Schedule JHK–1–C) and an extension of Rate Schedules KP–1–B and KP–2–B.[1] These rate schedules apply to wholesale power marketed by SEPA from the Corps of Engineers' multiple purpose reservoir projects known as the John H. Kerr and Philpott projects. By Rate Order SEPA–14, issued on September 2, 1982, the AS/CE confirmed and approved these rate schedules on a interim basis. Final approval is requested for the period October 1, 1982, through March 31, 1983.

SEPA is a Federal power marketing agency responsible for marketing power from a number of reservoir projects, including the integrated Kerr-Philpott projects located on the Roanoke and Smith Rivers, respectively, in Southern Virginia. The total installed hydroelectric capacity of the project is 218,000 kilowatts. SEPA owns no transmission facilities, relying, instead, on the facilities of Virginia Electric and Power Company (VEPCO) and Carolina Power and Light Company (CP&L) to transmit power to its preference customers. Rates previously in effect were approved by the Commission by order dated January 29, 1981. A one-year extension through September 30, 1982, was approved by the Acting Director of the Commission's Office of Electric Power Regulation by order dated March 19, 1982.

Rate Schedule KP–1–B is applicable to public bodies and cooperatives which operate within 150 miles of the Kerr project and receive power through VEPCO transmission facilities. Rate Schedule KP–2–B is applicable to power and energy sold to CP&L and to VEPCO. The AS/CE has requested that these rate schedules be extended for a six-month period without change or modification.

Rate Schedule JHK–1–D governs sales to public bodies and cooperatives operating within 165 miles of the interconnection point for the VEPCO and CP&L systems and which are served by CP&L's transmission facilities. Rate Schedule JKH–1–D is identical to Rate Schedule JKH–1–C (which it supersedes) except that the monthly wheeling charge has been increased from $0.56 per kilowatt of contract demand to $0.72 per kilowatt of contract demand to cover additional transmission costs imposed by CP&L. This results in an increased wheeling charge of $60,000, which will be paid by SEPA to CP&L. SEPA will pass the added wheeling costs directly through to its affected customers.

Public notice of the filing was published in the **Federal Register** on September 22, 1982, with comments due on or before October 1, 1982. No interventions or protests were filed.

Discussion

The basic support for this filing is a June 1982 System Power Repayment Study (PRS), which includes supplementary information that explains the basis for the data, criteria, and assumptions used in the PRS. The PRS is basically an update of SEPA's System PRS dated June 1981, upon which existing rates are predicated. However, the June 1982 PRS shows a deficit of $5,521,000 in repayment of the capital investment, at the end of the 50-year repayment period. This deficit occurs primarily because (1) future project replacement costs were indexed from a 1982 price level to a higher 1983 price level, (2) SEPA applied a current interest rate (increased from 8.5 to 9.0 percent) on all future project replacements, and (3) after fiscal year 1982, increased electric operating expenses exceed increased project revenues. The deficit is also partially attributable to additional interest expense on future project replacements because of a deferral of repayment of portions of project replacement costs during the latter years of the repayment period. Portions of the $5,521,000 deficit occur throughout the 23-year period between fiscal year 1982 and 2004. Therefore, there is not a large deficit occurring in any one year.

The AS/CRE states in Rate Order No. SEPA–14:

> SPEA's Power Repayment Study, prepared in June 1982, for the Kerr-Philpott projects, shows that the rate schedules proposed for the six-month extension will not produce revenues on a long-term basis sufficient to meet repayment criteria. However, because the shortfall is very moderate and of definite short duration, and because SEPA is engaged in a definite course of action to extricate itself from difficult and complex policy problems, the proposal to extend two of the existing rate schedules and to modify the third to pass on additional wheeling charges applicable to the Carolina Power and Light Company area appears, under the circumstances, to be reasonable and justifiable. Furthermore, SEPA's representation that it will develop and present rate schedules during the requested extension period which will produce revenues adequate to recover on a timely basis all project power costs appears realizable and will be accepted.

In exercising our delegated authority to confirm and approve Federal power marketing agency rates, the Commission must insure that such rates satisfy the standards established under the applicable power marketing statutes. Those statutes, including Section 5 of the Flood Control Act of 1944, require, *inter alia,* that rates be set at levels which encourage the most widespread use of project power and energy, which are as low as possible consistent with sound business principles, and which provide sufficient revenues to recover operating costs and to repay the Federal investment within a reasonable time.

While the SEPA PRS provided in this docket indicates some revenue deficiency over a 23 year period, we believe it significant that no large deficit is projected to occur in any given year. Furthermore, given the representations by the AS/CE that SEPA is developing and will shortly file rates providing for full cost recovery, and considering the relatively short duration of the requested approval period, we cannot conclude that the AS/CE's request to extend SEPA's two rate schedules and implement the third is unreasonable or inconsistent with the relevant statutory criteria. We note, however, that our approval is predicated on the short term nature of the request and contains the caveat that we expect SEPA to submit its new rates in a timely fashion with no further requests for extension.

The Commission orders:

(A) SEPA's Rate Schedules JHK–1–D, KP–1–B, and KP–2–B are hereby confirmed and approved on a final basis for the six-month period, October 1, 1982, through March 31, 1983.

(b) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 4271-002]

Vidler Tunnel Water Co.; Surrender of Preliminary Permit

March 2, 1983.

Take notice that the Vidler Tunnel Water Company, Permittee for the proposed Vidler Tunnel Project No. 4271, has requested that its preliminary permit be terminated. The permit was issued on August 21, 1981, and would have expired on July 31, 1983. The project would have been located on Peru Creek in Summit County and on Leavenworth Creek in Clear Creek County, Colorado.

Vidler Tunnel Water Company has determined that the lack of flow at the site and the difficulty of construction and operation of this project make the economics very poor. It was concluded that this project would be economically unfeasible at this time.

Permittee filed its request on February 10, 1983. The surrender of the preliminary permit for Project No. 4271

is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of implementation of second-stage refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the distribution of the consent order funds obtained from Ethyl Corporation in settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, Department of Energy, 1220 Pennsylvania Avenue, NW., Washington, D.C. 20461, (202) 633-8377.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the decision and order set out below. The decision and order relates to a consent order between Ethyl Corporation, a petroleum products reseller, and the DOE's Economic Regulatory Administration. The consent order settled all disputes between the DOE and the firm with regard to Ethyl's compliance with the DOE price regulations. Under the terms of the consent order, Ethyl has deposited $14,535 into an escrow account for distribution by the Office of Hearings and Appeals through its special refund procedures.

On May 20, 1982, the Office of Hearings and Appeals issued a Decision and Order establishing special refund procedures for distributing the Ethyl consent order funds. *See* 47 FR 23015 (1982). In that decision, the OHA held that it would accept for a period of 90 days from the publication of the Decision in the **Federal Register** applications for refund from persons who purchased No. 2 fuel oil from Ethyl during the period covered by the consent order. The OHA also stated that it would reserve judgment on the disposition of any funds remaining after all successful refund applicants had been paid. No applications for refund were filed by August 24, 1982, the deadline for filing refund applications. Consequently, the present Decision and Order, published concurrently with this notice, reflects the OHA's determination as to the appropriate disposition of the entire Ethyl settlement fund.

After analyzing the circumstances underlying the consent order and the comments submitted by interested parties, the OHA has determined that the settlement money should be paid to Gulf States Utilities Company of Beaumont, Texas, the ultimate consumer of the No. 2 fuel oil. Gulf States will be required to pass on the benefits of the refund to its utility customers as reduced fuel costs. Accordingly, the OHA has ordered the DOE's Office of Controller to disburse the entire proceeds of the Ethyl consent order fund to Gulf States Utilities Company.

Dated: March 1, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of the Department of Energy

Supplemental Order

Name of Petitioner: Office of Enforcement, Economic Regulatory Administration: In the Matter of Ethyl Corporation

Date of Filing: January 10, 1983

Case No.: HQF-0013

On May 20, 1982, the Office of Hearings and Appeals of the Department of Energy issued a Decision and Order establishing special refund procedures for distributing funds obtained by the DOE through consent orders entered into with Panhandle Eastern Pipeline Company, PVM Oil Associates, Inc., Loveladdy Oil Company, Armstrong and Associates, and Ethyl Corporation (Ethyl). *Office of Enforcement*, 9 DOE ¶ 82,569 (1982) (hereinafter cited as *Panhandle*). Under the terms of the consent orders, each firm placed money into a DOE escrow account to be distributed, together with interest, in accordance with the directives of the OHA pursuant to special refund proceedings. While the common legal and factual issues in these cases made it appropriate to consolidate them for the purpose of establishing special refund procedures, the consent order funds have remained separate, and the refund proceedings in each case have been handled separately. The present Decision concerns only the Ethyl consent order fund.

The May 20 Decision established a two-stage process for the distribution of the Ethyl consent order fund. In the first stage, applications for refund would have been accepted from claimants who purchased No. 2 diesel fuel which was marketed by Ethyl during the period January 17, 1974 through May 31, 1974. The deadline for the submission of refund applications was August 24, 1982. The May 20 Decision also suggested that any funds remaining after qualified claimants had been paid would be distributed to entities which would pass through the benefits of any refunds to the group of persons who were likely injured as a result of the allegedly improper pricing practices.

The deadline for the submission of claims has now passed, and we have not received any refund applications. Under these circumstances, any possible claimant has waived its right to receive a refund during the first stage claim process. This Decision will therefore address the procedures to be instituted for distribution of the Ethyl consent order funds in the second stage of the refund process. Under the facts of the present proceeding Gulf States Utilities Company of Beaumont, Texas, the end-user of the fuel oil covered by the Ethyl consent order, appears to be the most appropriate entity through which the benefits of the Ethyl settlement fund may be distributed to injured parties.

Background

Ethyl is a "reseller" of petroleum products, as that term was defined in 10 CFR 212.31, and is engaged in operations in the Houston, Texas area. During the relevant time period, Ethyl was subject to the Mandatory Petroleum Price Regulations set forth in 10 CFR Part 212, Subpart F, which governed the maximum prices that could lawfully be charged by resellers in the sale of fuel oil and other covered products. A DOE audit of Ethyl revealed possible pricing violations with respect to the firm's sale of No. 2 fuel oil in the State of Texas during the period January 17 through May 13, 1974. All of the fuel oil covered by the audit was purchased by Stinnes Oil & Chemical Company (Stinnes). In order to settle all claims and disputes between Ethyl and the DOE regarding Ethyl's

sales of No. 2 fuel oil, Ethyl and the DOE entered into a consent order on July 30, 1979, in which Ethyl agreed to remit $14,535 to the DOE. Notice of the consent order was published in the **Federal Register** on August 13, 1979. *See* 44 FR 47394 (1979). Interested parties were invited to submit written notice to the DOE of potential claims against the settlement amount. No claim was received by the DOE in response to that notice. The ERA was unable either to identify the persons, if any, who were entitled to the Ethyl settlement funds or to ascertain the amounts of refunds that such persons were entitled to receive. Accordingly, it filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals on July 21, 1981.

Following the issuance of a final determination on the ERA's Petition in connection with the Ethly fund in the *Panhandle* case, we mailed written notice of the opportunity to file applications for refund for a portion of the Ethyl refund moneys to Stinnes and to Gulf States Utilities Company. We also published the *Panhandle* Decision and Order in the **Federal Register**. *See* 47 FR 23015 (1982). However, no applications for refund for a portion of the Ethyl fund had been filed by the time the deadline for filing, August 24, 1982, had passed.

Second Stage Refund Procedures

As we have stated in a number of previous Decisions, the primary purpose of Subpart V special refund procedures is to provide restitution to persons injured by alleged regulatory violations. *See generally, Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (hereinafter cited as *Vickers*); *Sauder v. DOE*, 648 F.2d 1341 (Temp. Emer. Ct. App. 1981). Second stage refund procedures permit the fashioning of distribution programs to compensate injured persons who are unable for one reason or another to submit valid claims. *See Armstrong and Associates/City of San Antonio*, 10 DOE ¶ 85,050 (1983). Although we did not establish second-stage procedures in the *Panhandle* Decision we suggested several possible distribution mechanisms: (1) first purchasers, who are in the best position to channel refunds to downstream purchasers, would be invited to formulate plans for distribution; (2) refunds might be made in the form of lowered energy or energy-related costs in Ethyl's market area, through special programs formulated by state governments; and (3) in the event that other distribution mechanisms proved infeasible or inappropriate, we proposed that the remaining funds be deposited into the United States Treasury.(*1*)

Following the issuance of the *Panhandle* Decision, we were informed by the Ethyl Corporation that all of the fuel covered by the consent order was sold to Stinnes Oil Company of Houston, Texas, which in turn sold it to Gulf States, an investor-owned public utility doing business in the States of Texas and Louisiana. As a public utility, Gulf States would be required to report any refunds which it received to the state regulatory agencies which oversee its operations. These funds would be accounted for as a reduction in fuel oil costs, which would result in the refunds being passed on to Gulf States' utility customers in the form of lower rates for electricity. *See* January 19, 1983 Letter from John Creighton III, counsel for Gulf States, to Terry Johnson, Deputy Assistant Director, Office of Hearings and Appeals.

A distribution of the Ethyl funds through Gulf States would have several advantages. It would channel the funds through the ultimate purchaser of all the Ethyl products covered by the consent order to the same class of persons who were injured by the alleged overcharges. Moreover, the administrative costs for Gulf States of passing on the benefit of the refund to its customers would be *de minimus*, since it could be accomplished as part of the utility's routine regulatory reports. This is an important consideration in light of the relatively small amount of the fund—only $21,098.67 including interest accrued to January 31, 1983. Finally, this distribution satisfies the concerns expressed by the commenters in their general remarks about the appropriate distribution of residual funds. (*2*) Consequently, we shall direct the DOE Office of the Controller to disburse the entire Ethyl Corporation consent order fund to Gulf States Utilities Company.

It is Therefore Ordered That:

(1) The Director of the Office of Finance and Accounting, Washington Financial Services Division, of the DOE Office of the Controller shall take appropriate action to disburse $14,535 plus 100 percent of accrued interest on the Ethyl Corporation account from the deposit fund escrow account established at the Department of the Treasury for this purpose to: Gulf States Utilities Company, c/o John Creighton III, Esq., Orgain, Bell & Tucker, 470 Orleans Street, Beaumont, Texas 77701.

This disbursement shall be made upon receipt of this Decision and Order.

(2) This is a final Order of the Department of Energy.

Dated: March 1, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Notes

(*1*) In response to our request for comments on the appropriate second-stage refund procedure, we received submissions from nine state governments contending that residual funds should be distributed through them. *See, e.g.*, Attorneys General of the States of Delaware, *et al.*, 10 DOE ¶ 82,536 (1982). We also received a submission from the Transportation Group, an organization representing four public transportation trade associations, in which the group maintained that all funds should be distributed only to direct purchasers of the petroleum products covered by the consent order. All of the comments which we received in this proceeding were generic rather than case-specific. We disagree with the premise advocated by the state governments and the Transportation Group that the OHA should adopt a single approach to the disposition of second-stage funds in all special refund cases. As we have repeatedly stated, the appropriate solution to the question of what should be done with funds remaining after all first-stage claims have been adjudicated depends upon the factual circumstances involved in each case. *See* Vickers at 96,307; Office of Special Counsel, 10 DOE ¶ 85,048 (1982) at 88,217. Thus, the amount of money remaining, the product involved, and any information available about the probable disribution of the product or about the transactions underlying the consent order are all factors which we consider in determining the appropriate recipient or recipients for second-stage refunds.

(*2*) Both the Transportation Group and the states maintain that second-stage funds should be distributed to a party with some nexus to the transactions underlying the consent order in order to benefit those persons who were likely injured. It is clear that under the facts in the present proceeding, a distribution to Gulf States satisfied this concern.

BILLING CODE 6450-01-M

Office of the Secretary

National Petroleum Council; Coordinating Subcommittee of the Committee on Enhanced Oil Recovery; Location Change for Meeting

The location of the March 22, 1983 meeting of the Coordinating Subcommittee of the Committee on Enhanced Oil Recovery, which was noticed on December 21, 1982, (47 FR 56892) has been changed. The new location should read: The Venice Room, Guest Quarters Galleria West, 5353 Westheimer, Houston, Texas.

Issued at Washington, D.C., on March 2, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

[FR Doc. 83-6912 Filed 3-8-83; 8:45 am]

BILLING CODE 6450-01-M

Costs and Economics Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Costs and Economics Task Group of the Committee on Enhanced Oil Recovery will meet in March 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Costs

and Economics Task Group meeting follows:

The Costs and Economics Task Group will hold its fourth meeting on Friday, March 18, 1983, starting at 9:00 a.m., in the Research Conference Room, Cities Service Company, Cities Service Technology Center, 4500 South 129th East Avenue, Tulsa, Oklahoma.

The tentative agenda for the Costs and Economics Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.

2. Review progress of Task Group study assignments.

3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Costs and Economics Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Costs and Economics Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas, and Shale Technology, Fossil Energy, 301/353-3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on March 2, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-66099; PH-FRL 2317-4]

Certain Pesticide Products; Intent To Cancel Registrations; Empire International et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice lists the name of firms requesting voluntary cancellation of registration of their pesticide products in compliance with section 6(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended. Production of these products after the effective date of cancellation will be considered a violation of the Act unless continued registration is requested.

EFFECTIVE DATE: April 8, 1983.

ADDRESS: Written comments to: Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-401, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Lela Sykes, Process Coordination Branch (TS-767C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 706, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7406).

SUPPLEMENTARY INFORMATION: EPA has been advised by the following firms of their intent to voluntarily cancel registration of their pesticide products.

Registration No.	Product name	Registrant	Date registered
5-31	EM 815	Empire International, P.O. Box 29605, Atlanta, GA 30359	Jan. 23, 1970.
148-782	De-Fender General Weed and Brush Killer	TH Agriculture and Nutrition Co., P.O. Box 2700, Kansas City, KS 66110.	Jan. 18, 1968.
264-35	Weedar MCPA	Union Carbide, Agricultural Products Co., Inc., P.O. Box 12014, Research Triangle Park, NC 27709.	Sept. 25, 1961.
264-228	Technical MCPA Acid	do	Mar. 4, 1968.
1706-104	Nalkil 2727 Liquid With Endrift Weed Killer	Nalco Chemical Co., 2901 Butterfield Road, Oak Brook, IL 60521	Oct. 7, 1970.
1706-105	Nalkil 2728 Liquid With Endrift Weed Killer	do	Sept. 28, 1970.
1706-107	Nalkil 2726 Liquid With Endrift Weed Killer	do	Jan. 20, 1971.
1935-39	Quick Vegetation Killer and Soil Sterilant	Navy Brand Manufacturing Co., 5111 Southwest Ave., St. Louis, MO 63110.	Nov. 22, 1967.
2342-617	4% Cyprex Dust	Kerr McGee Chemical Corp., Kerr McGee Building, Oklahoma City, OK 73102.	Aug. 8, 1973.
2342-859	9% Cyprex Dust	do	May 15, 1967.
5197-32	Norken 600	Kem Manufacturing Corp., Kem International Bldg., Tucker, GA 30084.	Dec. 4, 1968.
5778-22	Super Chinch Ethion Dust	Gro Chemical Co., 3530 N.W. 31st St., Miami, FL 33142	Aug. 29, 1967.
8965-26	Sear 21 Plus	Madison Bionics, P.O. Box 29605, Atlanta, GA 30359	Sept. 4,1967.
9775-168	Brush—Ex Weed and Brush Killer	Riverside Chemical Co., P.O. Box 1828, Sioux City, IA 51102	Dec. 23, 1971.

The Agency has agreed that such cancellation shall be effective April 8, 1983 unless within this time the registrant, or other interested person with the concurrence of the registrant, requests that the registration be continued in effect. The registrants were notified by certified mail of this action.

The Agency has determined that the sale and distribution of these products produced on or before the effective date of cancellation may legally continue in commerce until the supply is exhausted, or for 1 year after the effective date of cancellation, whichever is earlier; provided that the use of these products is consistent with the label and labeling registered with EPA. Furthermore, the sale and use of existing stocks have been determined to be consistent with the purposes of FIFRA as amended. Production of these products as pesticide formulations after the effective date of cancellation will be considered to be a violation of the Act.

Requests that the registration of these products be continued, may be submitted in triplicate to the Process Coordination Branch, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Comments may be filed regarding this notice. Written comments should bear a notation indicating the document control number "[OPP-66099]" and the specific registration number. Any comments filed regarding this notice will be available for public inspection in the Document Control Office, Room E-107, at the above address from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 6(a)(1) of FIFRA as amended, 86 Stat. 973, 89 Stat. (751, 7 U.S.C. 136))

Dated: February 25, 1983.

Issuance of Experimental Use Permits; Abbott Laboratories, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each experimental use permit at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

275-EUP-29. Extension. Abbott Laboratories, 14th and Sheridan Rd., North Chicago, IL 60064. This experimental use permit allows the use of the remaining supply of the originally authorized 3,650 BIUs of the biological insecticide *Bacillus thuringiensis*, serotype H-14 on estuarine areas, intermittently flooded pastures, irrigation ditches, natural marshes, rice paddies, roadside ditches, and sewage lagoons to evaluate the control of blackfly and mosquito larvae. A total of 2,000 acres are involved. This program and the one above are authorized in the States of Alabama, Arkansas, California, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Tennessee, Texas, Utah, Virginia, and Washington. This experimental use permit is effective from May 1, 1983 to May 1, 1984. (Franklin Gee, PM 17, Rm. 207, CM#2, (703-557-2690))

275-EUP-30. Extension. Abbott Laboratories, 14th and Sheridan Rd., North Chicago, IL 60064. This experimental use permit allows the use of the remaining supply of the originally authorized 616.3 BIUs of the biological insecticide *Bacillus thuringiensis*, serotype H-14 on estuarine areas, intermittently flooded pastures, irrigation ditches, natural marshes, rice paddies, roadside ditches, and sewage lagoons to evaluate the control of blackfly and mosquito larvae. A total of 500 acres are involved; the program is authorized in all 50 States. This experimental use permit is effective from May 1, 1983 to May 1, 1984. The permits will use the same active ingredient but different formulations (Franklin Gee, PM 17, Rm. 207, CM#2, (703-557-2690))

8730-EUP-11. Extension. Health-Chem Corporation, 1107 Broadway, New York, NY 10010. This experimental use permit allows the use of 495 additional pounds of the pheromone (Z)-11-hexadecenal on artichokes to evaluate the control of the artichoke plume moth. A total of 40 acres are involved; the program is authorized only in the State of California. The experimental use permit is effective from July 26, 1983 to July 26, 1984. A permanent exemption from the requirement of a tolerance for residues of the active ingredient in or on artichokes has been established (40 CFR 180.1069). (Franklin Gee, PM 17, Rm. 207, CM#2, (703-557-2690))

4581-EUP-28. Extension. Pennwalt Corporation, Three Parkway, Philadelphia, PA 19102. This experimental use permit allows the use of the remaining supply of approximately 1,831 pounds (1,878 pounds originally authorized) of the insecticide mixture *O,O*-diethyl-*O*-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate and aromatic petroleum solvent on additional ornamental trees and shrubs to evaluate the control of various insects. The program is authorized in all 50 States and the District of Columbia. The experimental use permit is effective from October 15, 1982 to October 15, 1984. (George LaRocca, PM 15, Rm. 204, CM#2, (703-557-2400))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 92 Stat. 819, as amended, (7 U.S.C. 136))

Dated: February 23, 1983.

BILLING CODE 6560-50-M

[OPP-30225; PH-FRL 2314-6]

Application To Register a Pesticide Product Containing a New Active Ingredient; Sevana Co.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of an application to register a pesticide product containing an active ingredient not included in any previously registered pesticide product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comment by April 8, 1983.

ADDRESS: Written comments, identified by the document control number [OPP-30225] and the file symbol, should be submitted to: William Miller, Product Manager (PM) 16, Registration Division (TS-767C), Office of Pesticide Programs, CM#2, Rm. 211, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22201.

FOR FURTHER INFORMATION CONTACT: William Miller, 703-557-2600.

SUPPLEMENTARY INFORMATION: Sevana Co., 5336 E. Easterby Dr., N. Fresno, CA 93727, has submitted an application to EPA to register the pesticide product Sevana Bird Repellent, EPA File Symbol 47319-R, containing the active ingredient allium satiuum (garlic) at 4 percent, containing an active ingredient not included in any previously registered pesticide product pursuant to the provisions of section 2(c)(4) of FIFRA. The application proposes that the product be classified for general use to control horned larks, house finches, house sparrows, and starlings. Notice of receipt of this application does not imply a decision by the Agency on the application.

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will

be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing such comments telephone the product manager's office to ensure that the file is available on the date of intended visit.

(Sec. 3(c)(4) of FIFRA, as amended)

[OPP-240028; PH-FRL 2315-7]

State Registration of Pesticides; Alabama, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) from 47 states. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the **Federal Register.**

DATE: The last entry for each item is the date the State registration of the product became effective.

FOR FURTHER INFORMATION CONTACT: Sandra English, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1122, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2128).

SUPPLEMENTARY INFORMATION: Most of the registrations listed below were received by EPA in August 1982. Receipts by EPA of State registrations will be published periodically. Except as indicated by (CUP) in two of the registrations listed below, there is no changed use pattern involved in any of these registrations.

Alabama

EPA SLN No. AL 82 0033. Union Carbide Agricultural Products Co., Inc. Registration is for Temik 15G Aldicarb Pesticide, to be used on pecans to control aphids and mites. August 18, 1982.

Arkansas

EPA SLN No. AR 82 0029. Monsanto Co. Registration is for Roundup Herbicide, to be used on roadside Bermuda grass to control Johnson grass. August 30, 1982.

EPA SLN No. AR 82 0030. O. M. Scott and Sons Co. Registration is for Proturf Insecticide 4, to be used on fairways and putting green turf to control white grubs, Japanese beetles, masked chafers, European chafers, black turfgrass ataenius, chinch bugs, mole crickets, sod webworms, and *Hyperodes* weevils. August 30, 1982.

EPA SLN No. AR 82 0031. Burroughs Wellcome Co. Registration is for Atroban 11% EC, to be used on livestock and their premises to control hog lice, mange mites, house flies, and stable flies. August 30, 1982.

California

EPA SLN No. CA 82 0026. Lewis F. Blumberg, Inc. Registration is for Trithion 4.0 Miscible, Benlate, to be used on date offshoots to control Banks grass mites, *Diplodia* disease, and black scorch. (CUP). April 26, 1982.

EPA SLN No. CA 82 0061. Del Norte County Agriculture Commissioner. Registration is for Pocket Gopher Bait Strychnine Treated Grain (0.29%), to be used in burrows to control pocket gophers. August 4, 1982.

EPA SLN No. CA 82 0062. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Malathion 25 Spray Powder, to be used on fruit crops, to control Mediterranean fruit flies. July 21, 1982.

EPA SLN No. CA 82 0063. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Malathion 8 Spray, to be used on fruit crops to control Mediterranean fruit flies. July 21, 1982.

EPA SLN No. CA 82 0064. FMC Corp. Registration is for Phoskil 25 Spray, to be used on citrus fruit to control red scale, yellow scale, citricola scale, and cottony cushion scale. July 20, 1982.

EPA SLN No. CA 82 0065. Imperial County Court House. Registration is for Ortho Wettable Sulfur, to be used on radishes to control powdery mildew. (CUP). July 23, 1982.

EPA SLN No. CA 82 0066. Glen County Dept. of Agriculture. Registration is for Paraquat CL, to be used on sunflowers to control broadleaf weeds and grasses. August 2, 1982.

EPA SLN No. CA 82 0068. E. I. du Pont de Nemours and Co. Registration is for Du Pont Vydate L Insecticide/Nematicide, to be used on onions and garlic to control nematodes. July 28, 1982.

EPA SLN No. CA 82 0069. Yolo County Dept. of Agriculture. Registration is for Temik, to be used on experimental seed crops (greenhouse grown) to control aphids, spider mites, and white flies. August 9, 1982.

EPA SLN No. CA 82 0070. Yolo County Dept. of Agriculture. Registration is for Treflan EC, to be used on garlic to control annual grasses and broadleaff weeds. August 9, 1982.

EPA SLN No. CA 82 0071. California Dept. of Health Services. Registration is for Citco Copper Sulfate Granular Crystals, to be used on recreational lakes, reservoirs, and ponds to control schistosome-infected fresh water snails. August 9, 1982.

EPA SLN No. CA 82 0072. Imperial County Agriculture Dept. Registration is for Bayleton 50 WP, to be used on Bermuda grass grown for seed to control Bermuda rust. August 9, 1982.

EPA SLN No. CA 82 073. Solano County Dept. of Agriculture. Registration is for Lorsban 4 E and Lorsban 15 G, to be used on dill to control cutworms and beet armyworms. August 9, 1982.

EPA SLN No. CA 82 0074. California Dept. of Food and Agriculture. Registration is for Vertifume, to be used on conifer seeds to control internal seed feeders. August 9, 1982.

EPA SLN No. CA 82 0075. California Dept. of Food and Agriculture. Registration is for DZN Diazinon 50 W Volck Supreme Spray, to be used on tulip trees and deciduous magnolias in the dormant stage to control tulip tree scale. August 9, 1982.

EPA SLN No. CA 82 0076. FMC Corp. Registration is for Furadan 4F, to be used on strawberries to control root weevils. August 6, 1982.

EPA SLN No. CA 82 0077. Dow Chemical U.S.A. Registration is for Lorsban 4 E Insecticide, to be used on sugar beets to control armyworms and cutworms. August 6, 1982.

EPA SLN No. CA 82 0080. FMC Corp. Registration is for Pounce 3.2 EC, to be used on field grown roses to control tobacco budworms and cotton bollworms. August 10, 1982.

EPA SLN No. CA 82 0081. FMC Corp. Registration is for Pounce 3.2 EC, to be used on seed alfalfa to control spotted alfalfa aphids. August 11, 1982.

EPA SLN No. CA 82 0082. FMC Corp. Registration is for Pounce 3.2 EC, to be used on greenhouse roses to control beet

armyworms, cabbage loopers, and omnivorous leafrollers. August 11, 1982.

EPA SLN No. CA 82 0083. Uniroyal Chemical. Registration is for Comite, to be used on cotton to control the two-spotted mite complex. August 11, 1982.

EPA SLN No. CA 82 0084. Brea Agricultural Service. Inc. Registration is for N-Tac Herbicide, to be used on onions (green and dry bulb), leeks, shallots, spring onions, and garlic to control weeds. August 16, 1982.

EPA SLN No. CA 82 0085. Plumas County Dept. of Agriculture. Registration is for Rodent Bait Diphacinone Treated Grain (0.005%), to be used in dry locations such as concealed places, in corners, and along walls to control Norway rats, house mice, ground squirrels, muskrats, and jack rabbits. August 13, 1982.

EPA SLN No. CA 82 0086. Pfizer, Inc. Registration is for Mycoshield Brand of Agricultural Terramycin, to be used on pears to control fire blight. August 24, 1982.

EPA SLN No. CA 82 0087. Glenn County Dept. of Agriculture. Registration is for Orthene 75 Soluble Powder, to be used on non-bearing pistachio orchards to control thrips. August 16, 1982.

EPA SLN No. CA 82 0090. County of San Luis Obispo County Dept. of Agriculture. Registration is for Starling and Blackbird Bait Starlicide Mealworm Solution (1.92%), to be used on desirable locations for bait exposure to control starling and blackbirds. August 17, 1982.

EPA SLN No. CA 82 0091. Lassen County Dept. of Agriculture. Registration is for Rodent Bait Chlorophacinone Treated Grain, to be used in buildings and burrows, and on runways to control rodents. August 30, 1982.

EPA SLN No. CA 82 0092. Contra Costa County Dept. of Agriculture. Registration is for Bayleton 50 WP, to be used on Christmas trees to control gall rust. August 30, 1982.

EPA SLN No. CA 82 0093. Mobay Chemical Corp. Registration is for Dylox Liquid Concentrate, to be used on cotton to control pink adult bollworms. August 30, 1982.

EPA SLN No. CA 82 0094. Mobay Chemical Corp. Registration is for Dylox 80% Soluble Powder, to be used on cotton to control pink adult bollworms. August 30, 1982.

Florida

EPA SLN No. FL 82 0045. Rhone-Poulenc Inc. Registration is for Chipco Ronstar G Herbicide, to be used on leatherleaf fern grown under shade cloth structures or wooden slat structures to control annual broadleaf weeds and annual grassy weeds. August 11, 1982.

EPA SLN No. FL 82 0046. Mobay Chemical Corp. Registration is for Bolstar 6, to be used on chrysanthemums (grown for stock plants) to control beet armyworms. August 17, 1982.

EPA SLN No. FL 82 0047. Chevron Chemical Co. Registration is for Diquat Water Weed Killer, to be used on fresh water ponds, lakes, rivers, drainage and flood control canals, ditches, reservoirs, and bayous to control *Hydrilla*. August 20, 1982.

EPA SLN No. FL 82 0048. Sandoz, Inc. Registration is for Solicam 80 WP, to be used on tree fruit and nut crops to control weeds. August 26, 1982.

Georgia

EPA SLN No. GA 82 0013. Union Carbide Agricultural Products Co., Inc. Registration is for Temik 15G Aldicarb Pesticide, to be used on pecans to control aphids, mites and leaf phylloxeras. May 25, 1982.

EPA SLN No. GA 82 0017. Mobay Chemical Corp. Registration is for Bolstar 6, to be used on cotton to control tobacco budworms and cotton bollworms. August 24, 1982.

Illinois

EPA SLN No. IL 82 0015. Hopkins Agricultural Chemical Co. Registration is for Hopkins Zinc Phosphide Mouse Bait, to be used on corn to control prairie and meadow voles. August 17, 1982.

EPA SLN No. IL 82 0016. E. I. du Pont de Nemours and Co. Registration is for Du Pont Benlate Fungicide, to be used on soybeans grown for seed to control stem and pod diseases. August 30, 1982.

Indiana

EPA SLN No. IN 82 0013. Merck and Co., Inc. Registration is for Mertect 340-F Fungicide, to be used on soybeans grown for seed to control pod and stem blight, anthracnose, brown spot, frog eye leaf spot, and purple seed stain. August 10, 1982.

Kansas

EPA SLN No. KS 82 0014. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lexone Weed Killer, to be used on TAM W101, TAM 105, Eagle, and Newton dryland winter wheat to control chickweed, Japanese brome, cheat, henbit, mustards, pigweed, annual pepperweed, shepard's purse, field pennycress, and rescue grass and for partial control of downy brome and wild buckwheat. August 21, 1982.

EPA SLN No. KS 82 0015. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lexone 4L Weed Killer, to be used on TAM W101, TAM 105, Eagle, and Newton dryland winter wheat to control chickweed, Japanese brome, cheat, henbit, mustards, pigweed, annual pepperweed, shepard's purse, field pennycress, and rescue grass and for partial control of downy brome and wild buckwheat. August 20, 1982.

EPA SLN No. KS 82 0016. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lexone DF Weed Killer, to be used on TAM W101, TAM 105, Eagle, and Newton dryland winter wheat to control chickweed, Japanese brome, cheat, henbit, mustards, pigweed, annual pepperweed, shepard's purse, field pennycress, and rescue grass and for partial control of downy brome and wild buckwheat. August 20, 1982.

Louisiana

EPA SLN No. LA 82 0031. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lannate Insecticide, to be used on tomatoes in greenhouses to control tomato pinworms. August 27, 1982.

Maryland

EPA SLN No. MD 82 0015. Hopkins Agricultural Chemical Co. Registration is for Hopkins Sevin Carbaryl Bait, to be used on sweet potatoes to control cutworms. August 27, 1982.

Michigan

EPA SLN No. MI 82 0021. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10 Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. August 18, 1982.

EPA SLN No. MI 82 0022. E. I. du Pont de Nemours and Co. Registration is for Du Pont Vydate L Insecticide/Nematicide, to be used on carrots to control carrot weevils. August 18, 1982.

Mississippi

EPA SLN No. MS 82 0031. Platte Chemical Co. Registration is for Clean Crop Methyl P, to be used on cotton to control Lygus bugs, cabbage loopers, armyworms, bollworms, tobacco budworms, boll weevils, and pink bollworms. August 2, 1982.

EPA SLN No. MS 82 0034. Mobay Chemical Corp. Registration is for Bolstar 6, to be used on cotton to control tobacco budworms, cotton bollworms, and Lygus bugs (nymphs). August 2, 1982.

EPA SLN No. MS 82 0035. Shell Chemical Co. Registration is for Pydrin Insecticide 4 ULV Concentrate, to be used on cotton to control cotton bollworms, tobacco budworms, Lygus bugs, cabbage loopers, beet armyworms,

boll weevils, and white flies. August 2, 1982.

EPA SLN No. MS 82 0036. Philips Roxane, Inc. Registration is for Anchor Permectrin 25% WP Long Lasting Barn and Premise Fly Spray, to be used on livestock and poultry premises to control house flies, stable flies, and false stable flies. August 25, 1982.

EPA SLN No. MS 82 0037. Philips Roxane, Inc. Registration is for Bioceutic Overtime 25% WP Long Acting, Livestock Premise Insecticide to be used on livestock and poultry premises to control house flies, stable flies, and false stable flies. August 25, 1982.

EPA SLN No. MS 82 0038. Gustafson, Inc. Registration is for Gustafson Lorsban 30 FL, to be used on stored planting seeds of cotton to control red flour beetles, rice weevils, sawtoothed grain beetles, Indian meal moths, angoumois grain moths, and cigarette bettles. August 31, 1982.

Montana

EPA SLN No. MT 82 0009. Monsanto Co. Registration is for Far-Go, to be used on winter wheat to control cheatgrass. August 25, 1982.

Nebraska

EPA SLN No. NE 82 0020. ICI Americas Inc. Registration is for Gramoxone, to be used on no-till sunflowers to control emerged annual broadleaf weeds and grasses. August 23, 1982.

Nevada

EPA SLN No. NV 82 0013. Mobay Chemical Corp. Registration is for Furadan 4 FL, to be used on soil planted to potatoes to control nematodes. August 27, 1982.

New Hampshire

EPA SLN No. NH 82 0003. O.M. Scott and Sons Co. Registration is for Proturf Insecticide 4, to be used on golf course fairways, tees, greens, and roughs to control white grubs (cold season grasses only), sod webworms, chinch bugs, mole crickets, and *Hyperodes* weevils. August 13, 1983.

New Jersey

EPA SLN No. NJ 82 0015. Interchem, Inc. Registration is for Resmethrim EC, to be used on edges of fields and open areas to control deer flies. August 3, 1982.

EPA SLN No. NJ 82 0016. Hopkins Agricultural Chemcial Co. Registration is for Hopkins Sevin Carbaryl Bait, to be used on sweet potatoes to control cutworms. August 10, 1982.

New Mexico

EPA SLN No. NM 82 0020. Burroughs Wellcome Co. Registration is for Atroban 11% EC, to be used on livestock and poultry premises to control house flies and stable flies. August 11, 1982.

New York

EPA SLN No. NY 82 0011. New York Dept. of Environmental Conservation. Registration is for Bayluscide 5% GR Sea Lamprey Larvicide, to be used on lakes to control sea lamprey larvae. August 30, 1982.

Ohio

EPA SLN No. OH 82 0018. FMC Corp. Registration is for Furadan 4F Insecticide, to be used on soybeans to control nematodes (root-knot, cyst, stunt, ring, spiral, lesion, lance, dagger, and stubby-root). August 27, 1982.

Oklahoma

EPA SLN No. OK 82 0021. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10 Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. August 2, 1982.

EPA SLN No. OK 82 0022. Philips Roxane, Inc. Registration is for Anchor Permectrin 25% WP Long Lasting Barn and Premise Fly Spray, to be used on livestock and poultry premises to control house flies, coastal flies, stable flies, and false stable flies. August 2, 1982.

EPA SLN No. OK 82 0023. Philips Roxane, Inc. Registration is for Bioceutic Overtime 25% WP Long Acting Livestock Premise Insecticide, to be used on livestock and poultry premises to control house flies, coastal flies, stable flies, and false stable flies. August 2, 1982.

EPA SLN No. OK 82 0024. Monsanto Co. Registration is for Roundup Herbicide, to be used on roadside Bermuda grass release to control Johnson grass. August 26, 1982.

EPA SLN No. OK 82 0025. Ciba-Geigy Corp. Registration is for Diazinon 14G, to be used on wheat to control grubs. August 27, 1982.

EPA SLN No. OK 82 0026. Ciba-Geigy Corp. Registration is for Diazinon AG500, to be used on wheat to control grubs. August 27, 1982.

EPA SLN No. OK 82 0027. Ciba-Geigy Corp. Registration is for Diazinon 50W, to be used on wheat to control grubs. August 27, 1982.

Oregon

EPA SLN No. OR 82 0056. Aceto Agricultural Chemicals Corp. Registration is for Aceto Phorate 15G, to be used on potatoes to control aphids, leafhoppers, leaf miners, psyllids, wireworms, and flea beetle larvae. August 2, 1982.

EPA SLN No. OR 82 0059. Biochem Products. Registration is for Bactimos WP, to be used on orchards and pastures to control mosquito larvae. August 19, 1982

EPA SLN No. OR 82 0060. Fairfield American Corp. Registration is for Pyrenone Corp Spray, to be used on dill to control aphids. August 27, 1982.

South Carolina

EPA SLN No. SC 82 0025. American Hoechst Corp. Registration is for Hoelon 3 EC Herbicide, to be used on fall seeded wheat to control annual ryegrass. August 24, 1982.

EPA SLN No. SC 82 0026. Stauffer Chemical Co. Registration if for Dyfonate 10-G, to be used on soybeans to control lesser cornstalk borers. August 25, 1982.

EPA SLN No. SC 82 0026. Stauffer Chemical Co. Registration if for Dyfonate 4-EC, to be used on soybeans to control lesser cornstalk borers. August 25, 1982.

South Dakota

EPA SLN No. SD 82 0007. Mansanto Co. Registration is for Roundup Herbicide, to be used in post-harvest tillage to control fall quackgrass. August 6, 1982.

EPA SLN No. SD 82 0008. O.M. Scott and Sons Co. Registration is for Proturf Insecticide 4, to be used on golf course fairways, tees, greens, and roughs to control white grubs (cool season grasses only), sod webworms, chinch bugs, mole crickets, and *Hyperodes* weevils. August 31, 1982.

EPA SLN No. SD 82 0009. FMC Corp. Registration is for Furadan 4 F, to be used on small grains, (wheat, oats, and barley) to control greenbugs. August 31, 1982.

Tennessee

EPA SLN No. TN 82 0019. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10 Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. August 19, 1982.

EPA SLN No. TN 82 0020. FMC Corp. Registration is for Furadan 4 FL, to be used at seeding time on alfalfa to control clover root and curculio potato leafhoppers, crickets, and grasshoppers. August 14, 1982.

Utah

EPA SLN No. UT 82 0010. Mobay Chemical Corp. Registration is for Mesurol 50% Hopper-Box Treater, to be

used on newly planted corn to control depredating birds. August 10, 1982.

Virginia

EPA SLN No. VA 82 0029. Shell Chemical Co. Registration is for Pyridine Insecticide 2.4 EC, to be used on soybeans to control Mexican bean beetles, green cloverworms, velvet bean caterillars, and potato leafhoppers. August 23, 1982.

Washington

EPA SLN No. WA 82 0058. All Pure Chemical Co. Registration is for Purechlor Sanitizer, to be used on pear, apple, cherry, peach, plum, prune, quince, nectarine, and apricot tanks to control fungus spores and bacteria. August 18, 1982.

EPA SLN No. WA 82 0059. Fairfield American Corp. Registration is for Pyrenone Crop Stray, to be used on dill to control aphids. August 30, 1982.

Dated: February 24, 1983.

Robert V. Brown,

Acting Director, Registration Division.

Science Advisory Board; High-Level Radioactive Waste Disposal Subcommittee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a two-day meeting of the High-Level Radioactive Waste Disposal Subcommittee of the Science Advisory Board will be held in the 6th Floor Conference Room, EPA Region IX, 215 Fremont Street, San Francisco, CA, on March 24-25, 1983. The meeting will begin at 9:00 a.m. and last until 5:00 p.m. each day.

The purpose of the meeting will be to continue the review of the scientific and technical basis of the Agency's proposed rules for the management and disposal of high-level radioactive wastes. The members of the Subcommittee, and the principal issues for the Subcommittee's consideration, were announced in the Federal Register, Wednesday, January 5, 1983, page 509.

The agenda for the meeting, which is the third in a series of meetings on the proposed rules, will include review of the environmental pathways analyses supporting the proposed rules, briefings on the health effects analyses and on the engineering aspects of waste forms, canisters and mining technologies, and discussions on the outline for the Subcommittee's final report.

The meeting is open to the public. Any member of the public wishing to attend or obtain further information about the meeting should contact Harry C. Torno, Executive Secretary, at (202) 382-2552, or Dr. Terry F. Yosie, Staff Director, Science Advisory Board, at (202) 382-4126. Public comment will be accepted at the meeting. Written comment will be accepted in any form, and there will be opportunity for brief oral statements. Anyone wishing to make such comment must contact Mr. Torno prior to March 18, 1983, in order to be placed on the agenda.

Dated: March 2, 1983.

Terry F. Yosie,

Staff Director, Science Advisory Board.

[PP 2G2638/T404; PH-FRL 2318-3]

Mobay Chemical Corporation; Establishement of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for residues of the fungicide, 1-(4-Clorophenoxy)-3, 3-dimethyl-1-(1*H*-1, 2, 4-triazol-1-1-yl)-2-butanone and its metabolite, beta-(4-Chlorophenoxy)-alpha-(1, 1-dimethylethyl)-1H-1, 2, 4-triazol-1-1-ethanol, in or on certain raw agricultural commodities. These temporary tolerances were requested by Mobay Chemical Corporation.

DATE: These temporary tolerances expire December 31, 1984.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 229 CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703-557-1900).

SUPPLEMENTARY INFORMATION: Mobay Chemical Corporation, Agricultural Chemicals Division, P.O. Box 4913, Kansas City, MO 64120, has requested, in pesticide petition PP 2G2638 the establishment of temporary tolerances for residues of the fungicide, 1-(4-Chlorophenoxy)-3, 3-dimethyl-1-(1*H*-1, 2, 4-triazol-1-yl)-2-butanone and its metabolite, beta-(4-chlorophenoxy)-alpha-(1, 1-dimethylethyl)-1H-1, 2, 4-triazol-1-ethanol, in or on the raw agricultural commodities apricots, peaches and nectarines at 10.0 parts per million (ppm), almonds (meat) at 0.1 ppm, and almonds (hulls) at 1.0 ppm.

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 3125-EUP-177 which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Mobay Chemical Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire December 31, 1984. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 610-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant

economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Sec. 408 (l), 68 Stat. 510, (21 U.S.C. 346a (l)))

Dated: February 25, 1983.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-180619; PH-FRL 2318-4]

Emergency Exemptions: Arizona et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests in the States listed below. Also listed is a crisis exemption initiated by California.

DATES: See each specific and crisis exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each specific and crisis exemption for the name of the contact person. the following information applies to all contact people: Registration Division (TS-767C) Office of Pesticide Programs, Environmental Protection Agency, Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1192).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Arizona Commission of Agriculture and Horticulture for the use of acephate on citrus to control citrus thrips; March 1, 1983 to October 15, 1983 (Jim Tompkins)

2. California Department of Food and Agriculture for the use of oxylfuorfen on dry bulb onions to control various weeds (little mallows, common groundsel and mustard); January 6, 1983 to December 9, 1983. EPA completed a rebuttable presumption against registration (RPAR) on this chemical; the final determination was published in the Federal Register on June 23, 1982 (47 FR 27118). (Gene Asbury)

3. California Department of Food and Agriculture for the use of acephate on citrus to citrus to control citrus thrips; January 31, 1983 to January 30, 1984. (Jim Tompkins)

4. California Department of Food and Agriculture for the use of imazalil on cottonseed to control *Thielaviopsis basicola*; March 13, 1983 to February 28, 1984. (Jack E. Housenger)

5. California Department of Food and Agriculture for the use of permethrim on citrus to control the Japanese bayberry whitefly; January 28, 1983 to May 10, 1983. (Jack E. Housenger)

6. Florida Department of Agriculture and Consumer Services for the use of trifadimefon on squash to control powdery mildew: February 1, 1983 to December 20, 1983 (Libby Welch)

7. Florida department of Agriculture and Consumer Services for the use of thiobencarb on lettuce, endive, and escarole to control barnyardgrass and purslane; January 23, 1983 to June 1, 1983. (Jack E. Housenger)

8. Office of governor of Kansas for the use of permethrin on wheat to control army cutworms and/or pale western cutworms; February 1, 1983 to June 1, 1983. (Libby Welch)

9. Office of Governor of Kansas for the use of chlorpyrifos on wheat to control army cutworms and/or pale western cutworms; February 1, 1983 to June 1, 1983. (LIbby Welch)

10. Michigan department of Agriculture for the use of permethrin on asparagus to control the climbing cutworm complex; January 20, 1983 to June 30, 1983. (Gene Asburn)

11. Ohio Department of Agriculture for the use of metalaxyl on soybeans (seed) to control *phytophthora* damping off; January 19, 1983 to December 31, 1983. (Libby Welch)

12. Oregon Department of Agriculture for the use of methocarb on barley, clover, oats, wheat, and grass grown for seed; January 13, 1983 to May 1, 1983. Oregon had initiated a crisis exemption for this program. (Gene Asbury)

13. West Virginia Department of Agriculture for the use of fenamiphos on peaches to control stem pitting; January 14, 1983 to April 30, 1983. (Gene Asbury)

14. West Virginia Department of Agriculture for the use of fenamiphos on bearing apple orchards to control American dagger nematodes; February 4, 1983 to April 30, 1983. (Gener Asbury)

A crisis exemption was initiated by the California Department of Food and Agriculture on January 25, 1983, for the use of methiocarb on tomato and cucurbit seeds to control bird damage. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. (Libby Welch)

Dated: February 25, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

Advisory Committee for the 1985 ITU World Administrative Radio Conference on the Use of the Geostationary Satellite Orbit and the Planning of the Space Services Utilizing It (Space WARC Advisory Committee); Meeting

March 1, 1983.

Task Group B-4 of Working Group B: Institutional Accommodations of New Services and Technologies:

Chairman: S. A. Levy (202) 331-2624.
Date: Friday, March 4, 1983.
Time: 9:30 a.m.—1:00 p.m.
Location: Hogan & Hartson, 7th Floor, 815 Connecticut Avenue, NW., Washington, D.C. 20006.

William J. Tricarico,

Secretary.

Federal Communications Commission.

BILLING CODE 6712-01-M

Mobile Services Advisory Committee; Meeting

Supplemental Information

March 3, 1983.

By Public Notice dated February 9, 1983, (February 17, 1983; 48 FR 7006) the Commission announced that the Mobile Services Advisory Committee would meet on March 29 to consider various issues involving common carrier pager codes. The Notice specifically mentioned the POCSAG code. It was not the intention of the Commission to exclude consideration of other codes, such as NEC and Golay, or to otherwise limit the relvant areas of discussion. All issues pertinent to the topic of the meeting may be explored.

William J. Tricarico,

Ssecretary, Federal Communications Commission.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group Plant Accounts Subcommittee Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group (TIAG) Plant Accounts Subcommittee scheduled to meet on Wednesday, March 23, 1983. The meeting will begin at 9:30 a.m. in Conference Room A (10th Floor) of AT&T's offices located at 1120 20th Street, NW., Washington, D.C., and will be open to the public. The agenda is as follows:

I. General Administrative Matters
II. Review of Minutes of Previous Meeting
III. Report by Subcommittee Members
IV. Discussion of Reports
V. Further Assignments
VI. Other Business
VII. Presentation of Oral Statements
VIII. Adjournment

With prior approval of Subcommittee Chairman Gyles Norwood, oral statements, while not favored or encouraged, may be allowed at the meeting if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Norwood (202/887–3266) at least five days prior to the meeting date.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

[MM Docket No. 83–151; File No. BPCT–820810KJ, etc.]

Filmway of Wisconsin and Janesville Broadcasting Co.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: February 28, 1983.

Released: March 4, 1983.

In re applications of Filmway of Wisconsin, Janesville, Wisconsin; MM Docket No. 83–151, File No. BPCT–820810KJ; Janesville Broadcasting Co., Janesville, Wisconsin; MM Docket No. 83–152, File No. BPCT–821008KI for construction permit.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Filmway of Wisconsin (Filmway) and Janesville Broadcasting Co. (Janesville) for authority to construct a new commercial television broadcast station on Channel 57, Janesville, Wisconsin.

2. No determination has been reached that the tower height and location proposed by each of the applicants would not constitute a hazard to air navigation. Accordingly, an issue regarding this matter will be specified.

Filmway of Wisconsin

3. Section 73.682(a)(15) of the Commission's rules states that the effective radiated power of the aural transmitter shall not be less than 10 percent nor more than 20 percent of the peak radiated power of the visual transmitter. Filmway's aural power is 52% of the visual. The applicant will be required to correct this situation by an appropriate amendment.

4. Applicant's response to Section V–C, Items 11 and 15, FCC Form 301, and its Exhibit V–1, purport to show that the proposed station would encompass Janesville within the required city grade (80 dBu) contour. However, at the proposed power and height, the city grade contour would extend only 6 miles from the transmitter site. Operating in this fashion, the predicted city grade contour would not encompass all of Janesville and thus is a violation of § 73.685(a) of the Commission's rules. The Commission has not received a request for waiver. Accordingly, an issue regarding this matter will be specified.

Janesville Broadcasting Co.

5. Janesville indicates in Section V–C, Item 7, FCC Form 301, that it will use mechanical beam tilt. Section 73.685 (e) and (f) of the Commission's Rules requires that information be submitted to verify the nature of the proposed mechanical beam tilt. The applicant has not submitted this information. Accordingly, applicant will be required to submit an appropriate engineering amendment within 20 days of the release of this order.

6. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

7. Accordingly, IT IS ORDERED, That, pursuant to Section 309(e) of the Communications Act of 1934, as

amended, the applications are designated for hearing in a consolidated proceeding, before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether there is a reasonable possibility that the tower height and location proposed by each of the applicants would constitute a hazard to air navigation.

2. To determine whether the application of Filmway is consistent with § 73.685(a) of the Commission's Rules with respect to City Grade coverage and, if not, whether circumstances exist which would warrant a waiver of the rule.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

8. It is further ordered, That the Federal Aviation Administration is made a party respondent with respect to Issue 1.

9. It is further ordered, That Filmway shall submit, pursuant to § 73.682(a)(15) of the Commission's Rules, to the presiding Administrative Law Judge within 20 days after the date of release of this Order, an appropriate engineering amendment to correct the aural effective radiated power.

10. It is further ordered, That Janesville shall submit, pursuant to § 73.685(e) and (f) of the Commission's Rules, to the presiding Administrative Law Judge within 20 days after the date of release of this Order, an appropriate engineering amendment to verify the nature of the proposed mechanical beam tilt.

11. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

12. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

[FR Doc. 83-6831 Filed 3-8-83; 8:45 am]

BILLING CODE 6712-01-M

[CC Docket No. 83-109, et al.]

BA Co. et al.; Hearing

Adopted: February 14, 1983.

Released: February 22, 1983.

In re Applications of; Robert A. Cordon d.b.a. the BA Company, CC Docket No. 83-109; File No. 439-CM-P-80; and Video Communications Systems, CC Docket No. 83-110; File No. 655-CM-P-80; and Microband Corporation of America, CC Docket No. 83-111; File No. 3743-CM-P-80; for Construction Permits in the Multipoint Distribution Service for a New Station at Clewiston, Florida; Designating Applications for Consolidated Hearing on Stated Issues; Memorandum Opinion and Order.

1. For consideration are the above-referenced applications.[1] These applications are for construction permits in the Multipoint Distribution Service and they propose operations on Channel 1 at Clewiston, Florida. The applications are therefore mutually exclusive and, under present procedures, require comparative consideration. These applications have been amended as a result of informal requests by the Commission's staff for additional information. There are no petitions to deny or other objections under consideration.[2]

2. Upon review of the captioned applications, we find that these applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

3. Accordingly, it is hereby ordered, that pursuant to section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. 309(e) and Section 0.291 of the Commission's Rules, 47 CFR 0.291, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent Order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered:[3]

(a) The relative merits of each proposal with respect to efficient frequency use, particularly with regard to compatibility with co-channel use in nearby cities and adjacent channel use in the same city;

(b) The anticipated quality and reliability of the service proposed, including installation and maintenance programs; and

(c) The comparative cost of each proposal considered in context with the benefits of efficient spectrum utilization and the quality and reliability of service as set forth in issues (a) and (b).

4. It is further ordered, That Robert A. Gordon, d.b.a. The BA Company, Video Communications Systems, Microband Corporation of America and the Chief, Common Carrier Bureau, are made parties to this proceeding.

5. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's Rules, 47 CFR 1.221.

6. The Secretary shall cause a copy of this Order to be published in the Federal Register.

James R. Keegan,

Chief, Domestic Facilities Division, Common Carrier Bureau.

[FR Doc. 83-6822 Filed 3-8-83; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 83-147, et al]

Caribbean Broadcasters et al.; Hearing

Adopted: February 28, 1983.

Released: March 2, 1983.

In re applications of; Jose Cordero and Nayda Nicolau de Colon, d/b/a Caribbean Broadcasters; San Sebastian, Puerto Rico; MM Docket No. 83-147; File No. BPCT-8209110KE; Nydia Toro Gonsalez d/b/a Mothers for Television; San Sebastian, Puerto Rico; MM Docket No. 83-148; File No. BPCT-821105KE; Designating Applications for Consolidated Hearing on Stated Issues; Hearing Designation Order.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to

---

[1] On August 18, 1980, Tymshare, Inc. (Tymshare) and Arthur Lipper Corporation (ALC) executed a contract whereby ALC agreed to transfer control of Microband Corporation of America to Tymshare. *Transfer of Control/MDS*, 85 FCC 2d 1023 (1981).

[2] By Memorandum Opinion and Order adopted June 28, 1981 and released July 2, 1981 Mimeo No. 001883, Microband was granted an exemption from the Commission's "cut-off" rules pursuant to Section 21.31 of the Rules, 47 CFR 21.31, to preserve the status of its pending mutually exclusive application.

[3] Consideration of these factors shall be in light of the Commission's discussion in *Frank K. Spain*, 77 FCC 2d 20 (1980).

delegated authority, has before it the above-captioned mutually exclusive applications of Caribbean Broadcasters (Caribbean) and Mothers for Television (Mothers) for authority to construct a new commercial television broadcast station on Channel 38, San Sebastian, Puerto Rico.

2. Mothers' response to Section V–C, Item 7, FCC Form 301, purports to show the azimuths of the main lobes of its proposed station. However, the information submitted does not match the directional pattern submitted with the application (Figure 1). Section 73.685(f)(1)(2) of the Commission's Rules requires a description of the proposed antenna system and the orientation of the directional pattern with respect to True North. The applicant will be required to correct this discrepancy by an appropriate amendment.

3. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

4. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine which of the proposals would, on a comparative basis, better serve the public interest.

2. To determine, in light of the evidence adduced pursuant to the foregoing issue, which of the applications should be granted.

5. It is further ordered, that Mothers shall submit, pursuant to § 73.685(f)(1)(2) of the Commission's rules to the presiding Administrative Law Judge within 20 days after the date of release of this Order, an appropriate engineering amendment to correct the azimuths of the main lobes of its proposed station.

6. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

7. It is further ordered, that the applicants herein shall pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

[FR Doc. 83-6828 Filed 3-8-83; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 83–132, et al.]

Clevenger, Linda D., et al.; Hearing

Adopted: February 24, 1983.

Released: March 3, 1983.

In re Applications of; Linda D. Clevenger, Lincoln, Nebraska; MM Docket No. 83–132, File No. BPCT–820727RF; Native American Communications Corp., Lincoln, Nebraska, MM Docket No. 83–133, File No. BPCT–821008KK; for Construction Permit, Designating Applications for Consolidated Hearing on Stated Issues; Hearing Designation Order.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Linda D. Clevenger (Clevenger) and Native American Communications Corp. (NACC) for a new commercial television station to operate on Channel 45, Lincoln, Nebraska.

Linda D. Clevenger

2. The geographical coordinates submitted by Clevenger in Section V–C of FCC Form 301 are incorrect. Clevenger will be required to submit the correct coordinates to the presiding Administrative Law Judge within 15 days after the release date of this Order.

3. The effective radiated visual power, antenna height above average terrain and other technical data submitted by Clevenger indicate that there would be a significant difference in the size of the area and population that it proposes to serve and the size of the area and population that NACC proposes to serve. Consequently, for the purposes of comparison, the areas and populations which would be within the predicted 64 dBu (Grade B) contour, together with the availability of other television service of 64 dBu (Grade B) or greater intensity, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to either of the applicants.

Native American Communications Corporation

4. The Commission is not in receipt of the Federal Aviation Administration's determination for the antenna structure proposed by NACC.[1] Consequently, no determination has been made that the tower height and location proposed would not constitute a hazard to air navigation. Accordingly, an appropriate issue will be specified.

5. The material submitted in NACC's application does not demonstrate the applicant's financial qualifications. Although the financial standards are unchanged, the Commission has changed the application form to require only certification as to financial qualifications. Accordingly, the applicant will be given 30 days from the date of release of this Order to review its financial proposal in light of Commission requirements, to make any changes that may be necessary, and, if appropriate, to submit a certification to the Administrative Law Judge in the manner called for in revised Section III, Form 301, as to its financial qualifications. If the applicant cannot make the required certification, it shall so advise the Administrative Law Judge who shall then specify an appropriate issue. *Minority Broadcasters of East St. Louis, Inc.*, BC Docket No. 82–378 (released July 15, 1982).[2]

6. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

7. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the application are designated for hearing in a consolidated proceeding, to be held before an Administrative Law

---

[1] NACC proposes to mount on the proposed AM tower in BP–820409AD. The tower was cleared for 216 feet; however, NACC proposes to increase the height to 545 feet.

[2] NACC states that its construction and operating funds will come from various sources (grants, loans, donations). However, NACC has not certified or indicated that it has firm commitments from any of its sources.

Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Native American Communications Corporation whether there is a reasonable possibility that the tower height and location proposed would constitute a hazard to air navigation.

2. To determine which of the proposals would, on a comparative basis, better serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

8. It is further ordered, That Linda D. Clevenger shall amend Section V–C, FCC Form 301, to show the correct coordinates and submit it to the presiding Administrative Law Judge within 15 days after the release date of this Order.

9. It is further ordered, That Native American Communications Corporation shall submit a financial certification in the form required by Section III, F.C.C. Form 301, or advise the Administrative Law Judge that the certification cannot be made, as may be appropriate.

10. It is further ordered, That the Federal Aviation Administration is made a Party Respondent to this proceeding with respect to issue 1.

11. It is further ordered, That to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rule, in persons or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

12. It is further ordered, That the applicants herein shall, pursuant to section 311a(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

BILLING CODE 6712-01-M

[MM Docket No. 83-127, et al.]

H & S, Ltd., et al.; Hearing

Adopted: February 24, 1983.

Released: March 3, 1983.

In re Applications of Davenport Television, Inc. and Janet T. Lee d/b/a H&S, LTD.[1] Davenport, Iowa; MM Docket No. 83–127, File No. BPCT–830815KH; Elan, Inc., Davenport, Iowa; MM Docket No. 83–128, File No. BPCT–821101KE; Davenport Communications Limited Partnership, Davenport, Iowa; MM Docket No. 83–129 File, No. BPCT–821109KE; Independence Broadcasting Corporation, Davenport, Iowa; MM Docket No. 83–130, File No. BPCT–821109KK; Channel 18, Limited,[2] Davenport, Iowa; MM Docket No. 83–131, File No. BPCT–821109KL; For Construction Permit; Designating Applications for Consolidated Hearing on Stated Issues; Hearing Designation Order.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority has before it the above-captioned mutually exclusive applications for a new commercial television station to operate on Channel 18, Davenport, Iowa.

2. No determination has been made that the tower heights and locations proposed by H&S, Ltd.,[3] Davenport Communications Limited Partnership, The Independence Broadcasting Corporation and Channel 18, Limited would not constitute a hazard to air navigation. An appropriate issue will be specified.

3. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant well serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

4. Accordingly, is is ordered, that pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine, with respect to H&S, Ltd., Davenport Communications Limited Partnership, The Independence Broadcasting Corporation and Channel 18, Limited, whether there is a reasonable possibility that the tower height and location proposed by each would constitute a hazard to air navigation.

2. To determine which of the proposals would, on a comparative basis, best serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

5. It is further ordered, That the Federal Aviation Administration is made a party respondent to this proceeding with respect to issue 1.

6. It is further ordered, that to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

7. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

---

[1] H&S, Ltd. amended its application to change its limited partner. Since the transfer of the limited partner's interests does not effect control of the partnership, the amendment does not constitute a transfer of negative control and it is not, therefore, a major amendment. *Anax Broadcasting, Incorporated*, 87 FCC 2d 483 (1981).

[2] Applicant amended its application on January 7, 1983, to change its name from Channel 18, Inc.

[3] The overall height above ground and the height above mean sea level shown in the application do not agree with those heights approved by FAA.

[CC Docket No. 83–112, et al.]

Digital Paging Systems, Inc., et al.; Hearing

Adopted February 15, 1983.

Released February 22, 1983.

In re Applications of Digital Paging Systems, Inc.; CC Docket No. 83–112, File No. 50063–CM–P–74; and M.C.C.A. Service Corporation; CC Docket No. 83–113, File No. 50017–CM–P–75; for Construction Permits in the Multipoint Distribution Service for a New Station at Birmingham, Alabama; Designating Applications for Consolidated Hearing on Stated Issues; Memorandum Opinion and Order.

1. For consideration are the above-referenced applications. These applications are for construction permits in the Multipoint Distribution Service and they propose operations on Channel 2 at Birmingham, Alabama. The applications are therefore mutually exclusive and, under present procedures, require comparative consideration. These applications have been amended as a result of informal requests by the Commission's staff for additional information. There are no petitions to deny or other objections under consideration.

2. Upon review of the captioned applications, we find that these applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.[1]

3. Accordingly, it is hereby ordered, that pursuant to Section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. 309(e) and §0.281 of the Commission's Rules, 47 CFR 0.281, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent Order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered:[2]

(a) The relative merits of each proposal with respect to efficient frequency use, particularly with regard to compatibility with co-channel use in nearby cities and adjacent channel use in the same city;

(b) The anticipated quality and reliability of the service proposed, including installation and maintenance programs; and

(c) The comparative cost of each proposal considered in context with the benefits of efficient spectrum utilization and the quality and reliability of service as set forth in issues (a) and (b).

4. It is further ordered, That Digital Paging Systems, Inc., M.C.C.A. Service Corporation and the Chief, Common Carrier Bureau, ARE MADE PARTIES to this proceeding.

5. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of Section 1.221 of the Commission's Rules, 47 CFR 1.221.

6. It is further ordered, That any authorization granted to Digital Paging Systems, Inc., a wholly-owned subsidiary of Graphic Scanning Corporation, as a result of the comparative hearing shall be conditioned on, and without prejudice to, reexamination and reconsideration of that company's qualifications to hold an MDS license following a decision in the hearing designated in *A.S.D. Answering Service, Inc., et al.*, FCC 82-381, released August 24, 1982, and shall be specifically conditioned upon the outcome of that proceeding.

7. This Order is effective on its release date. Petitions for reconsideration under § 1.106 or applications for review under Section 1.115 of the Rules may be filed within the time limits specified in those sections. *See also* Rule 1.4(b)(2).

8. The Secretary shall cause a copy of this Order to be published in the Federal Register.

James R. Keegan,

Chief, Domestic Facilities Division, Common Carrier Bureau.

[FR Doc. 83-6823 Filed 3-8-83; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 83-144, et al.]

Educational Television of the Southwest, Inc., et al.; Hearing

In re applications of Educational Television of the Southwest, Inc., Fort Worth, Texas; MM Docket No. 83-144, File No. BPET-820824KF; Texas Educational Network, Inc.; Fort Worth, Texas; MM Docket No. 83-145, File No. BPET-820824KQ; for Construction Permit; Designating Applications for Consolidated Hearing on Stated Issues; Hearing Designation Order.

Adopted: February 24, 1983.

Released: March 3, 1983.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Educational Television of the Southwest, Inc. (ETS) and Texas Educational Network, Inc. (TENI) for authority to construct a new noncommercial educational television station on Channel 31, Fort Worth, Texas.

Texas Educational Network, Inc.

2. Applicants for new broadcast stations are required by Section 73.3580 of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission certification of compliance with the requirements as described in Section 73.3580(h). We have no evidence that TENI has published the required local notice. To remedy this, TENI will be required to file with the presiding Administrative Law Judge certification of compliance with Section 73.3580 within 30 days after the date of release of this Order.

3. The material submitted in the application does not demonstrate the applicant's financial qualifications.[3] Although the financial standards are unchanged, the Commission is changing FCC Form 340 to require only certification as to financial qualifications.[3] Accordingly, the applicant will be given 30 days from the date of release of this Order to review its financial proposal in light of Commission requirements, to make any changes that may be necessary, and, if appropriate, to submit a certification to the Administrative Law Judge in the same manner as called for in the December 13, 1982 Public Notice, as to its financial qualifications. If the applicant cannot make the required certification, it shall so advise the Administrative Law Judge who shall then specify an appropriate issue.

4. Since we have not received a determination from the Federal Aviation Administration that TENI's proposed tower height and location would not constitute a hazard to air navigation, an issue regarding this matter will be specified.

Conclusion and Order

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

6. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

---

[1] This finding is subject to paragraph 6, *infra*.

[2] Consideration of these factors shall be in light of the Commission's discussion in *Frank K. Spain*, 77 FCC 2d 20 (1980).

[3] The bank requires a pledge of TENI's assets and guarantee of principals; however, the principals have not indicated a willingness to furnish such guarantee.

[3] In the interim, non-commercial educational TV applicants will be allowed to certify. Public Notice released December 23, 1982, FCC 82-537.

1. To determine, with respect to Texas Educational Network, Inc., whether there is a reasonable possibility that the tower height and location proposed would constitute a hazard to air navigation.

2. To determine the extent to which each applicant's proposed operation will be integrated into the overall cultural and educational objectives of the respective applicants;

3. To determine the manner in which each applicant's proposed operation meets the needs of the community to be served;

4. To determine whether the factors in the record demonstrate that one applicant will provide a superior non-commercial educational broadcast service.

5. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

7. It is further ordered, that Texas Educational Network, Inc. shall file certification with the presiding Administrative Law Judge that it has or will publish local notice of the filing of its application within 30 days after the date of release of this Order.

8. It is further ordered, that Texas Educational Network, Inc. shall submit a financial certification in the same form as required by Section III, F.C.C. Form 301, or advise the Administrative Law Judge that the certification cannot be made, as may be appropriate.

9. It is further ordered, that the Federal Aviation Administration is made a party respondent to this proceeding with regard to Issue 1.

10. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants and party respondent herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

11. It is further ordered, that the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

BILLING CODE 6712-01-M

[MM Docket NO. 83-137, et al.]

Family Televison 55, Ltd., et al.; Hearing

In re Applications of; Family Television 55, Ltd., Kenosha, Wisconsin, MM Docket No. 83-137, File No. BP-820714KF; Chicago Communications Service, Inc.; Kenosha, Wisconsin, MM Docket No. 83-138, File No. BPCT-820908KE; Frank Edward Kavenik and Frances M. Kavenik d/b/a Midwest Broadcast Associates Kenosha, Wisconsin, MM Docket No. 83-139, File No. BPCT-820909KG, for Construction Permit; Designating Applications for; Consolidated Hearing on Stated Issues; Hearing Designation Order.

Adopted: February 25, 1983.
Released: March 2, 1983.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Family Television 55, LTD. (Family), Chicago Communications Service, Inc. (CCS) and Frank Edward Kavenik and Frances M. Kavenik d/b/a Midest Broadcast Associates (Midwest) for authority to constuct a new commercial television station on Channel 55, Kenosha, Wisconsin.

Chicago Communications Service, Inc.

2. The applicant submitted to the Federal Aviation Administration a request for clearance of a tower of 482 feet AGL and obtained a determination of no hazard for that height, but its application to the Commission specifies a tower height of 483 feet AGL. We will not specify an air hazard issue. CCS, however, will be required to submit an appropriate amendment to specify the correct tower height to the presiding Administrative Law Judge within 30 days of the release of this Order.

3. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as propoosed. Since these applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convneience and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

4. Accordingly, It is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine which of the proposals would, on a comparative basis, best serve the public interest.

2. to determine, in light of the evidence adduced pursuant to the foregoing issue, which of the applications should be granted.

5. It is further ordered, that within 30 days of the release of this Order, Chicago Communications Service, Inc. shall submit the correct figure for its tower height to the presiding Administrative Law Judge.

6. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 says of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

7. It is further ordered, that the applicants herein shall, purusuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

BILLING CODE 6712-01-M

[CC Docket No. 83-146, et al.]

LIN Cellular Communications Corp. et al.; Hearing

In re Applications of; LIN Cellular Communications Corporation; CC Docket No. 83-146, File No. 26147-CL-P-(27)82; ICS/MCI, File No 26109-CL-P-(23)- 82; Cellular Mobile Systems of California, Inc., File No. 26169-CL-P-(48)-82; Los Angeles Celiular Corporation, File No. 26083-CL-P.(24)-82; for a Construction Permit to establish a Cellular System to operate on frequency Block A in the Domestic Public Cellular Radio

Telecommunications Service to serve the Los Angeles, California, Standard Metropolitan Statistical Area; Designating Applications for Consolidated Hearing on Stated Issues; Memorandum Opinion and Order Designating Applications for Hearing.

Adopted February 25, 1983.

Released March 4, 1983.

1. Presently before the Chief, Common Carrier Bureau, under delegated authority are the captioned applications, filed by LIN Cellular Communications Corporation (LIN), ICS/MCI, Cellular Mobile Systems of California, Inc. (CMS) and Los Angeles Cellular Corporation (LACC). The applicants propose to construct cellular systems to serve the Los Angeles, California, Standard Metropolitan Statistical Area (SMSA).[1] Petitions to Deny have been filed against all the applications and responsive pleadings have been filed.

2. Except with respect to the application of LIN,[2] we find that the petitions fail to raise any substantial and material issues requiring designation for hearing. Since the four applications are mutually exclusive, we are designating them for a comparative hearing in accordance with the Commission's *Report and Order* in CC Docket No. 79-318, 86 FCC 2d 469 (1981), *modified*, 89 FCC 2d 58 (1982), *further modified*, 90 FCC 2d 592 (1982). We are also requiring that CMS modify its application as set forth below.

ICS/MCI Application

3. LIN and CMS filed petitions to deny ICS/MCI's application, alleging that ICS/MCI has failed to adequately describe its basis for determining system congestion; that it has failed to demonstrate a reliable method for the coordinated expansion of its system in response to changing service demand; and that it is not financially qualified because it has not included all relevant costs in its projections or demonstrated the availability of sufficient funds.

4. *System congestion.* We reject CMS' allegations that ICS/MCI's response to § 22.913(a)(5) of the rules is insufficient. In Exhibits 4, 5, 25 and 30 of the application, ICS/MCI has discussed its system for monitoring traffic and evaluating that data and described its projected grade of service for the system and methodology for expansion to maintain that quality of service. This information adequately satisfies the requirements of § 22.913(a)(5) of the rules.

5. *System Expansion.* LIN maintains that ICS/MCI has not properly determined its level of subscriber demand and thus, has not adequately demonstrated a method for system expansion pursuant to § 22.913(a)(4) of the rules. ICS/MCI's description of its cellular design concept and methodology for system expansion, contained in Exhibits 3 and 5 of the application, fulfill our requirements contained in § 22.913(a)(4) of the Rules. Whether the proposal is sufficient to meet anticipated demand for service may be examined in the comparative portion of this proceeding to the extent it is relevant to the issues specified in para. 29. below. Likewise, the applicant's underlying marketing and demographic analysis are also issues which will be examined during the comparative portion of this proceeding.

6. *Financial Issue.* Petitioners allege ICS/MCI's cost projections fail to include landline costs and itemized construction costs for each cell and that ICS/MCI has not demonstrated the availability of sufficient funds for its Los Angeles cellular commitment.[3]

7. We find the first allegation to be without merit since ICS/MCI has explicitly listed its telephone interconnect charges as operating expenses in its financial business plan (Exhibit 36, pp. 36-8, 36-9). Second, in Exhibits 13 and 14, ICS/MCI has adequately itemized its construction and operating expenses for one year. We do not require applicants to demonstrate itemized costs for each cell; therefore, ICS/MCI has fully complied with our rule requirements. *See Advanced Mobile Phone Service, Inc., et al. (Buffalo Order)*, CC Mimeo 1920, released December 14, 1982, at para. 9

8. The aggregate of ICS/MCI's construction and first year operating expenses for the Los Angeles cellular system is $41,836,000. ICS has demonstrated the availability of $750,000 based upon a line of credit with the Imperial Bank in Los Angeles, CA. MCI indicates that it will incur all of the Los Angeles costs and its commitments in eleven other SMSA's totaling $204,957,000. To meet these expenses MCI is relying on a $300 million line of credit from the First National Bank of Chicago. In *Advanced Mobile Phone Service, Inc., et al., (Pittsburgh Order)*, CC Mimeo 1169, released December 6, 1982, the Common Carrier Bureau found that MCI had demonstrated reasonable assurance of the $300 million line of credit. We concluded therefore, that MCI has sufficient funds available to construct its twelve cellular systems,[4] and that no financial issues should be designated for hearing against any MCI Communications Corporation subsidiary based on its ability to finance commitments for twelve cellular applications in the top-30 markets. Because petitioners have not raised any allegations particular to the Los Angeles application, the finding in the *Pittsburg Order* are fully dispositive of the arguments here.

CMS Application

9. ICS/MCI and LIN filed petitions to deny CMS' application alleging that CMS is not financially qualified; that it has underestimated its costs; that it has failed to demonstrate a projected method for system expansion; that CMS has not made adequate provisions for maintenance, repair and operation of the system; and that CMS does not have the requisite character qualifications to be a Commission licensee. In addition, we will raise on our own motion the extension of CMS' Cellular Geographic Service Area (CGSA) into another central SMSA.

10. *Financial Issue.* First, the CMS cost estimates do not appear unreasonable, the they include the full costs of constructing the forty-eight cell sites [5] and the channel equipment necessary for the first year of operation. The Commission has long found that the general allegation that one applicant's estimated costs are lower than another's

---

[1] Three applications were also filed requesting the wireline allocation (frequency block B) in this SMSA. On November 22, 1982, the three applicants filed a settlement agreement for this SMSA. We will consider the wireline allocation in a separate order.

[2] *See* para. 27, *infra.*

[3] ICS/MCI was a partnership of subsidiaries of ICS Communications and MCI Communications Corporation. On January 31, 1983, ICS/MCI filed an amendment pursuant to Section 1.65 of the Commission's Rules, notifying the Commission that on January 5, 1983, a transfer of control of ICS Communications to Metromedia, Inc., was consummated. We will accept this as a minor amendment consistent with our policies on this issue, *Order*, FCC 82-408, 47 FR 39.686 (1982), because this change in ownership does not result in a transfer of control. MCI had control and will retain control of the cellular radio partnership. ICS had a 20% interest in ICS/MCI; therfore, Metromedia will hold a minority ownership in the ICS/MCI cellular radio partnership. We emphasize that ICS/MCI has not claimed, nor will we accord it, any comparative credit for the change in ownership.

[4] MCI has filed applications in the following SMSA's either as part of a joint venture or independently: ICS/MCI—Los Angeles; MCI/Mobile Radio Communications—Kansas City; MCI Cellular Telephone Company—Philadelphia, Pittsburgh, Minneapolis, Dallas, Houston, Miami, Cleveland, Denver, Tampa, and Portland.

[5] We also reject LIN's allegations that CMS should have itemized construction costs for each cell site. Our rules do not require this degree of specificity. *See* Buffalo Order, *supra*, at para 9. Further, contrary to LIN's allegation, Section 22.917 of our Rules does not require that the cost of mobile equipment be included in an applicant's financial projections. *See* Metrocom of St Louis, *et al.* (St. Louis Order), CC Mimeo 2045, released January 28, 1983.

is insufficient to warrant the addition of a financial issue.[6] Second, CMS' projected costs of construction and operation of its system for one year are estimated at $32.117 million. To finance these costs CMS is relying on a letter of commitment from its parents, Graphic Scanning Corp. (Graphic), to advance $35.5 million. This letter of commitment from Graphic to CMS specifically states that none of the funds have been committed to other cellular system applications or to other projects. We find that this satisfies Rule § 22.917(b) which requires that resources used to demonstrate financial ability regarding one cellular system may not include funds committed elsewhere. Moreover, in the *Chicago Order, supra,* the Commission found that Graphic and its cellular subsidiaries have provided reasonable assurance that they will have sufficient funds available to cover construction of 30 cellular systems in the top 30 markets. The Commission further concluded that no financial issues should be designated for hearing against any Graphic subsidiary based on the ability of Graphic to finance the construction and operation for one year of 30 cellular systems. Because petitioners have not raised any substantial allegations particular to the Los Angeles application, the findings in the Commission's *Chicago Order* control the disposition of the allegations here. Thus, we find CMS to be financially qualified.

11. We have also considered the other objections made against CMS' application and we find that they raise no substantial issues. First, contrary to LIN's allegations, CMS has submitted an adequate frequency plan (Volume I, Exhibit 4), and has described its plan for system expansion at Volume I, Exhibit III, Section C of its application. This fulfills our filing requirements contained in § 22.913 (a)(4) and (a)(6). As discussed with respect to ICS/MCI's application, the sufficiency of these proposals may be examined in the comparative portion of this proceeding. *Report and Order, supra,* at 502–03. Second, CMS has submitted exhibits describing its service and maintenance proposal which meet the requirements of our rules. *See* Volume I, Exhibit VII, Section C, E and Appendix D. These proposals may also be examined in the comparative portion of this proceeding to the extent they are relevant to the issues specified in para. 29 below. Finally, the Commission has held that the character of Graphic would be examined in the *ASD* proceeding [7] and would not be included in the cellular comparative hearing process. *Chicago Order, supra,* at n. 19. Consistent with that decision, the Commission reserves the right to reexamine and reconsider the qualifications of CMS to hold a cellular license should *ASD* be resolved against any of CMS' affiliates, parent companies or against any of their principals. Therefore, we decline to designate any of these issues for hearing.

12. *Extension of CGSA.* Review of CMS' application reveals that CMS' proposed CGSA extends into the central San Diego SMSA. Pursuant to Rule 22.903(a), a CGSA may not extend into another central SMSA. Therefore, we will require that CMS file a conforming amendment to bring the nonconforming CGSA and 39 dBu contour for cell #6, San Juan Capistrano, into compliance with the rules. The amended 39 dBu contour shall not cover any area in the SMSA not previously covered by the nonconforming 39 dBu contour. This amendment should consider the effects, if any, that this change may have on other parts of the application. Due to this circumstance, brief extensions of time may be granted at the discretion of the Administrative Law Judge.[8]

LACC Application

13. LIN and ICS/MCI filed petitions to deny LACC's application alleging that LACC has failed to provide an adequate plan for staffing, maintaining and operating its proposed system pursuant to § 22.15(e); that LACC has not detailed its construction costs with respect to individual cell sites; that mobile equipment costs have not been included in the projected expenses; that LACC has not included construction costs to be incurred after year one; and that LACC has not demonstrated the availability of sufficient funds for its Los Angeles system.

14. *Staffing and Maintenance Proposal.* LIN's allegation in this regard is without merit. In Exhibits 23 and 24 of the application LACC described its service and maintenance proposals as required by our rules. Whether these proposals are sufficient may be examined in the comparative portion of this proceeding to the extent they are relevant to the issues specified in para. 29 below. Accordingly, we will not designate a basic qualifying issue with respect to this matter.

15. *Financial Issue.* Allegations concerning LACC's cost projections are also without merit because we do not require construction costs for individual cell sites, *Buffalo Order, supra,* nor do we require that mobile equipment expenses be included in financial projections. *St. Louis Order, supra.,* at para. 10. In any event, LACC has included mobile equipment costs in its estimated costs, *See* Exhibit 22, Attachment 22–C, p. 2. Further, we reject CMS' allegation that LACC should have demonstrated its financial qualifications for more than one year. The Commission only requires that cellular applicants demonstrate financial ability to operate for one year. *See* 47 CFR 22.917 and *Buffalo Order,* at para. 16.

16. Finally, we find that LACC has demonstrated reasonable assurance of the availability of $28,580,000 to cover its aggregate construction and first year operating expenses of $27,670,000.[9] To meet these expenses LACC is relying on (1) an escrow account of $3,575,000 from American Cellular, (2) $8,000,000 debt financing from the First National Bank of Chicago, and (3) $16,785,000 from Westel and its principal shareholder, FMI Financial Corporation (FMI). Petitioners challenge the bank letter and the availability of sufficient funds from Westel/FMI.

17. *Bank letter.* LIN argues that the letter from the First National Bank of Chicago does not constitute a firm commitment because it is conditioned on "the participation of substantially all of the stockholders named in the cellular application" and because the terms of the loan were made contingent upon the exact credit conditions prevailing at the time of the commitment. The Commission does not require a legally binding loan commitment but "reasonable assurance" that a loan or similar financing will be available to the applicant if it secures a construction permit. *Multi-State Communications, Inc.* v. *FCC,* 590 F. 2d 1117 (D.C. Cir. 1978), *cert. denied,* 440 U.S. 959 (1979). In fact the bank letter which the Commission found sufficient in *Multi-*

[6] *See e.g.,* Advanced Mobile Service, Inc., *et al. (Chicago Order,* FCC 82–452, released November 1, 1982, at para. 13, and Cross Broadcasting Co., 46 RR 2d 1091, 1097–98 (1979).

[7] A.S.D. Answer Service, Inc., *et al.,* FCC 82–391, released August 24, 1982.

[8] On September 13, 1982, CMS resubmitted an amendment to modify its Cellular Geographic Service Area. Since we are directing a specific amendment to cover this problem, we are returning this amendment under separate cover.

[9] LACC's common stock is owned 43.5% by Westel-Los Angeles Company (Westel) and 56.5% by Los Angeles RCCs, Inc. (LAR). LAR is owned 70% by American Cellular Communications Corporation (American Cellular), a wholly owned subsidiary of Mobile Communications Corporation of America, and 5% by six companies with existing RCC operations in Los Angeles. The six companies are American Mobile Radio, Inc., Intrastate Radio Telephone, Inc. of San Bernardino, Mobilfone, Inc., Orange County Radio Telephone Service Inc., R.L. Mohr d/b/a/ Radiocall Corporation and Radio Dispatch Corporation.

State, supra, contained the same terms and conditions which LIN has challenged here. Accordingly, we find that the letter from the First National Bank of Chicago contains all the necessary terms and conditions and provides reasonable assurance that $6,000,000 is available to LACC for its Los Angeles cellular system.

18. *Westel/FMI financing.* FMI Financial Corporation (FMI) has agreed pursuant to the Joint Venture Agreement between FMI and the Western Union Telegraph Company to assure the compliance of Westel-Los Angeles with the financial terms of the shareholder's agreement.[10] Therefore, FMI will incur Westel's $18,785,000 commitment to LACC. In addition, FMI has agreed to contribute $33,624,000 to four cellular systems in the top thirty markets, including Los Angeles. FMI claims that it has at least $51,954,000 to meet its commitment to the four systems. It is relying on (1) $13,610,000 cash and short term government securities, (2) $10,000,000 from an existing loan agreement, (3) $20,700,000 in mortgage loans, and (4) future corporate earning projections of $7,624,000. FMI also argues that it has substantial real estate holdings which could be made available if these properties were either sold or pledged for further borrowings.

19. LIN has challenged FMI's $10,000,000 loan agreement with American Financial Corporation (AFC) arguing that the letter does not set forth essential terms such as interest payments and collateral requirements. It claims that although the letter refers to the terms underlying the original loan agreement, the agreement containing these terms was not submitted with the application. CMS argues that FMI has not earmarked its funds for cellular financing, and that the mortgage loans and land assets do not meet the Commission's criteria for liquidity. CMS also argues that FMI's projected earnings are too speculative to be relied upon.

20. First, with respect to the $10,000,000 loan agreement, LACC replies that all of the essential terms and conditions, including rate of interest and collateral requirements are set forth in the application, Exhibit 22, Attachment 22–B. In addition, LACC attaches the original loan agreement to its response. Second, LACC argues that FMI's mortgage loans are in a current paying status and are readily marketable. It attaches an affidavit from David R. Winstel, Vice President and Treasurer of FMI, who testifies that the type of mortgage loans which FMI possesses are highly marketable. Mr. Winstel states that FMI has first mortgage loans on hotels, apartment projects and single family residential properties which are five to ten years in age and have maturities ranging from eight to twenty years. LACC also attaches a letter from the Salomon Brothers, Inc., a major investment banking firm which engages in secondary trading of mortgage loans. This letter states that "first mortgage loans on commercial property are readily marketable if the mortgages are current, if the underlying properties are sound and if the value of the properties is sufficient to justify the amounts outstanding in the loans." It states that "investor appetite is greatest for loans which have a high degree of certainty that the remaining term of the mortgage loan will be at least five years and as long as fifteen years." According to LACC, this letter confirms Winstel's allegation that FMI's mortgage loans are readily marketable and that there is an active secondary trading market in such assets.

21. Third, LACC attempts to demonstrate the marketability of FMI's land assets. It states that FMI has undeveloped land holdings with an aggregate book value of $8,950,200 as of July 31, 1981. These assets were appraised during 1979 and 1980 at $20,702,000 and those appraisals are attached to the reply. LACC also states that five of FMI's hotel properties having an aggregate book value of $35,960,000 for the year ended January 31, 1982, had an aggregate appraised value of $54,745,000 as of December 31, 1979. It also attaches those appraisal letters. Finally, LACC argues that FMI's earning projections are highly realistic and are based on conservative assumptions regarding the nature of FMI's future operations.

22. We find that FMI has clearly demonstrated the availability of $13,610,000 in cash and short term government securities.[11] Moreover, LACC has demonstrated reasonable assurance of the availability of $10,000,000 from AFC. As stated in LACC's reply, the essential terms and conditions of the $10,000,000 loan were set forth in the application and the original loan agreement was attached to the reply. Therefore, the above assets total $23,610,000 and FMI needs an additional $10,014,000 to meet its $33,624,000 commitment.

23. With respect to FMI's $20,720,000 mortgage loan portfolio and assets aggregately appraised at $75,447,000, we are persuaded that these assets are sufficiently marketable so that FMI could rely on them for at least an additional $10 million. There is precedent in the broadcast area that reliance can be placed on nonliquid assets if the marketability of those assets is documented. In *Dodge-Point Broadcasting Co.*, 13 PR 2d 274 (1968), the applicant intended to rely on his ownership of a hotel and motel to demonstrate his financial qualifications. He had these assets appraised by experts and stated his intention to sell these properties if the funds were needed. The Commission allowed these assets to be considered in assessing the applicants financial qualifications and it reduced the amount by one-third to provide for unanticipated fluctuations in the market. Similarly, in *Enterprise Broadcasting, Inc.*, 56 FCC 2d 352 (Rev. Bd. 1975), the Commission allowed the applicant to rely on his wife's land to meet the deficiency in his financial proposal.

24. In light of the Winstel affidavit and Salomon Brothers letter, we are persuaded that FMI's $20,870,000 mortgage loans are marketable. LACC explains that these mortgage loans bear interest at an average rate of 10.7%, so they would have to sold at a discount from face value in order to bring a yield in line with current market interest rates. Even if the loans were discounted by as much as 40%, the proceeds would still be sufficient, when added to FMI's other assets, to cover FMI's financial commitments. Finally, since FMI appears to have sufficient funds without relying on projected corporate cash flow, we need not consider that aspect of FMI's financial showing. Moreover, unlike LIN's deficient financial showing, as discussed below, LACC has demonstrated the availability of sufficient funds without relying on projected cellular revenues. In light of the above, we decline to designate a financial issue against LACC.

LIN Application

25. CMS petitions to deny LIN's application arguing that LIN is not financially qualified. CMS claims that LIN has underestimated costs and failed to demonstrate the availability of sufficient funds to build and operate its proposed cellular systems in Los Angeles, New York, Dallas/Fort Worth

[10] Westel-Los Angeles is owned 20% by the Western Union Telegraph Company and 80% by FMI Communications Corporation (which is wholly owned by FMI).

[11] Contrary to CMS' allegations that FMI's funds are not committed to cellular, LACC emphasizes in its Reply that FMI will meet its cellular obligations and it has no other corporate projects which would require the use of these funds.

and Houston.[13] In addition, ICS/MCI submitted a late filed petition against LIN.[14]

28. *Financial Issue.* CMS claims that LIN does not have sufficient funds for its four cellular systems because LIN attempts to rely, in part, on $34,680,000 from projected first year cellular revenues. CMS argues that LIN cannot rely on projected revenues to meet its first year construction and operation costs because it did not submit commitments for service and it failed to proffer any probative support for its revenue estimates.

27. In the *New York Order,*[15] the Bureau examined similar arguments and found them to raise a substantial and material question of fact about LIN's financial ability. In view of this conclusion, the Bureau designated for hearing an issue concerning LIN's overall financial package. We wil not designate an identical issue here because we want to avoid duplicative litigation. However, we will consider the ultimate finding as to LIN's financial qualifications in the *New York* proceeding to be dispositive of the issue, and we will reserve the right to reexamine and reconsider any authorization to LIN in the event that LIN's Los Angeles application is granted as a result of the comparative hearing.[16]

Conclusions

28. Based on our analysis of the applications and our resolution of the contested issues in this order, we find the applicants to be legally, technically, financially and otherwise qualified to construct and operate their proposed cellular systems except to the extent discussed here. As indicated above, the captioned CMS application does not comply with one of the cellular rules. In the *Chicago Order,* at para. 17, the Commission determined that inflexible application of the rules to applications in the 30 largest markets would not be in the public interest. Accordingly, we are requiring CMS to bring its application into conformance with the rules as specified in this order. The applicants who filed mutually exclusive applications may address this amendment in their rebuttal cases. We emphasize that the amendment ordered here may not be used to give CMS a comparative advantage in the hearing proceeding. As the Commission stated in the *Chicago Order,* in markets for which applications have not yet been filed, strict conformance with the rules will be required, and absent unusual circumstances, the applicants will not be allowed to amend nonconforming applications.

29. Accordingly, It is ordered that pursuant to Section 309 of the Communications Act of 1934, as amended, that the applications of LIN Cellular Communications Corporation, ICS/MCI, Cellular Mobile Systems of California, Inc., and Los Angeles Cellular Corporation are designated for hearing in a consolidated proceeding upon the following issues:[17]

(a) to determine on a comparative basis the geographic area and population that each applicant proposes to serve;[18] to determine and compare the relative demand for the services proposed in said areas; and to determine and compare the ability of each applicant's cellular system to accommodate the anticipated demand for both local and roamer service;[19]

(b) to determine on a comparative basis each applicant's proposal for expanding its system capacity in a coordinated manner within its proposed CGSA in order to meet anticipated increasing demand for local and roamer service;

(c) to determine on a comparative basis the nature and extent of the service proposed by each applicant, including each applicant's rates, charges, maintenance, personnel, practices, classifications, regulations and facilities including switching capabilities;[20] and

(d) to determine, in light of the evidence adduced under the foregoing issues, what disposition of the referenced applications would best serve the public interest, convenience and necessity.

30. It is further ordered that the Separated Trial Staff (the Hearing Division and other individuals specifically designated) of the Common Carrier Bureau is made a party to the proceeding.[21]

31. It is further ordered that the applicants shall file written notices of appearances under § 22.916(b)(3) of the

---

[13] On October 1, 1982, LIN resubmitted an amendment to its cellular radio market study, which had been proffered on September 14, 1982. The staff had determined that the amendment pertained to LIN's affirmative direct case and should be submitted after designation to the presiding Administrative Law Judge. LIN contends that although the market study is contained in the direct case, it is incorporated by reference to the application (Exhibit 6, page 1, n. 1). Therefore, it argues that this amendment really amends the application. We reject LIN's argument LIN is in fact amending the market study which is contained in the direct case. The incorporation by reference contained in the application has not been changed. Therefore, we will return this amendment, and allow LIN to submit it to the presiding Administrative Law Judge.

[14] LIN challenged ICS/MCI's petition as untimely and unauthorized, and urged the Common Carrier Bureau to disregard it. We will consider it as an informal objection pursuant to § 22.30(c) of the Rules. ICS/MCI argues that LIN's application is deficient because its maps were not properly drawn to scale as required by § 22.903(a) of the Rules. We find that these allegations are moot because LIN filed a minor amendment on September 7, 1982, containing identical maps in terms of information, but drawn to the proper scale.

[15] Advanced Mobile Phone Service, Inc., *et al. (New York Order)* CC Mimeo 2619, released February 16, 1983.

[16] However, the petitioners in this proceeding may file a motion for limited intervention in the New York proceeding, on the financial issue. *See New York Order,* at note 22.

[17] There are two issues that are not to be considered in the comparative hearing. The first is the financial qualifications of all of the applicants. Financial ability is a basic rather than a comparative qualification for cellular licensing. Cellular Communications Systems, 86 FCC 2d 469, 501–02 (1981). Except for LIN, we have found all of the applicants included in the comparative hearing to be financially qualified. However, LIN's financial qualifications will be determined during the New York comparative hearing. The second issue not to be considered is the qualifications of Cellular Mobile Systems of California, Inc., or its parent Graphic, to the extent that such qualifications may be affected by the issues included in the Commission's order designating certain 35 and 43 MHz paging applications for hearing, A.S.D. Answer Service, Inc., *et al.* (ASD), FCC 82–391, released August 24, 1982. Those issues will be thoroughly reviewed in that separate proceeding and should not be reargued in the context of a cellular hearing. The Commission reserves the right to reexamine and reconsider the qualifications of Cellular Mobile Systems of California, Inc. to hold a cellular license should *ASD* be resolved adversely to any of CMS' affiliate or parent companies or to any of their principals. *See Chicago Order,* at n. 19.

[18] For purposes of comparison, the geographic area that an applicant proposes to serve includes that area within the proposed 39 dBu contours which, in turn, falls within the proposed Cellular Geographic Service Area and the relevant Standard Metropolitan Statistical Area. Consideration should be given to the presence of densely populated regions, highways and areas likely to have high mobile usage characteristics as well as indications of a substantial public need for the services proposed. *See* 86 FCC 2d at 502.

[19] In making this comparison, perference should be given to designs entailing efficient frequency use, including not only the applicant's plans with regard to cell-splitting and additional channels, but also the degree of frequency reuse the system will be capable of, and the applicant's ability to coordinate the use of channels with adjacent or nearby cellular systems. *See* 86 FCC 2d at 502–03.

[20] *See* 86 FCC 2d at 503 for a discussion of the relative importance of the evidence submitted under this issue.

[21] Members of the Separated Trial Staff are non-decision making personnel and they will not participate in decision making or agency review on an *ex parte* basis in this case, either directly or through contact with other Common Carrier Bureau personnel. Any investigative or prosecuting functions will be performed by the Separated Trial Staff in connection with its role as a party to the adjudication of these cellular radio applications. All other personnel of the Common Carrier Bureau, unless identified in a subsequent order as required to be separated, are designated as decision-making and they may advise the Commission as to the ultimate disposition of any appeal of an initial decision in this proceeding. See Communications Act of 1934 as amended section 409(c) (47 U.S.C. 409(c); Administrative Procedure Act section 554(d) (5 U.S.C. 554(d); § 1.221 of the Commission's Rules.

Commission's Rules within 10 days after publication of this order in the **Federal Register.**

32. It is further ordered that the hearing shall be held according to the procedures specified in § 22.916 of the Rules, except as otherwise noted here, at a time and place and before an Administrative Law Judge to be specified in a later order.

33. It is further ordered that exceptions to the initial decision of the Administrative Law Judge under § 1.276 of the Commission's Rules shall be taken directly to the Commission.

34. It is further ordered that CMS is directed to file the conforming amendment specified in this order within 15 days after publication of this order in the **Federal Register** and that all applicants are directed to file rebuttal cases under § 22.916(b)(4) of the Rules within 45, rather than 30 days after publication of this order in the **Federal Register.**

35. It is further ordered that, except to the extent granted here, the Petitions to Deny filed by the parties against the captioned applications are denied.

36. It is further ordered that any authorization granted to CMS as a result of the comparative hearing shall be conditioned on, and without prejudice to, reexamination and reconsideration of that company's qualifications to hold a cellular license following a decision in the hearing designated in *A.S.D. Answering Service, Inc., et al.*, FCC 82–391, released August 24, 1982, and shall be specifically conditioned upon the outcome of that proceeding.

37. It is further ordered, that any authorization granted to LIN as a result of the comparative hearing shall be conditioned on, and without prejudice to reexamination and reconsideration of that company's financial qualifications as determined in *Advanced Modile Phone Service, Inc., et al.* (*New York Order*), CC Mimeo 2418, released February 18, 1983.

38. It is further ordered, that any authorization granted as a result of this proceeding shall be conditioned upon obtaining the appropriate antenna structure clearances.

39. This order is issued under Section 0.291 of the Commission's Rules and *Order Delegating Authority*, FCC 82–435, released October 6, 1982, and is effective on its release date. Applications for review under § 1.115 of the Rules of this order may be filed within 30 days of the date of public notice of this order (see Rule 1.4(b)(2)).

40. The Secretary shall cause a copy of this order to be published in the **Federal Register.**

Gary M. Epstein,

Chief, Common Carrier Bureau.

BILLING CODE 6712–01–M

[CC Docket No. 83–104, et al.]

Mathis, James E., et al.; Hearing

Adopted: February 8, 1983.

Released: February 22, 1983.

In re Applications of; James E. Mathis, CC Docket No. 83–104, File No. 901–CM–P–80; and Microband Corporation of America, CC Docket No. 83–105, File No. 4159–CM–P–80; For Construction Permits in the Multipoint Distribution Service for a New Station at Gainesville, Georgia; Designating Applications for Consolidated Hearing on Stated Issues; Memorandum Opinion and Order.

1. For consideration are the above-referenced applications.[1] These applications are for: construction permits in the Multipoint Distribution Service and they propose operations on Channel 1 at Gainesville, Georgia. The applications are therefore mutually exclusive and, under present procedures, require comparative consideration. These applications have been amended as a result of informal requests by the Commission's staff for additional information. There are no petitions to deny or other objections under consideration.[2]

2. Upon review of the captioned applications, we find that these applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

3. Accordingly, it is hereby ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. § 309(e) and Section 0.291 of the Commission's Rules, 47 CFR § 0.291, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent Order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered: [3]

(a) The relative merits of each proposal with respect to efficient frequency use, particularly with regard to compatibility with co-channel use in nearby cities and adjacent channel use in the same city;

(b) The anticipated quality and reliability of the service proposed, including installation and maintenance programs; and

(c) The comparative cost of each proposal considered in context with the benefits of efficient spectrum utilization and the quality and reliability of service as set forth in issues (a) and (b).

4. It is further ordered, That James E. Mathis, Microband Corporation of America and the Chief, Common Carrier Bureau, are made parties to this proceeding.

5. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of Section 1.221 of the Commission's Rules, 47 CFR 1.221.

6. The Secretary shall cause a copy of this Order to be published in the **Federal Register.**

James R. Keegan,

Chief, Domestic Facilities Division, Common Carrier Bureau.

BILLING CODE 6712–01–M

[MM Docket No. 83–116, File No. BPH–7901?AC]

Santa Monica Broadcasting, Inc., et al.; Hearing

Adopted: February 17, 1983.

Released: March 1, 1983.

In re application of; Santa Monica Broadcasting, Inc, KSFR–FM, Santa Monica, California, MM Docket No. 83–116, File No. BPH–7901AC; HAS: 103.1 MHz Channel 276A 1.85 kW (H&V), 95 feet HAAT; Requests: 103.1 MHz, Channel 276A .87 kW (H&V) 570 feet HAAT; For Construction Permit for Modification of Facilities of KSRF (FM), Santa Monica, California; Designating Application for Hearing on State Issues; Hearing Designation Order.

1. On July 17, 1980, the Commission granted the above-captioned application and denied, without hearing, a petition

---

[1] On August 18, 1980, Tymshare, Inc. (Tymshare) and Arthur Lipper Corporation (ALC) executed a contract whereby ALC agreed to transfer control of Microband to Tymshare. *Transfer of Control/MDS*, 85 FCC 2d 1023 (1981).

[2] By Memorandum Opinion and Order adopted June 20, 1981 and released July 2, 1981, Mimeo No. 001883, Microband was granted an exemption from the Commission's "cut-off" rules pursuant to § 21.31 of the Rules, 47 CFR 21.31, to preserve the status of its pending mutually exclusive application.

[3] Consideration of these factors shall be in light of the Commission's discussion in *Frank K. Spain*, 77 FCC 2d 20 (1980).

to deny filed by Hutton Broadcasting, Inc. (KOCM), licensee of FM Station KOCM, Newport Beach, California. *Santa Monica Broadcasting, Inc.*, 79 FCC 2d 949 (1980). The Commission, on January 21, 1981, denied KOCM's petition for reconsideration, *Santa Monica Broadcasting, Inc.*, FCC. 81–8 (released January 21, 1981), again without a hearing. Subsequently, KOCM appealed the Commission's decision to the United States Court of Appeals for the District of Columbia Circuit. The Court affirmed in part and reversed in part the Commission's decision granting KSRF's application and remanded the case for an evidentiary hearing pursuant to Section 316(a) of the Communications Act of 1934, as amended (47 U.S.C. 316(a)). *Western Broadcasting Company v. FCC*, 674 F. 2d 44 (D.C. Cir. 1982).[1]

2. KOCM and KSRF are commercial Class A FM stations operating on the same frequency, KOCM in Newport Beach and KSRF in Santa Monica. They have existed as co-channel operations on channel 167A (103.1 MHz) since 1960. The stations are 41.5 miles apart. Normally, the Commission's Rules require that a minimum of 65 miles separate co-channel class A FM stations. *FM Broadcast Rules*, 40 FCC 662, 680 (1962) and § 73.208 of the Commission's Rules, 47 CFR 73.208. However, this short-spacing was permitted because the stations were already licensed in a short-spaced condition as of November 16, 1964. *FM Broadcast Rules, supra*, and § 73.213 of the Commission's Rules, 47 CFR 73.213. KSRF filed its application for changes because of the claimed deterioration of its signal to its city of license caused by interference from high-rise construction in Santa Monica. KOCM alleged that a grant of the KSRF application would create objectionable interference to its signal thereby causing an indirect modification of its license. The Commission determined that the proposal would cause no additional interference to KOCM's 1.0 mV/m area and denied KOCM's petition, without hearing.

3. The Court found that KOCM's claim of objectionable interference raised a "legally cognizable issue" under Section 316(a) of the Act and held that KOCM was entitled to notice and an opportunity to show cause in an evidentiary hearing why the proposed order of modification should not issue. It then remanded the case to the Commission for further proceedings consistent with its opinion. The Court made no findings concerning whether or not a grant of the application for modification would result in any interference to KOCM. Section 316(a) of the Act provides in pertinent part, that "any station license . . . may be modified by the Commission . . . if in the judgment of the Commission such action will promote the public interest, convenience and necessity." However, "no such . . . modification shall become final until the holder of the license . . . shall have been notified in writing of the proposed action and the grounds and reasons therefor, and shall have been given reasonable opportunity . . . to show cause by public hearing, if requested, why such order of modification should not issue."

4. Because of the unique posture of this case, we believe it is necessary to provide guidance as to what constitutes "objectionable interference." We believe that it is appropriate to use Section 73.509 of the Rules. However, because the stations involved are grandfathered, short-spaced stations, there may already be objectionable interference under that rule. Therefore, we believe it is appropriate to determine the degree of interference already encountered with regard to the existing operations, and then to determine whether there will be any increase in that interference. "Objectionable interference," for the purposes of this proceeding only, will be defined as any increase in the interference presently encountered within the station's 1 mV/m contour, which is neither masked by existing interference nor is so small as to be *de minimis*. Normally, the location of the contours would be determined pursuant to § 73.313 of the Commission's Rules. In this case, however, KOCM has proposed an alternative method of determining the extent of the pertinent contours. Therfore, at the outset of this case, it will be necessary to determine whether the method prescribed by § 73.313 or the alternative method advocated by KOCM is more appropriate under these circumstances.

5. In view of the foregoing, KOCM will be made a party to this proceeding thereby giving it an opportunity, pursuant to Section 316(a) of the Communications Act, to show in hearing why its license should not be modified.

6. Accordingly, it is ordered, That, pursuant to Section 316(a) of the Communications Act of 1934, as amended, the application of Santa Monica Broadcasting, Inc., is designated for hearing, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine the areas and populations which Santa Monica Broadcasting, Inc. presently serves and those areas and populations which may be expected to gain or lose primary service from the proposed operation of KSRF and the availability of other primary aural service (1mV/m or greater in the case of FM) to such areas and populations.

2. To determine whether the proposal of Santa Monica Broadcasting, Inc. would cause additional objectional interference to Station KOCM and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations affected (1mV/m or greater in the case of FM).

3. To determine, in light of the evidence adduced under issue two, whether the grant of the application would modify the license of station KOCM and, if so.

4. To determine whether there are any public interest benefits that would flow from the grant of the application and which would warrant a modification of the license of station KOCM and a grant of the application.

7. It is further ordered, That Donrey, Inc., license of Station KOCM, Newport Beach, California, is made a party to the proceeding.

8. It is further ordered, That: (a) with regard to the alleged modification of the license of Station KOCM, the burden of introduction of evidence and the burden of proof shall be on the Mass Media Bureau, but that Santa Monica Broadcasting Inc. and Western Broadcasting Company may also introduce evidence on this issue; (b) with regard to the alleged public interest benefits resulting from the proposed operation of Station KSRF, the burden of introducing evidence and the ultimate burden of proof shall be on Santa Monica Broadcasting, Inc.

9. It is further ordered, That to avail themselves of the opportunity to be heard, the applicant and party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

10. It is further ordered, That the Secretary of the Commisson shall send copies of this order by certified mail, Return Receipt Requested, to the parties in this proceeding.

[1] Donrey, Inc., is the present licensee of station KOCM. Hutton Broadcasting, Inc., was the licensee of KOCM when these proceedings were initiated before the Commission. Western was substituted during the appellate proceeding.

Federal Communications Commission.

FEDERAL MARITIME COMMISSION

[Agreements Nos. 10374-2 and 10266-5]

Availability of Finding of No Significant Impact

Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decision on Agreements Nos. 10374-2 and 10266-5 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 et seq., and that preparation of an environmental impact statement is not required.

Agreement No. 10374-2 is between Intercontinental Transport (ICT) B.V., Compagnie Generale Maritime (CGM), Hapag-Lloyd (HL) and Harrison Line (Harrison), and Agreement No. 10266-5 is between ICT, CGM, HL and Harrison (Proponents). Proponents have narrowed the scope of the amendments to these Agreements so that they are limited to two basic modifications. These two modifications would (1) extend the geographic coverage of both Agreements to encompass the U.S./Mexico trade; and (2) authorize the parties to Agreement No. 10266 to offer transshipment service.

This Finding of No Significant Impact (FONSI) will become final within 10 days of publication of this notice in the Federal Register unless a petition for review is filed pursuant to 46 CFR 547.6(b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523-5725.

Francis C. Hurney,
Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Company; Proposed de Novo Nonbank Activities; First National Boston Corp.

The organization identified in this notice has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to the application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on the application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. Federal Reserve Bank of Boston (Richard E. Randall, Vice President), 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *First National Boston Corporation*, Boston, Massachusetts (management consulting to nonaffiliated depository institutions; United States): To engage *de novo*, through an existing subsidiary, FBC, Inc., in providing management consulting advice to nonaffiliated bank and nonbank depository institutions including commercial banks, savings and loan associations, mutual savings banks, credit unions, industrial banks, Morris Plan banks, cooperative banks, and industrial loan companies in accordance with § 225.4(a)(12) of Federal Reserve Regulation Y (12 CFR § 225.4(a)(12)). These activities will be performed *de novo* by FBC, Inc. from an office in Boston, Massachusetts, that will serve the United States. Comments on this application must be received not later than April 1, 1983.

Board of Governors of the Federal Reserve System, March 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; American Bankshares Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *American Bankshares, Inc.*, Bowman, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of The American Bank, Bowman, Georgia. Comments on this application must be received not later than March 30, 1983.

B. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *First Fowler Bancorp, Inc.*, Fowler, Colorado; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Fowler, Fowler, Colorado. The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Kansas City. Comments on this application must be received not later than April 1, 1983.

Board of Governors of the Federal Reserve System, March 3, 1983.

James McAfee,

Associate Secretary of the Board.

Montana; Conveyance and Order Providing for Opening of Federal Lands

March 1, 1983.

In an exchange of lands made under the provisions of Section 206 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2756, 43 U.S.C. 1716, the following lands have been conveyed to the United States:

Principal Meridian

T. 7 S., R. 19 E.,
Sec. 33, E½ as shown on the official U.S. GLO survey plat approved December 28, 1868 and redescribed as Tracts 37 and 38 on the official U.S. GLO resurvey plat approved March 17, 1941;
Sec. 34, S½NE¼, W½ and W½SE¼.
The area described contains 800 acres.

Upon acceptance of title to the lands, they became part of the Custer National Forest and are subject to all the laws, rules and regulations applicable thereto. At 10 a.m. on April 18, 1983, the lands shall be open to such forms of disposition as may by law be made of national forest lands.

Inquiries concerning the lands should be addressed to the Forest Supervisor, Custer National Forest, 2602 First Avenue North, P.O. Box 2556, Billings, Montana 59103.

In exchange for above described land and a $5,600 cash equalization payment, the following described lands in Phillips County were transferred to First Montana Title Insurance Company as trustee for the benefit of Federal Land Exchange of Nevada, Inc.:

Principal Meridian

T. 28 N., R. 31 E.,
Sec. 10, S½;
Sec. 15, all.
Containing 960 acres.

The purpose of this notice is to inform the public and interested state and local governmental officials of the issuance of the conveyance document.

Michael J. Penfold,

State Director.

In accordance with 30 CFR 256.26(b), a public hearing will be held on April 13, 1983, at the Vandenberg Inn, Riviera Rooms A, B, and C, 1316 South Broadway, Santa Maria, California 93454, for the purpose of receiving comments regarding the central California OCS leasing proposal. The hearing will begin at 9:00 a.m., local time.

The hearing will provide the Secretary of the Interior with additional information from both public and private sectors to help evaluate fully the potential effects of leasing oil and gas tracts offshore central California. In addition, the proceedings will give the Secretary the opportunity to receive further comments and views of concerned Federal, State, and local agencies.

Interested individuals, representatives of organizations, and public officials who wish to testify at the hearings, are requested to contact the Regional Manager, Pacific OCS Region, Minerals Management Service, at the above address by 4:00 p.m., April 6, 1983. Written comments from those unable to attend the public hearing also should be addressed to the Regional Manager, Pacific OCS Region, Minerals Management Service at the above address. The Minerals Management Service will accept written testimony and comments on the draft EIS until April 26, 1983. Time limitations make it necessary to limit the length of oral presentations to ten (10) minutes. An oral statement may be supplemented, however, by a more complete written statement which may be submitted to the hearing officer at the time of presentation of the oral statement. Written statements presented in person at the hearing will be considered as part of the hearing record. To the extent that time is available after presentation of oral statements by those who have

given advance notice, the hearing officer will give others present an opportunity to be heard.

After testimony and comments have been received and analyzed, a final EIS will be prepared.

Harold Doley,

Director, Minerals Management Service.

John H. Farrell,

Acting Director, Environmental Project Review.

Valley Transportation Service, Inc.—Merger Exemption—L.C.W. Transportation Service, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Pursuant to 49 U.S.C. § 11343(e) and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1) *Procedures—Handling Exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982), L.C.W. Transportation Service, Inc. (No. MC-153034) and Valley Transportation Service, Inc. (No. MC-149553), both under the common ownership, management, and control of L. C. Waller, seek the merger of the operating rights of L.C.W. Transportation into Valley Transportation. The operating rights of L.C.W. Transportation to be merged are contained in: (1) A certificate issued in No. MC-153034 authorizing the transportation of doors, door frames, and mouldings, (a) from ports of entry on the international boundary line between the United States and Mexico, at or near El Paso, TX, to San Antonio and Houston, TX, and (b) from ports of entry on the international boundary line between the United States and Mexico, at or near El Paso, TX, to Diboll and Harlingen, TX, restricted in (b) only to traffic moving in foreign commerce; and (2) a permit issued in No. MC-153034 (Sub-No. 2) X authorizing the transportation of pulp, paper and related products, and materials, equipment and supplies (except commodities in bulk), used in the manufacture of pulp, paper and related products, between points in the United States, under continuing contract(s) with International Paper Company, of New York, NY, Weyerhaeuser Company, of McAllen, TX, and Crown Zellerbach, Gaylord Container Division, of Weslaco, TX.

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register.**

ADDRESSES: Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423

and

(2) Petitioners' representative: D. R. Beeler, P.O. Box 482, Franklin, Tn 37064.

Comments should refer to No. MC-F-15152.

BILLING CODE 7035-01-M

Motor Carriers; Finance Application; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1161.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the Federal Register of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49580, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminary, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

For status, please call Team 1 at 202–275–7992.

Volume No. OP1–77

Decided: March 2, 1983.

MC 66100 (Sub-51X), (partial republication), filed January 10, 1983, previously noticed in the Federal Register of January 28, 1983. Applicant: D. P. BONHAM TRANSFER, INC., P.O. Drawer G, Bartlesville, OK 74003. Representative: Larry E. Gregg, 641 Harrison St., P.O. Box 1979, Topeka, KS 66601. Sub 49: (a) broaden machinery, equipment, materials, and supplies used in or in connection with the construction, operation, repair, servicing, maintenance, dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way), to "machinery, metal products, rubber or plastic products and clay, concrete, glass or stone products", and (b) change Tulsa, OK, and points within 5 miles of Tulsa, to "Tulsa, OK".

Note.—The purpose of this partial republication is to include part 4 of applicant's Sub 49 which was inadvertently omitted from the initial publication. The rest of the previous publication remains the same.

For status, please call Team 2 at 202–275–7030.

Volume No. OP2–088

Decided: March 1, 1983.

MC 2962 (Sub-No. 78)X, filed January 10, 1983. Applicant: A. & H. TRUCK LINE, INC., 1111 E. Louisiana St., Evansville, IN 47711. Representative: Robert H. Kinker, 314 West Main St., P.O. box 464, Frankfort, KY 40602, (502) 223–8244. Lead and Sub-Nos. 4, 5, 6, 7, 9, 10, 12, 13, 14, 15, 16, 18, 25, 26, 27, 29, 30, 32, 34, 35, 36, 37, 39, 41, 42, 43, 45, 46, 47, 48, 49, 50, 51, 52, 54, 56, 57, 58, 59, 60, 61, 63, 64, 66, 69F, 70F, 74F, 75, and 76 Certificates: (1) broaden (a) all above certificates from General commodities (with exceptions) to "general commodities (except classes A and B explosives, household goods, and commodities in bulk);" and (b) Sub 12, from paint and paint materials to "chemicals and related products"; (2) allow service at all intermediate points (regular routes) in the lead and Sub-Nos. 12, 18, 25, 42, 50, 61, 70, and 74F; (3) remove restrictions against service on routes (a) lead, between Cincinnati, OH, on the one hand, and, on the other, Jeffersonville, IN, New Albany, IN and Louisville, KY, and limiting commodities at West Memphis, AR, (b) Subs 10 and 49, between Cincinnati, OH and Louisville, KY, (c) Sub 14, between Sanoval, IL and Washington, IN, (d) Sub 16, off-route point of Buckner, KY, (e) Sub 26, off-route point of Eastman Kodak Co., at Oak Brook IL, (f) Sub 30, between Vincennes, IN and Shoals, IN, (g) Sub 42, serving Princeton, KY, (h) Sub 43, off-route point of Hopkinsville, KY, (i) Sub 45, between Owensboro, KY and Drakesboro, KY, (j) Sub 46, between Hammond, IN and Indianapolis, IN, and (k) Sub 51, between Nashville, TN and Louisville, KY; (4) change one-way to radial in Sub 12; (5) remove restriction requiring use of tank vehicles in Sub 12; and (6) broaden Tell City, IN to Perry and Spencer Counties, IN and Hancock County, KY in (irregular routes) the lead.

Motor Carriers; Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of comments must be filed with the Commission within 25 days after the date of this **Federal Register** notice addressing specifically the issue(s) indicated as the purpose for republication.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4 at (202) 275-7669.

MC 135046 (Sub-27)X, filed July 30, 1982, previously noticed in the **Federal Register** issues of September 14, 1982 and September 29, 1982, respectively, and republished as follows: Applicant: ARLINGTON J. WILLIAMS, INC., 1398 S. DuPont Hwy., Smyrna, DE 19977. Representative: James H. Sweeney, P.O. Box 9023, Lester, PA 19113. In a decision decided February 3, 1983, Division 1, acting as an Appellate Division, found that with respect to the proposed expansion of its commodity descriptions contained in its former certificates No. MC-135046 and Sub-Nos. 2 and 11 will be modified as follows: from fibre, fibre products, and insulating materials to: food or related products; textile mill products; apparel, or other finished textile products or knit apparel; lumber or wood products, except furniture; pulp, paper or related products; chemicals or related products; clay, concrete, glass or stone products; fabricated metal products except ordnance, machinery and transportation equipment; instruments; photographic goods or optical goods; watches or clocks; waste or scrap materials not identified by producing industry, materials, equipment and supplies used in the manufacture and distribution of the above named commodities.

Note.—(1) If no comments are filed within 25 days of publication, the application will be granted.

(2) The purpose of this republication is to broaden specified commodity descriptions in the Lead and Subs 2 and 11.

Motor Carriers; Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of petition for leave to intervene must be filed with the Commission within 30 days after the date of this **Federal Register** notice addressing specifically the issue(s) indicated as the purpose for republication.

Agatha L. Mergenovich,

Secretary.

MC 140554 (Sub-3) (republication), filed July 26, 1982, published in the **Federal Register** issue of August 25, 1982. Applicant: HEY, INC., d.b.a. SOUTHWEST COACHES, R.R. 4, Box 51A, Marshall, MN 56258. Representative: Patrick J. Leary, 509 W. Main St., Marshall, MN 56258, (507) 532-5766. A Decision of the Commission, Review Board 1, decided February 11, 1983, and served February 25, 1983, finds that the performance by applicant of the service described herein to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *passengers,* in charter and special operations, between points in Minnesota, North Dakota, South Dakota, Iowa, and Wisconsin, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii); that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to reflect applicant's actual grant of authority.

MC 158124 (Sub-1) (republication), filed September 9, 1982, published in the **Federal Register** issue of September 28, 1982 and republished this issue. Applicant: CHARLES D. GOODWIN, INC., P.O. Box 1008, Sanford, NC 27330. Representative: Archie W. Andrews, P.O. Box 1166, Eden, NC 27288, (919) 635-4711. A Decision of the Commission, Review Board 3, decided January 17, 1983, and served January 31, 1983, finds that the performance by applicant of the service described herein to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting chemicals, *food and related products,* and *non-metallic minerals* and *related products,* between points in California, Connecticut, Georgia, Illinois, Indiana, Massachusetts, Missouri, North Carolina, New Jersey, and New York, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii); that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to reflect applicant's actual grant of authority.

MC 161824 (republication), filed May 3, 1982, published in the **Federal Register** issue of May 20, 1982 and republished this issue. Applicant: ARIES TRANSPORTATION COMPANY, INC., 13932 E. Valley Blvd., City of Industry, CA 91744. Representative: James Bowers (same address as applicant), (213) 968-9648. A Decision of the Commission, Review Board 3, decided November 24, 1982, and served December 1, 1982, finds that the performance by applicant of the service described herein to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk) between points in Arizona, California, Colorado, Idaho, Montana, New Mexico, Nevada, Oregon, Texas, Utah, Washington and Wyoming; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to reflect applicant's actual grant of authority and to give notice to those parties who have relied on the previous notice in the **Federal Register** of the application as published and may have an interest in, and would be prejudiced by the lack of proper notice.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on

December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275-7992.

Volume No. OP1-79

Decided: February 25, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier, (Member Fortier not participating.)

MC 126430, (Sub-4), filed February 14, 1983. Applicant: TRENTWAY-WAGER, INC., 680 The Queensway, P.O. Box 1017, Petersborough, Ontario, Canada. [FR Doc. 83–6974 Filed 3–8–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries to Team One at (202) 275–7992.

Volume No. OP1–80

Decided: February 25, 1983.

By the Commission, Review Board No. 1. Members Parker, Chandler, and Fortier. (Member Fortier not participating.)

MC 74681 (Sub-20), filed February 17, 1983. Applicant: STEVENS VAN LINES, INC., 121 South Niagara St., Saginaw, MI 48602. Representative: Robert J. BILLING CODE 7035-01-M

Motor Carrier; Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–343

The following applications were filed in Region 3. Send protests to: ICC, Regional Authority Center, Room 300, 1776 Peachtree Street, N. E., Atlanta, GA 30309.

MC 2934 (Sub-3–63TA), filed February 24, 1983. Applicant: AERO MAYFLOWER TRANSIT COMPANY, INC., 9998 North Michigan Road, Carmel, Indiana 46032. Representative: W. G. Lowry (same as above). *Contract:* Irregular; *Medical diagnostic equipment,* between Milpitas, CA and points in the United States (excluding AK and HI), under continuing contracts with Diasonics, Inc., 1545 Barber Way, Milpitas, CA 95035. Supporting shipper: Diasonics, Inc., 1545 Barber Way, Milpitas, CA 95035.

MC 2934 (Sub-3–66TA), filed February 24, 1983. Applicant: AERO MAYFLOWER TRANSIT COMPANY, INC., 9998 North Michigan Road, Carmel, Indiana 46032. Representative: W. G. Lowry (same as above). *Contract:* Irregular; *Household goods, displays office furniture and electronic equipment,* between points in the U.S. (excluding AK and HI), under continuing contracts with Sun Exploration & Production Company, 5400 LBJ Freeway, Lincoln Centre, Dallas, TX 57240. BILLING CODE 7020–02–M

[Investigation No. 337–TA–117]

Certain Automotive Visors; Termination of Investigation and Issuance of Consent Orders

AGENCY: International Trade Commission.

ACTION: Termination of investigation and issuance of consent orders.

SUMMARY: On September 2, 1982, complainant Prince Corporation (Prince), respondent Gebr. Happich GmbH (Happich), and the Commission investigative attorney filed a joint motion (Motion No. 117–15) to terminate Happich as a respondent in the above-captioned investigation. The motion was based on a consent order agreement entered into by Prince and Happich. On September 20, 1982, Prince, Happich, and the Commission investigative attorney filed an amendment to the original agreement (Motion No. 117–17). On September 30, 1982, the presiding officer recommended that the Commission accept the proposed agreement and order, as amended, and certified Motion No. 117–17 to the Commission (Order No. 15). A **Federal Register** notice was published on November 24, 1982, seeking comments from interested members of the public and other Government agencies. 47 FR 53145. Comments were received and considered. On March 4, 1983, the Commission issued the consent orders, as amended, and terminated the investigation as to Happich.

On September 20, 1982, complainant Prince, respondent Voplex Corporation (Voplex), and the Commission investigative attorney jointly moved to terminate this investigation as to Voplex on the basis of a consent order agreement. On September 30, 1982, the presiding officer recommended that the Commission accept the proposed order and agreement, and certified the motion (Motion No. 117–16) to the Commission. A **Federal Register** notice was published on November 24, 1982, seeking comments on the proposed termination

from interested members of the public and other Government agencies. 47 FR 53147. No comments were received. On February 10, 1983, the Commission granted the joint motion, adopting the consent order and terminating the investigation as to respondent Voplex.

SUPPLEMENTARY INFORMATION: As Voplex and Happich were the only remaining respondents in investigation No. 337–TA–117, the termination of these two respondents terminated the investigation.

The Commission was conducting investigation No. 337–TA–117 to determine whether there was a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 137) in the importation and sale of certain automotive visors, which were alleged to infringe certain claims of U.S. Letters Patent Nos. 3,926,470 and 4,227,241, owned by complainant Prince. The alleged effect or tendency of these unfair acts was to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

Copies of the Commission Action and Orders, the consent orders, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Jane Albrecht, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–1627.

By order of the Commission.

Issued: March 4, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[332-156]

Competitive Assessment of the U.S. Ceramic Floor and Wall Tile Industry

AGENCY: United States International Trade Commission.

ACTION: In accordance with the provisions of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), the Commission has instituted on its own motion investigation No. 332–156 for the purpose of assessing the competitive position of the U.S. ceramic floor and wall tile industry. Specifically, the Commission will compile and present trade data and other information on the U.S. industry, identify key competitive factors in domestic and foreign markets, and examine the impact of such factors on the operations and global competitive position of U.S producers.

EFFECTIVE DATE: February 22, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James J. Lukes (telephone 202–523–0279), U.S. International Trade Commission, Washington, D.C. 20436.

Written Submissions: While there is no public hearing scheduled for this study, written submissions from interested parties are invited. Commercial or financial information which a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested parties. To be ensured of consideration by the Commission, written statements should be received by the close of business on July 1, 1983. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: March 1, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-116]

Certain Drill Point Screws for Drywall Construction; Termination of Investigation

AGENCY: International Trade Commission.

ACTION: Termination of investigation upon a finding of no violation of section 337 of the Tariff Act of 1930.

SUPPLEMENTARY INFORMATION: On the basis of a complaint filed on January 20, 1982, the Commission on March 3, 1982, published in the **Federal Register** (47 FR 9113) a notice of institution of an investigation pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). The purpose of the investigation was to determine whether there were unfair methods of competition and unfair acts in the unauthorized importation and sale of certain drill point screws for drywall construction alleged to infringe certain claims of U.S. Letters Patent 3,463,045 owned by complainant Illinois Tool Works, Inc.

On February 17, 1983, the Commission unanimously determined that there was no violation of section 337 in investigation No. 337–TA–116 in the importation or sale of the drill point screws in question.

Copies of the Commission's Action and Order and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 F Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Carol McCue Verratti, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0079.

By order of the Commission.

Issued: March 3, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[332-158]

Effects of Foreign Product Counterfeiting on U.S. Industry

AGENCY: International Trade Commission.

ACTION: In accordance with the provisions of section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), the Commission has instituted investigation No. 332–158 for the purpose of assessing the impact of foreign product counterfeiting on U.S. industry, considering both domestic and export markets. The objectives of the investigation are: (1) To identify those product sectors in which the U.S. industry faces competition from foreign counterfeited products, either in the United States or abroad, (2) to assess the impact such counterfeiting has had on these industries and U.S. exports, (3) to identify the primary country sources of counterfeiting, (4) to inventory the methods U.S. firms are using to counteract counterfeiting and their recommendations for government action, and (5) to compile an inventory of U.S. and foreign laws and international agreements encompassing counterfeiting, including the avenues of relief available.

EFFECTIVE DATE: February 25, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Estes, General Manufactures Division, Office of Industries (202–724–0977).

SUPPLEMENTARY INFORMATION: For the purposes of this investigation the term "counterfeit goods" means any goods bearing an unauthorized representation of a trademark that is legally registered in respect to such goods in the country of importation or sale, but does not include goods produced or marketed under a protected trademark by the owner of the trademark right or with his consent, or to goods bearing an authorized trademark which are imported or sold in contravention of a commercial arrangement.

Public hearing.—A public hearing in connection with the investigation will be held in the Commission Hearing Room, 701 E Street NW., Washington, D.C. 20436, beginning at 10:00 a.m., e.d.t., on August 23, 1983, to be continued on August 24, 1983 if required. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, not later than noon, August 17, 1983.

Written submissions.—In lieu of or in addition to appearances at the public hearing, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be ensured of consideration by the Commission, written statements should be received at the earliest practicable date, but no later than September 19, 1983. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: March 4, 1983.

BILLING CODE 7020-02-M

[Investigation No. 701-TA-184 (Final)]

Frozen Concentrated Orange Juice From Brazil

AGENCY: International Trade Commission.

ACTION: Suspension of final countervailing duty investigation.

EFFECTIVE DATE: March 2, 1983.

SUMMARY: On March 2, 1983, the United States Department of Commerce suspended its countervailing duty investigation involving frozen concentrated orange juice from Brazil (48 FR 8839). The basis for the suspension is an agreement by the Government of Brazil to offset completely the amount of the net subsidy determined by Commerce to exist with respect to the subject product. Accordingly, the United States International Trade Commission hereby gives notice of the suspension of its countervailing duty investigation involving frozen concentrated orange juice, provided for in item 165.35 of the Tariff Schedules of the United States, from Brazil (investigation No. 701–TA–184 (Final)). The schedule for this investigation, which was included in the Commission's notice of institution (47 FR 58051, December 29, 1982), is hereby cancelled.

FOR FURTHER INFORMATION CONTACT: Mr. David Coombs (202–523–1376), Office of Investigations, U.S. International Trade Commission.

This notice is published pursuant to § 207.40 of the Commission's Rules of Practice and Procedure (19 CFR 207.40).

By order of the Commission.

Issued: March 2, 1983.

Kenneth R. Mason,

Secretary.

[Investigation No. 337-TA-132]

Certain Hand-Operated, Gas-Operated, Welding, Cutting, and Heating Equipment and Component Parts Thereof; Commission Decision Not To Review Initial Determination

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination (Order No. 22) amending the notice of investigation in the above-referenced investigation.

Authority: The authority for the Commission's disposition of this matter is contained in sections 335 and 337 of the Tariff Act of 1930 (19 U.S.C. 1335, 1337) and in §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982; to be codified at 19 CFR 210.53 (c) and (h)).

SUPPLEMENTARY INFORMATION: On February 10, 1983, the presiding officer issued an initial determination granting complainant Victor Equipment Co.'s motion to amend the notice of investigation in the above-referenced investigation. Under § 210.54(b) of the Commission's rules the deadline for filing petitions for review expired on February 22, 1983. No petitions were filed within the time specified in the Commission's rules.

Copies of the presiding officer's initial determination, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Warren H. Maruyama, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0375.

By order of the Commission.

Issued: February 25, 1983.

[Investigation 701-TA-179 through 181 (Final)]

Hot-Rolled Stainless Steel Bar, Cold-Formed Stainless Steel Bar, and Stainless Steel Wire Rod From Brazil

AGENCY: International Trade Commission.

ACTION: Suspension of final countervailing duty investigation.

EFFECTIVE DATE: February 7, 1983.

SUMMARY: On January 27, 1983, the United States Department of Commerce suspended its countervailing duty investigation on hot-rolled stainless steel bar, cold-formed stainless steel bar, and stainless steel wire rod (certain stainless steel products) from Brazil (48 FR 4703, February 2, 1983). The basis for the suspension is an agreement by the government of Brazil to offset completely the amount of the net subsidy with an export tax applicable to the subject merchandise. Accordingly, the United States International Trade Commission hereby gives notice of the

suspension of its countervailing duty investigation involving the subject certain stainless steel products, provided for in items 606.90, 607.20, and 607.43 of the Tariff Schedules of the United States, from Brazil (investigation No. 701–TA–179 through 181 (Final)), and cancellation of the public hearing scheduled for February 14, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Bill Schechter (202–523–0300), Office of Investigations, U.S. International Trade Commission.

This notice is published pursuant to § 207.40 of the Commission's Rules of Practice and Procedure (19 CFR 207.40).

By order of the Commission.

Issued: February 25, 1983.

[Investigation No. 337-TA-140]

Certain Personal Computers and Components Thereof; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on January 31, 1983, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, Calif. 95014. The complaint alleges unfair methods of competition and unfair acts in the importation of certain personal computers and components thereof into the United States, or in their sale, by reason of alleged (a) infringement of claims 1 through 8 of U.S. Letters Patent 4,136,359 and claims 1 through 11 of U.S. Letters Patent 4,278,972; (b) infringement of U.S. Copyright Reg. Nos. TX 873–203 and TX 886–569; and (c) misappropriation of trade dress. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that, during the pendency of the investigation, the Commission issue a temporary exclusion order, prohibiting importation of the articles into the United States except under bond and, after a full investigation, issue a permanent exclusion order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on February 28, 1983, ordered, that: (1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930 an investigation be instituted to determine whether there is reason to believe that there is a violation or whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain personal computers and components thereof into the United States, or in their sale, by reason of (a) infringement of the claims of U.S. Letters Patent 4,136,359; (b) infringement of the claims of U.S. Letters Patent 4,278,972; (c) direct or contributory infringement of U.S. Copyright Reg. No. TX 873–203 and U.S. Copyright Reg. No. TX 886–569; and (d) misappropriation of trade dress, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, Calif. 95014.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Golden Formosa Microcomputer Co., Ltd. a/k/a Guan Haur Industrial Co., Basement 371, Jiin Jou Street, Taipei, Taiwan
Sunrise Computer Service Co., Ltd., 12th Fl., No. 339, Sec. 4, Hsing I Road, Taipei, Taiwan
Jardine Strauss International, Ltd., Room 1103, England Building, 311 Chung Hsiao East Road, Sec. 4, Taipei, Taiwan
Fantastic Merchandise Inc., 10–5 10th Fl., #263 Hsin-Yi Road, Sec. 4, Taipei, Taiwan
A-Tek Enterprises Co., Ltd., 3rd Floor, 170 Chang AE Road, Taipei, Taiwan
Leader Trading Co., Rm. L–55, Peninsula Center, Midj Road East, Tsim Sha Tsu East, Kowloon, Hong Kong
Fuji Trading Co., Rm. 24, Cosmopolitan Center, 10/F, 760 Nathan Road, Kowloon, Hong Kong
Reliant Engineering Co., P.O. Box 33610, Sheung Wan Post Office, Hong Kong
STC Limited, 10C Washington Mansion 28, Jen-Al Road, Sec. 3, Taipei, Taiwan
Yen Enterprises, 4/F Kolin Super Plaza, 54–1, Sec. 6, Taipei, Taiwan
Business Computer Alliance System Co., Ltd., 10th Fl., #30 King-Yuan Road, Taipei, Taiwan
Microtonics, Singapore
Taiwan Machine Trade Co., 5250 Belfield Avenue, Philadelphia, Pa. 19144
North American Research Corp., 5545 Lee Highway, Arlington, Va.
J.E. Computer Co., Ltd., Room 8011, Taipei Square Building, No. 2, 41, Sec. 1, Chung Hsiao W. Road, Taipei (100), Taiwan
Apollo Computer Co., Ltd., 5th Fl., No. 96, Sec. 2, Chung Itsiao E. Road, Taipei, Taiwan
Oriental Investments Ltd., Hardstrasse 81, 8040, P.O. Box 460, Zurich, Switzerland
Collins International Trading Corp, 16311 Ventura Blvd., Suite 500, Encino, Calif. 91436
Formula International, Inc., 12603 Crenshaw Blvd., Hawthorne, Calif. 90250
Powtek Electronics Co., Ltd., No. 17, Sec. 1, Keelung Road

(c) Patricia Ray, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 122, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative

Law Judge, U.S. International Trade Commission, shall designate the presiding officer. Pursuant to § 210.30(c) of the Commission's Rules of Practice and Procedure (19 CFR 210.30(c)), discovery should be allowed in connection with the temporary relief phase of the investigation only to the extent necessary to weigh the standards that are applicable in determining whether temporary relief should be granted.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 210.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Patricia Ray, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–1088.

By order of the Commission.

Issued: March 2, 1983.

Competitive Position of U.S. Producers of Robotics in Domestic and World Markets

AGENCY: International Trade Commission.

ACTION: The Commission, on its own motion, instituted investigation No. 332–155, under section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), for the purpose of gathering and presenting information on the competitive position of the U.S. robotics industry in domestic and international markets. The study will assess capital, labor, technology, and other economic factors affecting the manufacture and use of robotics in the United States and in foreign countries. The effects of the increasing application of robotics on the operations of domestic and foreign automobile, aircraft, and appliance industries will be explored.

EFFECTIVE DATE: February 23, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Nelson Hogge, Machinery and Equipment Division, U.S. International Trade Commission, Washington, D.C. 20436 (Telephone 202–523–0377).

Written Submissions: While there is no public hearing scheduled for this study, written submissions from interested parties are invited. Commercial or financial information which a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be assured of consideration by the Commission in this study, written statements should be received by the close of business on August 12, 1983. All submissions should be addressed to the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436.

By order of the Commission.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (83-23)]

NASA Advisory Council; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Informal Task Force for the Study of the Mission of NASA.

DATE AND TIME: March 25, 1983, 9 a.m. to 4 p.m.

ADDRESS: NASA Headquarters, Room 7002, 400 Maryland Avenue SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Nathaniel B. Cohen, Code LB–4, National Aeronautics and Space Administration, Washington, DC 20546 (202/755–8303).

SUPPLEMENTARY INFORMATION: The NASA Advisory Council Informal Task Force for the Study of the Mission of NASA was established under the NASA Advisory Council to conduct a study of the directions NASA should take in the future (including goals, programmatic objectives, and possible missions) and to report its findings and recommendations to the Council. The Task Force is chaired by Dr. George E. Solomon, and has a total of 14 members.

Visitors will be admitted to the meeting room up to its capacity, which is approximately 60 persons including Task Force members and other participants. Visitors will be requested to sign a visitor's register.

TYPE OF MEETING: Open.

AGENDA:

March 25, 1983

9 a.m.—Introduction.
9:30 a.m.—Status reports by subgroups.
1 p.m.—Task Force Working Session.
4 p.m.—Adjourn.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

March 2, 1983.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–313]

Arkansas Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 70 to Facility Operating License No. DPR–51, issued to Arkansas Power and Light Company (the licensee), which added a license condition for operation of Arkansas Nuclear One, Unit No. 1 (ANO–1) located in Pope County, Arkansas. The amendment is effective as of the date of issuance.

The amendment adds a condition to the license regarding the implementation of a secondary water chemistry monitoring program.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's application dated November 9, 1982, (2) Amendment No. 70 to License No. DPR–51, and (3) the Commission's letter to the licensee dated March 1, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Arkansas Tech University, Russellville, Arkansas. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 1st day of March 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 83-6060 Filed 3-8-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–237]

Commonwealth; Edison Co. Systematic Evaluation Program; Availability of Final Integrated Plant Safety Assessment Report for the Dresden Nuclear Power Station, Unit 2

The Nuclear Regulatory Commission's (NRC) Office of Nuclear Reactor Regulation (NRR) has published its Final Integrated Plant Safety Assessment Report (IPSAR) (NUREG–0823) related to the Commonwealth Edison Company's (licensee) Dresden Nuclear Power Station, Unit 2 located in Grundy County, Illinois.

The Systematic Evaluation Program (SEP) was initiated by the NRC to review the design of older operating nuclear reactors plants to reconfirm and document their safety. This report documents the review completed under the Systematic Evaluation Program for the Dresden 2 Plant. Areas in the report identified as requiring further analysis or evaluation and required modifications for which design descriptions have not yet been provided by the licensee to the NRC will be reviewed as part of the operating license

conversion review. Supplements to the Final IPSAR will be issued addressing items requiring further analysis and review. The review has provided for (1) an assessment of the significance of differences between current technical positions on selected safety issues and those that existed when the Dresden 2 plant was licensed, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety when all supplements to the IPSAR and the Safety Evaluation Report for converting the license from a provisional to a full-term license have been issued. Equipment and procedural changes have been identified as a result of the review. The report also addresses the comments and recommendations made by the Advisory Committee on Reactor Safeguards (ACRS) in connection with its review of the Draft Report, issued in October 1982. These comments and recommendations, as contained in a report by the ACRS dated December 13, 1982, and the NRC staff's related response are included in Appendix H of this report.

The Final IPSAR and its supplements will form part of the bases for considering the conversion of the existing provisional operating license to a full-term operating license.

Pursuant to 10 CFR 50.71e(3)(i), the licensee has filed a revision to the original Final Safety Analysis Report (FSAR) for Dresden Units 2 and 3. In accordance with 10 CFR 50.71e(4), the licensee is required to file revisions to the updated FSAR no less frequently than annually which shall reflect all changes up to a maximum of six months prior to the date of filing. On July 20, 1982, the licensee filed with the staff an updated FSAR for Dresden Units 2 and 3 pursuant to 10 CFR 50.71e(3)(ii) and prior to completion of the SEP. The licensee was not required to file an updated FSAR until 24 months after completion of SEP. The licensee is required to incorporate in a revision to the FSAR plant modifications, procedure revisions, and further analyses completed as a result of the SEP program. The revision incorporting the SEP information is due to be submitted within 24 months after receipt of the letter dated March 1, 1983 from the Director of the Office of Nuclear Reactor Regulation to the licensee transmitting the Final IPSAR. This does not relax the requirements of an annual FSAR update for all other changes pursuant to 10 CFR 50.71(e)(4).

The Final IPSAR is being made available at the NRC's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Morris Public Library, 604 Liberty Street, Morris, Illinois 60451 for inspection and copying. Copies of this Final Report (Document No. NUREG–0823) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and from the Sales Office, U.S. Nuclear Regulatory Commission, Director, Division of Technical Information and Document Control, Washington, D.C. 20555, Attention: Publications Unit.

Dated at Bethesda, Maryland, this 4th day of March 1983.

For the Nuclear Regulatory Commission.

Thomas V. Wambach,

Acting Chief, Operating Reactors Branch No. 5, Division of Licensing.

[FR Doc. 83-6087 Filed 3-8-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50–295 and 50–304]

Commonwealth Edison Co. (Zion Station, Units 1 and 2); Issuance of Director's Decision Under 10 CFR 2.206

By letter of October 11, 1982, Pollution and Environmental Problems, Inc. (PEP) made a request for action under 10 CFR 2.206 of the Commission's regulations. Pollution and Environmental Problems, Inc. requested that the Commission (1) "Deny Commonwealth Edison permission to use high burnup nuclear fuel in Zion 1 and 2 nuclear reactors," and (2) "Provide evidence to the public that Zion 1 and 2 reactors should be allowed to continue operating despite the fact that their reactor pressure vessels are vulnerable to embrittlement and the time for which the NRC has vouched for their ability to withstand a servere overcooling event has already expired." After a review of the relevant information, the Director of the Office of Nuclear Reactor Regulation had determined that the request does not provide an adequate basis for taking any action with respect to the Zion facilities. Accordingly, the request by PEP has been *denied.*

Copies of the Director's Decision are available for inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Local Public Document Room for the Zion Station located at the Zion-Benton Public Library, 2600 Emmaus Avenue, Zion, Illionis 60099. A copy will also be filed with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206(c) of the Commission's regulations.

As provided in 10 CFR 2.206(c), this decision will constitute the final action of the Commission after 25 days unless the Commission determines to review this decision within that time.

Dated at Bethesda, Maryland, this 1st day of March 1983.

For the Nuclear Regulatory Commission.

Edson G. Case,

Acting Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50–213]

Connecticut Yankee Atomic Power Co. (Haddam Neck Plant); Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 52 to Facility Operating License No. DPR–61, issued to Connecticut Yankee Atomic Power Company (the licensee), which revised the Technical Specifications for operation of the Haddam Neck Plant (the facility) located in Middlesex County, Connecticut. The amendment is effective as of its date of issuance.

The amendment revised the Appendix A Technical Specifications to permit operation of the facility in Cycle 12 following refueling.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 14, 1982 and supplements thereto dated January 13, and February 9, 1983, (2) Amendment No. 52 to License No. DPR–61, and (3) the Commission's related Safety

Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Russell Library, 119 Broad Street, Middletown, Connecticut 16457. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 3rd day of March, 1983.

For the Nuclear Regulatory Commission.

Thomas V. Wambach,

Acting Chief, Operating Reactors Branch No. 5, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-289]

Metropolitan Edison Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 80 to Facility Operating License No. DPR-50, issued to Metropolitan Edison Company, Jersey Central Power and Light Company, Pennsylvania Electric Company, and GPU Nuclear Corporation (the licensees), which revised the Technical Specifications (TSs) for operation of the Three Mile Island Nuclear Station, Unit No. 1 (the facility) located in Dauphin County, Pennsylvania. The amendment becomes effective six weeks after its date of issuance.

The amendment revises the TSs for the facility to eliminate use of sodium thiosulfate as a spray additive in the Reactor Building Spray System (RBSS). The amendment also specifies the required sodium hydroxide (NaOH) concentration in the NaOH Tank of the RBSS and the required height differential to be maintained between the Borated Water Storage Tank and the NaOH Tank.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(b)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 23, 1981, as modified and supplemented September 3, 1981, November 23, 1981, August 11, 1982, and January 5, 1983, (2) Amendment No. 80 to License No. DPR-50, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 24th day of February 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 83-6030 Filed 3-8-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-289]

Metropolitan Edison Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 81 to Facility Operating License No. DPR-50, issued to Metropolitan Edison Company, Jersey Central Power and Light Company, Pennsylvania Electric Company, and GPU Nuclear Corporation (the licensees), which revised the Technical Specifications (TSs) for operation of the Three Mile Island Nuclear Station, Unit No. 1 (TMI-1) located in Dauphin County, Pennsylvania. The amendment is effective as of its date of issuance.

The amendment adds TS 3.20 concerning Special Test Exceptions which permits suspension of certain TSs during performance of the Low Power Natural Circulation Test to be conducted during the restart, if authorized, of TMI-1.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 10, 1981, (2) Amendment No. 81 to License No. DPR-50, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126. BILLING CODE 7590-01-M

[Docket No. 50-289]

Metropolitan Edison Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 82 to Facility Operating License No. DPR-50, issued to Metroplitan Edison Company, Jersey Central Power and Light Company, Pennsylvania Electric Company, and GPU Nuclear Corporation (the licensees), which added a license condition and revised Technical Specifications (TSs) for operation of the Three Mile Island Nuclear Station, Unit No. 1 (the facility) located in Dauphin County, Pennsylvania. The amendment is effective as of its date of issuance.

The amendment adds license condition 2.c(7) which requires submitting an updated aircraft probability analysis sixty days following the 1984 report on aircraft movements at Harrisburg International Airport. Additionally, the amendment modifies TS 6.9.1.B.2.b concerning reporting of movements of aircraft larger than 200,000 pounds at Harrisburg International Airport. The revised TS 6.9.1.B.2.b Requires the aircraft movements report to be broken down into scheduled and nonscheduled (including military) takeoffs and landings.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 30, 1982, (2) Amendment No. 82 to License No. DPR–50, and (3) the Commission's letter to GPU Nuclear Corporation dated March 1, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–410]

Niagara Mohawk Power Corp., et al., Nine Mile Point Nuclear Station, Unit 2; Order Extending Construction Completion Date

Niagara Power Corporation, Central Hudson Gas & Electric Corporation, New York State Electric & Gas Corporation, Long Island Lighting Company and Rochester Gas and Electric Corporation are the co-holders of Construction Permit No. CPPR–112 issued by the Atomic Energy Commission [1] to Niagara Mohawk Power Corporation on June 24, 1974 for construction of the Nine Mile Point Nuclear Station, Unit 2 to be located in Oswego County, New York, on the south shore of Lake Ontario in the town of Scriba, seven miles east of the city of Oswego, New York. The Construction Permit No. CPPR–112 was amended on October 27, 1978 to approve the transfer of ownership interests to the above noted companies.

By letter dated February 27, 1978, Niagara Mohawk Power Corporation filed a request for extension of the latest construction completion date for the Nine Mile Point Nuclear Station, Unit 2. It was requested that Construction Permit No. CPPR 112 be extended from July 31, 1978 to December 31, 1984. By letter dated June 26, 1981, Niagara Mohawk Power Corporation identified additional factors which have resulted in further delay and requested the latest completion date be extended an additional three years to December 31, 1987.

The reasons given for the requested extension to Decembr 31, 1984 were:

1. Reduction in the demand for electric power in the Niagara Mohawk Power Corporation's service area;

2. Difficulty in obtaining funds at a reasonable rate thereby delaying construction;

3. Additional construction time required to implement design changes such as relocation of the safety/relief valve piping to mitigate Mark II containment dynamic loads and changing from once-through to closed loop circulating water cooling;

4. Additional time required to study geological features and phenomena;

5. Extended construction period caused by labor problems and work stoppages in 1976 and 1977 and shortages of qualified welders, material procurement delays and shortages of qualified vendors; and

6. Delay in granting the original Construction Permit.

The reasons given for the additional three years of extension to December 31, 1987 were:

1. Additional time required to implement design changes and improvements to meet NRC requirements, some of which resulted from the Three Miles Island incident;

2. Additional time required to evaluate geological features and phenomena; and

3. Additional time consumed by an extensive audit of the project as ordered and directed by the New York State Public Service Commission.

This action involves no significant hazards consideration, good cause has been shown for the delays and the requested extension is for a reasonable period, the basis for which are set forth in the staff's safety evaluation for this extension.

The Commission has determined that this action will not result in any significant environmental impact and, pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

The NRC staff evaluation of the request for extension of the construction permit is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D. C. 20555 and at the Denfield Library, State University College at Oswego, Oswego, New York 13126.

It is hereby ordered that the latest completion date for Construction Permit No. CPR–112 is extended from July 31, 1978 to December 31, 1987.

Date of Issuance: February 28, 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office Nuclear Reactor Regulation.

Philadelphia Electric Co., et al.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 88 and 88 to Facility Operating Licenses Nos. DPR-44 and DPR-56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications (TSs) for operation of the Peach Bottom Atomic Power Station, Units Nos. 2 and 3 (the facility) located in York County, Pennsylvania. The Amendments are effective as of the date of issuance.

The amendments revise the TSs to provide limiting conditions for operation and surveillance requirements for Scram Discharge Volume (SDV) vent and drain valves and reactor protection system and control rod block SDV limit switches.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated October 14, 1980, as supplemented October 7, 1981, (2) Amendment No. 88 to License No. DPR-44, and Amendment No. 88 to License No. DPR-56, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington D.C., and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 1st day of March 1983.

[Docket Nos. 50-280 and 50-281]

Virginia Electric & Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 82 to Facility Operating License No. DPR-32 and Amendment No. 83 to Facility Operating License No. DPR-37 issued to Virginia Electric & Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Station, Unit Nos. 1 and 2, respectively (the facilities), located in Surry County, Virginia. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications to incorporate requirements related to working hours of the plant staff and to increase the frequency of audits of the emergency and security programs.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated December 1, 1982, (2) Amendment Nos. 82 and 83 to License Nos. DPR-32 and DPR-37, and (3) the Commission's related letter dated March 1, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185. Virginia Electric and Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 83 to Facility Operating License No. DPR-32 and Amendment No. 84 to Facility Operating License No. DPR-37 issued to Virginia Electric and Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Station, Unit Nos. 1 and 2, respectively (the facilities), located in Surry County, Virginia. The amendments are effective as of the date of issuance

The amendments revise the Technical Specifications to add Limiting Conditions for Operation and Surveillance Requirements related to containment purge valves. The change requires purge valves to be closed above 200° F, periodic leakage tests, and periodic checks to ensure that the values are closed

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the

Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 FR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

[Docket No. 50–508; DASLB No. 83–486–01 OL]

Washington Public Power Supply System, et al.; Establishment of Atomic Safety and Licensing Board To Preside in Proceeding

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register** (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.711, 2.714a, 1.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and requests for hearing and to conduct the proceeding in the event that a hearing is ordered.

Washington Public Power Supply System, et al.

WPPSS, Unit 3

Contruction Permit No. CPPR–154

This Board is being constituted pursuant to a notice published by the Commission on September 15, 1982 in the **Federal Register** (47 FR 40736–38) entitled, "Washington Public Power Supply System, et al., Nuclear Project No. 3; Receipt of Application for Facility Operating License; Availability of Applicants' Environmental Report; Consideration of Issuance of Facility Operating License; and Notice of Opportunity for Hearing."

The Board is comprised of the following administrative judges:

Morton B. Margulies, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Mr. Glenn O. Bright, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Dr. James H. Carpenter, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Issued at Bethesda, Maryland, this 3rd day of March, 1983.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590–01–M

Documents Containing Reporting or Recordkeeping Reqirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget Review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new revision or extension: New.

2. The title of the information collection: Notice and State consultation.

3. The form number if applicable: N/A.

4. How often the collection is required: Each time a licensee of a nuclear power plant or of a testing facility requests a license amendment.

5. Who will be required or asked to report: As stated in No. 4.

6. An estimate of the number of responses: 600 per year.

7. An estimate of the total number of hours needed to complete the requirement or request: 4 hours per license amendment, for a total of 2,400 hours for 600 amendments.

8. An indication of whether Section 3504(h), Pub. L. 96–511 applies: N/A.

9. Abstract: Under an NRC interim final rule, "Notice and State Consultation," a licensee of a nuclear power plant or of a testing facility would have to provide to the NRC and the State in which its facility is located its amendment application and its analysis about the issue of significant hazards.

Copies of the submittal may be inspected or obtained for a fee from NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill (202) 395–7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 4th day of March 1983.

Patricia G. Norry,

Director, Office of Administration.

BILLING CODE 7590–01–M

PENSION BENEFIT GUARANTY CORPORATION

Pendency of Request for Exemption From Bond/Escrow Requirement Relating to Sale of Assets by an Employer That Contributes to a Multiemployer Plan: James River-Dixie/Northern, Inc.

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from James River-Dixie/Northern, Inc. for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974, as amended. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years beginning after the sale. The PBGC is authorized to grant exemptions from this requirement. Prior to granting an exemption, the PBGC is

required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise interested persons of this exemption request and to solicit their views on it.

DATES: Comments must be submitted on or before April 25, 1983.

ADDRESSES: All written comments (at least three copies) should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006; (202) 254–4862. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) and the contract-provision requirement of section 4204(a)(1)(C). The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1) (B) or (C) does not constitute a finding by PBGC that the transaction satisfies the other requirements of section 4204(a)(1).

Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets, (46 FR 46127, September 17, 1981) the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from James River-Dixie/Northern, Inc. ("James River-Dixie") to waive the bond/escrow requirement of ERISA section 4204(a)(1)(B). In the request, James River-Dixie represents among other things, that:

1. Effective May 6, 1982, James River-Dixie and its parent corporation, James River Corporation of Virginia ("James River Corp."), purchased certain assets of the American Can Company ("American Can").

2. In connection with this sale, James River-Dixie has assumed the responsibilities of American Can under collective bargaining agreements with the United Paperworkers International Union, International Brotherhood of Electrical Workers, and International Brotherhood of Teamsters.

3. The following chart lists the two multiemployer plans for which an exemption is requested, the estimated amount of American Can's withdrawal liability and the estimated amount of the bond/escrow that would be required under ERISA section 4204(a)(1)(B) with respect to each such plan:

Plan	Estimate of seller's liability	Amount of bond/escrow
Paper Industry-Union Management Pension Fund ("Paper Industry Fund")	$1,922,300	[1]2,693,000
Central States, Southeast and Southwest Areas Pension Fund ("Central States Fund")	424,885	[2]20,858
Total	2,347,290	2,693,858

[1] The amount represents the annual contribution required to be made by American Can to the Paper Industry Fund for plan year 1981.

[2] The amount represents the average annual contribution that American Can made to the Central States Fund for the three plan years preceding the plan year in which the sale occurred.

4. According to is audited consolidated financial statements, James River Corp. and its subsidiaries had total net assets for its fiscal year ended April 25, 1982 of approximately $170 million, and an average net income after taxes for its fiscal years 1980–1982 of about $20.2 million.

5. James River-Dixie has sent a copy of this request to the plans and the collective bargaining representatives of the American Can's former employees by certified mail, return receipt requested.

Comments

All interested persons are invited to submit written comments on the pending exemption to the above address, by April 25, 1983. All comments will be made a part of the record. Comments received, as well as the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C. on this 3rd day of March, 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

Pendency of Request for Exemption From Bond/Escrow Requirement Relating to Sale of Assets by an Employer that Contributes to a Multiemployer Plan: Reilly-Whiteman, Inc.

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of Pendency of Request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from Reilly-Whiteman, Inc. for

an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974, as amended. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years beginning after the sale. The PBGC is authorized to grant exemptions from this requirement. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise intersted persons of this exemption request and to solicit their views on it.

DATE: Comments must be submitted on or before April 25, 1983.

ADDRESSES: All written comments (at least three copies) should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (292) 254–4862. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(A)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) and the contract-provision requirement of section 4204(a)(1)(C). The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1) (B) and (C) does not constitute a finding by PBGC that the transaction satisfies the other requirements of section 4204(a)(1).

Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets (46 FR 46127, September 17, 1981), the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from Reilly-Whiteman, Inc. ("New Reilly") to waive the bond/escrow requirement of ERISA section 4204(a)(1)(B). In the request, New Reilly represents among other things, that:

1. Effective June 11, 1982, New Reilly, then called RW Acquisition Corp., purchased substantially all of the assets of Reilly-Whiteman, Inc. (the "Seller"). Oakite Products, Inc. ("Oakite") was a guarantor to the sales contract.

2. New Reilly has assumed the seller's responsibilities under a collective bargaining agreement with the Oil, Chemical and Atomic Workers International Union, which obligates New Reilly to contribute to the Oil, Chemical and Atomic Workers International Union Industry Pension Fund (the "Fund"). Prior to the sale, the seller's potential withdrawal liability had been estimated by the Fund to be $7,500.

3. The amount of the bond or escrow required under section 4204(a)(1)(B) is approximately $17,400 (the seller's required annual contribution for 1981, the plan year preceding the year in which the sale occurred).

4. New Reilly is a wholly owned subsidiary of Oakite. According to its audited consolidated financial statements, Oakite and its subsidiaries had total net assets for its fiscal year ended December 31, 1981 of approximately $28 million, and an average net income for its fiscal years 1979–1981 of about $4.5 million.

5. The applicants have sent a copy of this request to the Fund and the collective bargaining representative of the seller's former employees by certified mail, return receipt requested.

Comments

All interested persons are invited to submit written comments on the pending exemption to the above address, by April 25, 1983. All comments will be made a part of the record. Comments received, as well as the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C., on this 3rd day of March 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

SMALL BUSINESS ADMINISTRATION

[Delegation of Authority No. 12; Revision 2, Amdt. 1]

Authority Delegation—Associate Administrator for Finance and Investment

Associate Administrator for Finance and Investment Delegation of Authority No. 12 (47 FR 14995) is hereby amended to provide certain disaster loan making

authority, to clarify lease guarantee authority, and to broaden the restriction to deny liability of the Agency to the Associate Administrator for Finance and investment. Additionally, Delagetion of Authority No. 14, Revision 1 (38 FR 13064), as amended (48 FR 37048), to the Associate Administrator for Operations and disaster authority delegated to field offices by 13 CFR Part 101.3–2, Part II Disaster Program (47 FR 2305), are hereby revoked and disaster authority therein is transferred to the Associate Administrator for Finance and Investment. Actions taken prior to the effective date hereof are ratified to the extent that they would have been authorized under this delegation had the delegation been in effect and continue to be in effect from the effective date hereof as amended. The amended paragraphs read as follows:

I. * * *

A. *Financial Assistance Activities.*

1. To approve or decline applications for business, development company, disaster, and all other types of loans and guaranty of debentures sold by development companies (hereinafter referred to as loans) authorized to be made by the Agency, (including SBIC and 301 (d) debentures and pollution control financing guarantees) including reconsideration thereof, and to execute authorizations and modifications pertaining to such loans, including waiving the limit of $500,000 for major sources of unemployment as permitted by 7 (c) of the SBAct.

* * * * *

5. To take all necessary actions in connection with the servicing, administration, collection and liquidation of all loans (including those made under the Small Business Investment Act), other obligation and acquired property, with the exception of those loans classified as in litigation; to resolve nonunanimous Compromise Committee recommendations, to accept or reject a compromise settlement of an indebtedness owed to the Agency for a sum less than the total amount due thereof.

* * * * *

c. *Disaster Activities.*

1. To declare a disaster loan area for Economic Injury Disaster Loans upon notification that the Secretary of Agriculture has declared a natural disaster for that area.

2. To amend declarations made under authority of paragraph C. 1 above in accordance with amendments made by the Secretary of Agriculture.

3. To authorize the acceptance of disaster loan applications after expiration of the original disaster period or extension thereof.

4. To extend disbursement period without limitation for disaster loans.

5. To establish disaster field offices and to obligate the Agency through the General Services Administration for the rental of office space and ancillary services and to close disaster field offices when no longer advisable to maintain such offices.

6. To appoint as a processing representative any lender in the disaster area.

7. To hire, reassign and terminate disaster permanent, cadre and temporary employees as necessary.

8. To take necessary actions with respect to personnel, financial management, and administrative activities.

9. To contract for supplies, materials and equipment, printing (Government sources only), transportation, communications, and special services for the Agency pursuant to Chapter 4 of Title 41, U.S.C., as amended, subject to the limitations contained in Section 257(a) and (b) of that Chapter.

* * * * *

E. *Lease Guarantee Activities.*

* * * * *

2. To process, approve, or disapprove claims arising under lease guarantee policies.

3. To take all necessary actions in connection with the defaults of all lease guarantees, execpt for those in litigation.

* * * * *

11. This delegation does not authorize anyone serving in the above position to:

A. Sell any primary obligation or other evidence of indebtedness owed to the Agency for a sum less than the total amount due thereon.

B.. Deny liability of the Small Business Administration under terms of a participation or guaranty agreement on the initiation of a suit for recovery from a participation or guaranty agreement.

III. The Authority delegated herein may be redelegated.

IV. Tha authority delegated herein may be exercised by any SBA employee officially designated as Acting Associate Administrator for Finance and Investment.

Effective date: March 9, 1983.

Dated: March 2, 1983.

James C. Sanders,

Administrator.

BILLING CODE 8025-01-M

[Delegation of Authority No. 12–C]

Redelegation of Disaster Assistance

I. Pursuant to the authority delegated to the Associate Administrator for Finance and Investment in Delegation No. 12 (Revision 2) (47 FR 14995) and by Amendment 1 published in this issue of the Federal Register Section 101.3–2 Part II of SBA Rules and Regulations is hereby canceled and authority relating to disaster activities is hereby redelegated as follows:

A. Deputy Associate Administrator for Disaster Assistance.

1. To declare a disaster loan area for Economic Injury Disaster Loans upon notification that the Secretary of Agriculture has declared a natural disaster for that area.

2. To amend declarations made under authority of paragraph A.1 above in accordance with amendments made by the Secretary of Agriculture.

3. To authorize the acceptance of disaster loan applications after expiration of the original disaster period or extension thereof.

4. To approve or decline applications for home and business physical disaster loans, economic injury disaster loans and all other types of disaster loans authorized to be made by the Agency including reconsiderations thereof, and to execute authorizations and modifications pertaining to such loans, including waiving the limit of $500,000 for major sources of unemployment as permitted by 7(c)(4) of the Small Business Act.

5. To cancel, reinstate, modify and amend authorizations for disaster loans.

6. To extend disbursement period without limitation for disaster loans.

7. To determine eligibility of disaster loan applications.

8. To establish disaster field offices and to obligate the Small Business Administration through the General Services Administration for the rental of office space and ancillary services and to close disaster field offices when no longer advisable to maintain such offices.

9. To appoint as a processing representative any lender in the disaster area.

10. To hire, reassign and terminate disaster permanent, cadre and temporary employees as necessary.

11. To take necessary actions with respect to personnel, financial management, and administrative activities, as are granted to the Associate Administrator for Finance and Investment.

12. To contract for supplies, materials and equipment, printing (Government sources only), transportation, communications, and special services for the Agency pursuant to Chapter 4 of Title 41, U.S.C., as amended, subject to the limitations contained in Section 257 (a) and (b) of that chapter.

II. The authority delegated herein may be redelegated.

III. The authority delegated herein may be exercised by an SBA employee officially designated as Acting in that Position.

Effective date: March 9, 1983.

Dated: March 3, 1983.

[Delegation of Authority No. 12-D]

Redelegation of Disaster Assistance

I. Pursuant to the authority delegated to the Deputy Associate Administrator for Disaster Assistance in Delegation No. 12C (published in this issue of the Federal Register) authority relating to disaster activities is hereby redelegated as follows:

A. *Area Directors (Disaster).*

1. To approve up to the statutory limit or decline applications for home and business physical disaster loans, economic injury disaster loans and all other types of disaster loans authorized to be made by the Agency including reconsideration thereof, and to execute authorizations and modifications pertaining to such loans.

2. To cancel, reinstate, modify and amend authorizations for disaster loans.

3. To authorize the acceptance of disaster loan applications after expiration of the original disaster period or extension thereof.

4. To determine eligibility of disaster loan applicants.

5. To extend disbursement periods without limitation for disaster loans.

6. To establish disaster field offices and to obligate the Small Business Administration through the General Services Administration for the rental of office space and ancillary services; and to close disaster field offices when no longer advisable to maintain such offices.

7. To appoint as a processing representative any lender in the disaster area.

8. To hire, reassign, and terminate disaster cadre and temporary employees as necessary.

9. To take necessary actions with respect to personnel, financial management, and administrative activities as are granted to the Deputy Associate Administrator for Disaster Assistance.

10. To contract for supplies, materials and equipment, printing (Government sources only), transportation, communications, and special services for the Agency pursuant to Chapter 4 of Title 41, U.S.C., as amended, subject to the limitations contained in Section 257(a) and (b) of that chapter.

11. To amend, suspend or revoke authority delegated to any position listed below.

B. *Disaster Branch Manager.*

1. To approve up to the statutory limit or decline applications for home and business physical disaster loans, economic injury disaster loans and all other types of disaster loans authorized to be made by the Agency including reconsideratioin thereof, and to execute authorizations and modifications pertaining to such loans.

2. To cancel, reinstate, modify and amend authorizations for disaster loans.

3. To authorize the acceptance of disaster loan applications after expiration of the original disaster period or extension thereof.

4. To determine eligibility of disaster loan applicants.

5. To extend disbursement periods without limitation for disaster loans.

6. To establish disaster field offices and to obligate the Small Business Administration through the General Services Administration for the rental of office space and ancillary services; and to close disaster field offices when no longer advisable to maintain such offices.

7. To appoint as a processing representative any lender in the disaster area.

8. To hire, reassign, and terminate disaster temporary employees as necessary.

9. To take necessary actions with respect to personnel, financial management, and administrative activities as are granted to the Area Director (Disaster).

10. To contract for supplies, materials and equipment, printing (Government sources only), transportation, communications, and special services for the Agency pursuant to Chapter 4 of Title 41, U.S.C., as amended, subject to the limitations contained in Section 257 (a)and (b) of that chapter.

C. Assistant Disaster Branch Manager.

1. To approve up to the statutory limit or decline applications for home and business physical disaster loans, economic injury disaster loans and all other types of disaster loans authorized to be made by the Agency including reconsideration thereof, and to execute authorizations and modifications pertaining to such loans.

To cancel, reinstate, modify and amend authorizations for disaster loans.

3. To determine eligibility of disaster loan applicants.

4. To extend disbursement periods without limitations for disaster loans.

5. To hire reassign, and terminate disaster temporary empliyees as necessary.

6. To take necessary actions with respect to personnel, financial management, and administrative activities as are granted by the Disaster Branch Manager.

7. To contract for supplies, materials and equipment, printing (Government sources only), transportation, communications, and special services for the Agency pursuant to Chapter 4 of Title 41, U.S.C., as amended, subject to the limitations contained in Section 257(a) and (b) of that chapter.

D. *Supervisory Loan Specialist (Disaster).*

1. To approve up to the statutory limit or decline applications for home and business physical disaster loans, economic injury disaster loans and all other types of disaster loans authorized to be made by the Agency including reconsideration thereof, and to execute authorizations and modifications pertaining to such loans.

2. To cancel, reinstate, modify and amend authorizations for disaster loans.

3. To determine eligibility of disaster loan applicants.

4.To extend disbursement periods for disaster loans up to 6 months cumulative (on fully undisbursed loans only)

II. The authority delegated herein may not be redelegated.

III. The authority delegated herein may be exercised by an SBA employee officially designated as Acting in that Position.

Effective date: March 9, 1983.

Dated: March 3, 1983.

Bernard Kulik,

Deputy Associate Administrator, for Disaster Assistance.

BILLING CODE 8025-01-M

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 83-55]

Change of Practice Relating to the Tariff Treatment of Moon Boot Shells Imported with Removable Felt Liners

AGENCY: Customs Service, Treasury.

ACTION: Change of Practice.

SUMMARY: This document changes the current established and uniform practice of separately classifying moon boot shells imported with an equal number of removable felt liners. Customs will now treat these articles as tariff entities pursuant to the doctrine of entireties, dutiable under various provisions of Schedule 7, Part 1, Subpart A, Tariff Schedules of the United States (TSUS). This change is based on Customs finding that the shells and liners are intended to be used as a unit and their individual identities are subordinated to the identity of the combined article.

EFFECTIVE DATE: June 7, 1983.

FOR FURTHER INFORMATION CONTACT: Donald F. Cahill, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8181).

SUPPLEMENTARY INFORMATION:

Background

By notice published in the **Federal Register** on January 25, 1982 (47 FR 3375), Customs solicited public comments regarding: (a) The interpretation of a provision in the Tariff Schedules of the United States (19 U.S.C. 1202) pertaining to imported footwear having foxing or a foxing-like band applied or molded at the sole and overlapping the upper; and (b) whether Customs should change its uniform and established practice of classifying shells for "moon boots", a type of footwear, imported with an equal number of removable liners as separate entities, dutiable individually, or whether the shells and liners should be classified as tariff entities pursuant to the doctrine of entireties. Interested parties were given until March 26, 1982, to submit comments on the proposal. Pursuant to a request to extend the period of time for the submission of comments, Customs published a notice in the **Federal Register** on March 22, 1982 (47 FR 12194), extending the period of time to April 26, 1982. Because of the numerous substantive and conflicting comments received in response to the more significant issue of question (a) relating to "foxing", it is being treated separately from question (b) relating to moon boot shells and liners. The foxing issue will be the subject of another document to be published in a future **Federal Register.**

As indicated in the notice, moon boots are footwear which extend above the ankle and are designed to be worn over, or in lieu of, other footwear to protect against water, cold, or inclement weather. They may be imported as completed articles or the shells and liners may be imported unattached to be joined after importation to form the finished product.

In Customs Ruling No. 062041 dated August 6, 1979, Customs held that imported moon boot shells with separable liners are not entireties for tariff purposes, but rather are classifiable separately. This ruling was in accordance with the previous determination published in the Customs Bulleting as T.D. 67-118(7) in which Customs held that a removable felt liner imported with a boot is classifiable as a separate tariff entity.

Based upon Customs August 6, 1979 ruling, and liquidations covering entries of the same merchandise at various ports, an established and uniform practice of classifying imported moon botts with an equal number of of removable liners as separate articles exists within the meaning of section 315(d), Tariff Act of 1930, as amended (19 U.S.C. 1315(d)).

However, in the case of *Donalds Ltd., Inc. v. United States,* 32 Cust. Ct. 310, C.D. 1619 (1954), in discussing the doctrine of entireties, the court stated that "if there are imported in one importation separate entities, which by their nature are obviously intended to be used as a unit, or to be joined together by mere assembly, and in such use or joining the individual identifies of the separate entities are subordinated to the identity of the combined entity, duty will be imposed upon the entity they represent." It is this principle upon which Customs proposal to treat moon boot shells and liners as entireties is based.

Analysis of Comments

Eleven comments were received in response to the proposed change in practice. Ten of the commenters were in favor of the proposal and one was opposed to the change.

The commenter opposed to the change argued the following:

(1) The emphasis of the judicial determinations in this field is on separate function, use, and identity of entities in a combination. With respect to "moon boot removable liners", the function of the liners is distinguishable from the function of the boot. Liners provide extra warmth and comfort while boots themselves provide protection against the elements.

(2) Liners possess a separate use and are complete in themselves in that they are capable of and are used as a slipper type of footwear worn indoors.

(3) Liners maintain their separate identity even though imported and sold with moon boots.

(4) Although not normally sold separately at retail, liners can be purchased separately by the consumer.

The commenters in favor of the proposal made the following points:

(1) Moon boot shells and their liners are clearly designed to be used as a unit. The moon boot shell is incomplete without the lining. Absent the lining the inner stitching of the shell is typically exposed and the inner sole of plastic is uncushioned. Without the lining the cold weather protective qualities of the shell are inadequate.

(2) The liners have no function apart from the shell other than perhaps incidently as a makeshift foot warmer.

(3) The general practice in the trade is to purchase liners in numbers equal to the number of shells produced.

(4) Moon boot liners are purchased, packed, shipped, invoiced, imported, advertised, and retailed as units with moon boots shells.

(5) Typical moon boot liners are unsuited for separate use by reason of their lack of durability, by their texture, and appearance.

(6) Moon boot importers do not trade in liners separately

(7) Moon boot shells and their separable liners have no viable separate identity, except in combination with each other.

(8) Moon boot liners are not designed to be worn around the house as a slipper, rather they are intended to facilitate drying of perspiration and any moisture which may have leaked into the boot.

(9) Moon boot shells and liners function only as an entirety and each piece has no function other than its use in the combined moon boot.

After review of the comments, it is clear that the shells and liners involved are intended to be used as a unit and their separate identities are subordinated to the indentity of the completed moon boot. Consequently, shells and liners are considered entireties within the principle set forth in the *Donalds* case, *supra.*

Change of Practice

After careful analysis of the comments and further review of this matter, Customs practice of separately classifying moon boot shells with an

equal number of liners is clearly erroneous. Accordingly, the proposal to treat these articles as tariff entities pursuant to the doctrine of entireties, dutiable under various sections of Schedule 7, Part 1, Subpart A, TSUS, is adopted. This change of practice shall be effective as to merchandise entered or withdrawn from the warehouse for consumption on or after 90 days from the date of publication of this notice in the **Federal Register**.

Treasury Decision 67–118(7) and Customs ruling of August 6, 1979 are revoked, to the extent that they are inconsistent with this decision.

Drafting Information

The principal author of the document was Jesse V. Vitello, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

Dated: August 13, 1982.

Alfred R. De Angelus,

Acting Commissioner of Customs.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This delegation order is revised to delegate authority to Automated Collection Branch managers, GS–9 and above, to execute returns under 26 CFR 301.6020–1(b) when the person required to file such return fails to do so. The text of this delegation order appears below.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur Aron, OP:C:O, Internal Revenue Service, 1111 Constitution Avenue NW., Room 7539, Washington, D.C. 20224; (202) 566–3131 (Not a Toll Free Telephone number).

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury directive appearing in the **Federal Register** for Wednesday, November 8, 1978.

Larry G. Westfall,

Assistant Commissioner (Collection).

Order No. 182 (Rev. 2)

Effective date: 3–7–83

Authority To Execute Returns

The authority granted to the Commissioner of Internal Revenue, by 26 CFR 301.6020–1(b) and 26 CFR 301.7701–9 to execute returns required by any internal revenue law or regulation made thereunder when the person required to file such return fails to do so, is delegated to:

1. Revenue Agents.
2. Tax Auditors.
3. Revenue Officers, GS–9 and above.
4. Collection Office function managers. GS–9 and above.
5. Automated Collection Branch managers, GS–9 and above.

The authority delegated herein may not be redelegated.

Delegation Order No. 182, (Rev. 1), effective December 4, 1981, is superseded.

Dated: February 8, 1983.

James I. Owens,

Deputy Commissioner.

[FR Doc. 83-6014 Filed 3-8-83; 8:45 am]

BILLING CODE 4830-01-M

[Delegation Order No. 42 (Rev. 18)]

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This delegation order is revised to provide for the redelegation of authority to sign all consents fixing the period of limitations on assessment or collection to personnel assigned to the Examination Support Staff/Section, Grade GS–11. The text of the delegation order appears below.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: J. J. Thomassen OP:EX:I:E, 1111 Constitution Avenue, NW., Room 2406, Washington, D.C. 20224; Telephone Number (202) 566–6466 (Not a toll-free telephone number).

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury directive appearing in the **Federal Register** for Wednesday, November 8, 1978.

Louie Mays,

Acting Director, Office of IRP, Service Center and Support Programs.

Delegation Order

Order No. 42 (Rev. 18)

Date of issue: March 7, 1983.

Effective Date: March 7, 1983

Subject: Authority to Execute Consents Fixing the Period of Limitations on Assessment or Collection Under Provisions of the 1939 and 1954 Internal Revenue Codes.

1. Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 120; Order No. 150–2; 26 CFR 301.6501(c)–1; 26 CFR 301.6502–1; 26 CFR 301.6901–1(d); and 26 CFR 301.7701–9; the authority to sign all consents fixing the period of limitations on assessment or collection is delegated to the following officials:

a. Chief Counsel.
b. Regional Counsel.
c. Regional Directors of Appeals.
d. Service Center Directors.
e. District Directors.

2. This authority may be redelegated but not below the following levels for each activity:

a. Service Centers—Chief, Accounting Branch; Chief, Correspondence and Processing Section; Revenue Officers; Chief, Quality Review Staff; and Returns Program Managers;

b. Collection—Chiefs, Office Branches and Office Groups; Revenue Officers; Chiefs, Technical and Office Compliance Branches and Groups; Revenue Representative Supervisors;

c. Examination—Reviewers, Grade GS–11; Group Managers; Case Managers; Returns Program Managers; Classifiers/Screeners, Grade GS–11; and personnel assigned to the Examination Support Staff/Section, Grade GS–11;

d. Criminal Investigation—Chiefs, Criminal Investigation Divisions, except this authority is streamlined districts is limited to the District Director;

e. Appeals—Appeals Officers;

f. Foreign Operations District—Representatives at foreign posts; Revenue Agents, Tax Auditors, and Special Agents on foreign assignments; and levels b, c and d, above; and

g. District Employee Plans and Exempt Organizations—Reviewers, Grade GS–11; Group Managers.

3. No authority is delegated under this Order to the District Counsel.

4. Delegation Order No. 42 (Rev. 17), effective December 21, 1982, is superseded.

James I. Owens,

Deputy Commissioner.

BILLING CODE 4830–01–M

VETERANS ADMINISTRATION

Advisory Committee on Former Prisoners of War; Meeting

The Veterans Administration gives notice under 38 U.S.C. 211 that a meeting of the Advisory Committee on Former Prisoners of War will be held in the Omar N. Bradley Conference Room at the Veterans Administration Central Office, 810 Vermont Avenue, NW, Washington, DC 20420, April 5 and 6, 1983. The purpose of the Committee is to consult with and advise the Administrator of Veterans' Affairs on the administration of benefits under title 38, United States Code, for veterans who are former prisoners of war and on the needs of such veterans with respect to compensation, health care, and rehabilitation.

The session will convene at 9 a.m. each day. These session will be open to the public up to the seating capacity of the room. Because this capacity is limited, it will be necessary for those wishing to attend to contact Miss Linda Gardner, Administrative Assistant to the Chief Benefits Director, Veterans Administration Central Office (phone 202/389–2455) prior to March 24, 1983.

Members of the public may direct questions or submit prepared statements for review by the Committee in advance of the meeting, in writing only, to Mr. H. B. Mars, Deputy Director, Compensation and Pension Service, Department of Veterans Benefits, Room 400, Veterans Administration Central Office. Submitted material must be received at least five days prior to the meeting. Such members of the public may be asked to clarify submitted material prior to consideration by the Committee. Summary minutes of the meeting and rosters of the Committee members may be obtained from Miss Linda Gardner at the aforementioned address.

Dated: February 23, 1983.

By Direction of the Administrator.

Rosa Maria Fontanes,

Committee Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 48, No. 47
Wednesday, March 9, 1983

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

Federal Deposit Insurance Corporation 1, 2
Federal Maritime Commission 3
Federal Mine Safety and Health Review Commission 4, 5
Nuclear Regulatory Commission 6
Securities and Exchange Commission 7

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, March 14, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Application for Federal deposit insurance:

Fidelity Bank & Trust Company, Salem, New Hampshire, a proposed new bank to be located in the Rockingham Mall on the southwest corner of South Broadway (Route 28) and Rockingham Boulevard, Salem, New Hampshire.

Request for reconsideration of a previous denial of a request for consent to retire a subordinated note prior to maturity:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6) and (c)(9)(A)(ii)).

Recommendation regarding the Corporation's assistance agreement with an insured bank pursuant to section 13(c) of the Federal Deposit Insurance Act.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: March 7, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, March 14, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of the minutes of previous meetings.

Application for consent to establish a branch:

West Olympia Bank, Los Angeles, California, for consent to establish a branch at 901 South Western Avenue, Los Angeles, California.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,614-L—The Drovers' National Bank of Chicago, Chicago, Illinois
Case No. 45,618-SR—Tri-State Bank, Markham, Illinois
Memorandum and Resolution re: First National Bank of Carrington, Carrington, North Dakota
Memorandum and Resolution re: The Metro Bank of Huntington, Inc., Huntington, West Virginia

Recommendations with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Edwards, Roberts & Winterstein, Oklahoma City, Oklahoma, in connection with the receivership of Penn Square Bank, National Association, Oklahoma City, Oklahoma.
Gable & Gotwals, Tulsa, Oklahoma, in connection with the receivership of Penn Square Bank, National Association, Oklahoma City, Oklahoma (two memorandums).

Memorandum and Resolution re: Amendment to Part 308 of the Corporation's rules and regulations, entitled "Rules of Practice and Procedures," Which would delegate to the Executive Secretary the authority to designate presiding officers for hearings held in connection with proceedings under section 8(g) of the Federal Deposit Insurance Act and petitions for reconsideration of denials of applications under section 19 of the Federal Deposit Insurance Act.

Memorandum re: Division of Liquidation regional office space in Dallas.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Banks Supervision with respect to applications or request approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 7, 1983.

Federal Deposit Insurance Cororation.

Hoyle L. Robinson,

Exective Secretary.

3

FEDERAL MARITIME COMMISSION

TIME AND DATE: 9 a.m., March 15, 1983.

PLACE: Hearing Room One, 1100 L Street, N.W., Washington, D.C. 20573.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Agreement No. 10376–3: Extension of the Discussion and Sailing Agreement between Lykes Bros. Steamship Co. and China Ocean Shipping Co.
2. Proposed Rulemaking to Amend Tariff Filing Requirements for Conferences and Rate Agreements when Filing Open and Independent Action Rates for Controlled Carrier Member Lines.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary (202) 523–5725.

[S-333-83 Filed 3-7-83; 3:58 pm]

BILLING CODE 6730-01-M

4

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

March 3, 1983.

TIME AND DATE: 10 a.m., Wednesday, March 9, 1983.

PLACE: Room 600, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: In addition to the previously announced item on the agenda, the Commission will also consider and act upon the following:

2. Secretary of Labor, ex rel. Milton Bailey v. Arkansas-Carbona Company, Docket No. CENT 81–13–D. (Issues include whether the judge erred in severing the civil penalty proceeding from the discrimination case and whether he erred in awarding 6% interest on the back pay award.)

It was determined by a unanimous vote of Commissioners that Commission business required that the above item be included on the agenda and that no earlier announcement of the addition was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5632.

[S-330-83 Filed 3-7-83; 2:48 pm]

5

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

March 3, 1983.

TIME AND DATE: 2 p.m., Thursday, March 3, 1983.

PLACE: Room 600, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: In addition to the previously announced items on the agenda, the Commission also considered the following:

2. Elk River Sewell Coal Company, Docket No. WEVA 82-207. (Petition for Discretionary Review).

It was determined by a unanimous vote of Commissioners that Commission business required that the above item be added to the agenda and that no earlier announcement of the addition was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5632.

[S-331-83 Filed 3-7-83; 2:48 pm]

BILLING CODE 6735-01-M

6

NUCLEAR REGULATORY COMMISSION

DATE: Week of March 7, 1983 and Week of March 14, 1983.

PLACE: Commissioners' Conference Room, 1717 H Street, N.W., Washington, D.C.

STATUS: Open and closed.

MATTERS TO BE DISCUSSED: *Thursday, March 10:*

11:00 a.m.
- Affirmation/Discussion and Vote (Public Meeting)
  - a. San Onofre Memorandum and Order Re Arrangements for Medical Services

Friday, March 11:

9:30 a.m.
- Briefing on Salem (Public Meeting)

10:30 a.m.
- Briefing on INPO Construction Evaluation Program (Public Meeting)

Monday, March 14:

10:00 a.m.
- Discussion of Procedures for Hearing on NPS–Erwin (Closed—Exemption 1 and 10)

Tuesday, March 15:

10:00 a.m.
- Briefing on Interim Independent Design Verification Program (Public Meeting)

2:00 p.m.
- Discussion/Possible Vote on Contested Issues in Palo Verde Full Power Proceeding (Closed—Exemption 1 and 10)

Wednesday, March 16:

10:00 a.m.
- Discussion of Management-Organization and Internal Personnel matters (Closed—Exemption 2 and 6)

Thursday, March 17:

4:00 p.m.
- Affirmation/Discussion and Vote (Public Meeting)
  - a. Regulations to Implement Pub. L. 97–415 (Tentative)

ADDITIONAL INFORMATION:

Discussion/Possible Vote on Contested Issues in Waterford Full Power Proceeding scheduled for March 2, *moved* to Friday, March 4.

Status and Discussion of Shoreham scheduled for March 4, *cancelled.*

On March 3 the Commission voted 4–0 (Commissioner Gilinsky not present), to hold Discussion/Possible Vote on ALAB–714 and 716 scheduled for Friday, March 4.

AUTOMATIC TELEPHONE ANSWERING SERVICE FOR SCHEDULE UPDATE: (202) 634–1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

CONTACT PERSON FOR MORE INFORMATION: Walter Magee (202) 634–1410.

March 3, 1983.

Walter Magee,

Office of the Secretary.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: To be published.

STATUS: Closed meetings.

PLACE: 450 5th Street, NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Friday, February 18, 1983.

CHANGES IN THE MEETING: Additional meeting/item. The following item was considered at a closed meeting scheduled on Wednesday, March 2, 1983, at 4:30 p.m.

Regulatory matter bearing enforcement implications.

The following additional item was considered at a closed meeting scheduled for Thursday, March 3, 1983, following the 10:00 a.m. open meeting.

Regulatory matter regarding financial institution.

Chairman Shad and Commissioners Evans, Longstreth and Treadway determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any matters have been added, deleted or postponed, please contact: Bob Zutz at (202) 272–2091.

March 4, 1983.

Part II

Environmental Protection Agency

Electrical and Electronic Components Point Source Category; Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards; Proposed Regulations

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 469

[WH-FRL 2298-6]

Electrical and Electronic Components Point Source Category; Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards

AGENCY: Environmental Protection Agency.

ACTION: Proposed regulation.

SUMMARY: EPA is proposing regulations under the Clean Water Act to limit effluent discharges to waters of the United States or to publicly owned treatment works (POTWs) from cathode ray tube and luminescent materials manufacturing facilities. The purpose of this proposal is to establish new source performance standards and pretreatment standards for these industries. After considering comments received in response to this proposal, EPA will promulgate a final rule.

DATE: Comments on this proposal must be submitted by May 9, 1983.

ADDRESS: Send comments to: Mr. John Newbrough, Effluent Guidelines Division (WH-552), Environmental Protection Agency, 401 M St., SW, Washington, D.C. 20460, Attention: Electrical and Electronic Components Rules. Technical information and copies of technical documents may be obtained from Mr. John Newbrough, at the address listed above. The economic analysis may be obtained from Ms. Renee Rico, Economic Analysis Staff (WH-586), Environmental Protection Agency, 401 M St., SW, Washington, D.C. 20460 or call (202) 382-5397. For further information contact: John Newbrough (202-382-7158).

FOR FURTHER INFORMATION CONTACT: John Newbrough (202) 382-7158.

SUPPLEMENTARY INFORMATION:

Overview: The preamble discusses the legal authority and background, the technical and economic data bases, and other aspects of the proposed regulations. Abbreviations, acronyms, and other terms used in the preamble are defined in Appendix A.

These proposed regulations are supported by three major documents available from EPA. Analytical methods are discussed in *Sampling and Analysis Procedures for Screening of Industrial Effluents for Priority Pollutants.* EPA's technical conclusions are detailed in the *Development Document for Effluent Limitations Guidelines and Standards for the Electrical and Electronic Component Point Source Category-Phase 2.* The Agency's economic analysis is found in *Economic Impact Analysis of Effluent Limitations Guidelines and Standards for the Electrical and Electronic Components Point Source Category-Phase 2.*

The supporting information and all comments on this proposal will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2402 (Rear) (EPA Library). The EPA public information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

  C. List of Toxic Pollutants Excluded From Regulation

I. Legal Authority

EPA is proposing the regulations described in this notice under the authority of Sections 301, 304, 306, 307, 308, and 501 of the Clean Water Act (the Federal Water Pollution Control Act Amendments of 1972, 33 USC 1251 et seq., as amended by the Clean Water Act of 1977, Pub. L. 95-217) (the "Act"). These regulations also are proposed in response to the Settlement Agreement in *Natural Resources Defense Council, Inc.* v. *Train*, 8 ERC 2120 (D.D.C. 1976), *modified* 12 ERC 1833 (D.D.C. 1979), modified by order dated October 26, 1982.

II. Background

A. The Clean Water Act and the Settlement Agreement

The Federal Water Pollution Control Act Amendments of 1972 established a comprehensive program to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters," Section 101(a).

- Section 301(b)(1)(A) set a deadline of July 1, 1977, for existing industrial direct dischargers to achieve "effluent limitations requiring the application of the best practicable control technology currently available" ("BPT").
- Section 301(b)(2)(A) set a deadline of July 1, 1983, for these dischargers to achieve "effluent limitations requiring the application of the best available technology economically achievable * * * which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants" ("BAT").
- Section 306 required that new industrial direct dischargers comply with new source performance standards ("NSPS"), based on best available demonstrated technology.
- Sections 307 (b) and (c) require pretreatment standards for new and existing dischargers to publicly owned treatment works ("POTW"). While the requirements for direct dischargers were to be incorporated into National Pollutant Discharge Elimination System (NPDES) permits issued under Section 402, the Act made pretreatment standards enforceable directly against dischargers to POTWs (indirect dischargers).
- Section 402(a) of the 1972 Act does allow requirements for direct dischargers to be set case-by-case. However, Congress intended control requirements to be based for the most part on regulations promulgated by the Administrator of EPA.
- Section 304(b) required regulations that establish effluent limitations reflecting the ability of BPT and BAT to reduce effluent discharge.
- Sections 304(c) and 306 of the Act require regulations for NSPS.
- Sections 304(g), 307(b), and 307(c) require regulations for pretreatment standards.
- In addition to these regulations for designated industry categories, Section 307(a) required the Administrator to promulgate effluent standards applicable to all dischargers of toxic pollutants.
- Finally, Section 501(a) authorized the Administrator to prescribe any additional regulations "necessary to carry out his functions" under the Act.

The EPA was unable to promulgate many of these regulations by the deadlines contained in the Act, and as a result, in 1976, EPA was sued by several environmental groups. In settling this lawsuit, EPA and the plaintiffs executed a "Settlement Agreement" which was approved by the Court.This agreement required EPA to develop a program and meet a schedule for controlling 65 "priority" pollutants and classes of pollutants. In carrying out this program EPA must promulgate BAT effluent limitations guidelines, pretreatment standards, and new source performance standards for 21 major industries. See *National Resources Defense Council, Inc.* v. *Train,* 8 ERC 2120 (D.D.C. 1976) as modified, 12 ERC 1833 (D.D.C. 1979) and by order dated October 26, 1982.

Several of the basic elements of the Settlement Agreement program were incorporated into the Clean Water Act of 1977. This law also makes several important changes in the Federal water pollution control program.

- Sections 301(b)(2)(A) and 301(b)(2)(C) of the Act now set July 1, 1984 as the deadline for industries to achieve effluent limitations requiring application of BAT for "toxic" pollutants. "Toxic" pollutants here includes the 65 "priority" pollutants and classes of pollutants which Congress declared "toxic" under Section 307(a) of the Act.
- Likewise, EPA's programs for new source performance standards and pretreatment standards are now aimed principally at controlling toxic pollutants.
- To strengthen the toxics control program, Section 304(e) of the Act authorizes the Administrator to prescribe certain "best management practices" ("BMPs"). These BMPs are to prevent the release of toxic and hazardous pollutants from: (1) Plant site runoff, (2) spillage or leaks, (3) sludge or waste disposal, and (4) drainage from raw material storage if any of those events are associated with, or ancillary to, the manufacturing or treatment process.

In keeping with its emphasis on toxic pollutants, the Clean Water Act of 1977 also revises the control program for non-toxic pollutants.

- For "conventional" pollutants identified under Section 304(a)(4) (including biochemical oxygen demand, suspended solids, fecal coliform and pH), the new Section 301(b)(2)(E) requires "effluent limitations requiring the application of the best conventional pollutant control technology" ("BCT")—instead of BAT—to be achieved by July 1, 1984. The factors considered in assessing BCT for an industry include the relationship between the cost of attaining a reduction in effluents and the effluents reduction benefits attained, and a comparison of the cost and level of reduction of such pollutants by publicly owned treatment works and industrial sources.

For those pollutants which are neither "toxic" pollutants nor "conventional" pollutants, Sections 301(b)(2)(A) and (b)(2)(F) require achievement of BAT effluent limitations within three years after their establishment or by July 1, 1984, whichever is later, but not later than July 1, 1987.

The purpose of this proposed regulation is to establish NSPS, PSES, and PSNS effluent standards for the Electrical and Electronic Components Point Source Category-Phase 2.

B. General Criteria for Effluent Limitations Considered Under This Regulation

1. New Source Performance Standards. The basis for new source performance standards (NSPS) under Section 306 of the Act is the best available demonstrated technology. New plants have the opportunity to design the best and most efficient processes and wastewater treatment technologies. Therefore, Congress directed EPA to consider the best demonstrated process changes, in-plant controls, and end-of-process treatment technologies that reduce pollution to the maximum extent feasible.

2. Pretreatment Standards for Existing Sources. Section 307(b) of the Act requires EPA to promulgate pretreatment standards for existing sources (PSES), which industry must comply with within a time period not to exceed three years from promulgation. PSES are designed to prevent the discharge of pollutants which pass through, interfere with, or are otherwise incompatible with the operation of POTWs.

The legislative history of the 1977 Act indicates that pretreatment standards are to be technology-based and analogous to the best available technology for removal of toxic pollutants. The General Pretreatment Regulations which serve as the framework for the proposed pretreatment standards are in 40 CFR Part 403, 46 FR 9404 (January 28, 1981).

EPA has generally determined that there is pass through of pollutants if the percent of pollutants removed by a well-operated POTW achieving secondary treatment is less than the percent removal by the best available technology (BAT) model treatment system.

This proposal does not contain a BAT standard, largely because there are only a few direct dischargers and they already have technology in-place, as required by existing permits. In assessing pass-through EPA has assumed that BAT treatment would be equivalent to that required by PSES.

A study of 40 well-operated POTWs with biological treatment and meeting secondary treatment criteria showed that metals are typically removed at rates varying from 20 to 70 percent. POTWs with only primary treatment have even lower rates of removal. In contrast to POTWs, BAT level treatment by sources in this industrial category can achieve metals removals of approximately 98% or more. Accordingly, these metals "pass through" POTWs.

As for toxic organics, data from the same POTWs illustrate a wide range of removals, from zero to greater than 99%. By comparison, sound solvent management practices preventing the dumping of solvents would achieve a TTO reduction of 99% or more over that which would result from solvent dumping. Data regarding the removal of organic compounds in biological treatment systems used by industry in treating organic waste containing solvents, such as used in this industry, demonstrate removals considerably less than this 99% achieved by solvent management. This indicates that pass-through of toxic organic pollutants does occur.

There is no removal of fluoride by a POTW. Removals of 95–96% by precipitation/clarification have been demonstrated at plants in the cathode ray tube subcategory of this industry. Thus, pass-through of flouride does occur.

These standards rely upon precipitation and clarification for metals removal. This treatment system will also, at no additional cost, remove fluoride to the levels required by this regulation. We propose to limit fluoride in the cathode ray tube subcategory because the levels of fluoride in the raw waste in the CRT subcategory are very high—up to 800 mg/l. This is in contrast to the proposed standards for Phase I of this category which did not rely on end-of-pipe treatment and which did not set limits on fluoride and where fluoride's highest occurrence—in the semiconductor subcategory—was only 146 mg/l.

3. Pretreatment Standards for New Sources. Section 307(c) of the Act requires EPA to promulgate pretreatment standards for new sources (PSNS) at the same time that it

promulgates NSPS. These standards are intended to prevent the discharge of pollutants which pass through, interfere with or are otherwise incompatible with a POTW. New indirect dischargers, like new direct dischargers, have the opportunity to incorporate the best available demonstrated technologies—including process changes, in-plant controls, and end-of-process treatment technologies-and to select plant sites that ensure the treatment system will be adequately installed. Therefore, the Agency sets PSNS after considering the same criteria considered for NSPS. Indirect discharging new sources in these subcategories are expected to have the same pass through of pollutants as existing sources. PSNS will have environmental benefits similar to NSPS.

C. Prior EPA Regulations

On August 24, 1982, EPA proposed Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards as "Phase I" regulations for two subcategories of the Electrical and Electronic Components Category (47 FR 37048). Those subcategories were Semiconductors and Electronic Crystals. No regulations have ever been proposed or promulgated for the Cathode Ray Tube and Luminescent Materials subcategories of E&EC, which are the ones assessed in this rulemaking.

D. Overview of the Industry

The Electrical and Electronic Components Point Source Category (E&EC) includes plants which are a subset of the Standard Industrial Classification (SIC) Major Group 36, Electrical and Electronic Machinery, Equipment and Supplies. However, many of the industries listed under that SIC code were not evaluated as part of the E&EC category because EPA concluded that the wastewater discharges from these industries were more properly associated with unit operations addressed by the Metal Finishing Category. There were originally 21 subcategories in the E&EC industry (47 FR 37048). As part of the Phase I rulemaking, seventeen (17) subcategories were excluded from regulation under Paragraph 8 of the Settlement Agreement, which provides that national guidelines need not be issued for sources which are, generally, not discharging significant toxic pollutants. In Phase I EPA proposed standards for two subcategories (Semiconductors and Electronic Crystals) on August 24, 1982, 47 FR 37048. Two further subcategories—Luminescent Materials and Electron tubes—were to be the subject of these Phase II Standards. 47 FR 37054. In developing these standards, however, EPA has realized that Electron Tubes should be segmented into Cathode Ray Tubes and Receiving and Transmitting Tubes. The latter segment is excluded from regulation under the provision of paragraph 8(a)(1) of the Settlement Agreement. See Section IX(a)(2), below. Thus two subcategories—Cathode Ray Tubes and Luminescent Materials—are the subject of this Phase II rulemaking, which will complete the assessment of the electrical and electronic components category.

The cathode ray tube (CRT) segment of the Electron Tube subcategory (now the Cathode Ray Tube subcategory) is comprised of approximately twenty-two (22) plants: twenty-one (21) are indirect dischargers and one is a direct discharger. The major pollutants discharged by CRT plants are cadmium, zinc, chromium, lead, toxic organics, fluoride, and suspended solids.

The Luminescent Materials subcategory consists of two (2) direct dischargers, two (2) indirect dischargers and one (1) plant which used an evaporation pond with no surface water discharge. The major pollutants discharged by liminescent materials plants are cadmium, fluiride, zinc, antimony and suspended solids.

III. Summary of Methodology

EPA first studied the Electrical and Electronic Components Point Source Category-Phase 2 to determine whether differences in raw materials, final products, manufacturing processes, equipment, age and size of plants, water usage, wastewater constituents, or other factors required the development of separate effluent limitations and standards for different segments of the category. This involved a detailed analysis of wastewater discharge and treated effluent characteristics, including: (1) The sources and volume of water used, the processes employed, and the sources of pollutants and wastewaters in the plant; and (2) the constituents of wastewaters, including toxic pollutants. This analysis enabled the Agency to determine the concentrations of toxic pollutants in the major wastewater discharges.

EPA also identified several distinct control and treatment technologies (both in-plant and end-of-pipe), including those with the potential for use in the Electrical and Electronic Components for use in the Electrical and Electronic Components Point Source Category-Phase 2. The Agency analyzed both historical and newly generate data on the performance of these technologies, including their non-water quality environmental impacts on air quality, solid waste generation, and energy requirements.

The cost of each control and treatment technology was estimated from unit cost curves developed by applying standard engineering analysis to wastewater characteristics. EPA derived the unit process costs by applyng model plant wastewater characteristics (production and flow) to the unit cost curve of each treatment process. These unit process costs were added together to yield the total cost at each treatment level.

Consideration of these factors enabled EPA to characterize the various control and treatment technologies used as a basis for PSES, PSNS, and NSPS. The proposed regulations, however, do not require the installation of any particular technology. Rather, they require achievement of effluent limitations representative of the proper operation of these technologies or equivalent technologies.

IV. Data Gathering Efforts

Between 1979 and 1982, under the authority of Section 306 of the Act, EPA and its contractors contacted by letter and phone approximately 150 plants producing electron tubes and luminescent materials. Using information gathered from these contacts, EPA selected nine plants to visit to view their operations and discuss products, manufacturing processes, water use and wastewater treatment. Six plants were selected for sampling visits to determine pollutant characteristics of the wastewater.

The Agency also collected information on treatment systems not currently used in the industry. In collecting this information, EPA surveyed literature, contacted waste treatment equipment manufacturers and observed applicable treatment systems used by other industries.

Data for the economic analysis were obtained from published information, inquiries to waste treatment equipment manufacturers, and personal contacts with industry.

In addition to the foregoing data sources, supplementary data were obtained from NPDES permit files in EPA regional offices and contacts with state pollution control offices.

V. Sampling and Analytical Program

The sampling and analysis program for this rulemaking concentrated on the toxic pollutants designated in the Clean Water Act. However, conventional and nonconventional pollutants were also

sampled and analyzed. Both inorganic toxic and organic toxic pollutants were sampled for in the wastes. EPA used the analytical techniques described in *Sampling and Analysis Procedures for Screening of Industrial Effluents for Priority Pollutants,* revised April 1977. A very similar method is found among those proposed on December 3, 1979. Metals analysis was by AA spectrophotometry, except that the standard cold vapor method was used for mercury. We made minor changes in the 304(h) method in order to avoid excessive matrix interference that caused high limits of detection. Analyses for cyanide and cyanide amenable to chlorination also used 304(h) methods. Analysis for abestos fibers used transmission electron microscopy with selected area defraction; results were reported as chrysotile fiber count. Analyses for conventional pollutants (BOD^5, TSS, pH, and oil and grease) and nonconventional pollutants (total residual chlorine, iron, ammonia, fluoride, and COD) were performed by 304(h) methods. The Agency has not promulgated analytical methods for many of the organic toxic pollutants under Section 304(h) of the Act, although a number of these methods have been proposed (44 FR 69464, December 3, 1979; 44 FR 75028, December 18, 1979). Additional information on the development of sampling and analysis methods for toxic organic pollutants is contained in the preamble to the proposed regulations for the Leather Tanning Point Source Category, 44 FR 38749, July 2, 1979.

EPA checked for the presence and magnitude of 65 toxic pollutants and classes of pollutants (as listed in the NRDC Consent Decree) and a smaller group of conventional and non-conventional pollutants suspected to be present in this industry's wastewaters. Sampled plants were selected to be representative of the manufacturing processes, the prevalent mix of production among plants, and the current treatment technology in the industry. During the sampling program EPA sampled 4 plants in the cathode ray tube and 2 plants in the luminescent materials subcategories.

Wherever possible, each sample of an individual raw waste stream, a combined waste stream, or a treated effluent was collected by an automatic time series compositor during sampling periods as long as 72 hours. Where automatic compositing was not possible, grab samples were taken and composited manually.

VI. Industry Subcategorization

In developing this regulation, the Agency considered whether different effluent limitations and standards are appropriate for different segments of the Electrical and Electronic Components manufacturing industry. The Act requires EPA to consider a number of factors to determine if subcategorization is needed. These factors include raw materials, final products, manufacturing processes, geographical location, plant size and age, wastewater characteristics, non-water-quality environmental impacts, treatment costs, energy costs, and solid waste generation.

After considering the above factors the Agency concluded that product type was the appropriate basis for subcategorization. Product type determines both the raw and process material requirements and the number and type of manufacturing processes used. Plants manufacturing the same product were found to have similar wastewater characteristics. Other factors affected the wastewater characteristics, but were not significant enough in themselves to be used as the basis for subcategorization.

Using product type as a basis, EPA identified (1) the Luminescent Materials subcategory and redefined the Electron Tube subcategory as (2) Receiving and Transmitting tubes and (3) Cathode Ray Tubes subcategories.

This redefinition was necessary because Electron Tube manufacturing is comprised of two distinct product types employing different raw materials and manufacturing processes. Therefore this subcategory has been divided into two segments, based on the products produced; (1) cathode ray tubes, and (2) receiving and transmitting tubes.

Luminescent Materials production generates significant wastewater and EPA has retained it as a subcategory. Cathode Ray Tube manufacture also employs raw materials and process operations which generate wastewater. These standards cover wastewater from those processes. However, production of receiving and transmitting tubes is a dry process. Thus EPA is not proposing that today's standards cover the Receiving and Transmitting Tubes subcategory.

The Development Document provides further background on decisions concerning subcategorization and on the make-up of the regulated subcategories.

VII. Available Wastewater Control and Treatment Technology

A. Status of In-Place Technology

This section describes the status of in-place technology for the subcategories to be regulated by this rulemaking: Cathode Ray Tubes and Luminescent Materials.

Wastewater treatment techniques currently used in the cathode ray tube subcategory include both in-process and end-of-pipe waste treatment. In-plant process waste treatment is designed to remove pollutants from contaminated manufacturing process wastewater at some point in the manufacturing process. End-of-pipe treatment is wastewater treatment at the point of discharge.

In-process control techniques with widespread use in the cathode ray tube subcategory are: (1) Collection of spent solvents for resale, reuse or disposal, and (2) segregation of spent acid wastes for contract hauling. Contract hauling refers to the industry practice of contracting a firm to collect and transport wastes for off-site disposal.

End-of-pipe controls in the cathode ray tube subcategory consist primarily of neutralization. In addition, six of the seven Cathode ray tube plants, which manufacture tubes, and three of the fifteen remaining cathode ray tube plants use end-of-pipe precipitation/clarification for control of toxic metals.

In the Luminescent Materials subcategory the two direct dischargers have combined end-of-pipe treatment systems that utilize precipitation/clarification technologies. Of the three other plants in the subcategory, one evaporates its liquid waste and has no industrial discharge and two are indirect dischargers, one of which neutralizes its wastes end-of-pipe and the third uses precipitation/clarification technology to control toxic metals prior to discharge.

B. Water Use

The water used in the production of CRTs is deionized DI) water which is very expensive to produce using an ion exchange process. Because of the high costs of DI water, the industry practice is to reuse/recycle and conserve water to whatever extent is practical. Therefore, further wastewater flow reduction by increased water conservation and recycle does not appear practicable. The plant-to-plant variability of the degree of water reuse and recycle is a function of general product quality requirements and, to a lesser extent, of site specific water supply factors. This made it infeasible to derive a correlation between water flow and production. An effort was even made to establish a relationship between DI water produced and plant production level. This absence of a relationship between production and wastewater flow precluded the use of

mass based limits. That is why this proposal would set concentration-based limits.

C. Control Treatment Options

EPA considered the following treatment and control options for wastewater discharges from facilities within the Cathode Ray Tube and Luminescent Materials subcategories. The options evaluated are based on treatment observed in plants EPA visited or which described their own treatment processes. They are discussed in further detail in the Development Document, in Chapter VII.

Option 1—Neutralization for pH control.

Option 2—Option 1 plus end-of-pipe precipitation/clarification for treatment of toxic metals (cadmium, chromium, antimony, lead, zinc), fluoride, and total suspended solids (TSS).

Option 3—Option 2 plus filtration for further reduction of toxic metals.

Option 4—Solvent management for control of toxic organics. Solvent management is not an end-of-pipe treatment system, but rather an in-plant control which consists of modifying piping to collect used solvents for resale or contract disposal. Process wastewater is the only other source of toxic organics for these subcategories. Since the spent solvents would not be discharged into the wastewater, toxic organic limitations based on this control would be equivalent to the maximum concentration of toxic organics found in the discharge as a result of process wastewater contamination. As an in-plant control, this option could be used in consort with any of the other options and it was considered in connection with each.

As previously stated, one plant in the luminescent materials subcategory utilizes a non-discharging evaporation pond. Evaporation ponds were not considered because they achieve a zero discharge status through evaporative losses only in dry, arid, regions of the country. Therefore, because of the geographical constraints on the viability of an evaporation system, it is not amenable to being utilized in national regulations. In addition evaporation cost is tied to space availability. The only plant now using evaporation as a control technology had process wastewater flows below those generally observed at larger plants. Further flow reductions are unlikely since, as discussed above, plants already have incentives to minimize process water use.

VIII. Selection of Treatment Options and Effluent Limitations

A. Cathode Ray Tubes

The technology basis for each standard for the Cathode Ray Tube subcategory is presented below, along with the rationale for selecting the specific treatment option. The technologies and wastewater characteristics are discussed in more detail in the Development Document for this rulemaking.

The Agency is proposing not to regulate existing direct dischargers for the reasons cited in Section IX (Pollutants and Subcategories Not Regulated). Therefore, BPT, BAT and BCT effluent limitations have not been proposed.

1. *PSES.* EPA has selected precipitation/clarification for the control of toxic metals and fluoride (Option 2) plus solvent management for control of toxic organics (Option 4) for PSES. This technology is widely demonstrated in this industry as well as other industries with similar raw wastes. Metals removal greater than 96% have been demonstrated. Option 1 was rejected because data indicated that greater removals were achievable at Option 2 which was economically achievable and already widely utilized. EPA is continuing to give serious consideration to, and is soliciting comment regarding, the selection of Option 3 as a final regulation. Filtration is not now the proposal of choice because the additional 1472 annual pounds of national pollutant reduction accomplished by Option 3 are not significant in comparison to the low effluent levels already accomplished by Option 2 in the treatment train. Section VII of the Development Document contains a discussion and tables concerning the effluent concentrations that can be achieved using lime precipitation/clarification (Option 2) and those that would be achieved by the addition of a filter (Option 3).

Pollutant removals and costs of options 2 and 3 are summarized below. (See Section X of this preamble for the economic impacts.) Removals and compliance costs are increments beyond estimates of current discharge and treatment in place.

	Pollutant removal (number per year)		Costs (dollars in thousand)	
	Toxics (lb/yr)	Fluoride (lb/yr)	Capital	Annual
Option 2	62,370	1,476,000	$4,946	$2,744
Option 3 (beyond Option 2)	1,472		719	331

Toxic organics are being regulated as the total of all toxic organics found in the discharge at concentrations greater than 0.01 milligrams per liter. Toxic organics summed for the total are listed in Appendix A. The rationale for regulating toxic organics as a combined total is that many different solvents are used by the cathode ray tube subcategory and it would be very difficult to collect sufficient data to limit the individual toxic organic compounds resulting from the use of these solvents. (See paragraph C, in Section XIV.) As stated before, the limitation for total toxic organics (TTO) is the highest concentration of TTO found in the discharge from any CRT plant, all of which already practice in-plant solvent management. Accordingly, no additional cost will result from this regulation.

Because only limited TTO date are available from the CRT subcategory, the Agency also reviewed data from other industries, including other E&EC subcategories, to assess the reasonableness of this limitation. In the metal finishing industry, data indicate that precipitation/clarification technology reduces TTO by 80 percent. In the semiconductor subcategory of this industry, raw waste TTO levels at plants practicing good solvent management occur at from 0.03 to 1.4 milligrams per liter. Thus, if the CRT subcategory were to exhibit raw waste TTO levels within the range observed at semiconductor plants, reduction of TTO through Option 2 technology would result in effluent TTO levels near the proposed 0.15 milligram per liter limitation. EPA believes, however, that most plants will continue to meet TTO levels through solvent management rather than through reliance on end-of-pipe treatment.

The Agency is not proposing a monthly average limitation for TTO. Monthly averages differ from daily limits in order to deal with expected performance variations. The proposed daily maximum limitation for TTO is based on solvent management, which, unlike most treatment options, does not entail pollution control equipment and is therefore not subject to significant performance variations. Accordingly, there is no need to establish a monthly

average different from the daily maximum.

EPA is proposing to establish a compliance date of eighteen months from the date of promulgation for these pretreatment standards because that period reflects the time that our analyses indicate will be required to plan, install, and adjust necessary control technology.

2. *NSPS and PSNS.* For NSPS and PSNS, the Agency is proposing standards based on Options 3 and 4. This technology consists of solvent management plus end-of-pipe precipitation/clarification followed by filtration. Based on model plant flows ranging from 10,000 to 500,000 gals/day, incremental capital investment costs for PSNS range from $5,200 to $165,000, and annualized costs from $2,100 to $68,500. The annualized costs represent less than an 8% increase in treatment costs over treatment required for similarly sized existing plants with an additional estimated 2.4 percent of metals removed. This cost should present no significant barrier to entry of new firms. For NSPS, since BAT is not proposed, the analysis for new direct dischargers uses total costs rather than incremental costs. Total capital investment costs for pollution control range from $113,100 to $1.7 million, and total annualized costs range from $77,660 to $905,200 depending on the size of the relevant plants. The impact of these costs is considered to be small, but the Agency invites comment on the effect of treatment costs on new sources.

B. Luminescent Materials

The technology basis for each standard for the Luminescent Materials subcategory is presented below along with the rationale for selecting the specific treatment option. The technologies and wastewater characteristics are discussed in more detail in the Development Document. The Agency is not proposing to regulate existing direct or indirect dischargers in this subcategory for the reasons cited in Section IX (Pollutants and Subcategories Not Regulated). Therefore, BPT, BAT, BCT and PSES effluent limitations and standards have not been proposed.

1. *NSPS and PSNS.* For NSPS and PSNS, EPA is proposing limitations based on end-of-pipe precipitation/clarification (Option 2) which has been demonstrated within the industry. This option would control cadmium, antimony, zinc, fluoride, TSS and pH in both the NSPS and PSNS. Option 1 alone (pH neutralization) was not selected because Option 2 achieved far greater removals of toxic metals at economically achievable costs. Option 3 (Option 2 plus filtration) is not now the proposal of choice because it will only achieve minimal further reduction of pollutant levels in the effluent, as presented in Chapter VII of the development document. Total capital investment costs for new sources in the Luminescent Materials subcategory range from $91,100 to $1.2 million, total annualized costs range from $68,200 to $569,600 depending on the size of the relevant plants. A comparison of annual treatment cost to sales indicates that the impact on end-products would be small, and treatment costs are not expected to result in significant barriers to entry. While the Agency does not project a significant impact from these new sources standards, this conclusion is based on available data, and the Agency invites comments and data on the effect of new source treatment costs.

IX. Pollutants, Subcategories and Subcategory Segments not Regulated

A. Settlement Agreement

The Settlement Agreement specified 65 categories of toxic pollutants as of "priority" concern. EPA, by regulation, specified 126 pollutant parameters as measures for those pollutants. The Agreement also contained provisions authorizing the exclusion from regulation, in certain circumstances, of toxic pollutants and industry categories and subcategories. These provisions have been rewritten in a Revised Settlement Agreement which was approved by the District Court for the District of Columbia on March 9, 1979, *NRDC* v. *Costle*, 12 ERC 1833.

EPA proposes to set standards for some of those 126 pollutant parameters and for two additional subcategories of this industry, while excluding other pollutant parameters and one additional subcategory from these standards. Data supporting exclusion of the pollutants and subcategories and subcategory segments identified below are presented in the Development Document for this rulemaking.

1. *Exclusion of Pollutants in the CRT and Luminescent Materials Subcategories.* EPA proposes to exclude ninety-six (96) toxic pollutants listed in Appendix C from regulation for the Cathode Ray Tube subcategory. The basis of the proposed exclusion for eighty-six (86) of these pollutants is Paragraph 8(a)(iii) which allows exclusion for pollutants which are not detectable with state-of-the-art analytical methods. The basis of exclusion for another 10 (the nine listed in Appendix C plus antimony) is also provided by Paragraph 8(a)(iii) which allows exclusion of pollutants which are present in amounts too small to be effectively reduced by technologies known to the administrator.

For the Luminescent Materials subcategory we are proposing to exclude 123 pollutants under paragraph 8(a)(iii) of the Decree (of these, 28 are organic solvents controlled in the CRT subcategory by the TTO limit). Luminescent Material plants have stated that they do not use solvents containing these 28 pollutant parameters and EPA believes they will not be present in detectable levels in effluent from this subcategory. Of the 96 toxic pollutants excluded under paragraph 8(a)(iii) in the CRT subcategory, one (antimony) was found in significant quantities and will be regulated in the Luminescent Materials subcategory. The remaining 95 will be excluded on the basis of paragraph 8(a)(iii), for the same reasons as in the CRT subcategory. In addition, lead and chromium, which are regulated in the CRT subcategory were not found at treatable levels from plants in the Luminescent Materials subcategory and therefore will be excluded from further regulation under paragraph 8(a)(iii).

2. *Exclusion of Subcategories and Subcategory Segments.* The manufacture of Receiving and Transmitting Type Electron Tubes is a dry process. That subcategory therefore will be excluded from further regulation under the provisions of paragraph 8(a)i of the Settlement Agreement.

The Agency is proposing to exclude from regulation existing direct dischargers in the Cathode Ray Tube segment of the Electron Tube subcategory. This subcategory is excluded from regulation under the provisions of paragraph 8(a)(iv) on the basis that there is only one direct discharger which is already subject to an NPDES permit, and has Option 3 (precipitation/clarification/filtration) treatment in place. Its current discharge of toxic pollutants is less than 2 pounds/day.

The Agency is also proposing to exclude from regulation all existing dischargers in the Luminescent Materials subcategory under the provisions of paragraph 8(a)(iv). Of the five (5) plants in this subcategory, 2 are direct dischargers. Each of these 2 plants discharge after treatment required by existing NPDES permits less than 1 pound/plant of toxic metals per day. Two of the remaining plants in the Luminescent Materials subcategory are indirect dischargers. EPA proposes to exclude these plants from national categorical pretreatment standards under the provisions of paragraph 8(b)(ii) of the Decree on the basis that

the amount of toxic pollutants introduced into POTWs is less than 2 pounds/plant each operating day. The remaining plant in the Luminescent Materials subcategory utilizes an evaporation pond which does not discharge to sufrace water.

B. Conventional Pollutants

BOD, and oil and grease are not being regulated for either subcategory because they were found only at concentrations below treatability.

X. Cost and Economic Impact

Executive Order 12291 requires EPA and other agencies to perform regulatory impacts analyses of major regulations. Major rules are those which impose a cost on the economy of $100 million a year or more or have certain other economic impacts. This regulation is not a major rule because its annualized cost of $2.7 million is less than $100 million and it meets none of the other criteria specified in Section 1(b) of the E.O. 12291.

The Agency's economic impact assessment is presented in the report entitled *Economic Impact Analysis of Proposed Effluent Guidelines and Standards for the Electrical and Electronic Components Industry Phase II—Cathode Ray Tubes and Luminescent Coatings Subcategories* EPA 440/2–83–001. This report details the investment and annual costs for the Phase II portion of the Electrical and Electronic Components Category. Compliance costs are based on engineering estimates of capital requirements for the effluent control systems described earlier in this preamble. The report assesses the impact of effluent control costs in terms of price changes, production changes, plant closures, employment effects, and balance of trade effects. The impacts for each option are discussed in the report and summarized below.

In addition, EPA has conducted an analysis of the incremental removal cost per pound equivalent for each of the proposed technology-based options. A pound equivalent is calculated by multiplying the number of pounds of pollutant discharged by a weighting factor for that pollutant. The weighting factor is equal to the water quality criterion for a standard pollutant, divided by the water quality criterion for the pollutant being evaluated. The use of "pound equivalent" gives relatively more weight to removal of more toxic pollutants. Thus, for a given expenditure, the cost per pound equivalent removed would be lower when a highly toxic pollutant is removed. This analysis is included in the record of rulemaking "Cost Effectiveness Analysis of Proposed Effluent Limitations and Standards for the Electrical and Electronic Components Industry—Phase II". EPA invites comments on the methodology.

EPA has identified 27 plants in the Phase II subcategories that are covered by this regulation. Of these 27 plants, 3 plants are direct dischargers, 18 are indirect dischargers, and 6 discharge no wastewater.

PSES: Compliance costs for PSES for the CFR subcategory total $4.9 million for capital investment and $2.7 million annually (1982 dollars). These are all associated with installation of Option 2 (precipitation/clarification). No additional costs are predicted for Option 4 since all plants already practice solvent recovery. No plant closures or job losses are projected as a result of compliance costs for this regulation.

PSNS: For model plants in the CFT subcategory, incremental capital investment costs range from $5,200 to $165,000, and incremental annualized costs range from $2,100 to $68,000 depending on assumptions concerning plant size. The annualized costs represent less than an 8 percent increase over treatment costs for similarly sized existing plants. The price increases associated with these costs range from 0.1 to 0.8 percent and are not likely to result in a competitive disadvantage for new sources. For the Luminescent Materials subcategory, new source costs reflect the total cost of the treatment technology (not incremental) because no pretreatment standards are proposed for existing indirect dischargers. Capital investment costs range from $91,100 to $1.2 million depending on the size of the plant. Total annualized costs range from $68,200 to $589,600. The analysis of new source costs for this subcategory compares annual treatment costs to annual plant sales. The impacts for an average or large new plant are small and are not expected to result in significant barriers to their entry into the subcategory. The impacts on the smallest new plants, while larger than for the other sizes, are not expected to cause severe problems in entering the industry. Total annual treatment costs as a percentage of sales are expected to range from 1.8 to 10.4% for new small plants.

NSPS: For model plants in the CFR subcategory, new source costs for direct dischargers reflect the total costs of the pollution control technology. Capital investment ranges from $113,100 to $1.7 million, and total annualized costs range from $77,600 to $905,200 depending on plant size. The impact of the treatment costs per tube ranges from 0.2 to 3.1 percent. These impacts are considered to be small, but the Agency invites comment on the effect of treatment costs on new sources. For new sources in the Luminescent Materials subcategory, the costs and impacts are the same for both direct and indirect dischargers. The costs and comparisons to sales are shown above, under PSNS. No significant barriers to entry are expected.

Public Law 96–354 requires EPA to prepare an initial Regulatory Flexibility Analysis for all proposed regulations that have a significant impact on a substantial number of small entities. This analysis may be done in conjunction with or as a part of any other analysis conducted by the Agency. The economic impact analysis described above indicates that there will not be a significant impact on any segment of the regulated population, large or small. Therefore, a formal regulatory flexibility analysis is not reqiured.

XI. Non-Water Quality Aspects of Pollution Contol

The elimination or reduction of one form of pollution may aggravate other environmental problems. Sections 304(b) and 306 of the Act require EPA to consider the non-water quality environmental inpacts of these regulations including air and noise pollution, radiation, solid waste generation, and energy requirements.

Compliance with the proposed regulations, including NSPS and PSNS will have no effect on air, noise, or radition pollution and will only result in minimal solid waste generation and will only result in minimal solid waste generation and minimal increased energy usage. The amount of solid waste generated per year will be 1,200 metric tons, beyond that now generated. Available information indicates that the solid waste generated will not be hazardous as defined in the Resource Conservation and Recovery Act (RCRA). Energy requirements associated with these regulations will be 24,000 kilowatt-hours per year of only 6.4 kilowatt-hours per day per facility, beyond that now used for wastewater treatment.

EPA's relevant program offices have had an opportunity to review this data and, based on the above non-water quality impacts from these regulations, the Agency has concluded that the proposed regulation best serves overall national environmental goals.

XII. Upset and Bypass Provisions

A recurring issue is whether industry limitations and standards should include

provisions that authorize noncompliance during "excursion" is unintentional noncompliance beyond the reasonable control of the permittee. EPA believes that upset provisions are necessary, because upsets will inevitably occur, even if the control equipment is properly operated. Because technology based limitations can require only what technology can achieve, many claim that liability for upsets is improper. When confronted with this issue, courts have been divided on the questions of whether an explicit upset or excursion exemption is necessary or whether upset or excursions incidents may be handled through EPA's enforcement discretion. Compare *Marathon Oil Co.* v. *EPA*, 564 F. 2d 1253 (9th Cir. 1977) with *Weyerhaeuser* v. *Costle, supra* and *Corn Refiners Association, et al.* v. *Costle*, No. 78–1069 (8th Cir. April 2, 1979). See also *American Petroleum Institute* v. *EPA*, 540 F. 2d 1023 (10th Cir. 1976); (*CPC International, Inc.* v. *Train*, 540 F. 2d 1320 (8th Cir. 1976); *FMC Corp.* v. *Train*, 539 F. 2d 973 (4th Cir. 1979).

Unlike an upset—which is an unintentional episode—a bypass is an intentional noncompliance to circumvent waste treatment facilities during an emergency. EPA has both upset and bypass provisions in NPDES permits, and the NPDES portions of the Consolidated Permit regulations include upset and bypass permit provision. See 40 CFR Part 122.60, 44 FR 32854, 32862–3 (June 7, 1979). The upset provision establishes an upset as an affirmative defense to prosecution for violation of technology-base effluent limitations. The bypass provision authorizes bypassing to prevent loss of life, personal injury, or severe property damage. Since permittees in the cathode ray tube and luminescent materials subcategories are entitled to the upset and bypass provisions in NPDES permits, this proposed regulation does not repeat these provisions. Upset provisions are also contained in the Genral Pretreatment regulation.

XIII. Variances and Modifications

When the final regulation for a point source category is promulgated, subsequent Federal and State NPDES permits to direct dischargers must enforce the effluent standards. Also, the pretreatment limitations apply directly to indirect dischargers.

Indirect dischargers subject to PSES are eligible for the "fundamentally different factors" variance and credits for pollutants removed by POTW. See 40 CFR 403.7; 403.13; 46 FR 9404 (January 28, 1981). Indirect dischargers subject to PSNS are eligible only for the credits provided for in 40 CFR 403.7. New sources subject to PSNS are not eligible for EPA's "fundamentally different factors" variance or any statutory or regulatory modifications. See *E. I. du Pont de Nemours* v. *Train*, supra.

XIV. Relation to NPDES Permits and General BCT Treatment

A. The NSPS in this regulation will be applied to individual plants through NPDES permits issued by EPA or approved State agencies under Section 402 of the Act. Under the proposed regulation for the Electrical and Electronic Components Category, all limitations are concentration based. As discussed in section VII–B, national mass based limitations are not provided because the Agency has determined that a fundamental relationship between production and pollutant loadings cannot be broadly established for either subcategory. See 40 CFR 122.63(f). Permitting authorities can derive mass based limitations by multiplying the concentration limit by the undiluted discharge flow. The Effluent Guidelines Division can assist the permitting authorities in making this determination, especially with respect to the validity of the flow levels presented by a permittee as representative of their plant.

The preceding section of this preamble discusses the binding effect of this regulation on NPDES permits, except when variances and modifications are expressly authorized. The following adds more detail on the relation between this regulation and NPDES permits.

B. One subject that has received different judicial rulings is the scope of NPDES permit proceedings when effluent limitations and standards do not exist. Under current EPA regulations, States and EPA regions that issue NPDES permits before regulations are promulgated must do so on a case-by-case basis. This regulation provides a technical and legal base for new permits.

Another issue is how the regulation affects the authority of those that issue NPDES permits. EPA has developed the limitations and standards in this regulation to cover the typical facility for this point source category. In specific cases, the NPDES permitting authority may have to establish permit limits on toxic pollutants that are not covered by this regulation. This regulation does not restrict the power of any permit-issuing authority to comply with law or any EPA regulation, guideline, or policy. For example, if this regulation does not control a particular pollutant, the permit issuer may still limit the pollutant on a case-by-case basis, when such action conforms with the purposes of the Act. In addition, if State water quality standards or other provisions of State or Federal law require limits on pollutants not covered by this regulation (or require more stringent limits on covered pollutants), the permit-issuing authority *must* apply those limitations.

C. An alternative to effluent monitoring for TTO was proposed in § 469.12 of the E&EC Phase 1 regulation proposed August 24, 1982, 47 FR 37058. In lieu of monitoring for TTO, EPA proposed to allow the permit authority to allow direct dischargers to make the following certification as a "Comment" on the Discharge Monitoring Report required by § 122.62(e) "I certify that, since filing the last discharge monitoring report, toxic organic compounds have not entered the wastewater in quantities that will exceed the discharge limits for TTO". In addition, in lieu of requiring monitoring for TTO, EPA proposed to permit control authorities to allow industrial users of POTWs to make the following certification as a comment to the periodic reports required by § 403.12(e) "Periodic reports on continued compliance." The Phase I proposal also specified that dischargers must specify the toxic organic compounds used and the procedures used to prevent excessive wastewater discharge of toxic organics. EPA requests comment on applying this same approach to dischargers in the Cathode Ray Tube subcategory.

In response to the Phase I proposal, a number of comments were received suggesting that the certification language was overly restrictive and recommending revision of the language. These comments are being considered, and where appropriate, will be incorporated in the final E&EC Phase I regulation upon promulgation. That regulation is scheduled to be signed by the Administrator by March 31, 1983.

D. A final topic of concern is the operation of EPA's NPDES enforcement program, which was an important consideration in developing this regulation. The Agency emphasizes that although the Clean Water Act is a strict liability statute, EPA can initiate enforcement proceedings at its discretion (*Sierra Club* v. *Train*, 557, F 2d 485, 5th Cir., 1977). EPA has exercised and intends to exercise that discretion in a manner that recognizes and promotes good-faith compliance.

E. Indirect dischargers covered by the PSES and PSNS standards proposed today may also be subject to local pretreatment ordinances and the requirements of EPA's General Pretreatment Regulations. See, 40 CFR § 403. Those regulations include

provisions for base-line monitoring reports, compliance reports, credits for pollutant removals achieved by POTWs, and standards prohibiting interference with POTW operations. The provisions of 40 CFR 403.6(e) also provide a "combined waste stream formula" for determining effluent significant limits when quantities of differing waste streams are combined. Since the plants covered by today's proposal do not combine E&EC wastes with significant other waste streams, that provision should seldom be needed for these subcategories.

XV. Solicitation of Comments

EPA invites and encourages public participation in this rulemaking. The Agency asks that any deficiencies in the record of this proposal be specifically addressed and particularly asks that suggested revisions or corrections be supported by data.

EPA is particularly interested in receiving additional comments and information on the following issues:

1. The Agency is continuing to seek additional data, specifically from those plants engaged in the production of cathode ray tubes and use solvents in the productions process for cleaning and degreasing operations. To regulate the board array of toxic organics, TTO has been selected as the control parameter. The limit for TTO is not based on a specific treatment technology but represents the amount of toxic organics which were detected in the raw waste loan from plants in the data base which practice solvent recovery. The Agency requests that those plants that may have analyzed their effluent for toxic organic compounds known to be present in the solvents used, submit that data along with the analytical method used.

2. The Agency requests comments on the selection of chemical precipitation/clarification versus filtration for new sources and existing sources in the cathode ray tube and luminescent materials subcategories.

The reporting provisions in this rule will be submitted for approval to the Office of Management and Budget of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. Any final rule will explain how its reporting provisions respond to any Office of Management and Budget or public comments.

List of Subjects in 40 CFR Part 469

Electric and electronic equipment, Waste treatment and disposal, Water pollution control.

Date: February 28, 1983.

Anne M. Burford,

Administrator.

XVII. Appendices

Appendix A—Abbreviations, Acronyms, and Other Terms Used in This Notice

Act—The Clean Water Act.

Agency—The U.S. Environmental Protection Agency.

BAT—The best available technology economically achievable under Section 304(b)(2)(B) of the Act.

BCT—The best conventional pollutant control technology, under Section 304(b)(4) of the Act.

BMP—Best management practices under Section 304(e) of the Act.

BPT—The best practicable control technology currently available under Section 304(b)(1) of the Act.

Clean Water Act—The Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251 et seq.), as amended by the Clean Water Act of 1977 (Public Law 95–217).

Direct Discharger—A facility which discharges or may discharge pollutants into waters of the United States.

Indirect Discharger—A facility which discharges or may discharge pollutants into a publicly owned treatment works.

NPDES Permit—A National Pollutant Discharge Elimination System permit issued under Section 402 of the Act.

NSPS—New source performance standards under Section 306 of the Act.

POTW—Publicly owned treatment works.

PSES—Pretreatment standards for existing sources of indirect discharges under Section 307(b) of the Act.

PSNS—Pretreatment standards for new sources of direct discharges under Section 307(b) and (c) of the Act.

RCRA—Resource Conservation and Recovery Act (Pub. L. 94–580) of 1976. Amendments to Solid Waste Disposal Act.

Appendix B—List of Toxic Organics Comprising Total Toxic Organics (TTO) for the Cathode Ray Tube Subcategory and excluded from the Luminescent Materials Subcategory.

1,2,4 trichlorobenzene
chloroform
1,2, dichlorobenzene
1,3 dichlorobenzene
1,4 dichlorobenzene
ethylbenzene
1,1,1 trichloroethane
methylene chloride
napthalene
2 nitrophenol
phenol
bis(2-ethylhexyl) phthalate
tetrachloroethylene
toluene
trichloroethylene
2 chlorophenol
2,4 dichlorophenol
4 nitrophenol
pentachlorophenol
di-n-butyl phthalate
anthracene
1,2 diphenylhydrazine
isophorone
butyl benzyl phthalate
1,1 dichloroethylene
2,4,6 trichlorophenol

Appendix C—List of Pollutants Excluded From Regulation

The following nine (9) pollutants are being proposed for exclusion from further regulation for both subcategories under Paragraph 8(a)(iii) because they are present in amounts too small to be effectively reduced by technologies known to the administrator: arsenic, beryllium, copper, mercury, nickel, selenium, silver, thallium, and cyanide.

The following list of eighty-six (86) pollutants are being proposed for exclusion from further regulation for both subcategories under Paragraph 8(a)(iii) because they were not detected in the effluent.

1. Acenaphthene
2. Acrolein
3. Acrylonitrile
4. Benzene
5. Benzidine
6. Carbon Tetrachloride
7. Chlorobenzene
8. Hexachlorobenzene
9. 1,2-Dichloroethane
10. Hexachloroethane
11. 1,1-Dichloroethane
12. 1,1,2-Trichloroethane
13. 1,1,2,2-Tetrachloroethane
14. Chloroethane
15. Bis (2-Chloroethyl) Ether
16. 2-Chloroethyl Vinyl Ether (Mixed)
17. 2-Chloronaphthalene
18. Parachlorometa Cresol
19. 3,3'-Dichlorobenzidine
20. 1,2-Trans-Dichloroethylene
21. 1,2-Dichloropropane
22. 1,2-Dichloropropylene
23. 2,4-Dimethylphenol
24. 2,4-Dinitrotoluene
25. 2,6-Dinitrotoluene
26. Fluorathene
27. 4-Chlorophenyl Phenyl Ether
28. 4-Bromophenyl Phenyl Ether
29. Bis(2-chloroisopropyl) Ether
30. Bis-(2-chloroethoxy) Methane
31. Methyl Chloride
32. Methyl Bromide
33. Bromoform
34. Dichlorobromomethane
35. Chlorodibromomethane
36. Hexachlorobutadiene
37. Hexachlorocyclopentadiene
38. Nitrobenzene
39. 2,4-dinitrophenol
40. 4,6-dinitroso-cresol
41. N-nitrosodimethylamine
42. N-nitrosodiphenylamine
43. N-nitrosodi-n-propylamine
44. Di-n-octyl phthalate
45. diethyl phthalate
46. dimethyl phthalate
47. Benzo (a) anthracene
48. Benzo (a) pyrene
49. 3, 4-benzofluorathene
50. Benzo (k) fluoranthane
51. Chrysene

52. Acenaphthylene
53. Benzo(ghi) perylene
54. Fluorene
55. Phenanthrene
56. Dibenzo(a,h)anthracene
57. Indeno(1,2,3-cd)pyrene
58. Pyrene
59. 2,3,7,8-tetrachlorodibenzo-p-dioxin
60. Vinyl Chloride
61. Aldrin
62. Dieldrin
63. Chlordane
64. 4,4' DDT
65. 4,4' DDE
66. 4,4' DDD
67. A-endosulfan-Alpha
68. B-endosulfan-Beta
69. Endosulfan Sulfate
70. Endrin
71. Endrin Aldehyde
72. Heptachlor
73. Heptachlor Epoxide
74. A-BHC-Alpha
75. R-BHC-Beta
76. G-BHC-Delta
77. PCB-1242
78. PCB-1254
79. PCB-1221
80. PCB-1232
81. PCB-1248
82. PCB-1260
83. PCB-1016
84. Toxaphene
85. Asbestos

For the Cathode Ray Tube subcategory only, an additional toxic pollutant, antimony, is being proposed for exclusion from further regulation under Paragraph 8(a)(iii), because it was found in amounts too small to be effectively treated.

In the Luminescent Materials subcategory, the twenty-six (26) additional toxic pollutants listed in appendix C are being proposed for exclusion under Paragraph 8(a)(iii) because EPA believes they are not present at detectable concentrations using state-of-the-art analytical methods. The two additional toxic pollutants being considered for exclusion under paragraph 8(a)(iii) are lead and chromium which were not detected in effluents from the subcategory.

For the reasons stated above, EPA proposes to add new subpart C and D to Part 469 of 40 CFR, Chapter I as follows:

PART 469—ELECTRICAL AND ELECTRONIC COMPONENTS POINT SOURCE CATEGORY

* * * * *

Subpart C—Cathode Ray Tube Subcategory

Sec.
469.30 Applicablity.
469.31 Specialized definitions.
469.32 Monitoring requirements.
469.34 Pretreatment standards for existing sources (PSES).
469.35 New source performance standards (NSPS).
469.36 Pretreatment standards for new sources (PSNS).

Subpart D—Luminescent Materials Subcategory

469.40 Applicability
469.41 Specialized definitions.
469.42 New source performance standards (NSPS).
469.43 Pretreatment standards for new sources (PSNS).

Authority: Secs. 301, 304, 306, 307, 308, and 501, Clean Water Act (the Federal Water Pollution Control Act Amendments of 1972, as amended by the Clean Water Act of 1977, 33 U.S.C. 1311, 1314, 1316, 1317, 1318, and 1361; 86 Stat. 816, Pub. L. 92500; 91 Stat. 1567, Pub. L. 95-217).

Subpart C—Cathode Ray Tube Subcategory

§ 469.30 Applicability.

(a) The provisions of this subpart are applicable to discharges resulting from the manufacture of cathode ray tubes.

(b) The compliance deadline for PSES standards shall be no later than September 10, 1984.

§ 469.31 Specialized definitions.

The definitions in 40 CFR Part 401 and the chemical analysis methods in 40 CFR Part 136 apply to this subpart. In addition,

(a) The term "total toxic organics (TTO)" shall mean the sum of the concentrations for each of the following toxic organic compounds which is found in the discharge at a concentration greater than ten (10) micrograms per liter:

1,2,4 trichlorobenzene
chloroform
1,2 dichlorobenzene
1,3 dichlorobenzene
1,4 dichlorobenzene
ethylbenzene
1,1,1 trichloroethane
methylene chloride
napthalene
2 nitrophenol
phenol
bis(2-ethylhexyl) phthalate
tetrachloroethylene
toluene
trichloroethylene
2 chlorophenol
2,4 dichlorophenol
4 nitrophenol
pentachlorophenol
di-n-butyl phthalate
anthracene
1,2 diphenylhydrazine
isophorone
butyl benzyl phthalate
1,1 dichloroethylene
2,4,6 trichlorophenol

(b) The term "cathode ray tubes" shall mean electronic devices in which high velocity electrons focus through a vacuum to generate an image on a luminescent surface.

§469.32 Monitoring.

Certification for TTO as specified in § 469.12(a), 47 FR 37058 will be applicable to this subpart.

§ 469.34 Pretreatment standards for existing sources (PSES).

Except as provided in 40 CFR 403.7 and 403.13, any existing source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for existing sources (PSES):

Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter (mg/l)	
TTO [1]	0.15	
Cadmium	0.046	0.022
Chromium	0.91	0.26
Lead	1.13	0.36
Zinc	2.06	0.40
Fluoride	32.6	22.3

[1] Total toxic organics.

§ 469.35 New source performance standards (NSPS).

Any new source subject to this subpart must achieve the following new source performance standards (NSPS):

Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter (mg/l)	
ph	(2)	(2)
TTO [1]	0.15	
Cadmium	0.046	0.022
Chromium	0.77	0.22
Lead	0.73	0.23
Zinc	1.18	0.28
Fluoride	32.6	22.3
TSS	42.9	16.1

[1] Total toxic organics.
[2] Within the range of 6.0 to 9.0.

§ 469.36 Pretreatment standards for new source (PSNS).

Except as provided in 40 CFR 403.7, any new source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for new sources (PSNS):

Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter (mg/l)	
TTO [1]	0.015	
Cadmium	0.046	0.022
Chromium	0.77	0.22
Lead	0.73	0.23
Zinc	1.18	0.26
Fluoride	32.6	22.3

[1] Total toxic organics.

Subpart D—Luminescent Materials Subcategory

§ 469.40 Applicability.

(a) The provisions of this subpart are applicable to discharges resulting from the manufacture of luminescent materials.

(b) The compliance deadline for PSES standards shall be no later than September 10, 1984.

§ 469.41 Specialized definitions.

The definitions in 40 CFR Part 401 and the chemical analysis methods in 40 CFR Part 136 apply to this subpart. In addition,

(a) The term "luminescent materials" shall mean materials that emit electromagnetic radiation (light) upon excitation by such energy sources as photons, electrons, applied voltage, chemical reactions or mechanical energy and which are specifically used as coatings in fluorescent lamps and cathode ray tubes.

§ 469.42 New source performance standards (NSPS).

Any new source subject to this subpart must achieve the following new source performance standards (NSPS):

Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter (mg/l)	
pH	(1)	(1)
Cadmium	0.46	0.23
Antimony	0.18	0.044
Zinc	2.84	0.68
Fluoride	32.6	22.3
TSS	57.0	22.0

[1] Within the range of 6.0 to 9.0.

§ 469.43 Pretreatment standards for new sources (PSNS).

Except as provided in 40 CFR 403.7, any new source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for new sources (PSNS):

Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter (mg/l)	
Cadmium	0.46	0.23
Antimony	0.18	0.044
Zinc	2.84	0.68
Fluoride	32.6	22.3

Part III

Federal Communications Commission

Policies Governing the Ownership and Operation of Domestic Satellite Earth Stations in the Bush Communities in Alaska

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 25

[CC Docket No. 80-584]

Policies Governing the Ownership and Operation of Domestic Satellite Earth Stations in the Bush Communities in Alaska; Correction and Clarification

AGENCY: Federal Communications Commission.

ACTION: Correction and clarification.

SUMMARY: This document clarifies and corrects a Reference made in the Order Extending Time for Filing Comments in this proceeding concerning Policies governing the ownership and operation of certain earth stations in the Alaskan Bush communities.

FOR FURTHER INFORMATION CONTACT: Cecily Holiday, Common Carrier Bureau, (202) 634-1684.

SUPPLEMENTARY INFORMATION:

In the Matter of policies governing the ownership and operation of domestic satellite earth stations in the Bush communities in Alaska (CC Docket No. 80-584).

Correction and Clarification

On February 22, 1983, an Extension of Time for Filing Comments was published in the **Federal Register** in the above-captioned proceeding (48 FR 7481).

This extension concerned a Tentative Decision which had not been published in the **Federal Register** and the reference made to the Proposed Rule is inapplicable.

The Tentative Decision is printed elsewhere in this Part III.

William J. Tricarico,

Secretary, Federal Communications Commission.

[FR Doc. 83-6094 Filed 3-8-83; 8:45 am]

BILLING CODE 6712-01-M

47 CFR Part 25

[CC Docket No. 80-584; RM-3304; FCC 82-516]

Policies Governing the Ownership and Operation of Domestic Satellite Earth Stations in the Bush Communities in Alaska

AGENCY: Federal Communications Commission.

ACTION: Tentative decision.

SUMMARY: This action proposes joint ownership of certain Alaskan Bush earth stations and is necessary to resolve issues raised in the Proposed Rule in this proceeding without the need to resort to comparative hearings. It also allows for contributions to be made in the development of the Bush earth station network by both Alascom and the local carriers.

DATES: As a result of an Order extending the comment periods, published 2-22-83, 48 FR 7481, comments were due by March 7, 1983 and replies by April 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Cecily Holiday, Common Carrier Bureau, (202) 634-1684.

SUPPLEMENTARY INFORMATION:

In the matter of policies governing the ownership and operation of domestic satellite earth stations in the Bush communities in Alaska (CC Docket No. 80-584, RM-3304).

Tentative Decision

Adopted November 10, 1982.

Released December 10, 1982.

1. Before the Commission are applications for earth station facilities to provide message telephone service (MTS) to approximately 35 rural Alaskan Bush communities.[1] At each of these locations, an application for construction permit and license has been filed by Alascom, Inc. (Alascom),[2] which is certified to provide both intrastate and interstate toll MTS and private-line services in Alaska. In each of these communities the local exchange carrier, which is regulated and certified by the Alaska Public Utilities Commission (APUC), has also filed an application for Bush earth station facilities. We have found that such duplicative proposals for essential facilities in remote, isolated Bush communities of small populations are mutually exclusive because the public interest would not be served by grant of both.[3]

2. We decided that the best method to resolve these controversies was by rulemaking rather than by separate comparative hearings and we issued a *Notice of Proposed Rulemaking*.[4] Therein we sought comment on whether the public interest in this matter might best be served by requiring local exchange certification as a qualification to own and operate earth station facilities in rural Alaskan communities to provide MTS service.

3. On review of the record before us, we conclude that neither the adoption of the proposed rule, nor the administrative selection of one or the other of the applicants, would best serve the public interest. Instead, we find that joint ownership of the Bush earth stations by Alascom and the appropriate local exchange carrier would best serve the public interest. We adopt this Tentative Decision to implement these findings in an orderly fashion.

I. Background

4. The provision of Alaskan communications has been a source of controversy before this Commission for over a decade, dating to the time when the Alaska Communications System (ACS) was transferred by the Air Force to private industry. The winning bid for the ACS was to be selected by the Executive Department upon a competitive basis.[5] Congress indicated that in making the selection emphasis was to be placed upon the following factors: (a) the best plan for expanding the communications system in Alaska, with particular attention given to proposals for serving rural Alaska, and (b) the best proposal for reducing costs to the Alaskan ratepayers.[6] Alascom, established by RCA Corporation to acquire and operate the ACS, was the winning bidder.[7]

5. In 1971 Alascom and RCA Global Communications, Inc. filed applications with the Commission for authority to construct a satellite system to provide domestic communications services. Alascom's proposal included several applications for earth stations in Alaska to be used in conjunction with these satellites. However, in its early domestic satellite (domsat) policy

[1] The term "Bush communities" refers to small villages in rural Alaska that are isolated from the larger cities by rugged terrain and harsh weather conditions. *See also* paragraphs 59-61, *infra*. Although additional services, such as private-line or video, may also be provided through these Bush earth stations, our focus in this proceeding is on MTS.

[2] Alascom is a wholly-owned subsidiary of Pacific Power and Light Company, which acquired the corporation, formerly known as RCA Alaska Communications, Inc., from the RCA Corporation. *See* Alascom, Inc., FCC 79-305, released May 22, 1979. The current company, as well as its predecessor, will be referred to as Alascom throughout this decision.

[3] *See* note 12, *infra*.

[4] Domestic Satellite Earth Stations-Alaska Bush, 81 FCC 2d 304 (1980). The specific applications at issue in this proceeding are listed in Appendix A to the *Notice*.

[5] 40 U.S.C. 771, *et seq*.

[6] "To authorize the Disposal of the Government Owned Long-Lines Communication Facilities in the State of Alaska", Hearing on S. 223, Before the Subcomm. on Armed Services, 90th Cong., 1st Sess. 5028 (1967).

[7] *See RCA Global Communications, Inc., 22 FCC 2d 200 (1970).*

decisions, the Commission questioned whether the facilities proposed by Alascom would meet the needs of the rural Alaskan communities.[8] In light of these concerns, which also were articulated by the State of Alaska, the Commission required Alascom to submit detailed information concerning its plans for Alaskan facilities and services.

6. Alascom filed its "Alaska Communications Plan, 1974–1980" on September 20, 1974. The plan and comments it generated are fully detailed in the *Satcom Construction Order*.[9] In its plans, Alascom proposed to construct 36 small earth stations throughout the state. Using supplemental terrestrial facilities, these stations were to provide telephone service on a regular basis "to the estimated 106 communities with populations of 25 or more in rural Alaska that are presently without voice communications." *Id.* at 673.

7. The Governor's Office of Telecommunications was dissatisfied with Alascom's plan, and the State of Alaska objected to the plan for both economic and technical reasons. The State believed that the Alaskan ratepayers would be forced to bear an excessive portion of the system's costs and believed a much more efficient system was feasible. Nor was the State satisfied with Alascom's subsequent revision to increase the number of Bush earth stations to 100. Consequently, in 1975, the State legislature appropriated funding and the State filed competing applications at each of these sites.[10]

8. The Commission, recognizing the need for service to the Alaska Bush, found both applicants to be legally, technically and financially qualified to construct and operate the proposed Bush stations.[11] It also found the applications to be mutually exclusive.[12] However, the Commission deferred final action on these applications as well as other controversies surrounding the provision of Alaskan services. The Commission anticipated that further informal proceedings and negotiations might resolve these matters without recourse to evidentiary hearings.[13]

9. In order to initiate service, the State and Alascom agreed to an earth station program and negotiated an interim arrangement for construction and operation of the facilities pending Commission action. Starting in 1975, a series of temporary authorizations were issued granting joint authority to Alascom and the State to construct the facilities. Alascom was granted temporary authority, as trustee, to provide common carrier services by means of these facilities. The temporary authorizations are expresly conditioned on the ultimate resolution of the question of who shall be awarded permanent authority to own and operate the earth station facilities.

10. Local exchange operators, comprised mainly of small, native-owned companies and non-profit cooperative associations, have since filed thirty-five applications to construct new earth station facilities or to acquire those currently operated by Alascom and jointly owned by the State. The State's applications were dismissed at its own request and it has indicated that it will convey its ownership interest to the ultimate licensee.[14] Operation of Bush earth stations by Alascom at the contested locations continues under temporary authorizations. At the approximately 65 Bush locations where there were no competing applications, formal radio station authorizations were issued to Alascom. These authorizations are subject to possible modification as a result of this proceeding.[15]

II. Comments

11. In response to the *Notice* we have received formal comments from eight parties, including the local exchange operators (OTZ Telephone Cooperative, Inc. and Mukluk Telephone Company, Inc. (OTZ/Mukluk), filing jointly, and United Utilities, Inc. (United)); Alascom; the State of Alaska (State); the Alaska Public Utilities Commission (APUC); the Rural Electrification Administration (REA); the Federal Aviation Administration (FAA); and the National Telephone Cooperative Association (NTCA). An additional eleven parties filed informal comments or letters. These letters were received from entities such as Bush citizens, local governing bodies of Bush communities, associations and federations representing village councils, and State Senators and Representatives. Six parties filed reply comments.

12. The commenters are divided as to whether the Commission's proposal should be adopted. The local exchange operators favor adoption of the proposed rule. Also supporting adoption of the rule are the NTCA and the REA. The State of Alaska supports adoption of the rule in part. It believes that when two applicants meet specific minimum qualifications, a preference should be afforded to the local exchange operator. However, this preference, according to the State, should not apply to renewal proceedings.

13. Alascom, the APUC and the FAA oppose the rule. Both Alascom and the APUC state that the telephone network is a single technological and economic structure. Thus, in their view, a long-lines certificate, rather than a local exchange certificate, should be the basic eligibility requirement. The City of St. Mary's stated in a letter that, while it is not opposed to the eventual control by United of the earth station facilities in St. Mary's, it does not believe that the local exchange operator has yet achieved the requisite maintenance capability.

14. Basically, the local exchange carriers seek to control the interconnect facilities within their certified regions. They believe, as do all but one local commenting party, that the proposed rule serves the public interest because it provides for local control of essential telecommunications facilities. This, they assert, will allow them to play a more

---

[8] Domestic Communications Satellite Facilities, 35 FCC 2d 844 (1972) (*Domsat II*), *recons. in part*, 38 FCC 2d 665 (1972) (*Domsat III*).

[9] *See* RCA Global Communication, Inc., 56 FCC 2d 660 (1975).

[10] The Alaskan legislature appropriated $5 million towards this effort. The State did not intend to operate the facilities. Rather it proposed to lease the stations to a carrier—Alascom or a local entity—offering the most favorable terms. It subsequently indicated that its actions were motivated in part by a desire to preserve the option that these facilities could be owned and operated by local carriers. *See* State of Alaska's Reply to Response to Petition for Continued Authorizations as Trustee, Application File No. W-P-C-2859. Although we indicated that a potential hearing issue could result from a licensee divorcing ownership from the operation of the facilities, we did not find it disqualifying *per se*. *Satcom Construction Order, supra* note 9, at 668.

[11] Reconsideration of this finding was requested by Alascom. However, in light of the State's applications being dismissed at its own request, reconsideration was never undertaken.

[12] The need for the Commission to warrant that competition is feasible and beneficial before authorizing duplicative communications facilities was recently reaffirmed by the D.C. Court of Appeals. Telocator Network of American v. FCC, No. 78-2218 (D.C. Cir. Oct. 5, 1982), Slip op. at 40. The finding of mutual exclusivity for Bush earth station facilities was based on the conclusion that one facility could provide all the services proposed by either party, and that there did not appear to be any public interest benefits in the construction of duplicative MTS facilities in the Bush. *See Satcom Construction Order* at 668. None of the parties dispute this conclusion and we reaffirm it here.

[13] These further proceedings provided substantial assistance in addressing these issues. *See RCA Global Communications, 61 FCC 2d 218 (1976); Most of these issues were finally resolved in the Alaska Facilities Decision, 74 FCC 2d 435 (1979), recons. denied* 78 FCC 2d 359 (1980). The remaining issue is the ownership of the Alaska Bush earth stations. No progress beyond the interim arrangement was made in those further proceedings. *See Satcom Construction Order* at 699–700.

[14] *See* letter of May 28, 1980 in File Nos. 65-DSE-P-75 *et al.* The State's withdrawal appears to have been based in part on local exchange development. In a Statement released in October 1979, the Governor indicated that the willingness of the local carriers to compete for earth station ownership made it possible for the State to withdraw its applications.

[15] *See e.g.*, Alascom, Inc., Mimeo No. 69171 released October 10, 1980.

significant role in the planning and development of the Bush network. They also claim that, from an economic as well as management perspective, the viability of their local exchange is tied to such ownership. If the earth station facilities are included in their rate base, the local exchange carriers claim they will derive much-needed increased revenues from the settlements process. This in turn can be used by them to expand and improve local service in the Bush. Additionally, because REA financing can be obtained with low interest rates, the local exchange carriers contend they can improve services at lower costs to their subscribers than can Alascom. Local ownership, they contend, will inevitably result in a strong commitment to maintain and upgrade service at rates that are as low as possible.

15. From a management perspective, the local exchange carriers stress the importance of maintaining operational control over the facilities that often provide Bush communities with their only link to the outside world. Because the local exchange carriers believe Alascom's service and interconnection practices have not always been optimal, they believe they can significantly improve the services available to their subscribers. History indicates, according to the local exchange carriers, NTCA, and the State, that Alascom had to be coerced into extending service to the Bush. They believe that it was only due to the efforts of the State that the initial two channel system was provided. To improve services, one local carrier proposes to introduce equipment redundancy. All propose local and regional maintenance schemes that they believe improve upon the system Alascom currently employs.

16. Additionally, some who favor the adoption of the proposed rule believe that its implementation will result in a decrease in rates to the public. United states that such savings will result from the ability of local exchange operators to co-locate their local exchange facilities with the earth station equipment, thus obviating the need for an additional shelter. Also, the training of maintenance personnel to handle problems that relate to both earth stations and local exchange facilities will preclude the need for maintaining separate staffs. United also claims local ownership will avoid high air transportation costs because Alascom service personnel will not have to be flown to Bush areas. It also claims that its redundant earth station design will result in savings due to less frequent repair calls.

17. Finally, while the State of Alaska believes the proposed rule will serve the public interest, it also believes some showings concerning qualifications should be made by each applicant. According to the State, APUC certification should not be *prima facie* evidence that a local exchange operator is qualified to own and operate an earth station.

18. In opposing the proposed rule, Alascom claims that it will hinder bush development, reduce service quality and increase cost of service to the Alaskan ratepaying public. According to Alascom, the increase in cost will result because of the inefficient and unnecessary replacement of existing earth station facilities, loss of savings due to Alascom's buying power, incentives of local exchange carriers to "gold-plate" earth station facilities, and the need for duplicative facilities and personnel which are unnecessary under Alascom's maintenance program. Operationally, Alascom insists that unified control is critical to the efficient operation of the Bush network. Earth station operations, it claims, require a high level of engineering coordination of equipment, frequency use, testing and other technical matters. Alascom believes that it is in a unique position to provide this capability. Alascom also argues that the adoption of the proposed rule will increase intrastate MTS toll rates due to the impact on separations and settlements.

19. Procedurally, Alascom argues that the proposed rule violates its hearing and due process hights under the *Ashbacker* doctrine, Sections 309(d) and 201(a) of the Communications Act, and § 63.52(c) of the commission's rules. Alascom states that if the Commission does not grant it permanent authority under Title III to own and operte the Bush earth stations, it must be afforded a formal hearing.

20. The APUC joins Alascom in challenging the proposed rule. Its objections are based upon technical and procedural considerations similar to those of Alascom's. It believes that long-lines certification should be substituted for local exchange certification as a basic eligibility criterion.

III. Discussion

21. This proceeding is intended to determine in a generic fashion the appropriate owership structure to be applied to earth station facilities located in the Alaska Bush. In so doing, our focus is the selection of a structure that best satisfies the communications needs of Bush residents. This process is more efficient and less costly than multiple comparative oral hearings. In the *Notice*, the Commission determined that:

> [w]hile there are some differences in the financial and technical details of the various proposals, each applicant appears reasonably capable of sustaining the requisite public interest findings. The issue for decision, therefore, is a determination of the appropriate entity to hold the earth station license.

81 FCC 2d at 305. Thus, we began this rulemaking proceeding with

> [o]ur central objective * * * to establish an ownership structure which satisfies the communications needs of the residents of the Alaska Bush communities in the most efficient and expeditious manner possible.

Id. at 310. In reaching a conclusion in this rulemaking proceeding, we are not, however, limited to "a choice between two operationally viable and distinct ownership patterns" as represented by the specific applications immediately before us. Rather, it is the objective of this proceeding to

> * * * permit broad participation by all interested parties in the decision making process and * * * better enable the Commission to develop an integrated plan for ownership of the Bush earth station facilities. The determination thereby derived will be equally applied to all applicants for Bush earth stations.

Id. at 315. All of the basic issues concerning Bush earth station ownership have been addressed by the parties in the record of this proceeding, as well as in the applications before us. Although service is presently being provided to Bush residents under interim arrangements, a resolution of this controversy is becoming more urgent with the passing of time. Service requirements are growing beyond the two channel lifeline services that have generally served the Bush communities until now. Service improvements are being delayed by the continuing uncertainties surrounding the resolution of the Bush earth station ownership question. A resolution to this controversy, rather than further extensive proceedings, is needed to provide the incentives for an efficient and improved Bush communications network.

22. The comments, applications and our further analysis have persuaded us that sole ownership by the local exchange operators, as proposed in the *Notice*, or sole ownership by Alascom, as argued for by the opponents of our proposed rule, both have drawbacks. Selection of one or the other applicant could impair our ability to fulfill our statutory mandate "to make available, so far as possible, * * * a rapid, efficient, * * * wire and radio

communication service with adequate facilities at reasonable charges". 47 U.S.C. 151. Because we find there are detriments associated with either the local operators or Alascom having sole ownership, we have examined alternative ownership arrangements which might alleviate these problems, at least for the interim. It appears that a joint ownership arrangement would allow Bush residents to take advantage of the strengths of each of the contending entities, and we have tentatively adopted this approach as the resolution to this proceeding.

A. Ownership by Local Exchange Operators

23. In the *Notice* we stated our belief that the local exchange operators would be capable of fully demonstrating their qualifications to own and operate Bush earth station facilities. However, after reviewing the comments of Alascom, the FAA, the city of St. Mary's, and the APUC, we are not persuaded that the local exchange operators have demonstrated sufficient technical expertise to be the sole licensees of the Bush earth stations, independently responsible for the entire range of earth station design and operating decisions.

24. The record does establish a need for local presence in operating and maintaining the Bush earth station facililties. The local operators are unquestionably capable of performing routine, daily maintenance functions.[16] Relying on the technicians employed by the local exchange operators to perform such routine maintenance functions would also avoid duplication of Alascom's personnel. However, problems pertaining to higher level maintenance and repair functions of local facilities are documented in the record. For example, United, who appears among the local operators to be the most technically capable, has experienced service restoration problems during a serious outage in its telephone exchange service at St. Mary's. This outage prompted the Mayor to question United's current ability to manage the Bush earth stations. We believe, however, that the local exchange operators, with the assistance of Alascom and/or equipment suppliers, could one day clearly demonstrate such qualifications. But, at the present moment, review of the record suggests potential problems concerning local exchange operators unilaterally installing and maintaining a fully compatible earth station network that efficiently interfaces with Alascom's space segment.[17]

25. We are also influenced by the fact that the APUC in its comments states that it has not considered earth station ownership and operation in certificating any of the local exchange companies. Moreover, in APUC proceedings involving two of these companies, small earth station issues were specifically excluded from consideration.[18] Thus it appears that our initial intent to rely upon APUC certification of local exchange carriers as a definitive indication of qualifications to operate successfully Bush earth stations cannot stand.

26. We perceive little, if any, advantage to be gained by vesting sole ownership in local exchange operators if the concomitant operational responsibilities of a sole licensee are not also assumed at the same time. The record does not appear to support the conclusion necessary to effectuate our proposed rule, that local exchange certification assures full operational qualifications. In most cases, the local exchange operator would simply assume ownership of existing facilities from Alascom; this does not in itself demonstrate expertise to apply satellite technology to Bush communities. Moreover, where new but similar facilities are proposed by the local exchange carrier to replace existing satellite facilities (as is the case with United in some locations),[19] we see an additional problem. Specifically, there is no demonstrated record that sufficient improvements in service quality or reduced rates would result so as to warrant replacement of the investment in embedded Bush earth station facilities. Apart from issues involving channel capacity and redundancy, which can be easily remedied by installation of additional equipment, no party has demonstrated any flaws with the basic design and operation of the present Bush network.

27. We also find that our original proposal could lead to situations in which purely local Bush interests could conflict with statewide needs. In the *Notice*, we indicated the desirability for a coherent Bush-wide operational design to insure efficient and economical network operation with compatible equipment at each Bush location. Thus, while Alascom has statewide service responsibilities, the local carriers do not. Incentives could therefore exist to perceive network planning and coordination problems from the narrower perspective of a local carrier's limited service requirements. Such a perspective could conflict with sound network operations.

28. Finally, it is also possible that adoption of our proposed rule could retard the expansion of satellite network facilities throughout the entire Bush earth station system. This would hinder the Commission's goal under § 1 of the Communications Act of 1934 to ensure the expeditious development of Alaskan service. Our proposed rule would in some sense relegate Alascom to a caretaker's role in the 65 presently uncontested locations until a local carrier was in a position to assume the responsibilities of owning and operating the earth stations. Alascom would thus lack the incentive to upgrade these facilities a potential result in conflict with out statutory objectives.

B. Ownership by Alascom

29. Next we examine sole ownership by Alascom. Just as we believe there are good reasons for not adopting the proposed rule, we conclude that valid reasons also exist for not granting sole ownership to Alascom. It does not have any vested rights in Bush earth station licenses, nor has it been awarded any exclusive rights to toll facility authorizations.[20] Thus, it is incumbent on Alascom to demonstrate any unique capabilitties it has to provide superior services to the Bush communities before it alone is found to be the only eligible entity to hold all of the Bush earth station licenses. Alascom has not made this case on the record before us. Alascom has demonstrated extensive technical and operating capabilities. But it also appears to have been reluctant to expand service in the Bush. The State, Bush residents and the local exchange carriers have all expressed dissatisfaction concerning the service provided to Bush communities by Alascom. In fact, as we have previously indicated, one of the reasons given by the State when requesting that its applications be dismissed was the willingness and ability of the local exchange carriers to apply for the facilities it had constructed jointly with Alascom under the interim

[16] For example, *see* contract between the Arctic Slope Telephone Association Cooperative, Inc., (ASTAC) and Alascom setting out responsibilities and training to be provided (filed in the Reply Comments of the NTCA, Exhibit 1).

[17] Over 70% of Alaskan toll circuits are routed by satellite. Compatibility is a particular concern in our evaluation of Bush earth station ownership by local exchange operators since 65% of the Bush stations are presently authorized solely to Alascom. *See* paragraph 10, *supra*.

[18] *See* comments of the APUC at 13. The carriers involved were United and ASTAC.

[19] *See* File Nos. 932 and 937–DSE–P/L–80.

[20] *See* RCA Alaska Communications, *supra* note 7 at 204; and CC Docket No. 78–72 adopted today. Nor have we required all MTS services to be provided over a single satellite system. *See* National Satellite Services, 43 FCC 2d 1141 (1973).

arrangements. The State believes that Alascom, which has repeatedly underscored the financial and operational burden Bush facilities impose,[31] is reluctant to pursue an adequate Bush program.[32] While these incidents do not rise to a level at which we would question Alascom's basic qualifications, we find them indicative of disincentives to optimize Bush service levels in favor of higher density, more profitable services. And, although the State asks that local exchange qualifications be verified, it has indicated that it still would prefer ownership by the local exchange to ownership by Alascom.

30. However, the most significant detriment we perceive to Alascom's being the sole licensee of the Alaska Bush earth stations is the perpetuation of its total control over what appear to be the only facilities economically practical to provide MTS to the Alaska Bush communities for the indefinite future. While the applications for sole ownership by the local exchange carriers do not appear to be comparatively advantageous under current circumstances, they do appear to represent the bona fide intention of the exchange carriers actively to begin to participate in the operation of Bush earth station facilities. We do not believe the objectives of the Communications Act or our domestic satellite policies would be well served by thwarting such endeavors in their incipient stage. We therefore do not wish to foreclose additional participation in this network by licensing every station solely to Alascom. Over 65 Bush stations already will be licensed to Alascom, in addition to the mid-route stations not at issue in this proceeding. Thus, Alascom will remain by far the dominant Alaskan earth station licensee.

31. Local exchange operations require on-site personnel to maintain the exchange plant. Such personnel can also assume substantial responsibility for proper operation of the earth station facilities at this time to reduce service outages without duplication of the efforts of Alascom.[33] While the contract that exists between Alascom and ASTAC is a constructive attempt to involve one local exchange operator in Bush earth station operations, we do not believe it sufficient when a more active desire to participate has been manifested.

32. The local exchange operators also have the incentive to operate and develop the earth station facilities to tailor the services desired by Bush ratepayers. Thus, we believe that they should play a significant role in the design and operation of the network if they are willing and capable. Generally, the local exchange carriers are themselves residents of the Bush. They are familiar with the needs of the residents of these communities and are concerned with providing a more effective means of predicting and satisfying the growing communication needs of rural Alaska. And, because they themselves must rely on Bush communication services and facilities, they have incentives to improve the services which link their isolated communities with the rest of the world. An opportunity to participate in the ownership and operation of the Bush earth stations would therefore reinforce these incentives.

33. Sole ownership of the Bush earth stations by Alascom would remove substantial incentives to the local exchange operators to contribute to the development of this network. There are also other benefits that we consider important that would be denied Bush ratepayers if we were to grant sole ownership to Alascom. These include increased carrier accountability to the people served, joint participation in the network planning process, and, as previously mentioned, increased attention to the development of service within the Bush communities.[34] To exclude local exchange carriers from all participation in planning the Bush satellite network would effectively preclude them from gaining experience in domestic satellite communications and eventually making meaningful contributions to the development of the art.[35]

C. Joint Ownership

34. Based on the extensive record before us, and in view of the detriments which appear to exist in each of the ownership patterns presented in the applications, we find no reason to select one applicant over the other. Indeed, it appears that the public interest would be disserved by promulgating a rule which would effectively choose either of the applicants to be the sole licensee of the Bush earth stations. Both Alascom and the local exchange carriers have particular strengths that complement the weaknesses of the other. To grant sole ownership to one of the applicants would deny ratepayers the several benefits associated with the other. Moreover, the incentives of each differ somewhat. Combining these incentives in a joint undertaking should therefore provide a balance that will be in the best interests of the residents of the Bush communities.

35. First, the record demonstrates that, with the exception of Alascom's current ability to perform adequately routine daily maintenance in the Bush communities, its technical qualifications to design and operate the Bush network are unquestioned. The local carriers, on the other hand, have not fully demonstrated in practice their technical capabilities beyond routine maintenance functions. Second, we have recognized a desire for a coherent, Bush-wide operational design to enhance smoothly operating functions. We believe that Alascom's existing Satellite Communications Transmission Plan provides for such a unified network. The overall development of this network will be further improved by Alascom's research and development efforts. Conversely, the local carriers have less reason to consider the progress of the network as a whole, and have far more limited resources to invest in research and development. Third, we also believe it desirable, as Alascom proposes, to retain existing facilities. Increasing channel capacity and reliability to levels desired by the local residents can be accomplished by adding equipment. This, we believe, is preferable to the proposal of at least one local carrier to incur additional costs by replacing embededed equipment without demonstrating suficient benefit to the ratepayers. Fourth, the record establishes that the local carriers are fully qualified, and, due to their on-site personnel, better suited, to perform routine earth station maintenance that need not duplicate Alascom's efforts. Furthermore, over time they can gain the necessary experience to convincingly

---

[31] *See e.g.*, Alascom's Comments in CC Docket No. 78-72, filed March 3, 1980.

[32] Examples of Alascom's reluctance in this regard have been provided in proceedings both before the Commission and before the APUC. Alascom resisted constructing the necessary facilities to interconnect the local exchanges of OTZ to the toll network. *See e.g.*, File No. W-P-C-1090. It also failed to upgrade facilities at Gambell and Savoonga in United's service area. *See e.g.*, File Nos. 892, 897-DSS-P/L-80. Alascom has also stated its belief that construction of local exchanges in these extremely remote areas, while desirable, probably lacks an adequate revenue base to support such service.

[33] United's comments set forth examples of problems where duplicative staffing exists. On the other hand, the Alascom/ASTAC contract is a model of contractual obligations that appears to work. We have received no complaints to date.

[34] Participation in Bush earth station ownership and operation will also provide local exchange operators with more experience in the provision of private-line services. See Comments of FAA in this regard.

[35] *Cf.* Winter Park Telephone Company, 86 FCC 2d 889 (1981).

demonstrate their full qualifications. Such a result would be delayed, or perhaps foregone, if we preclude their participating in domsat technology by granting sole ownership to Alascom. Fifth, we conclude that the local exchange carriers, whose only customers are Bush residents, and who themselves are often residents of Bush communities, have the greatest incentive to provide the highest quality service. This factor, we believe, is important in light of Alascom's alleged lack of commitment to provide more than lifeline services to some Bush communities. Finally, by providing the local exchange carriers with an ownership interest, we will reinforce this incentive by providing them with an increased opportunity to plan for, and operate, portions of the Bush network in ways desired by Bush residents.

36. Thus we conclude that the appropriate resolution of this controversy that best serves the public interest is to adopt a policy pursuant to which Alascom and the local carrier are *jointly* authorized to plan, contruct and/or operate these stations. Such a policy alleviates many of the difficulties identified above while preserving the affirmative advantages associated with each entity.

37. The Commission has determined previously that the public interest would be best served by joint ownership and operation of earth stations by different entities. For example, it found joint ownership of earth station facilities used in the global commercial satellite system desirable.[26] In that case, basic policy considerations transcended the arguments of the individual applicants competing for specific stations. A similar joint ownership policy was adopted for the MARISAT system.[27] There the Commission authorized Comsat to construct three satellites to be used as part of a system intended to serve the Department of the Navy as well as to provide maritime communications services to other commercial maritime users. However, the authorization was conditioned to require Comsat to offer any U.S. carrier then providing maritime services the opportunity to participate with Comsat in the ownership and operation of the proposed system. This included both the joint provision of leased channel service to the Navy and competing maritime telex services. In both of these cases, the policy objective of joint ownership was to permit participation by all qualified entities in the construction and operation of initial facilities serving a market where competitive entry by multiple entrants did not appear, at least in the beginning, economically feasible.

38. We conclude that a similar approach is particularly desirable in the Alaska Bush. Joint ownership will afford each applicant a reasonable opportunity to participate in the development of Bush communications while allowing the ratepayers to profit from the benefits associated with each entity. Thus, neither Alascom's extensive experience and capital resources nor the local carriers' on-site availability of personnel and special knowledge of the communications needs of the Bush residents will be lost.

39. Through joint ownership Alascom will be able to share its experience with the local exchange carriers. As local personnel located on-site work with personnel from Alascom, we expect their knowledge of earth station operations to become more sophisticated. This, in turn, will greatly reduce, and perhaps eventually eliminate, the number of times maintenance staff will need to be dispatched to the Bush from metropolitan areas. We also believe that the local exchange carriers' concern for optimal development of communications service to the Bush, tempered with Alascom's understanding of the network as a whole, will provide the best service to the Alaskan ratepayers and will result in the most orderly, efficient and equitable means for planning and operating the Bush network.

D. Procedural Authority

40. Alascom has argued, in opposing the proposed rule, that its hearing and due process rights under the *Ashbacker* doctrine [28], Sections 309(d) and 201(a) of the Communications Act, and Section 63.52(c) of the Commission's rules are abridged. According to Alascom, if the Commission does not grant it permanent authority under Title III to own and operate the Bush earth stations, it must be afforded a formal hearing. We disgree. It is undisputed that the Commission may elect to use its rulemaking power when the pertinent issues involve questions of policy. We examined our procedural authority to decide the ownership question by rulemaking rather than comparative hearing in our *Notice, supra* note 4. There we observed that it is well settled that the Commission has broad latitude when formulating rules and policies which effectuate its responsibilities under the Communications Act. Thus, procedural questions are left to the Commission's informed determination, bearing in mind, of course, that it must protect private rights and the public interest.[29] The choice between proceeding by rule or *ad hoc* adjudication lies primarily in the informed discretion of the agency.[30] Nor is the propriety of a rulemaking proceeding lessened because this procedure was followed to avoid numerous Section 309(e) hearings. "So long as the Commission remains within the bounds of its statutory authority, it may pursue a procedural route it deems superior to one it fears will be unduly time-consuming or burdensome." (footnote omitted)[31]

41. Our decision to proceed by rulemaking is a particularly sound administrative choice under the circumstances presently before us. Unlike most cases involving mutually exclusive applications, our determination of an appropriate Bush earth station ownership structure will not deprive either Alascom or the local exchange carrier the opportunity to continue with their present business functions in the locality in question. Local telephone service will still be provided solely by the local exchange carrier certified by the APUC. The design and operation of the Bush earth stations will not be changed in any basic respect. Alascom will continue functioning in its role as the dominant Alaskan toll carrier responsible for the overall design and operation of the Alaskan toll network. The basic issue before us is therefore how the respective functions and responsibilities of the two applicants are to interface at the Bush earth station where they necessarily meet to provide MTS toll services to the Bush residents.

42. Proceeding by rulemaking provides a more effective context for defining the respective roles of these common carriers in providing MTS services to the Alaska Bush than would an adversarial proceeding. Alascom, in its pleadings, states that it has raised many issues concerning the qualifications of the local exchange carriers to be earth station licensees. It has not, however, disputed their qualifications to provide local Bush MTS services as certified by the APUC.

[29] FCC v. Pottsville Broadcasting Co., 309 U.S. 134, 138 (1940); *See also*, FCC v. Schreiber, 381 U.S. 279 (1965) and Sections 4(i) and 4(j) of the Communications Act, 47 U.S.C. 154 (i) and (j).

[30] SEC v. Chenery Corp., 332 U.S. 194, 203 (1947).

[31] Telocator Network of America v. FCC, *supra*, note 12, at 57.

This operating presence, together with other evidence in the record, leads us to conclude, despite Alascom's assertions to the contrary, that the local exchange carriers have established their technical and financial qualifications to participate in the joint ownership of the earth station facilities. As previously stated, there is no question concerning their technical qualifications to perform the routine, daily technical maintenance functions involved with earth station ownership and operation. In fact, we believe they are in a better position to do so than is Alascom. This we find sufficient to qualify them to participate as joint owners in the Bush earth stations. Additionally, the REA has indicated a willingness to provide funding for such facilities. This too is sufficient to demonstrate the financial qualifications of the local exchange carriers.

43. In the *Notice*, we discussed the factors which we then believed warranted ownership of the Bush earth stations solely by the local exchange operators as a matter of general policy that would best serve the public interest. None of the parties has convincingly demonstrated that such an ownership policy would be infeasible or contrary to the public interest. Rather, the record developed in this proceeding leads us to conclude that joint ownership, rather than sole ownership by either Alascom or the local operators, will provide the Bush residents with the best service. We believe, however, that had we adopted the proposed rule, most, if not all, of the local operators would have been able to demonstrate their qualifications to solely own and operate the Bush earth stations as originally contemplated in our *Notice*.

44. The exhaustive record we have developed in this proceeding has provided us with sufficient information to enable us to make a policy determination that joint ownership provides the ownership structure that will most effectively satisfy the communications needs of the Bush residents. Our authority to implement this resolution comes from Sections 214(c) and 303(r) of the Communications Act of 1934. Thus, in the Tentative Decision we are adopting today, we do not deny the application of any party, but rather grant them all, with the condition that each amend its application to comport with the other. See 47 U.S.C. 303(r). Furthermore, Section 214(c) permits the Commission to "attach to the issuance of the certificate such terms and conditions as in its judgment the public convenience and necessity may require." 47 U.S.C. 214(c). We conclude that the record demonstrates that the public convenience and necessity will best be served by joint ownership of the Bush earth station facilities. We therefore believe oral comparative hearings are unnecessary and would add nothing to aid us in making a better decision. They would only burden the parties with additional, unnecessary costs. This is especially true of the local operators who do not have available to them the extensive resources of Alascom.[33] To the extent a hearing is required, we conclude that this rulemaking proceeding affords all interested parties an opportunity to voice their concerns about fashioning a policy to govern Bush earth station ownership. The consensus urges prompt resolution, and the record justifies the conclusion that joint ownership best serves the public interest.

45. Consideration of alternatives to a proposed rule is permissible in the context of a rulemaking proceeding. Notice is sufficient "if it affords interested parties a reasonable opportunity to participate in the rulemaking process,"[34] and if the parties have not been "deprived of the opportunity to present relevant information by lack of notice that the issue was there."[35] Interested parties have been advised that the purpose of this proceeding is to establish the ownership structure that will best satisfy the communications needs of Bush residents. The Administrative Procedure Act requires only that the notice of proposed rulemaking contain "either the terms or the substance of the proposed rule, or a description of the subjects and issues involved." 5 U.S.C. 553(b)(3). We believe the parties had sufficient notice that we would consider all reasonable alternatives to the proposed rule. However, because none of the parties expressly proposed or analyzed joint ownership, we are today adopting a Tentative Decision which comtemplates joint ownership of the Bush earth station facilities and will entertain further comments on that proposal.

46. Alascom continues to argue that under Section 201(a) of the Communications Act it is entitled in the first instance to an "opportunity for hearing" regarding interconnection between it and the local exchange carriers. As we stated in our *Notice*, to the extent Alascom views a decision in this proceeding to be a significant alteration of its Section 201(a) responsibilities, this proceeding has provided it with an opportunity to voice its concerns.[36]

47. Finally, Alascom persists in arguing that due process of law and the *Ashbacker* doctrine requires us to determine the ownership question on a case-by-case basis. As we have previously stated, the circumstances of this proceeding militate against individual proceedings. Congress intended that the Commission be vested with broad procedural discretion when formulating new policy for an industry. The policies proposed today are based upon the Commission's assessment of the nature of communication services in the Alaskan Bush and how we believe the public interest best will be served. This proceeding has provided an adequate opportunity to Alascom as well as all interested parties to submit all information deemed by them to be relevant. No party has offered any facts or specific lines of inquiry that we believe necessitates separate evidentiary hearings at each location. Accordingly, we believe this proceeding to be consistent with due process of law.

IV. Tentative Decision

48. We find, based on the record before us, that joint ownership of Alaska Bush earth stations best serves the public interest, convenience and necessity. We believe that telecommunications services in Alaska will be developed best by combining the contributions that both Alascom and the local carriers are able to offer to the operation and development of the Bush earth station network. This is particularly important because essential communications service is involved. We must also determine how best to implement our decision.

49. We tentatively conclude that to be eligible to hold a Bush earth station license, an applicant must either be certified by the APUC as a local exchange operator within the community to be served by the earth station or be certified by the APUC or the FCC as an interexchange carrier. When applications are already on file, or are filed in the future, by more than one qualified entity satisfying the above requirements, the Commission will issue authorization to the applicants jointly, conditioned upon their modifying their applications to conform with one another. Parties will not be required to amend their applications until after the Commission issues its final order in this

proceeding. Upon issuance of joint authority, parties will be required to negotiate a contract within 60 days.

50. We recognize that establishing a workable joint ownership arrangement will present a significant challenge to Alascom and the local exchange carriers.[36] We therefore believe it prudent to allow the parties an opportunity to air those issues that must be addressed before the detailed planning and negotiations needed to productively implement this policy can begin. Thus, we will allow the parties 60 days from the release of this Order to submit comments concerning the terms and conditions they believe should govern joint earth station ownership and operation. We encourage the parties to work together in order to formulate the overall mechanism to achieve this objective practically.[37] We believe that the cooperation of the parties involved is needed to end a controversy whose continuance will do nothing to promote the interests of the Alaskan ratepayers.

51. One of the basic issues that has to be addressed is the relative ownership of the Bush earth station facilities in the absence of agreement between the parties. Ownership share must, of course, be directly related to the share of investment and operating costs subscribed to by each party. In the event that each party would be willing and capable of assuming all the costs of Bush earth station operations, we believe it essential that one have a 51 percent ownership share. An equal ownership split could lead to deadlocks requiring frequent Commission intervention. Thus, either Alascom or the local exchange carrier should have majority ownership.

52. Alascom is ultimately responsible for the operational and technical integrity of the Alaskan toll network. It also has broad expertise and experience with satellite communications technology. These factors weigh in favor of assigning the controlling share to Alascom. On the other hand, the local exchange carriers appear to be able to develop services that are more closely tailored to the particular needs of the Bush residents. Majority ownership may also allow the local exchange carrier to expand its participation in the Alaskan telecommunications market. In view of the practical difficulties attendant to coordination among the diverse entities which will make up this system, we believe that Alascom should retain control. Thus, we shall allocate to Alascom up to a 51 percent ownership share.

53. Also, we believe it is preferable, in the first instance, for the parties themselves to define their respective operational roles in the Bush satellite network. However, a few basic principles are apparent from the record in this proceeding. For example, Alascom, as the dominant intrastate and interstate Alaskan satellite carrier, should maintain overall responsibility for the operation of an integrated and efficient Bush network. Alascom's "Satellite Communications Transmission Plan" should be used as the basis for planning the design and operation of Bush earth station facilities.[38] We expect, however, that local exchange carriers will actively contribute to updating this plan in the future, especially as it pertains to new channel, service and reliability requirements. Joint decisions should include traffic allocations and circuit requirements as well as the implementation of technical improvements. These should be incorporated into the plan as they are made. The record demonstrates that the parties have previously participated in such joint planning in, for example, arriving at trunk forecasts.[39] We recognize that difficulties were experienced in this joint planning process, but believe this was most likely a result of the unresolved status of the ownership of the facilities. With the resolution of this issue we expect the parties will be able to expand and improve upon this existing process.

54. Contributions to capital investment and regular operating and maintenance costs should, of course, be made by the parties in proportion to their ownership shares.[40] Upon assignment of part of an existing facility to a local exchange carrier, payment should be made to Alascom by the local carrier of its proportionate share of the original cost less accumulated depreciation. The arrangements for so doing will be agreed upon by the parties and submitted to the Commission and the APUC for review.[41]

55. Although Alascom has argued that a policy of licensing Bush earth stations to the local exchange carriers will result in a shift of revenue requirements to the intrastate jurisdiction through the operations of the Separations Manual, none of the parties has demonstrated sufficiently concrete results that would modify the technical and operational findings we have made above.[42] Absent a persuasive economic analysis of the impact of Bush earth station ownership on the ratepayers, we believe the ownership structure described above represents a reasonable allocation of costs and responsibilities for MTS services between Alascom and the local exchange carriers. Furthermore, any shift in revenue requirements can more appropriately be accommodated through the separations process or, if necessary, in a Joint Board proceeding.

56. The parties are therefore on notice that the Commission will use the comments they submit to fashion a final ownership plan. Such a plan will resolve any outstanding controversies and will form the basis for the definitive arrangementes to be negotiated by the parties. Thus, we believe it is preferable that the parties involved submit detailed responses concerning the issues we have outlined above, as well as any other implementation issue they believe necessary to bring to our attention. We also urge them to make every practical effort to reach consensus on the implementation of this joint ownership policy. We believe that the status of the Bush applications must be resolved and believe further extensive proceedings will serve no useful purpose.

57. In our *Notice* we also requested comments concerning the physical point of interconnection between the parties.

---

[36] During the comment period specified below, the parties can, of course, take exception to our tentative resolution.

[37] We would expect that the interim arrangement between Alascom and the State and the Alascom/ASTAC contract for routine Bush earth station maintenance would form a good starting point for formulating the details of how this ownership structure should be implemented.

[38] The "Alascom Satellite Communications Transmission Plan" is a detailed description of Alaskan earth station parameters, transponder allocation plans, and other technical and operational specifications. The most current version filed with the Commission is dated November 1979.

[39] *See* comments of Alascom at 72. Joint planning is a commonplace practice between AT&T and independent telephone companies in the contiguous 48 states. Also, the INTELSAT system is an example of a statellite system where some hundred independent countries cooperatively design and operate a sophisticated global satellite network.

[40] Our decision does not anticipate or authorize participation by the local exchange carriers in either Alascom's space segment operations or its earth station operations outside the Bush communities.

[41] The State of Alaska may also have to be included insofar as the disposition of its initial investment in Bush earth station facilities may not have been settled.

[42] Although Alascom has submitted figures on its estimate of the impact of local exchange ownership on the separations and settlements process, the case is clearly overstated. It claimed that $14 million in annual revenue requirements would shift from interstate to intrastate MTS. *See* Alascom Comments at 92. However, any actual shift would be much less. For example, Alascom appears to have significantly overstated Bush earth station investment costs. Furthermore, it assumes that a total of 150 Bush earth stations are transferred completely to local exchange operators rather then the 35 partial transfers at issue here. Thus we could not, in any event, rely on the cursory and overstated results alleged by Alascom in our deliberations on the appropriated Bush earth station ownership structure.

However, because Alascom will have an ownership interest in all earth stations, this question does not appear to require resolution by us as a practical matter. Rather, this question, if it does in fact have to be decided, will be answered in a way that is consistent with the definition of the respective operation responsibilities of Alascom and the local exchange carriers.

58. In the *Notice* we raised the question of whether authority pursuant to section 214 of the Act should be required of the local carriers who own and operate Bush earth station facilities. It has been our policy in the past to require that all operating transmit/receive earth stations initially obtain Section 214 certification.[45] In particular, we have found that the Bush earth station facilities are part of interstate channels of communication and therefore are "part of an interstate line" within the meaning of Section 214 (a)(1).[46] This is so even if the facilities are located entirely within the boundaries of a single state and provide interstate service only through connection with the facilities of an interstate carrier.[46] However, we see no purpose to be served by the filing of separate applications for Section 214 authorizations pursuant to the procedures of Part 63 of our rules. Any information needed to make the public interest findings required by Section 214 has already been compiled in the record of this proceeding, and formal applications for such authority would only be duplicative of this record. Thus, the radio station authorizations for the Bush earth stations will also comprise the necessary Section 214 certification for the joint owners.[48]

59. Our joint ownership policy is intended to apply only to those small isolated communities traditionally thought to comprise part of the Alaskan Bush rural population. This policy, like our proposed rule, will apply only to earth station facilities that are intended to provide public message telephone service as defined in Section 21.2 of the Commission's Rules. Thus, it will apply only to those earth stations that are proposed to be operated in conjunction with a local exchange service. Our purpose is to establish a policy that avoids duplication of earth station facilities needed to provide essential public message telephone service to these small communities when, for economic reasons, mutual exclusivity exists.

60. In our *Notice*, we attempted to limit the applicability of our proposed rule to those communities having the physical and geographical limitations which justify this unique regulation. Thus we chose to exclude the 32 largest Alaskan cities. In listing these cities, however, we relied on a list of communities in which Alascom presently operates mid-route stations. As a result, three of Alaska's largest cities, Fairbanks, Juneau, and Ketchikan, were not included; and some communities generally considered to be Bush communities, such as Aniak, Fort Yukon, Iliamna, and Sand Point, were included. We take this opportunity to clarify our definition of the Alaska Bush.

61. The policy we are adopting today will pertain to communities of less than 1,000 citizens. This is not, however, to be considered a definition without exceptions. If a showing can be made that the community in question is not isolated or is generally accessible, *i.e.* a community not considered to be located in the Alaska Bush, then it too will be excluded from the coverage of this rule.

62. Our intent is to apply this policy to the applications presently contested in the 35 Bush locations listed in Appendix A of our *Notice*. Additionally, if two applications are filed for a Bush earth station in the same Bush community, joint ownership will also be applied in any such future mutually exclusive situations. If the parties involved do not believe, based upon experience at that time, that our joint ownership policy is the most practical solution to the Bush earth station ownership question, either may file a petition incorporating their proposed ownership changes. The burden will be on the party proposing such a change to demonstrate that an alternate plan would better serve the public interest. Absent such a showing, joint ownership will be adopted as the appropriate means of resolving such future controversies.[47]

V. Conclusion

63. In view of our discussion with respect to the economic mutual exclusivity of duplicative earth station facilities in Bush communities, the benefits and detriments associated with each applicant, our policy of encouraging new entry into the domsat field and our desire to encourage local participation in the ownership of essential telecommunications facilities, it appears that further extensive proceedings will not serve the public interest. Hence, we tentatively conclude that the Bush earth station facilities should be jointly owned by Alascom and the appropriate local exchange operator.

64. A regulatory flexibility analysis is not required in this proceeding because the proposed rule will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). Only three applicants in this proceeding are potentially affected and this is not a substantial number.

65. Accordingly, it is ordered, pursuant to Sections 4(i), 4(j), 214(c) and 303(r) of the Communications Act of 1934, that the policies set forth in this document are adopted as a Tentative Decision in CC Docket No. 80-584. Interested persons may file comments on or before March 7, 1983 and reply comments on or before April 7, 1983. All relevant and timely comments filed in accordance with §§ 1.415 and 1.419 of our Rules and Regulations will be considered by the Commission before final action is taken in this proceeding.

66. Members of the public are reminded that from the time the Notice of Proposed Rulemaking was issued in this proceeding until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in proceedings such as this one.[49] An *ex parte* contact is a message (spoken or written) concerning the merits of the rulemaking made to a Commissioner, a Commissioner's assistant, or other decision making staff members, other than comments officially filed at the Commission or oral presentations requested by the Commission with all

[46] *Satcom Construction Order, supra* note 9 at 662, n. 29. *See also*, California Interstate Telephone Company v. FCC, 328 F.2d 556 (D.C. Cir. 1964.

[46] *See* General Telephone Co. of California v. FCC, 413 F.2d 390 (1969). There the court upheld a Commission decision that found connecting carriers were not exempt from the provisions of Section 214 when they construct facilities as part of an interstate channel of communication even though the facilities are located within a single state.

[48] *Cf.* Orbital Deployment Plan, 84 FCC 2d 584, 612-613 (1981); Competitive Carrier Rulemaking, 85 FCC 2d 1, 45-46 (1981).

[47] Section 309(b) of the Communications Act of 1934 declares, in part, that no application for a common carrier license shall be granted by the Commission earlier than thirty days following issuance of a public notice by the Commission of its acceptance for filing. Among other things, this provision is designed to give interested parties a thirty-day opportunity to learn of, and act upon, the filing of an application. To comply with our need for an orderly administrative procedure to prevent processing disruptions by late filings, we believe that any competing applications for Bush earth stations should be filed within this thirty day period in order to be considered mutually exclusive. A competing application filed after that date will be returned as unacceptable for filing due to its untimeliness. To ensure that all interested parties are aware of a filing, an applicant must file copies of its application with the APUC, and with Alascom or the local exchange carrier, as appropriate, and include proof of such service with its application to the Commission.

Secretary.

November 18, 1982.

Dissenting Statement of Commissioner Anne P. Jones

In re: Policies governing the ownership and operation of domestic satellite earth stations in the Bush Communities in Alaska

I dissent from the majority opinion in this case because I believe that the result it recommends will not serve the interests of the Alaska ratepayers it purports to protect. First, I am bothered by the way the concept of mutual exclusivity is applied in this case. I recognize that Alaska is a unique situation and that the communities involved here are very small. I also recognize that having more than one transmit/receive earth station in these communities may appear to be economically irrational. I am not willing to say, however, that these facts should absolutely bar every application for a second earth station in these communities.

This agency's action should not focus only on the cost of service, but also on the quality of service. If a community is dissatisfied with the quality of service it is receiving, and is willing to bear the costs of installing a second earth station, I don't believe it is our job to tell that community it may not opt for better quality service.[1] In my view, this is an unwarranted exercise of our authority.[2]

My concern that these communities be able to improve the quality of the service they receive also leads me to conclude that under the joint ownership arrangement proposed in this decision, vesting control of the existing earth stations in Alascom is wrong. Alascom has little incentive to use these earth stations in a way that would maximize the quality of service to the local community. As the decision recognizes, it is the local exchange operator who has "the incentive to operate and develop the earth station facilities to tailor the services desired by Bush ratepayers." Para. 32. By giving Alascom the controlling ownership share, the item gives Alascom the ability to thwart local desires where they differ from its own best interests. I don't believe there is any need to do this.

The majority's goal of having Alascom's technical expertise available to ensure efficient operation and continuity with the Alaska toll network is accomplished by having Alascom participate in the ownership of these facilities. I see no basis for the majority's implication that local carriers will in some way attempt to undermine efficient development of the Alaska toll network through their control over these facilities. Certainly it is in their interest to have a high quality system; this is likely to increase usage and, accordingly, revenues.

Quite simply, as I see it, the greatest incentive for improving the quality and diversity of service available in these communities lies with the local carriers, and not with Alascom. I would therefore vest the 51% share of these facilities in the local operators.

[1] *Cf. Communications Satellite Corporation,* where the Commission stated that it was willing to authorize facilities it believed to be redundant, so long as the customer (in that case DOD) was willing to pay the full cost of the facilities. 80 FCC 2d 170, 180 n. 28 (1980).

[2] The claim that permitting a second earth station might allow local carriers to "gold plate" their rate base is not a valid concern. In a situation where the decision to install a second earth station is not justified and appears to be an effort to inflate the carrier's rate base, it would be the job of the Alaska Public Utilities Commission to disallow the investment.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Thursday, March 10, 1983

Presidential Documents

Title 3—

The President

Proclamation 5029 of March 8, 1983

Women's History Week, 1983

By the President of the United States of America

A Proclamation

Before the signing of the Declaration of Independence, Abigail Adams, wife of one President and mother of another, wrote a prophetic letter to a delegate to the Continental Congress in Philadelphia. Its recipient was her husband, whom she admonished: ". . . in the new code of laws which I suppose it will be necessary for you to make I desire you would remember the ladies, and be more generous and favourable to them than your ancestors . . . if particular care and attention is not paid to the ladies we are determined to foment a rebellion . . ."

However, until well into the second century after that letter was written, barriers existed for women in educational, business and professional opportunities as well as in the law.

Today, American women of every ethnic origin, creed, and race play a vital role in our cultural, military, economic, social and political life. A woman serves as a Supreme Court Justice; there are women serving as university presidents, members of Congress, doctors, lawyers, astronauts, coal miners, corporate executives, members of the President's Cabinet, ranking military officers and leaders in civil rights, the diplomatic corps, cultural endeavors, private sector initiatives, truck drivers, and, very importantly, mothers and homemakers who continually strengthen the foundation of our country's greatness, the family.

During the past two hundred years, women have fought for the causes of abolition, health reform, elimination of child labor, temperance, voting rights, and improvement of industrial labor conditions. Their energy, persistence, and dedication to these causes have enlightened our Nation as to the needs of our society and frequently quickened our country's effort to effect positive change.

This memorable role of women in our Nation's history has been recorded in the written word and has been told as well in music, on canvas, in stone, and through poetry, novels, and the dance. In recognizing the outstanding achievements of America's women, we pay homage to an essential part of our Nation's heritage.

By Senate Joint Resolution 37, the Congress of the United States has authorized and requested the President to proclaim the week which includes March 8, 1983, as "Women's History Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning March 6, 1983, as "Women's History Week." Recognizing that the many contributions of American women

have at times been overlooked in the annals of American history, I encourage all citizens to observe this important week by participating in appropriate ceremonies and activities planned by individuals, governmental agencies, and private institutions and associations throughout the country.

IN WITNESS WHEREOF, I have hereunto set my hand this 8th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 48
Thursday, March 10, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 569; Navel Orange Reg. 568, Amdt. 1]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period March 11–17, 1983, and increases the quantity of such oranges that may be so shipped during the period March 4–10, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for the period specified due to the marketing situation confronting the orange industry.

DATES: This regulation becomes effective March 11, 1983, and the amendment is effective for the period March 4–10, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation and amendment are issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on March 8, 1983 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified weeks. The committee reports the demand for navel oranges is improving.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of navel oranges. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

PART 907—[AMENDED]

1. Section 907.869 is added as follows:

§ 907.869 Navel Orange Regulation 569.

The quantities of navel oranges grown in California and Arizona which may be handled during the period March 11, 1983 through March 17, 1983, are established as follows:

(1) District 1: 1,600,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited cartons.

2. Section 907.868 Navel Orange Regulation 568 (48 FR 8987), is hereby amended to read:

§ 907.868 Navel Orange Regulation 568.

* * * * *

(1) District 1: 1,500,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 9, 1983.

D. S. Kuryloski,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-01-M

FARM CREDIT ADMINISTRATION

12 CFR Part 615

Funding and Fiscal Affairs

AGENCY: Farm Credit Administration.

ACTION: Final rule.

SUMMARY: The Farm Credit Administration ("FCA"), by its Federal Farm Credit Board, adopts and publishes new and amended regulations on funding and fiscal affairs to allow the Farm Credit System ("System") banks to issue consolidated and consolidated Systemwide bonds in definitive rather than book-entry form when approved by the appropriate authorities. These amendments and the new regulation will permit the System to issue bonds in definitive form in special funding activities receiving proper approvals.

EFFECTIVE DATE: April 9, 1983.

FOR FURTHER INFORMATION CONTACT: Larry H. Bacon, Deputy Governor, Office of Administration, 490 L'Enfant Plaza

SW., Washington, DC 20578, (202–755–2161).

SUPPLEMENTARY INFORMATION: Currently, FCA Regulations permit issuance of new consolidated and consolidated Systemwide bonds only in book-entry form. The amendments and additional regulation provide the System with flexibility in its funding activities so as to issue definitive bonds evidenced by certificates for special purposes as determined by the System Finance Committee or subcommittees and approved by the Governor of the FCA. Also, they would allow issuance of definitive bonds to investors currently prevented from purchasing Farm Credit bonds because State law requires them to hold the bonds.

These are technical changes that relieve restrictions on the System funding activities by allowing issuance of bonds in definitive form under certain circumstances and do not affect the rights of current Farm Credit bondholders.

In view of these considerations, the FCA finds it is not necessary to the public interest for this final rule to be subject to the notice and public procedure requirements of 5 U.S.C. 553 which requires general notice of proposed rules to be published in the **Federal Register**. The amendments and new regulation shall not be effective prior to the expiration of 30 days after publication in the **Federal Register** during which either or both Houses of Congress are in session as required by § 5.18(b)(1) of the Farm Credit Act of 1971, as amended.

List of Subjects in 12 CFR Part 615

Accounting, Agriculture banks, Banking, Government securities, Investments, Rural areas.

PART 615—FUNDING AND FISCAL AFFAIRS

For the reasons set out in the preamble, Part 615 of Chapter VI, Title 12 of the Code of Federal Regulations is amended as shown.

1. The heading of Subpart O is revised to read as follows:

Subpart O—Issuance of Farm Credit Securities

2. Section 615.5450 is revised to read as follows:

§ 615.5450 Consolidated bonds.

(a) The 12 Federal land banks may issue consolidated bonds, dated on or after January 1, 1978, only in book-entry form, except as authorized under § 615.5453, in denominations of $1,000 or multiples thereof. Consolidated bonds dated before January 1, 1978, will continue to be available in both definitive form in denominations of $1,000, $5,000, $10,000, $50,000, $100,000, and $500,000, or in book-entry form in denominations of $1,000 or multiples thereof.

(b) The 12 Federal intermediate credit banks may issue consolidated bonds, dated on or after January 1, 1978, only in book-entry form, except as authorized under § 615.5453, in denominations of $5,000 or multiples thereof. Consolidated bonds dated before January 1, 1978, will continue to be available in both definitive form in denominations of $5,000, $10,000, $50,000, $100,000, and $500,000, or in book-entry form in denominations of $5,000 or multiples thereof.

(c) The 13 banks for cooperatives may issue consolidated bonds, dated on or after January 1, 1978, only in book-entry form, except as authorized under § 615.5453, in denominations of $5,000 or multiples thereof. Consolidated bonds dated before January 1, 1978, will continue to be available in both definitive form in denominations of $5,000, $10,000, $50,000, $100,000, and $500,000, or in book-entry form in denominations of $5,000 or multiples thereof.

3. Section 615.5452 is revised to read as follows:

§ 615.5452 Consolidated Systemwide bonds.

The 12 Federal land banks, the 12 Federal intermediate credit banks, and the 13 banks for cooperatives may issue consolidated Systemwide bonds only in book-entry form, except as authorized under § 615.5453, in denominations of $1,000 or multiples thereof for issues with an original maturity over 1 year and 1 month and $5,000 or multiples thereof for issues with an original maturity of under 1 year and 1 month.

§ 615.5453 [Redesignated as § 615.5454]

4. Section 615.5453 is redesignated as § 615.5454.

5. A new § 615.5453 is added to read as follows:

§ 615.5453 Definitive bonds.

Consolidated and consolidated Systemwide bonds may be issued in definitive form as determined to be appropriate by the Finance Committees or their subcommittees and as approved and executed by the Governor of the Farm Credit Administration.

(Secs. 5.9, 5.12, 5.18, Pub. L. 92–181, 85 Stat. 619, 620, 621, (12 U.S.C. 2243, 2246, and 2252))

Kenneth J. Auberger,
Acting Governor.

BILLING CODE 6705-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83–ASO–10]

Redesignation of Control Zones, Savannah, Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment will revise the coordinates of Savannah Municipal Airport and establish two separate control zones in the vicinity of Savannah, Georgia, to encompass that airspace presently designated as the Savannah control zone. This action will not involve the taking of any additional airspace but will provide separate control zones for the two major airports at Savannah.

DATES: Effective 0901 G.m.t., June 9, 1983.

Comments must be received on or before April 30, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO–530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 625, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves revising geographical coordinates and reassigning airspace so that there are two separate control zones in the Savannah area rather than one and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends,

the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revise the coordinates of Savannah Municipal Airport to reflect current information on its geographic coordinates and to reassign that airspace presently designated as the Savannah, Georgia, control zone. At the present time, the Savannah control zone is described as that airspace within a 5-mile radius of Savannah Municipal Airport and within a 5-mile radius of Hunter Army Air Field. The containment of two airports in a control zone, both with operating airport traffic control towers and weather reporting service, results in confusion when the weather at one airport is significantly different from the other airport. The airports are approximately nine miles apart and when the weather at Savannah Municipal is below basic Visual Flight Rule (VFR) minimums, restrictions to aeronautical operations incurred at Municipal are also applicable to operations at Hunter. By redesignating the airspace so there is a control zone at each airport, weather conditions at a specific airport will only affect operating conditions at that airport. Thus, the two airports may be permitted to operate more independently of each other which results in a more efficient utilization of airspace. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need to redesignate the Savannah control zone so as to establish two separate zones in the Savannah area. I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary as there will be no designation of additional airspace and the changes are minor in nature.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., June 9, 1983, as follows:

Savannah Municipal Airport, GA—Revised

Within a 5-mile radius of Savannah Municipal Airport (Lat. 32°07'30" N., Long. 81°12'09" W.); within two miles each side of Savannah ILS Runway 36 Localizer south course, extending from the 5-mile radius area to the LOM.

Savannah Hunter AAF, GA—New

Within a 5-mile radius of Hunter AAF (Lat. 31°00'35" N., Long. 81°08'45" W.); excluding that airspace north of latitude 31°02'30" N.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on February 28, 1983.

George R. LaCaille,

Acting Director, Southern Region.

14 CFR Part 71

[Airspace Docket No. 83-AWA-3]

VOR Federal Airway Extension

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The Canadian Government has requested to extend V-318 from Houlton, ME, to St. John, NB, Canada, via the MOWND Intersection. Currently, traffic from St. John, NB, to Montreal, Canada, and Toronto, Canada, requires routing over Houlton, ME, via FRENN Intersection. This amendment will aid flight planning, expedite traffic, and save a significant amount of fuel.

DATES:

Effective Date: June 9, 1983.

Comments must be received on or before April 21, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Director, FAA, New England Region, Attention: Manager, Air Traffic Division, Docket No. 83-AWA-3, Federal Aviation Administration, 12 New England Executive Park, Burlington, MA 01803.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves the extension of V-318 from Houlton, ME, to St. John, NB, Canada, only 2 nautical miles of this airway extension are within the United States. This amendment has little impact on U.S. airspace and, thus, was not preceded by notice and public procedure. Comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.123 of Part 71 of the Federal

Aviation Regulations (14 CFR Part 71) is to extend V–318 from Houlton, ME, to St. John, NB, Canada, via the 128°T(149°M) and the St. John 287°T(288°M) radials. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

Under the circumstances presented, the FAA concludes that there is an immediate need for a regulation to extend V–318 in order to expedite this request by the Canadian Government to enhance their air traffic operations. Also, only 2 nautical miles of this airway are within the United States thereby having little impact on the U.S. air traffic system. Therefore, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary and that good cause exists for making this amendment effective on the next charting date (June 9, 1983).

VOR Federal airway, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., June 9, 1983, as follows:

V–318 [Amended]

By deleting the words "Houlton, ME." and substituting the words "Houlton, ME, INT Houlton 128° and St John, NB, Canada, 287° radials; St John."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on March 2, 1983.

Harold W. Becker,

Acting Manager, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 436

Disclosure Requirements; Prohibitions Concerning Franchising and Business Opportunity Ventures; Grant of Franchise Rule Exemption Petition for Certain Wholesaler-Sponsored Grocery Chain Affiliation Offers

AGENCY: Federal Trade Commission.

ACTION: Petition granted for franchise rule exemption.

SUMMARY: The Federal Trade Commission has determined that certain distribution arrangements between grocery wholesalers and independent retailers should be exempt from the presale disclosure requirements of the Commission's Franchise Rule. Some of these arrangements, known as "wholesaler-sponsored voluntary chains," are technically covered by the Rule. However, voluntary chain affiliation offers do not have the potential for abuse that warranted the Rule's disclosure requirements for franchises. The exemption, which was requested by the National-American Wholesale Grocers' Association, is intended to make it clear that wholesale grocers who make voluntary chain affiliation offers have no obligation to comply with the Franchise Rule.

EFFECTIVE DATE: March 2, 1983.

ADDRESS: Federal Trade Commission, 6th & Pennsylvania Avenue, NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Craig Tregillus, PC–B–800, Federal Trade Commission, 6th & Pennsylvania Avenue, NW., Washington, D.C. 20580, (202) 376–2805.

SUPPLEMENTARY INFORMATION:

Before the Federal Trade Commission

Commissioners:
James C. Miller III
David A. Clanton
Michael Pertschuk
Patricia P. Bailey
George W. Douglas

In the Matter of: Petition for Exemption from Trade Regulation Rule entitled "Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures" filed by the National-American Wholesale Grocers' Association.

Decision and Order

On October 21, 1979, the National-American Wholesale Grocer's Association (NAWGA) filed a petition on behalf of its members seeking an exemption for wholesaler-sponsored grocery chains from coverage under a Commission trade regulation rule entitled "Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures" (the "franchise rule").[1] NAWGA argued in its petition that an exemption is necessary to prevent unjustified coverage of these relationships, known as "voluntary chains," which enable independent grocery retailers to advertise together under common trademarks and service marks owned by their wholesale supplier.

The franchise rule, which took effect on the same day NAWGA's petition was filed, requires franchisors to provide prospective franchisees with pre-sale disclosures in writing which contain information about the franchisor, the franchised business, the terms of the franchise relationship, and substantiation for any earnings claims made. The rule is designed to assure that potential franchise purchasers have the information they need, when they need it, in order to make an informed investment decision.

Section 18(g) of the Federal Trade Commission Act authorizes the Commission to grant exemptions from its trade regulation rules where coverage is "not necessary to prevent the unfair or deceptive act[s] or practice[s] to which the rule relates."[2] Accordingly, the Commission initiated an exemption proceeding pursuant to Section 553 of the Administrative Procedure Act[3] by publishing NAWGA's submissions in the **Federal Register** for public comment.[4] Having reviewed and considered the record in this exemption proceeding, including the comments received during the 30-day comment period, the Commission has determined that the standard prescribed by Section 18(g) of the Act is met, and that an unqualified exemption from franchise rule coverage should be granted.[5]

In considering NAWGA's exemption request, the Commission's principal concern has been to determine whether the acts and practices the franchise rule was designed to prevent would be likely to occur in voluntary chain relationships if an exemption were granted. Accordingly, as in prior franchise rule exemption proceedings,[6] the Commission has examined relevant indicia of the future likelihood of such acts and practices; namely: (1) The past record of wholesaler acts and practices in making voluntary chain affiliation offers to grocery retailers; (2) comments about the need for protection by and on behalf of the grocery retailers who might benefit from franchise rule coverage; (3) the presence of conditions in the industry which could permit the abuses addressed by the franchise rule to occur; and (4) the existence of economic incentives for wholesalers to engage in any of the unfair or deceptive acts or practices to which the franchise rule relates. None of these indicia suggests that franchise rule coverage is necessary to prevent unfair or deceptive acts by wholesalers offering voluntary chain affiliations to grocery retailers.

Evidence of Abuses

We begin with the fact that there is no prior record in the grocery industry of the types of unfair or deceptive acts or practices the franchise rule was designed to prevent. The rulemaking record documenting abuses in franchise sales was devoid of evidence of any similar abuses in offers of voluntary chain affiliation by grocery wholesalers. Consequently, we were persuaded when the rule was promulgated that voluntary chains and similar relationships should be exempted from franchise rule coverage.[7]

No new evidence has since come to our attention to suggest that any of the abuses addressed by the franchise rule have occurred or are occurring in the grocery industry. The public comments received in this exemption proceeding provide a notable case in point. The comments in the record from all parties directly affected endorsed the exemption petition. Wholesale grocers and their trade association were not alone in supporting the exemption. It was also advocated by the voluntary chain affiliates who commented, as well as by two trade associations representing over 40,000 independent retail grocers, some 20,000 of whom are affiliated with voluntary chains. Thus, the very group that franchise rule coverage might benefit has failed to seek the protection the rule would provide.

The record in this proceeding provides two explanations for the apparent lack of prior problems in the grocery industry which persuade us that the likelihood of future abuses is remote: (1) The absence of the conditions that have allowed abuses to occur in franchise sales; and (2) the lack of economic incentives for grocery wholesalers to engage in unfair or deceptive practices.

Conditions Permitting Abuses

As we emphasized in the Statement of Basis and Purpose for the franchise rule, what differentiates a covered franchise from conventional distribution arrangements is the significant degree to which a franchise must rely on the franchisor's knowledge and expertise from the very outset of the relationship.[8] It is this reliance or dependence which promises to reduce the franchisee's risk of failure in a new business, but also creates the conditions which, in the absence of full disclosure as required by the rule, have allowed well-documented abuses to occur in the sale of franchises by unscrupulous promoters.

We have previously identified the factors that contribute to a prospective franchisee's dependence on the franchisor, and the consequent informational imbalance which permits abuses in the sale of franchises: (1) The frequent lack of relevant business experience and sophistication of prospective franchisees; (2) the complexity of franchise agreements and the inadequate time typically provided to review them before a binding commitment is made; and (3) the promises inherent in all franchises covered by the rule that induce reliance on the superior knowledge and expertise of the franchisor.[9] An examination of the record in this proceeding satisfies us that these factors are not characteristic of voluntary chain relationships.

The record shows that applicants seeking voluntary chain affiliation typically have extensive prior experience in the grocery industry, and thus are capable of independently evaluating the risks and benefits of affiliation. We are advised that the typical applicant, in fact, has had pertinent experience in the grocery business, with many having worked as long as five to ten years, whether as owners of an unaffiliated grocery store, managers of a chain store, or in other supervisory positions. Such prior experience is a mandatory requirement for affiliation with some voluntary groups, and the economic self-interest of the wholesalers that do not have a formal requirement makes experience a prerequisite in practice, at least when financial assistance is provided.[10]

The record also indicates that prospective voluntary chain affiliates have ample time to review and consider contractual agreements before signing them; thus, there is no place for high-pressure sales tactics in affiliation offers. The comments indicate that negotiations for affiliation typically require at least one to three months, and that many applicants consult during that time with attorneys, accountants and other business advisors. Negotiations for relationships in which the wholesaler will provide financial assistance to an affiliate are even more protracted, commonly requiring at least six months, and sometimes as long as one to three years.

Thus, the picture that emerges from the record in this proceeding is one of knowledgeable and experienced applicants with adequate time to ask pertinent questions and consult with advisors about the risks and benefits of affiliation. They stand in sharp contrast to the unsophisticated consumers the rule was primarily designed to protect, such as "mom and pop" operators of convenience stores and other franchises.

[10] The franchise rule does not apply to voluntary chain affiliation offers unless the wholesaler provides some form of financial assistance to the retailer. See the discussion at p. 8, *infra*.

The pronounced differences between voluntary chain affiliations and franchise relationships are highlighted most clearly by the final factor, the lack of dependence of affiliated retailers on the wholesaler sponsoring the chain. In fact, the record shows that so little reliance on the wholesaler is induced by most affiliation offers that the prerequisites to franchise rule coverage are not even met.

Because the franchise rule targets only commercial relationships where a potential for abuse is created when an investment is induced in reliance on promises made by the franchisor, three essential elements must all be present before the rule applies: (1) An offer of the right to use the franchisor's trademark, service mark or other commercial symbol; (2) an offer of either significant assistance in operating the business or significant controls to reduce the risk of failure; and (3) required payments the franchisee must make to the franchisor to obtain the franchise, exclusive of payments made at bona fide wholesale prices for reasonable quantities of goods acquired for resale.[11]

One or more of these coverage prerequisites, which reflect the reliance and risk unique to franchise investments, is absent from almost all of the alternative business options that wholesalers typically present to their potential customers. The record indicates it is only in unique circumstances that the franchise rule ever applies to wholesaler-retailer relationships, as a brief review of the different options will demonstrate.

The first and most basic option is for establishment of an ordinary wholesale supply relationship, to which the franchise rule was never meant to apply.[12] Under this arrangement, the retailer simply contracts to purchase groceries from the wholesaler at wholesale prices, expects and receives no other services or assistance, and operates the retail business in all respects as a truly independent entrepreneur. None of the three prerequisites to franchise rule coverage is present in such a relationship.

The second option typically offered by grocery wholesalers—the opportunity to purchase not only groceries, but a variety of support services, including accounting, inventory control and payroll processing assistance [13]— is not covered either. The trademark prerequisite is not met, and there is no required payment because all the services are strictly optional, with the retailer entirely free to accept or reject each of them.[14]

For the same reason, the rule is inapplicable to the third option, the most common type of voluntary chain affiliation offer. Although the affiliation offer includes the right to operate and advertise under the wholesaler's marks and to purchase support services, the required payment prerequisite to coverage is still not met because the support services continue to be offered on a strictly optional basis.

It is only in rather limited circumstances that all three prerequisites to franchise rule coverage are technically present in voluntary chain affiliation offers. The record shows that the rule may apply when a retailer cannot affiliate unless the wholesaler invests in the business by providing some form of financial assistance. This may include, for example, an agreement to sublease store premises where the lessor demands the security of a prime lease with the wholesaler, an agreement to lease a store owned by the wholesaler, or a loan for inventory, fixtures or equipment. In each of these limited circumstances, the final prerequisite to franchise rule coverage will ordinarily be met by the required rental or loan payments the retailer must make to the wholesaler.[15] Moreover, where financial assistance is offered, required payments for such otherwise optional assistance as payroll, inventory control, accounting, site selection and store planning services may also help satisfy the final coverage prerequisite. These additional payments may be required if the wholesaler seeks to limit its risk in extending financial assistance through the control and oversight gained by providing the services, and requiring retailers who receive financing to purchase them.

We are persuaded that even though all the elements characterizing a covered franchise may technically be found when wholesalers provide financial assistance, the presence of those elements in this context reflects neither the degree of risk nor reliance likely to permit or encourage abuses. On the contrary, in providing financial assistance, the wholesaler assumes a share of the investment risk ordinarily undertaken solely by the retailer, and thus has every incentive to exercise care not to jeopardize the retailer's chances of success, through non-disclosure or otherwise. In contrast, franchisees ordinarily bear the full risk of loss in franchise investments, and franchisors do not necessarily have an incentive to promote the success of the franchise.

Furthermore, the degree of reliance of an affiliating retailer on the wholesaler is significantly less than a franchisee's reliance on a franchisor. The retailer is not induced by an affiliation offer to rely on the wholesaler's assistance, because all of the services and assistance available through affiliation are separately available from a wholesaler without affiliation. Thus, whereas a franchisee is induced to rely on a franchisor by the promise of a complete package of services and assistance not available without the franchise, no comparable reliance on a wholesaler is induced by an affiliation offer.

In addition, when the choice is made to affiliate with a voluntary chain, the retailer who needs no financial assistance is free, unlike a franchisee, to accept or reject all of the optional services offered by the wholesaler. If, on the other hand, financial assistance is sought from the wholesaler, the retailer can scarcely place any greater reliance on the wholesaler than on a bank or other commercial lender which might otherwise provide financing. The fact that the retailer may then be required to subscribe to some normally optional services can hardly be viewed as an inducement for the retailer to rely on the wholesaler to provide these services, or to obtain financial assistance from the wholesaler. If anything, such requirements might be expected to deter retailers from obtaining wholesaler financing.

With the exception of the services required when a wholesaler provides financing, the record shows that wholesalers impose no significant controls over the retailers who affiliate with voluntary chains. In marked contrast to the typical franchisee, the retailer can even terminate its affiliation on relatively short notice, such as thirty days, provided its financial obligations to the wholesaler have been met. Moreover, retailers owning multiple stores are free to belong to more than one voluntary chain, and the record indicates that a number of them do, in fact, participate in chains sponsored by more than one wholesaler. By comparision, the ownership of different franchises in the same business is commonly prohibited by the non-competition clauses to be found in most franchise agreements.

Consequently, we conclude that the conditions which permit abuses in franchising are not characteristic of voluntary chain relationships between wholesale grocers and retailers. As we have noted, affiliating retailers typically have prior experience in the business, ample time to review and consider the affiliation offer, and far less exposure to the risk and reliance confronting the franchisees the rule is designed to protect. Even where franchise rule coverage would technically result from required payments that exceed the $500 threshold of the rule's minimum investment exclusion, we think our original conclusion when the franchise rule was promulgated is still valid:

> While similar in many respects to franchising, the wholesaler sponsored voluntary chains differ from franchising in that the retailers associate with the wholesalers voluntarily and with little risk.[16]

---

[11] 16 CFR 436.2(a) (1) and (2); *see also* Final Interpretive Guides, 44 FR 49966, 49967 (Aug. 24, 1979).

[12] 43 FR at 59703 n.55.

[13] The record shows that wholesalers may also offer site selection, store planning and related services to retailers desiring assistance in opening a new location.

[14] Optional payments not required as a condition of obtaining a franchise do not satisfy the third coverage prerequisite. 43 FR at 59703 n.33. *See e.g.*, Informal Staff Advisory Opinion to Chrysler Corp., CCH Business Franchise Guide ¶6563 at 9563 (Aug. 10, 1979), *ratified by the Commission*, Oct. 5, 1979. Although some wholesalers charge nominal monthly affiliation and sign rental fees—typically less than $20—such fees do not exceed the $500 threshold of the minimum investment exclusion from coverage. 16 CFR 436.2(a)(3)(iii).

[15] A payment is "required as a condition of obtaining or commencing the franchise operation," 16 CFR 436.2(a)(2), if it is required by the terms of the contract offer or is "in fact necessary to begin operation." 43 FR at 59703 n. 50. All required payments made prior to and within the first six months of franchise operations count toward the $500 threshold of the minimum investment exclusion from coverage, 16 CFR 436.2(a)(3)(iii), and the record shows that even one month's rental or loan payments typically exceed that amount.

[16] 43 FR at 59704 n. 61.

Economic Incentives

Not only are the conditions which permit franchise abuses noteworthy for their absence from the grocery industry, but the structure of economic incentives actively inhibits wholesalers from committing unfair or deceptive acts and practices. Were it not for this, it would be difficult, if not impossible, to conclude that franchise rule coverage is unnecessary where financial assistance is offered.

The primary economic fact of life in the grocery business is intense price competition at the retail level. The record documents the fact that competition holds retailer profit margins at very low levels—typically one percent or less. Success and survival in the business require retailers to minimize costs and maximize sales volumes. Four consequences of this competition act as significant deterrents to wholesaler abuses in voluntary chain relationships.

First, wholesalers are unable to charge large front-end affiliation fees. Affiliating retailers cannot pass such fees on to their customers without risk of pricing themselves out of the market, and their profit margins are not sufficient to absorb them. The record confirms that initial affiliation fees are quite modest as a result—typically less than $100. Thus, there are no quick profits to be made from recruiting new affiliates; consequently, no economic incentive exists for misrepresentations to obtain them. In contrast, the incentive of substantial profits from initial franchise fees has led to well-documented sales abuses by fly-by-night franchise and business opportunity promoters.

Second, wholesalers cannot expect significant profits from continuing affiliation fees. While the record suggests that nominal monthly membership or sign rental fees are relatively common,[17] wholesalers cannot charge large on-going fees, or otherwise seek to profit at the expense of affiliated retailers, without jeopardizing the retailers' competitive position. Instead, wholesalers are constrained by retail competition to make their profit from the usual mark-up on the groceries they supply, while offering other services at cost or close to it. Thus, wholesalers stand to profit most from long-term voluntary chain affiliations, and lack the incentive franchisors can have to make short-term profits at the expense of their franchisees.

Third, unlike franchisors, wholesalers have no particular economic incentive to sell affiliation to retailers or other investors who might finance expansion of the voluntary chain. Since wholesalers profit from long-term supply relationships, rather than affiliation, they lack any significant incentive to employ unfair or deceptive practices to promote voluntary chain membership. Thus, the chain identity that affiliation offers is regarded in the industry as just another optional service provided by the wholesaler.[18] Franchisors, in contrast, typically have every incentive to expand their franchise systems as rapidly as possible, and to entice investors who can supply the necessary expansion capital to become franchisees.

Fourth, wholesalers have direct financial incentives to avoid unfairness or deception in promoting affiliation. When the rule would technically apply because a wholesaler provides financial assistance to an affiliating retailer, the record indicates that the wholesaler's losses from a store's failure can equal or exceed the retailer's. However, an even more important incentive for wholesalers to refrain from any deception that might result in financial injury to an affiliate is the wholesaler's necessary concern for preserving its good business reputation with both the affiliated and unaffiliated local retailers it serves. The loss of even one affiliate attributing a business failure to wholesaler misconduct could jeopardize a number of profitable supply relationships.

Conclusion

For these reasons, we conclude that competition in the grocery industry removes any significant incentive for wholesaler abuses in making affiliation offers. The lack of such an incentive, together with the absence of conditions that could allow abuses to occur, persuades us that there is no realistic likelihood of wholesaler misconduct in the future, just as the lack of evidence of prior abuses or requests for protection from interested parties would suggest. Thus, we conclude that franchise rule coverage of affiliation offers is not necessary to prevent the unfair or deceptive acts and practices addressed by the rule, and that an unqualified exemption from coverage should be granted since the statutory standard is met.

Our determination is unavoidably based, of course, on a forecast of the need for coverage based on the record before us of past and present conditions in the grocery industry. We recognize both that circumstances may change and that there can be no guarantee that abuses will never occur in the future. However, any isolated misconduct will be subject to scrutiny under Section 5 of the FTC Act, and the need for disclosure can be reevaluated if changed conditions ever result in widespread abuses.

Although the record in this proceeding clearly supports an exemption, there is no unanimity in the comments on the variety of proposals advanced for defining the class to whom the exemption should apply. These definitional problems can be traced to the desire of some wholesale grocers who do business as convenience store franchisors to gain an exemption for their franchise sales as well. If such an exemption is appropriate, it is not apparent on this record, which suggests, if anything, that convenience store franchises do not share the unique characteristics that minimize the potential for abuse in offers of voluntary chain affiliation.

We have determined, therefore, that the exemption we grant should apply only to voluntary chain affiliation offers, and not to convenience store franchises. Accordingly, an exemption is hereby granted from the requirements of Part 436 for:

The advertising, offering, licensing, contracting, sale or other promotion by a wholesale grocer of a voluntary chain affiliation to which Part 436 would not apply but for required payments to be made by an affiliating retailer to the wholesaler as a result of the retailer's voluntary election to obtain financial assistance from the wholesaler.

It is so ordered.

By direction of the Commission.

Benjamin I. Berman,

Acting Secretary.

[FR Doc. 83-6078 Filed 3-9-83; 8:45 am]

BILLING CODE 6750-01-M

[17] *See* note 14, *supra*, at 8.

[18] In fact, as the record reflects, wholesalers first offered the option of voluntary chain affiliation several decades ago in order to help the independent grocers they supplied to compete successfully with major grocery chains.

Staff Accounting Bulletin No. 50

The staff herein adds Section F to Topic 1 of the Staff Accounting Bulletin Series. This section discusses the requirements for financial statements and industry guide disclosures in filings involving the formation of a bank holding company structure over a bank and requirements for subsequent filings on Form 10–K.

Topic 1: Financial Statements

* * * * *

F. Financial Statement Requirements in Filings Involving the Formation of a One-Bank Holding Company

Facts: Holding Company A is organized for the purpose of issuing common stock to acquire all of the common stock of Bank A. Under the plan of reorganization, each share of common stock of Bank A will be exchanged for one share of common stock of the holding company. The shares of the holding company to be issued in the transaction will be registered on Form S–14. The holding company will not engage in any operations prior to consummation of the reorganization, and its only significant asset after the transaction will be its investment in the bank. The bank has been furnishing its shareholders with an annual report that includes financial statements that comply with generally accepted accounting principles.

Item 15 of Schedule 14A of the proxy rules[1] provides that financial statements generally are not necessary in proxy material relating only to changes in legal organization, (such as reorganizations involving the issuer and one or more of its totally held subsidiaries).

Question 1: Must the financial statements and the information required by Securities Act Industry Guide ("Guide 3")[2] for Bank A be included in the initial registration statement on Form S–14?

Interpretive Response: No, provided that certain conditions are met. The staff will not take exception to the omission of financial statements and Guide 3 information in the initial registration statement on Form S–14 if all of the following conditions are met:

- There are no anticipated changes in the shareholders' relative equity ownership interest in the underlying bank assets, except for redemption of no more than a nominal number of shares of unaffiliated persons who dissent;
- In the aggregate, only nominal borrowings are to be incurred for such purposes as organizing the holding company, to pay nonaffiliated persons who dissent, or to meet minimum capital requirements;
- There are no new classes of stock authorized other than those corresponding to the stock of Bank A immediately prior to the reorganization;
- There are no plans or arrangements to issue any additional shares to acquire any business other than Bank A; and,
- There has been no material adverse change in the financial condition of the bank since the latest fiscal year end included in the annual report to shareholders.

If at the time of filing the S–14, a letter is furnished to the staff stating that all of these conditions are met, it will not be necessary to request the Division of Corporation Finance to waive the financial statement or Guide 3 requirements of Form S–14.

Although the financial statements may be omitted, the filing should include a section captioned, "Financial Statements," which states either that an annual report containing financial statements for at least the latest fiscal year prepared in conformity with generally accepted accounting principles was previously furnished to shareholders or is being delivered with the prospectus. If financial statements have been previously furnished, it should be indicated that an additional copy of such report for the latest fiscal year will be furnished promptly upon request without charge to shareholders. The name and address of the person to whom the request should be made should be provided. One copy of such annual report should be furnished supplementally with the initial filing for purposes of staff review.

If any nominal amounts are to be borrowed in connection with the formation of the holding company, a statement of capitalization should be included in the filing which shows Bank A on an historical basis, the pro forma adjustments, and the holding company on a pro forma basis. A note should also explain the pro forma effect, in total and per share, which the borrowings would have had on net income for the latest fiscal year if the transaction had occurred at the beginning of the period.

Question 2: Are the financial statements of Bank A required to be audited for purposes of the initial Form S–14 or the subsequent Form 10–K report?

Interpretive Response: The staff will not insist that the financial statements in the annual report to shareholders used to satisfy the requirements of the initial Form S–14 be audited.

The consolidated financial statements of the holding company to be included in the registrant's initial report on Form 10–K should comply with the applicable financial statement requirements in Regulation S–X at the time such annual report is filed. However, the regulations also provide that the staff may allow one or more of the required statements to be unaudited where it is consistent with the protection of investors.[3] Accordingly, the policy of the Division of Corporation Finance is as follows:

- The registrant should file audited balance sheets as of the two most recent fiscal years and audited statements of income and changes in financial position for each of the three latest fiscal years, with appropriate footnotes and schedules as required by Regulation S–X unless the financial statements have not previously been audited for the periods required to be filed. In such cases, the Division will not object if the financial statements in the first annual report on Form 10–K (or the special report filed pursuant to Rule 15d–2)[4] are audited only for the two latest fiscal years.[5] This policy only applies to filings on Form 10–K, and not to any Securities Act filings made after the initial S–14 filing.

The above procedure may be followed without making a specific request of the Division of Corporation Finance for a waiver of the financial statement requirements of Form 10–K.

The information required by Guide 3 should also be provided in the Form 10–K for at least the periods for which audited financial statements are furnished. If some of the statistical information for the two most recent fiscal years for which audited financial statements are included (other than information on nonperforming loans and the summary of loan loss experience) is unavailable and cannot be obtained without unwarranted or undue burden or expense, such data may be omitted provided a brief explanation in support of such representation is included in the

---

[1] Item 13(c) of Schedule 14A (17 CFR Part 240).

[2] Item 801 of Regulation S–K (17 CFR Part 229).

[3] Rule 3–13 of Regulation S–X (17 CFR Part 210).

[4] Rule 15d–2 (17 CFR Part 240) would be appliable if the annual report furnished with the Form S–14 was not for the registrant's most recent fiscal year. In such a situation, Rule 15d–2 would require the registrant to file a special report within 90 days after the effective date of the Form S–14 furnishing audited financial statements for the most recent fiscal year.

[5] Unaudited statements of income and changes in financial position should be furnished for the earliest period.

report on Form 10–K. In all cases, however, information with respect to nonperforming loans and loan loss experience, or reasonably comparable data, must be furnished for at least the two latest fiscal years in the initial 10–K. Thereafter, for subsequent years in reports on Form 10–K, all of the Guide 3 information is required; Guide 3 information which had been omitted in the initial 10–K in accordance with the above procedure can be excluded in any subsequent 10–K's.

Question 3: Can organization costs incurred to register securities issued for the formation of one-bank holding companies be capitalized?

Interpretive Response: The staff will not object if organizational costs such as legal, printing and other related costs are capitalized and amortized against income over a period not to exceed 5 years. Any such organization costs should be shown in the balance sheet as an asset, and not as a reduction of shareholders' equity.

Audit fees incurred would not be deemed to be organizational costs and should be expensed.

17 CFR Part 231

[Release No. 33–6455]

Interpretive Release on Regulation D

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Interpretations.

SUMMARY: The Commission has authorized the issuance of this release setting forth the views of its Division of Corporation Finance on various interpretive questions regarding the rules contained in Regulation D under the Securities Act of 1933. These views are being published to answer frequently raised questions with respect to the regulation.

FOR FURTHER INFORMATION, CONTACT: David B. H. Martin, Jr., Office of Chief Counsel, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549, (202) 272–2573.

SUPPLEMENTARY INFORMATION: In Release No. 33–6389 (March 8, 1982) (47 FR 11251), the Commission adopted Regulation D (17 CFR 230.501–.506) which provides three exemptions from the registration requirements of the Securities Act of 1933 (the "Securities Act" or the "Act") (15 U.S.C. 77a–77bbbb (1976 & Supp. IV 1980), as amended by the Bus Regulatory Reform Act of 1982, Pub. L. No. 97–261 section 19(d), 96 Stat. 1121 (1982)).[1] Regulation D became effective on April 15, 1982.

In the course of administering the regulation, the staff of the Division of Corporation Finance has answered numerous oral and written requests for interpretation of the new provisions. This release is intended to assist those persons who wish to make offerings in reliance on the exemptions in Regulation D by presenting the staff's views on frequently raised questions. As indicated in Preliminary Note 3 to the regulation, Regulation D is intended to be a basic element in a uniform system of federal-state exemptions. As such, aspects of Regulation D have been incorporated in many state statutes and regulations. The interpretations set forth in this release relate only to the federal provisions.

Regulation D is composed of six rules, Rules 501–506. The first three rules set forth general terms and conditions that apply in whole or in part to the exemptions. The questions arising under Rules 501–503 fall into four general categories: definitions, disclosure requirements, operational conditions, and notice of sale requirements. The exemptions of Regulation D are set forth in Rules 504–506. Questions concerning those rules usually raise issues pertaining to more than one exemption. This release, an outline of which follows, is organized so as to reflect this pattern of inquiries.

I. Definitions—Rule 501
A. Accredited Investor—Rule 501(a) (Questions 1–30)
1. General
2. Certain Institutional Investors—Rules 501(a)(1)–(3)
3. Insiders—Rule 501(a)(4)
4. $150,000 Purchasers—Rule 501(a)(5)
a. $150,000 Purchase
b. 20 Percent of Net Worth Limitation
5. Natural Persons—Rules 501(a)(6)–(7)
6. Entities Owned By Accredited Investors—Rule 501(a)(8)
7. Trusts as Accredited Investors
B. Aggregate Offering Price—Rule 501(c) (Questions 31–36)
C. Executive Officer—Rule 501(f) (Question 37)
D. Purchaser Representative—Rule 501(h) (Questions 38–39)
II. Disclosure Requirements—Rule 502(b)
A. When Required (Questions 40–41)
B. What Required (Questions 42–51)
1. Non-reporting Issuers—Rule 502(b)(2)(i)
2. Reporting Issuers—Rule 502(b)(2)(ii)

B. Rule 505 (Question 66)
C. Questions Relating to Rules 504 and 505 (Questions 67–71)
D. Rule 506 (Questions 72–73)
E. Questions Relating to Rules 504–506 (Questions 74–80)
V. Notice of Sale—Form D (Questions 81–82)

I. Definitions—Rule 501

A. Accredited Investor—Rule 501(a)

Defined in Rule 501(a), the term "accredited investor" is significant to the operation of Regulation D.[2] Under Rule 501(e), for instance, accredited investors are not included in computing the number of purchasers in offerings conducted in reliance on Rules 505 and 506. Also, if accredited investors are the only purchasers in offerings under Rules 505 and 506, Regulation D does not require delivery of specific disclosure as a condition of the exemptions. Finally, in an offering under Rule 506, the issuer's obligation to ensure the sophistication of purchasers applies to investors that are not accredited. *See* Rule 506(b)(2)(ii).

The definition sets forth eight categories of investor that may be accredited. The following questions and answers cover certain issues under various of those categories. Given the frequency of questions regarding the application of the definition to trusts, however, there is a separate section addressing that area.

1. *General.* The definition of "accredited investor" includes any person who comes within or "who the issuer reasonably believes" comes within one of the enumerated categories "at the time of the sale of the securities to that person." What constitutes "reasonable" belief will depend on the facts of each particular case. For this reason, the staff generally will not be in

---

[1] Prior releases leading to the adoption of Regulation D included Release No. 33–6274 (December 23, 1980) (46 FR 2631) in which the Commission considered and requested comments on various exemptions under the Securities Act and Release No. 33–6339 (August 7, 1981) (46 FR 41791) in which the Commission published proposed Regulation D for comment.

[2] The term also is essential to the operation of section 4(6) of the Securities Act which exempts certain transactions involving sales solely to accredited investors. The definition of accredited investor for section 4(6) is found at section 2(15) of the Securities Act and Rule 215 (17 CFR 230.321). Rule 501(a) combines and repeats those provisions. As a result, interpretations regarding the definition of "accredited investor" in Regulation D also apply to the definition of that term under section 4(6).

a position to express views or otherwise endorse any one method for ascertaining whether an investor is accredited.

(1) *Question:* A director of a corporate issuer purchases securities offered under Rule 505. Two weeks after the purchase, and prior to completion of the offering, the director resigns due to a sudden illness. Is the former director an accredited investor?

Answer: Yes. The preliminary language to Rule 501(a) provides that an investor is accredited if he falls into one of the enumerated categories "at the time of the sale of securities to that person." One such category includes directors of the issuer. *See* Rule 501(a)(4). The investor in this case had that status at the time of the sale to him.[3]

2. *Certain Institutional Investors—Rules 501(a)(1)–(3).* (2) *Question:* A national bank purchases $100,000 of securities from a Regulation D issuer and distributes the securities equally among ten trust accounts for which it acts as trustee. Is the bank an accredited investor?

Answer: Yes. Rule 501(a)(1) accredits a bank acting in a fiduciary capacity.[4]

(3) *Question:* An ERISA employee benefit plan will purchase $200,000 of the securities being offered. The plan has less than $5,000,000 in total assets and its investment decisions are made by a plan trustee who is not a bank, insurance company, or registered investment adviser. Does the plan qualify as an accredited investor?

Answer: Not under Rule 501(a)(1). Rule 501(a)(1) accredits an ERISA plan that has a plan fiduciary which is a bank, insurance company, or registered investment adviser or that has total assets in excess of $5,000,000. The plan, however, may be an accredited investor under Rule 501(a)(5), which accredits certain persons who purchase at least $150,000 of the securities being offered.

(4) *Question:* A state run, not-for-profit hospital has total assets in excess of $5,000,000. Because it is a state agency, the hospital is exempt from federal income taxation. Rule 501(a)(3) accredits any organization described in section 501(c)(3) of the Internal Revenue Code that has total assets in excess of $5,000,000. Is the hospital accredited under Rule 501(a)(3)?

Answer: Yes. This category does not require that the investor has received a ruling on tax status under section 501(c)(3) of the Internal Revenue Code. Rather, Rule 501(a)(3) accredits an investor that falls within the substantive description in that section.[5]

(5) *Question:* A not-for-profit, tax exempt hospital with total assets of $3,000,000 is purchasing $100,000 of securities in a Regulation D offering. The hospital controls a subsidiary with total assets of $3,000,000. Under generally accepted accounting principles, the hospital may combine its financial statements with that of its subsidiary. Is the hospital accredited?

Answer: Yes, under Rule 501(a)(3). Where the financial statements of the subsidiary may be combined with those of the investor, the assets of the subsidiary may be added to those of the investor in computing total assets for purposes of Rule 501(a)(3).[6]

3. *Insiders—Rule 501(a)(4).* (6) *Question:* The executive officer of a parent of the corporate general partner of the issuer is investing in the Regulation D offering. Is that individual an accredited investor?

Answer: Rule 501(a)(4) accredits only the directors and executive officers of the general partner itself. Unless the executive officer of the parent can be deemed an executive officer of the subsidiary,[7] that individual is not an accredited investor.

4. *$150,000 Purchasers—Rule 501(a)(5).* This provision accredits any person [8] who satisfies two separate tests. To be accredited under Rule 501(a)(5), an investor must purchase at least $150,000 of the securities being offered, by one or a combination of four specific methods: cash, marketable securities, an unconditional obligation to pay cash or marketable securities over not more than five years, and cancellation of indebtedness. The rule also requires that "the total purchase price" may not exceed 20 percent of the purchaser's net worth. The two tests under Rule 501(a)(5) must be considered separately. Thus, for instance, in computing the "total purchase price" for the 20 percent of net worth limitation, the investor may have to include amounts that could not be included toward the $150,000 purchase test.

a. $150,000 Purchase. (7) *Question:* Two issuers, a general partner and its limited partnership, are selling their securities simultaneously as units consisting of common stock and limited partnership interests. The issues are part of a plan of financing made for the same general purpose. If an investor purchases $150,000 of these units, would it satisfy the $150,000 purchase element of Rule 501(a)(5)?

Answer: Yes. The issuers are affiliated and the simultaneous sale of their separate securities as units for a single plan of financing would be deemed one integrated offering. Rule 501(a)(5) applies to a purchase "of the securities being offered." The rule thus applies not to the securites of a particular issuer, but to the securities of a particular offering[9]

(8) *Question:* An investor will purchase securities in cash installments. Each installment payment will include amounts due on the principal as well as interest. If the total of all payments is $150,000, will the investor have purchased "at least $150,000 of the securities being offered" for purposes of Rule 501(a)(5)?

Answer: No. Under Rule 501(a)(5), any amount constituting interest due on the unpaid purchase price is not payment for the "securities being offered."

(9) *Question:* The installment payments for interests in a limited partnership that will develop commercial real estate will be conditioned upon completion of certain phases of the project. Will the obligation to make those payments be deemed "an unconditional obligation to pay" for purposes of Rule 501(a)(5)?

Answer: Yes, as long as the only conditions relate to completion of successive stages of the development project.

(10) *Question:* An investor will purchase securities in a Regulation D offering by delivering $75,000 in cash and a letter of credit for $75,000. Will such a purchase satisfy the $150,000 element of Rule 501(a)(5)?

Answer: No. Because there is no assurance that the letter of credit will ever be drawn against, the staff does not deem it to be an unconditional obligation to pay.

(11) *Question:* In connection with the sale of limited partnership interests in an oil and gas drilling program, an investor in a Regulation D offering commits to pay subsequent assessments

---

[3] Preliminary Note 6 to Regulation D would support a different analysis if it could be shown that the director's appointment or resignation was "part of a plan or scheme to evade the registration provisions of the Act."

[4] Rule 501(a)(1) refers to "[a]ny bank as defined in section 3(a)(2) of the Act." Section 3(a)(2) provides that the term "bank" includes "any national bank." Section 3(a)(2) also provides that where a common or collective trust fund is involved, the term "bank" has the same meaning as in the Investment Company Act of 1940 (the "Investment Company Act") (15 U.S.C. 80a–1–80a–65 (1976 & Supp. IV 1980)). Section 2(a)(5) of the Investment Company Act defines "bank."

[5] *See* letter re *Voluntary Hospitals of America, Inc.* dated November 30, 1982.

[6] *See* letter re *Voluntary Hospitals of America, Inc.* dated September 10, 1982.

[7] *See* Question 37.

[8] Section 2(2) of the Securities Act includes corporations and partnerships within the definition of "person."

[9] *See* letter re *Intuit Telecom Inc.* dated March 24, 1982.

that are mandatory, non-contingent, and for which the investor will be personally liable. Will the commitment to pay the assessments constitute an "unconditional obligation to pay" under Rule 501(a)(5)?

Answer: Yes. The assessments are essentially installment payments for which the investor makes the investment decision at the time the limited partnership interest originally is purchased.[10]

(12) *Question:* If the assessments in Question 11 are voluntary, contingent and non-recourse, can they be included in determining whether or not the investor has purchased $150,000 of the securities being offered?

Answer: No. Voluntary assessments of this nature are not deemed to constitute an unconditional obligation to pay.[11]

(13) *Question:* A purchaser of interests in a limited partnership makes a partial down payment and commits unconditionally to pay the balance over five years. Formation of the partnership is conditioned upon the sale of a specified number of interests. Under Rule 501(a)(5), when must the five year period for installment payments begin to run?

Answer: Rule 501(a)(5) provides that the unconditional obligation is to be discharged "within five years of the sale of the securities to the purchaser." For ease in the administration of an offering that is conditioned on a certain minimum level of sales, the staff believes it is reasonable to compute the length of installment obligations from the same date for the investors involved in reaching that minimum. Therefore, without any bearing on when the sale of the security actually occurs, the five-year time period of the investor's obligation may be measured from the date such minimum level of sales has been reached.[12]

b. 20 Percent of Net Worth Limitation

(14) *Question:* Where an investor makes installment payments composed of principal and interest, must the interest payments be included in computing the "total purchase price" for purposes of meeting the 20 percent of net worth limitation?

Answer: No. The interest is not part of the total purchase price but rather is an expense associated with financing the total purchase price.

(15) *Question:* A corporate investor will purchase $200,000 of the securities being offered for cash. Additionally, the investor will deliver an irrevocable letter of credit for $50,000 which the issuer will use as collateral in connection with a line of credit it will establish with a lending institution. Must the issuer include the $50,000 letter of credit when determining whether or not the purchaser's total purchase price exceeds 20 percent of its net worth under Rule 501(a)(5)?

Answer: Yes. Since the investor has committed to pay the $50,000 at the election of the issuer, that amount must be included with other forms of consideration in order to measure what percentage of the investor's net worth has been committed in the investment.[13]

(16) *Question:* As part of the purchase of an interest in a sale and lease-back program, the purchaser will deliver "non-recourse" debt where the source of payment for the debt is limited exclusively to the income generated by the security being purchased or the assets of the entity in which the security is being purchased. Must the non-recourse debt be included in the total purchase price for purposes of the 20 percent of net worth limitation under Rule 501(a)(5)?

Answer: No. Because the investor has no personal liability for the non-recourse debt, and because no part of the investor's assets at the time of purchase is available as a source of payment for the debt, the debt should not be included as part of the purchase price.[14]

(17) *Question:* Where the purchaser is a natural person, Rule 501(a)(5) provides that the total purchase price may be measured against the purchaser's net worth combined with that of a spouse. Would property held solely by one spouse be available for calculating the net worth of the other spouse who is making the $150,000 investment?

Answer: Yes.

(18) *Question:* An investment general partnership is purchasing securities in a Regulation D offering. The partnership was not formed for the specific purpose of acquiring the securities being offered. May the issuer consider the aggregate net worth of the general partners in calculating the net worth of the partnership?

Answer: Yes. An investment general partnership is functionally a vehicle in which profits and losses are passed through to general partners and in which the net worths of the general partners are exposed to the risk of partnership investments.[15]

(19) *Question:* A totally held subsidiary [16] makes a cash investment of $200,000 in a Regulation D offering. May that subsidiary use the consolidated net worth of its parent in determining whether or not its total purchase price exceeds 20 percent of its net worth?

Answer: Yes.[17]

5. *Natural Persons—Rules 501(a) (6)–(7).* Rules 501(a) (6) and (7) apply only to natural persons. Paragraph (6) accredits any natural person with a net worth at the time of purchase in excess of $1,000,000. If the investor is married, the rule permits the use of joint net worth of the couple. Paragraph (7) accredits any natural person whose income has exceeded $200,000 in each of the two most recent years and is reasonably expected to exceed $200,000 in the year of the investment.

(20) *Question:* A corporation with a net worth of $2,000,000 purchases securities in a Regulation D offering. Is the corporation an accredited investor under Rule 501(a)(6)?

Answer: No. Rule 501(a)(6) is limited to "natural" persons.

(21) *Question:* In calculating net worth for purposes of Rule 501(a)(6), may the investor include the estimated fair market value of his principal residence as an asset?

Answer: Yes. Rule 501(a)(6) does not exclude any of the purchaser's assets from the net worth needed to qualify as an accredited investor.

(22) *Question:* May a purchaser take into account income of a spouse in determining possible accreditation under Rule 501(a)(7)?

Answer: No. Rule 501(a)(7) requires "individual income" over $200,000 in order to qualify as an accredited investor.

(23) *Question:* May a purchaser include unrealized capital appreciation in calculating income for purposes of Rule 501(a)(7)?

Answer: Generally, no.

6. Entities Owned by Accredited Investors—Rule 501(a)(8). Any entity in which each equity owner is an accredited investor under any of the qualifying categories, except that of the $150,000 purchaser, is accredited under Rule 501(a)(8).

(24) *Question:* All but one of the shareholders of a corporation are

[17] *See* letter re *Federated Financial Corporation* dated May 13, 1982.

accredited investors by virtue of net worth or income. The unaccredited shareholder is a director who bought one share of stock in order to comply with a requirement that all directors be shareholders of the corporation. Is the corporation an accredited investor under Rule 501(a)(8)?

Answer: No. Rule 501(a)(8) requires "all of the equity owners" to be accredited investors. The director is an equity owner and is not accredited. Note that the director cannot be accredited under Rule 501(a)(4). That provision extends accreditation to a director of the issuer, not of the investor.

(25) *Question:* Who are the equity owners of a limited partnership?

Answer: The limited partners.

7. Trusts as Accredited Investors.

(26) *Question:* May a trust qualify as an accredited investor under Rule 501(a)(1)?

Answer: Only in directly. Although a trust standing alone cannot be accredited under Rule 501(a)(1), if a bank is its trustee and makes the investment on behalf of the trust, the trust will in effect be accredited by virtue of the provision in Rule 501(a)(1) that accredits a bank acting in a fiduciary capacity.

(27) *Question:* May a trust qualify as an accredited investor under Rule 501(a)(5)?

Answer: Yes. The Division interprets "person" in Rule 501(a)(5) to include any trust.[18]

(28) *Question:* In qualifying a trust as an accredited investor under Rule 501(a)(5), whose net worth should be considered in determining whether the total purchase price meets the 20 percent of net worth limitation test?

Answer: The net worth of the trust.

(29) *Question:* A trustee of a trust has a net worth of $1,500,000. Is the trustee's purchase of securities for the trust that of an accredited investor under Rule 501(a)(6)?

Answer: No. Except where a bank is a trustee, the trust is deemed the purchaser, not the trustee. The trust is not a "natural" person.

(30) *Question:* May a trust be accredited under Rule 501(a)(8) if all of its beneficiaries are accredited investors?

Answer: Generally, no. Rule 501(a)(8) accredits any entity if all of its "equity owners" are accredited investors. The staff does not interpret this provision to apply to the beneficiaries of a conventional trust. The result may be different, however, in the case of certain non-conventional trusts where, as a result of powers retained by the grantors, a trust as a legal entity would be deemed not to exist.[19] Thus, where the grantors of a revocable trust are accredited investors under Rule 501(a)(6) (*i.e.* net worth exceeds $1,000,000) and the trust may be amended or revoked at any time by the grantors, the trust is accredited because the grantors will be deemed the equity owners of the trust's assets.[20] Similarly, where the purchase of Regulation D securities is made by an Individual Retirement Account and the participant is an accredited investor, the account would be accredited under Rule 501(a)(8).

B. Aggregate Offering Price—Rule 501(c)

The "aggregate offering price," defined in Rule 501(c), is the sum of all proceeds received by the issuer for issuance of its securities. The term is important to the operation of Rules 504 and 505, both of which impose a limitation on the aggregate offering price as a specific condition to the availability of the exemption.[21]

(31) *Question:* The sole general partner of a real estate limited partnership contributes property to the program. Must that property be valued and included in the overall proceeds of the offering as part of the aggregate offering price?

Answer: No, assuming the property is contributed in exchange for a general partnership interest.

(32) *Question:* An owner of a mining or oil and gas property is selling interests in the property to investors for cash. The owner will retain a royalty interest in the property. Must any subsequent royalty payments be included in the aggregate offering price of the property interests?

Answer: No. Royalty payments to the seller of the property are treated as operating expenses, rather than capitalized costs for the property. As such, the royalty payments are not part of the consideration received by the issuer for issuance of the securities.

(33) *Question:* Where the investors pay for their securities in installments and these payments include an interest component, must the issuer include interest payments in the "aggregate offering price?"

Answer: No. The interest payments are not deemed to be consideration for the issuance of the securities.[22]

(34) *Question:* An offering of interests in an oil and gas limited partnership provides for additional voluntary assessments. These assessments, undermined at the time of the offering, may be called at the general partner's discretion for developmental drilling activities. Must the assessments be included in the aggregate offering price, and if so, in what amount?

Answer: Because it is unclear that the assessments will ever be called, and because if they are called, it is unclear at what level, the issuer is not required to include the assessments in the aggregate offering price. In fact, the assessments will be consideration received for the issuance of additional securities in the limited partnership. This issuance will need to be considered along with the original issuance for possible integration, or, if not integrated, must find its own exemption from registration.

(35) *Question:* In purchasing interests in an oil and gas partnership, investors agree to pay mandatory assessments. The assessments, essentially installment payments, are non-contingent and investors will be personally liable for their payment. Must the issuer include the assessments in the aggregate offering price?

Answer: Yes.[23]

(36) *Question:* As part of their purchase of securities, investors deliver irrevocable letters of credit. Must the letters of credit be included in the aggregate offering price?

Answer: If these letters of credit were drawn against, the amounts involved would be considered part of the aggregate offering price. For this reason, in planning the transaction, the issuer should consider the full amount of the letters of credit in calculating the aggregate offering price.

---

[18] Section 2(2) of the Securities Act includes "a trust" within the definition of "person" but limits that inclusion to "a trust where the interest or interests of the beneficiary or beneficiaries are evidenced by a security." The Division does not view that limitation as being necessary in the context of a trust as a purchaser of securities under Rule 501(a)(5).

[19] The result would also be different in the case of a business trust, a real estate investment trust, or other similar entities.

[20] *See* letter re *Rule 501(a)(8) of Regulation D* dated July 18, 1982.

[21] The basis for a limitation on the aggregate offering price derives from section 3(b) of the Securities Act. Section 3(b) accords authority to the Commission to adopt rules exempting any class of securities as long as no issue of securities is exempted "where the aggregate amount at which such issue is offered to the public exceeds $5,000,000." *See also* section 4(6) which exempts a transaction involving offers and sales solely to one or more accredited investors "if the aggregate offering price of an issue" does not exceed the amount allowed under section 3(b).

[22] This presumes that the payments are in fact for interest. *See* Preliminary Note 6 to Regulation D.

[23] *See* letter to *Kim R. Clark, Esq.* dated November 8, 1982.

C. Executive Officer—Rule 501(f)

The definition of executive officer in Rule 501(f) is the same as that in Rule 405 of Regulation C (17 CFR 230.405).

(37) *Question:* The executive officer of the parent of the Regulation D issuer performs a policy making function for its subsidiary. May that individual be deemed an "executive officer" of the subsidiary?

Answer: Yes.

D. Purchaser Representative—Rule 501(h)

A purchaser representative is any person who satisfies, or who the issuer reasonably believes statisfies, four conditions enumerated in Rule 501(h). Beyond the obligations imposed by that rule, any person acting as a purchaser representative must consider whether or not he is required to register as a broker-dealer under section 15 of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78a-78kk (1976 & Supp. IV 1980)) or as an investment adviser under section 203 of the Investment Advisers Act of 1940 (15 U.S.C. 80b–1–80b–21 (1976 & Supp. IV 1980)).[24]

(38) *Question:* May the officer of a corporate general partner of the issuer qualify as a purchaser representative under Rule 501(h)?

Answer: Rule 501(h) provides that "an affiliate, director, officer or other employee of the issuer" may not be a purchaser representative unless the purchaser has one of three enumerated relationships with the representative. The staff is of the view that an officer or director of a corporate general partner comes within the scope of "affiliate, director, officer or other employee of the issuer."

(39) *Question:* May the issuer in a Regulation D offering pay the fees of the purchaser representative?

Answer: Yes. Nothing in Regulation D prohibits the payment by the issuer of the purchaser representative's fees. Rule 501(h)(4), however, requires disclosure of this fact.[25]

[24] *See* letters to *Winstead, McGuire, Sechrest & Trimble* dated February 21 and 25, 1975 and re *Kenisa Oil Company* dated April 6, 1982. Questions regarding registration as a broker-dealer should be directed to the Office of Chief Counsel, Divison of Market Regulation, (202) 272–2844. Questions regarding registration as an investment adviser should be directed to the Office of Chief Counsel, Division of Investment Management, (202) 272–2030.

[25] Note 3 to Rule 501(h) points out that disclosure of a material relationship between the purchaser representative and the issuer will not relieve the purchaser representative of the obligation to act in the interest of the purchaser.

II. Disclosure Requirements—Rule 502(b)

A. When Required

Rule 502(b)(1) sets forth the circumstances when disclosure of the kind specified in the regulation must be delivered to investors. The regulation requires the delivery of certain information "during the course of the offering and prior to sale" if the offering is conducted in reliance on Rule 505 or 506 and if there are unaccredited investors. If the offering is conducted in compliance with Rule 504 or if securities are sold only to accredited investors, Regulation D does not specify the information that must be disclosed to investors.[26]

(40) *Question:* An issuer furnishes potential investors a short form offering memorandum in anticipation of actual selling activities and the delivery of an expanded disclosure document. Does Regulation D permit the delivery of disclosure in two installments?

Answer: So long as all the information is delivered prior to sale, the use of a fair and adequate summary followed by a complete disclosure document is not prohibited under Regulation D. Disclosure in such a manner, however, should not obscure material information.

(41) *Question:* An issuer commences an offering in reliance on Rule 505 in which the issuer intends to make sales only to accredited investors. The issuer delivers those investors an abbreviated disclosure document. Before the completion of the offering, the issuer changes its intentions and proposes to make sales to non-accredited investors. Would the requirement that the issuer deliver the specified information to all purchasers prior to sale if any sales are made to non-accredited investors preclude application of Rule 505 to the earlier sales to the accredited investors?

Answer: No. If the issuer delivers a complete disclosure document to the accredited investors and agrees to return their funds promptly unless they should elect to remain in the program, the issuer would not be precluded from relying on Rule 505.

B. What Required

Regulation D divides disclosure into two categories: that to be furnished by non-reporting companies and that required for reporting companies. In either case, the specified disclosure is required to the extent material to an understanding of the issuer, its business and the securities being offered.

1. Non-Reporting Issuers—Rule 502(b)(2)(i). If the issuer is not subject to the reporting requirements of section 13 or 15(d) of the Exchange Act,[27] it must furnish the specified information "to the extent material to an understanding of the issuer, its business and the securities being offered." For offerings up to $5,000,000, the issuer should furnish the "same kind of information" as would be contained in Part I of Form S–18,[28] except that only the most recent year's financial statements need be certified. For offerings over $5,000,000, the issuer should furnish "the same kind of information" as would be required in Part I of an available registration statement.[29]

(42) *Question:* When an issuer is required to deliver specific disclosure, must that disclosure be in written form?

Answer: Yes.

(43) *Question:* Form S–18 requires the issuer's audited balance sheet as of the end of its most recently completed fiscal year or within 135 days if the issuer has been in existence for a shorter time. With a limited partnership that has been formed with minimal capitalization immediately prior to a Regulation D offering, must the Regulation D disclosure document contain an audited balance sheet for the issuer?

Answer: In analyzing this or any other disclosure question under Regulation D, the issuer starts with the general rule that it is obligated to furnish the specified information "to the extent material to an understanding of the issuer, its business, and the securities being offered." Thus, in this particular case, if an audited balance sheet is not material to the investor's understanding,

[26] As noted in Preliminary Note 1, Regulation D transactions are exempt from the registration requirements of the Securities Act, not the antifraud provisions. Thus, nothing in Regulation D states that an issuer need not give disclosure to an investor. Rather, the regulation provides that in certain instances the exemptions from registration will not be conditioned on a particular content, format or method of disclosure.

[27] An issuer is subject to section 13 reporting obligations if it has a class of securities registered under section 12 of the Exchange Act. An issuer is subject to section 15(d) reporting obligations if it has had a Securities Act registration statement go effective, or if in any year after the year of effectiveness, it has at least 300 holders of the class of securities to which the registration statement applied. In the latter instance, however, even if the issuer has 300 or more shareholders, it may not be subject to section 15(d) reporting obligations if it has had less than 500 shareholders and less than $3,000,000 in assets during the last three years. *See* Rule 15d–6 (17 CFR 240.15d–6) under the Exchange Act.

[28] *See* 17 CFR 239.30. Form S–18 is an abbreviated registration form for certain offerings not exceeding $5,000,000. The form is not available to issuers that report under the Exchange Act.

[29] Rules 502(b)(2)(i)(C) and 502(b)(2)(ii)(D) contain special provisions for foreign issuers recently adopted by the Commission. *See* Release No. 33–6437 (November 19, 1982) (47 FR 54764).

then the issuer may elect to present an alternative to its audited balance sheet.

(44) *Question:* Is Securities Act Industry Guide 5 [30] applicable in a $4,000,000 Regulation D offering of interests in a real estate limited partnership?

Answer: Rule 502(b)(2)(i)(A) requires the issuer to provide the same kind of information as that required in Part I of Form S–18.[31]

Form S–18 directs the issuer's attention to the Industry Guides noting that such guides "represent Division practices with respect to the disclosure to be provided by the affected industries in registration statements." In preparing its Regulation D offering material, therefore, an issuer of interests in a real estate limited partnership should consider Guide 5 in determining the disclosure that will be material to the investor's understanding of the issuer, its business and the securities being offered.

(45) *Question:* In a $4,000,000 Regulation D offering of interests in an oil and gas limited partnership, what are the issuer's disclosure obligations with respect to financial statements of the general partner?

Answer: Item 21(h) of Form S–18 provides that the issuer should furnish the audited balance sheet as of the end of the most recent fiscal year of any corporation or partnership that is a general partner of the issuer. For any general partner that is a natural person, in lieu of an audited balance sheet, the issuer may furnish a statement of that individual's net worth in the text of the disclosure document, where assets and liabilities are estimated at fair market value with provisions for estimated income taxes on unrealized gains.[32]

(46) *Question:* The issuer in a $3,000,000 Regulation D offering is a limited partnership that will acquire certain real estate operations with the offering proceeds. What is the appropriate consideration for disclosure of the operating history of these operations?

Answer: Item 21(g) of Form S–18, which provides special guidance for such disclosure, calls for the audited income statements of the operations, with certain exclusions, for the two most recent fiscal years. If the issuer can meet certain conditions, however, the instruction reduces that requirement to only one year of audited income statements.[33]

Under Regulation D, Rule 502(b)(2)(i)(A) provides that only the financial statements for the issuer's most recent fiscal year must be certified in an offering not in excess of $5,000,000. The staff is of the view that this provision applies to all financial statements in the disclosure document. Thus, in the Regulation D offering described, the following considerations apply. If the issuer can meet the conditions in Item 21(g) of Form S–18, it may present one year of audited income statements on the operations to be acquired. If the issuer cannot meet the conditions in Form S–18, then it should present two years of income statements, only one of which must be audited.

(47) *Question:* If the issuer in Question 46 cannot obtain the financial statements on the operations to be acquired without unreasonable effort or expense, what further considerations are applicable under Regulation D?

Answer: Rule 502(b)(2)(i)(A) provides that "[i]f the issuer is a limited partnership and cannot obtain the required financial statements without unreasonable effort or expense, it may furnish financial statements that have been prepared on the basis of federal income tax requirements and examined and reported on in accordance with generally accepted auditing standards by an independent public or certified accountant." The staff interprets this provision to apply to all financial statements that the issuer presents in the offering document. Thus, the issuer described above may present tax basis operating statements on the operations to be acquired.[34]

(48) *Question:* Has the Commission defined or will the staff issue interpretations on the term "unreasonable effort or expense?"

Answer: No. The meaning of "unreasonable effort or expense" depends on the particular facts and circumstances attending each case. Only the issuer will know the facts and circumstances and be able to evaluate them with respect to the requirements of the rule.

(49) *Question:* The issuer in a Regulation D offering of $7,000,000 is a corporation. That corporation is acquiring a business. The issuer is unable to obtain the financial statements for that business without unreasonable effort or expense.[35] What are the relevant considerations under Regulation D?

Answer: Rule 502(b)(2)(i)(B) provides that if the issuer is not a limited partnership and "cannot obtain audited financial statements without unreasonable effort or expense, then only the issuer's balance sheet, which shall be dated within 120 days of the start of the offering, must be audited." The staff has interpreted this provision in the context of Rule 3–05 of Regulation S–X to apply to the financial statements of the business being acquired. Thus, if the business being acquired is other than a limited partnership, and if the issuer cannot obtain audited financial statements of that business without unreasonable effort or expense, then the issuer may provide the relevant financial statements for the business being acquired on and unaudited basis so long as it also provides an audited balance sheet for that business dated within 120 days of the start of the offering, or, if appropriate, as of the date of acquisition of the business.[36]

2. *Reporting Issuers—Rule 502(b)(2)(ii).* If the issuer is subject to the reporting requirements of section 13 or 15(d) of the Exchange Act, Regulation D sets forth two alternatives for disclosure: the issuer may deliver certain recent Exchange Act reports (the annual report, the definitive proxy statement, and, if requested, the Form 10–K (17 CFR 249.310)) or it may provide a document containing the same information as in the Form 10–K or Form

---

[30] The Commission adopted 53 Securities Act Guides in 1968 (Release No. 33–4936 (December 9, 1968) (33 FR 18617)) and 10 additional ones subsequently. The Guides served as an expression of the policies and practices of the Division of Corporation Finance. Most of those Guides have been incorporated into Regulation C (17 CFR 230.400–.494) and Regulation S–K (17 CFR 229.10–.802) (*see* Release No. 33–6383 (March 3, 1982) (47 FR 11380)) and thus were rescinded (*see* Release No. 33–6384 (March 3, 1982) (47 FR 11476)). Five of the Guides applicable to specific industries were not rescinded, however, and were redesignated. Guide 5, which was Guide 60, applies to the preparation of registration statements relating to interests in real estate limited partnerships. Guide 5 was revised in Release No. 33–6405 (June 3, 1982) (47 FR 25140).

[31] Form S–18 has been amended recently to permit its use by limited partnerships. Release No. 33–6400 (June 4, 1982) (47 FR 23126).

[32] The same general rule would be applicable to an offering in excess of $5,000,000. *See* Release No. SAB–40, Topic 6.D.3.d. (January 23, 1981).

[33] The parallel to this instruction under other forms of registration is Rule 3–14 of Regulation S–X (17 CFR 210.3–14). Rule 3–14 requires income statements for the three most recent fiscal years, unless the issuer meets certain conditions, in which case the issuer need present only one year of audited income statements.

[34] *See* letter re *Winthrop Financial Co., Inc.* dated May 25, 1982. In response to inquiries regarding the appropriateness of tax basis financial statements, issuers should refer to Statement on Auditing Standards No. 14, *Special Reports*, American Institute of Certified Public Accountants, December 1979.

[35] The issuer should refer to Rule 3–05 of Regulation S–X (17 CFR 210.3–05) for the disclosure guidelines on businesses to be acquired. If the offering were for less than $5,000,000 and the issuer were thus referring to Form S–18, Item 21(d) of that form provides a parallel rule on businesses to be acquired.

[36] *See* letter re *Walnut Valley Special Cable TV Fund* dated May 13, 1982.

10 (17 CFR 249.210) under the Exchange Act or in a registration statement under the Securities Act. In either case the rule also calls for the delivery of certain supplemental information.

(50) *Question:* Rule 502(b)(2)(ii)(B) refers to the information contained "in a registration statement on Form S–1." Does this requirement envision delivery of Parts I and II of the Form S–1?

Answer: No. Rule 502(b)(2)(ii)(B) should construed to mean Part I of Form S–1.

(51) *Question:* A reporting company with a fiscal year ending on December 31 is making a Regulation D offering in February. It does not have an annual report to shareholders, an associated definitive proxy statement, or a Form 10–K for its most recently completed fiscal year. The issuer's last registration statement was filed more than two years ago. What is the appropriate disclosure under Regulation D?

Answer: The issuer may base its disclosure on the most recently completed fiscal year for which an annual report to shareholders on Form 10–K was timely distributed or filed. The issuer should supplement the information in the report used with the information contained in any reports or documents required to be filed under sections 13(a), 14(a), 14(c) and 15(d) of the Exchange Act since the distribution or filing of that report and with a brief description of the securities being offered, the use of the proceeds from the offering, and any material changes in the issuer's affairs that are not disclosed in the documents furnished. *See* Rule 502(b)(2)(ii)(C).

C. General

Rule 502(b)(2) also contains four general provisions applicable to all classes of issuer in all offerings where specified disclosure is required. These provisions govern exhibits, disclosure of additional information to non-accredited investors, the opportunity for further investor inquiries, and disclosure of certain additional information in business combinations.

(52) *Question:* In a Rule 505 or 506 offering of interests in a limited partnership where certain purchasers are not accredited investors, must the issuer obtain an opinion of counsel regarding the legality of the securities being issued or an opinion regarding the tax consequences of an investment in the offering?

Answer: Rule 502(b)(2)(iii) provides that the issuer is not required to furnish the exhibits that would accompany the form of registration or report governing the issuer's disclosure document if the issuer identifies the contents of those exhibits and makes them available to purchasers upon written request prior to purchase.[37] Any form of registration to which the issuer refers in preparing its disclosure document under Regulation D requires that the issuer furnish the exhibits required by Item 601 of Regulation S–K. Item 601 requires that the issuer furnish, among other exhibits, an opinion of counsel as to the legality of the securities being issued. Thus, under Rule 502(b)(2)(iii), the issuer should identify the contents of this opinion of counsel and make it available to purchasers upon written request. Item 601 also sets forth certain requirements for an opinion as to tax matters. Such an opinion is required to support any representations in a prospectus as to material tax consequences. Thus, assuming the Regulation D issuer will make representations in the disclosure document as to material tax consequences of investing in a limited partnership, the issuer should identify the contents of and make available upon request an opinion supporting that discussion.[38]

III. Operational Conditions

A. Integration—Rule 502(a)

Rule 502(a) achieves two purposes. First, it explicitly incorporates the doctrine of integration into Regulation D. Second, it establishes an exception to the operation of that doctrine.

Integration operates to identify the scope of a particular offering by considering the relationship between multiple transactions. It is premised on the concept that the Securities Act addresses discrete offerings and on the recognition that not every offering is in fact a discrete transaction. The integration doctrine prevents an issuer from circumventing the registration requirements of the Securities Act by claiming a separate exemption for each part of a series of transactions that comprises a single offering. Because the determination of whether transactions should be integrated into one offering is so dependent on particular facts and circumstances, the staff does not issue interpretations in this area.[39] The Note to Rule 502(a), however, does set forth a number of factors that should be considered in making an integration determination.

Rule 502(a) also sets forth an exception to the integration doctrine. It provides that a Regulation D offering will not be integrated with offers or sales that occur more than six months before or after the Regulation D offering. This six month safe harbor rule only applies, however, where there have been no offers or sales (except under an employee benefit plan) of securities similar to those in the Regulation D offering within the applicable six months.[40]

(53) *Question:* An issuer conducts offering (A) under Rule 504 of Regulation D that concludes in January. Seven months later the issuer commences offering (B) under Rule 506. During that seven month period the issuer's only offers or sales of securities are under an employee benefit plan (C). Must the issuer integrate (A) and (B)?

Answer: No. Rule 502(a) specifically provides that (A) and (B) will not be integrated.[41]

B. Calculation of the Number of Purchasers—Rule 501(e)

Rule 501(e) governs the calculation of the number of purchasers in offerings that rely either on Rule 505 or 506. Both of these rules limit the number of non-accredited investors to 35. Rule 501(e) has two parts. The first excludes certain purchasers from the calculation. The second establishes basic principles for counting of corporations, partnerships, or other entities.

(54) *Question:* One purchaser in a Rule 506 offering is an accredited investor. Another is a first cousin of that investor sharing the same principal residence. Each purchaser is making his own investment decision. How must the issuer count these purchasers for purposes of meeting the 35 purchaser limitation?

Answer: The issuer is not required to count either investor. The accredited investor may be excluded under Rule 501(e)(1)(iv), and the first cousin may then be excluded under Rule 501(e)(1)(i).[42]

---

[37] This provision is similar to that found in former Rule 146 at paragraph (e)(1)(ii)(c).

[38] *See* letters to *Hecker & Phillips* dated December 22, 1982 and *Hopper, Kenouff, Smith and Peryam* dated September 10, 1982.

[39] *See* Release No. 33–6253 (October 28, 1980) (45 FR 72284); letters re *Security Bancorp, Inc.* dated January 21, 1980 and *Kearney Plaza Company* dated March 8, 1979.

[40] The Note to Rule 502(a) also points out that certain foreign offerings are not integrated with domestic exempt offerings.

[41] Rule 502(a), however, does not provide a safe harbor to the possible integration of offering (C) with either offering (A) or (B). In resolving that question, the issuer should consider the factors listed in the Note to Rule 502(a).

[42] The Note to Rule 501(a) provides that the issuer must satisfy all other conditions of Regulation D with respect to purchasers that have been excluded from the count. Thus, for instance, the issuer would have to ensure the sophistication of the first cousin under Rule 506(b)(2)(ii).

(55) *Question:* An accredited investor in a Rule 506 offering will have the securities she acquires placed in her name and that of her spouse. The spouse will not make an investment decision with respect to the acquisition. How many purchasers will be involved?

Answer: The accredited investor may be excluded from the count under Rule 501(e)(1)(iv) and the spouse may be excluded under Rule 501(e)(1)(i). The issuer may also take the position, however, that the spouse should not be deemed a purchaser at all because he did not make any investment decision, and because the placement of the securities in joint name may simply be a tax or estate planning technique.

(56) *Question:* An offering is conducted in the United States under Rule 506. At the same time certain sales are made overseas. Must the foreign investors be included in calculating the number of purchasers?

Answer: Offers and sales of securities to foreign persons made outside the United States in such a way that the securities come to rest aboard generally do not need to be registered under the Act. This basis for non-registration is separate from Regulation D and offers and sales relying on this interpretation are not required to be integrated with a coincident domestic offering.[43] Thus, assuming the sales in this question rely on this interpretation, foreign investors would not be counted.

(57) *Question:* An investor in a Rule 506 offering is a general partnership that was not organized for the specific purpose of acquiring the securities offered. The partnership has ten partners, five of whom do not qualify as accredited investors. The partnership will make an investment of $100,000. How is the partnership counted and must the issuer make any findings as to the sophistication of the individual partners?

Answer: Rule 501(e)(2) provides that the partnership shall be counted as one purchaser. The issuer is not obligated to consider the sophistication of each individual partner.

(58) *Question:* If the partnership in Question 57 purchases $200,000 of the securities being offered and if that amount does not exceed 20 percent of the partnership's net worth, how should the partnership be counted?

Answer: Rule 501(e)(2), which provides that the partnership shall be counted as one purchaser, operates in tandem with Rule 501(e)(1). Thus, because the partnership is an accredited investor (in this case under Rule 501(a)(5)), the partnership may be excluded from the count under Rule 501(e)(2)(iv).

(59) *Question:* An investor in a Rule 506 offering is an investment partnership that is not accredited under Rule 501(a)(8). Although the partnership was organized two years earlier and has made investments in a number of offerings, not all the partners have participated in each investment. With each proposed investment by the partnership, individual partners have received a copy of the disclosure document and have made a decision whether or not to participate. How do the provisions of Regulation D apply to the partnership as an investor?

Answer: The partnership may not be treated as a single purchaser. Rule 501(e)(2) provides that if the partnership is organized for the specific purpose of acquiring the securities offered, then each beneficial owner of equity interests should be counted as a separate purchaser. Because the individual partners elect whether or not to particpate in each investment, the partnership is deemed to be reorganized for the specific purpose of acquiring the securities in each investment.[44] Thus, the issuer must look through the partnership to the partners participating in the investment. The issuer must satisfy the conditions of Rule 506 as to each partner.

C. Manner of Offering—Rule 502(c)

Rule 502(c) prohibits the issuer or any person acting on the issuer's behalf from offering or selling securities by any form of general solicitation or general advertising. The analysis of facts under Rule 502(c) can be divided into two separate inquiries. First, is the communication in question a general solicitation or general advertisement? Second, if it is, is it being used by the issuer or by someone on the issuer's behalf to offer or sell the securities? If either question can be answered in the negative, then the issuer will not be in violation of Rule 502(c). Questions under Rule 502(c) typically present issues of fact and circumstance that the staff is not in a position to resolve. In several instances, however, the staff has been able to address questions under the rule.

In analyzing what constitutes a general solicitation, the staff considered a solicitation by the general partner of a limited partnership to limited partners in other active programs sponsored by the same general partner. In determining that this did not constitute a general solicitation the Division underscored the existence and substance of the pre-existing business relationship between the general partner and those being solicited. The general partner represented that it believed each of the solicitees had such knowledge and experience in financial and business matters that he or she was capable of evaluating the merits and risks of the prospective investment. *See* letter re *Woodtrails-Seattle, Ltd.* dated July 6, 1982.

In analyzing whether or not an issuer was using a geneal advertisement to offer or sell securities, the staff declined to express an opinion on a proposed tombstone advertisement that would announce the completion of an offering. *See* letter re *Alma Securities Corporation* dated July 2, 1982. Because the requesting letter did not describe the proposed use of the tombstone announcement and because the announcement of the completion of one offering could be an indirect solicitation for a new offering, the staff did not express a view. In a letter re *Tax Investment Information Corporation* dated January 7, 1983, the staff considered whether the publication of a circular analyzing private placement offerings, where the publisher was independent from the issuers and the offerings being analyzed, would violate Rule 502(c). Although Regulation D does not directly prohibit such a third party publication, the staff refused to agree that such a publication would be permitted under Regulation D because of its susceptability to use by participants in an offering. Finally, in the letter re *Aspen Grove* dated November 8, 1982 the staff expressed the view that the proposed distribution of a promotional brochure to the members of the "Thoroughbred Owners and Breeders Association" and at an annual sale for horse owners and the proposed use of a magazine advertisement for an offering of interests in a limited partnership would not comply with Rule 502(c).

(60) *Question:* If a solicitation were limited to accredited investors, would it be deemed in compliance with Rule 502(c)?

Answer: The mere fact that a solicitation is directed only to accredited investors will not mean that the solicitation is in compliance with Rule 502(c). Rule 502(c) relates to the nature of the offering not the nature of the offerees.

---

[43] *See* Release No. 33-6709 (July 9, 1984) (29 FR 828), Preliminary Note 7 to Regulation D and Note to Rule [illegible].

[44] *See* letter re *Madison Partners Ltd. 1982-1* dated January 18, 1982. *See also* letter re *Kenai Oil & Gas, Inc.* dated April 27, 1979.

D. Limitations on Resale—Rule 502(d)

Rule 502(d) makes it clear that Regulation D securities have limitations on transferability and requires that the issuer take certain precautions to restrict the transferability of the securities.

(61) *Question:* An investor in a Regulation D offering wishes to resell his securities within a year after the offering. The issuer has agreed to register the securites for resale. Will the proposed resale under the registration statement violate Rule 502(d)?

Answer: No. The function of Rule 502(d) is to restrict the unregistered resale of securities. Where the resale will be registered, however, such restrictions are unnecessary.

IV. Exemptions

A. Rule 504

Rule 504 is an exemption under section 3(b) of the Securities Act available to non-reporting and non-investment [46] companies for offerings not in excess of $500,000.

(62) *Question:* A foreign issuer proposes to use Rule 504. The issuer is not subject to section 15(d) and its securities are exempt from registration under Rule 12g3–2 (17 CFR 240.12g3–2). May this issuer use Rule 504?

Answer: Yes.

(63) *Question:* An issuer proposes to make an offering under Rule 504 in two states. The offering will be registered in one state and the issuer will deliver a disclosure document pursuant to the state's requirements. The offering will be made pursuant to an exemption from registration in the second state. Must the offering satisfy the limitations on the manner of offering and on resale in paragraphs (c) and (d) of Rule 502?

Answer: Yes. An offering under Rule 504 is exempted from the manner of sale and resale limitations only if it is registered in *each* state in which it is conducted and only if a disclosure document is required by state law.

(64) *Question:* The state in which the offering will take place provides for "qualification" of any offer or sale of securities. The state statute also provides that the securities commissioner may condition qualification of an offering on the delivery of a disclosure document prior to sale. Would the issuer be making its offering in a state that "provides for registration of the securities and requires the delivery of a disclosure document before sale" if its offering were qualified in this state on the condition that it deliver a disclosure document before sale to each investor?

Answer: Yes.[46]

(65) *Question:* If an issuer is registering securities at the state level, are there any specific requirements as to resales outside of that state if the issuer is attempting to come within the provision in Rule 504 that waives the limitations on the manner of offering and on resale in Rules 502 (c) and (d)?

Answer: No.[47] The issuer, however, must intend to use Rule 504 to make bona fide sales in that state and not to evade the policy of Rule 504 by using sales in one state as a conduit for sales into another state. *See* Preliminary Note 6 to Regulation D.

B. Rule 505

Rule 505 provides an exemption under section 3(b) of the Securities Act for non-investment companies for offerings not in excess of $5,000,000.

(66) *Question:* An issuer is a broker that was censured pursuant to a Commission order. Does the censure bar the issuer from using Rule 505?

Answer: No. Rule 505 is not available to any issuer who falls within the disqualifications for the use of Regulation A (17 CFR 230.251–.264). *See* Rule 505(b)(2)(iii). One such disqualification occurs when the issuer is subject to a Commission order under section 15(b) of the Exchange Act. A censure has no continuing force and thus the issuer is not subject to an order of the Commission.

C. Questions Relating to Rules 504 and 505

Both Rules 504(b)(2)(i) and 505(b)(2)(i) require that the offering not exceed a specified aggregate offering price. The allowed aggregate offering price, however, is reduced by the aggregate offering price for all securities sold within the last twelve months in reliance on section 3(b) or in violation of section 5(a) of the Securities Act.

(67) *Question:* An issuer preparing to conduct an offering of equity securities under Rule 505 raised $2,000,000 from the sale of debt instruments under Rule 505 eight months earlier. How much may the issuer raise in the proposed equity offering?

Answer: $3,000,000. A specific condition to the availability to Rule 505 for the proposed offering is that its aggregate offering price not exceed $5,000,000 less the proceeds for *all* securities sold under section 3(b) within the last 12 months.

(68) *Question:* An issuer is planning a Rule 505 offering. Ten months earlier the issuer conducted a Rule 506 offering. Must the issuer consider the previous Rule 506 offering when calculating the allowable aggregate offering price for the proposed Rule 505 offering?

Answer: No. The Commission issued Rule 506 under section 4(2), and Rule 505(b)(2)(i) requires that the aggregate offering price be reduced by previous sales under section 3(b).[48]

(69) *Question:* Seven months before a proposed Rule 504 offering the issuer conducted a rescission offer under Rule 504. The rescission offer was for securities that were sold in violation of section 5 more than 12 months before the proposed Rule 504 offering. Must the aggregate offering price for the proposed Rule 504 offering be reduced either by the amount of the rescission offer or the earlier offering in violation of section 5?

Answer: No. The offering in violation of section 5 took place more than 12 months earlier and thus is not required to be included when satisfying the limitation in Rule 504(b)(2)(i). The staff is of the view that the rescission offer relates back to the earlier offering and therefore should not be included as an adjustment to the aggregate offering price for the proposed Rule 504 offering.

(70). *Question:* Rules 504 and 505 contain examples as to the calculation of the allowed aggregate offering price for a particular offering. Do these examples contemplate integration of the offerings described?

Answer: No. The examples have been provided to demonstrate the operation of the limitation on the aggregate offering price in the absence of any integration questions.

(71) *Question:* Note 2 to Rule 504 is not restated in Rule 505. Does the principle of the note apply to Rule 505?

Answer: Yes. Note 2 to Rule 504 sets forth a general principle to the operation of the rule on limiting the aggregate offering price which is the same for both Rules 504 and 505. It provides that if, as a result of one offering, an issuer exceeds the allowed aggregate offering price in a subsequent unintegrated offering, the exemption for the first offering will not be affected.

---

[46] The Division is of the view that the provision in Rules 504 and 505 that bars an investment company from using the exemptions should be construed to mean an investment company as that term is defined in section 3 of the Investment Company Act.

[46] *See* letter to *Geraldine D. Green* dated November 22, 1982.

[47] *See* letter re *Freeport Resources, Inc.* dated December 9, 1982.

[48] Note that under Rule 502(a) these offerings may not have to be integrated because they are separated by six months.

D. Rule 506

(72) *Question:* May an issuer of securities with a projected aggregate offering price of $3,000,000 rely Rule 506?

Answer: Yes. The availability of Rule 506 is not dependent on the dollar size of an offering.

(73) *Question:* Rule 506 requires that the issuer shall reasonably believe that each purchaser who is not an accredited investor either alone or with a purchaser representative has such knowledge and experience in financial and business matters that he is capable of evaluating the merits and risks of the prospectve investment. Former Rule 146 required the issuer to make a similar determination with respect to each offeree. Rule 506 is not an exclusive basis for satisfying the requirements of the private offering exemption in section 4(2). *See* Preliminary Note 3 to Regulation D. What is the Commission's view of the relevance of the nature of the offerees in an offering that relies exclusively on section 4(2) as its basis for exemption from registration?

Answer: Clearly, in an offering relying exclusively on section 4(2) for an exemption from registration, all offerees who purchase must possess the requisite level of sophistication. The sophistication of each of those to whom the securities are offered who do not purchase is not a fact that in and of itself should determine mechanically the availability of the exemption; the number and the nature of the offerees, however, are relevant in determining whether an issure has engaged in a general solicitation or general advertising that would preclude reliance on the exemption in section 4(2).

E. Questions Relating to Rules 504–506

(74) *Question:* If an issuer relies on one exemption, but later realizes that exemption may not have been made available, may it rely on another exemption after the fact?

Answer: Yes, assuming the offering met the conditions of the new exemption. No one exemption is exclusive of another.

(75) *Question:* May foreign issuers use Regulation D?

Answer: Yes. Recent amendments to Regulation D have clarified the disclosure requirements for foreign issuers.[49]

(76) *Question:* Is Regulation D available to an underwriter for the sale of securities acquired in a firm commitment offering?

Answer: No. As Preliminary Note 4 indicates, Regulation D is available only to the issuer of the securities and not to any affiliate of that issuer or to any other person for resales of the issuer's securities. *See also* Rule 502(d) which limits the resale of Regulation D securities.

(77) *Question:* Regulation T (12 CFR 220.1–.8) of the Federal Reserve Board imposes certain restrictions on brokers and dealers for the use of credit in the purchase of securities. Regulation T provides an exemption from those provisions for the arrangement of credit in a sale of securities that is exempt from the registration requirements of the Securities Act under section 4(2). *See* 12 CFR 220.7(g). What is the applicability of this provision to offerings conducted under Regulation D?

Answer: Regulation T is interpreted by the Federal Reserve Board which has expressed the view that the exemption from Regulation T in 12 CFR 220.7(a) is available for offerings conducted in reliance on Rules 505 and 506,[50] but not for those under 504.[51]

(78) *Question:* A corporation proposes to implement an employee stock option plan for key employees. Can the issuer rely on Regulation D for an exemption from registration for the issuance of securities under the plan?

Answer: The corporation may use Regulation D for the sale of its securities under the plan to the extent that such offering complies with Regulation D. In a typical plan, the grant of the options will not be deemed a sale of a security for purposes of the Securities Act. The issuer, therefore, will be seeking an exemption for the issuance of the stock underlying the options. The offering of this stock generally will commence when the options become exercisable and will continue until the options are exercised or otherwise terminated. Where the key employees involved are directors or executive officers, such individuals will be accredited investors under Rule 501(a)(4) if they purchase securities through the exercise of their options. Other key employees may be accredited as a result of net worth or income under Rules 501(a)(6) or (a)(7).

(79) *Question:* In an "all or none" or minimum-maximum Regulation D offering of interests in a limited partnership, the general partner proposes, if necessary, to purchase enough interests for the issuer to sell a specified level of interests by the specified expiration date of the offering. What disclosure and other considerations are relevant?

Answer: The staff is of the view that pursuant to Rule 10b–9 under the Exchange Act, the issuer must disclose the possibility that the general partner may make purchases of the limited partnership interests in order to meet the specified minimum. In addition, the issuer should disclose the maximum amount of the possible purchases. Finally, these purchases must be for investment and not resale. Questions regarding these views should be directed to the Division of Market Regulation, Office of Trading Practices, (202) 272–2874.

(80) *Question:* An issuer will conduct a Regulation D offering on an "all or none" basis within a specified time. What considerations are there for the issuer if it wishes to extend the offering beyond the specified time in order to sell the specified amount of securities?

Answer: The staff is of the view that an offering may be extended beyond the specified time without resulting in a violation of Rule 10b–9 under the Exchange Act or, in the case of an offering in which a broker-dealer is a participant, Rule 15c2–4 under the Exchange Act, under the following conditions:

a. Prior to the specified expiration date, a reconfirmation offer must be made to all subscribers that discloses the extension of the offering and any other material information necessary to update previously provided disclosure.

b. The reconfirmation offer must be structured so that the subscriber affirmatively elects to continue his investment and so that those subscribers who take no affirmative action will have their funds returned to them.

c. The reconfirmation offer must be made far enough in advance of the specified expiration date so that any subscriber who does not elect to continue his investment will have his funds returned to him promptly after the specified expiration date.

Questions regarding these views should be directed to the Division of Market Regulation, Office of Trading Practices, (202) 272–2874.

V. Notice of Sale—Form D

Rule 503 requires the issuer to file a notice of sale on Form D. The notice must be filed not later than 15 days after the first sale, every six months

[49] *See* Release No. 33–6437 (November 19, 1982) (47 FR 54764).

[50] Letters from Laura Homer, Securities Credit Officer, Board of Governors of the Federal Reserve System to Ardith Eymann, Esq., Chief Counsel, Division of Market Regulation, Securities and Exchange Commission (April 10, 1982) and to Mrs. Mary E.T. Beach, Associate Director, Securities and Exchange Commission (January 8, 1982).

[51] Letter from Laura Homer, Securities Credit Officer, Board of Governors of the Federal Reserve System to Alan G. Rosenberg, Esq. (May 20, 1982).

thereafter, and no later than 30 days after the last sale.[52]

(81) *Question:* Where can an issuer obtain copies of Form D and where must the form be filed?

Answer: Form D is available through the Public Reference Branch of the Commission's main office, 450 5th Street, NW., Washington, D.C. 20549, (202) 272–7460, or any of its regional or branch offices. The form should be filed at the Commission's main office. There is no filing fee.

(82) *Question:* In a minimum-maximum offering where subscription funds are held in escrow pending receipt of minimum subscriptions, when is the first Form D required to be filed?

Answer: In the context of Rule 503, the first sale takes place upon receipt of the first subscription agreement and the deposit of the first funds into escrow. The issuer, therefore, should file its first Form D not later than 15 days after the receipt of the first subscription agreement.

(83) *Question:* An issuer conducting a minimum-maximum offering has received subscriptions for the minimum number of interests needed to form the limited partnership. Subsequent to closing and formation of the partnership, the issuer continues to offer interests. After two months in which no sales take place, the issuer decides to terminate the offering. Because more than 30 days have elapsed since the last sale, how can the issuer comply with Rule 503 in the filing of its final Form D?

Answer: The staff is of the view that a final Form D may be filed not later than 30 days after the last sale or after the termination of the offering, whichever occurs later.

(84) *Question:* In an employee stock option plan, when would the first and last Form D be filed?

Answer: The first Form D should be filed not later than 15 days after the exercise of the first option. The final Form D would be due not later than 30 days after the exercise or expiration of the last outstanding option, whichever occurs later.

(85) *Question:* An issuer commences a Regulation D offering and files an original Form D not later than 15 days after the first sale. Subsequently, because no further sales are made, the issuer returns the money to the one investor and terminates the offering. How should the issuer reflect the unsuccessful offering on its Form D?

Answer: The issuer should file a final Form D indicating zero sales, investors, and proceeds.

(86) *Question:* If the issuer is a limited partnership, who would be considered the chief executive officer for purposes of Form D questions?

Answer: The chief executive officer of a limited partnership is that individual who fulfills the function of chief executive officer. That individual may be the chief executive officer of a corporate general partner.

(87) *Question:* What is a Standard Industrial Classification ("SIC") and where is it obtained?

Answer: The SIC is a code associated with a particular economic activity. The SIC system, developed by the Bureau of the Census under the auspices of the Office of Management and Budget, is used in classification of establishments by the type of activities in which they are engaged. An issuer's SIC can be found in the Standard Industrial Classification Manual, a publication of the U.S. Government that may be obtained from the Superintendent of Documents and is generallly available in public and university libraries.

(88) *Question:* Question 8 of Part A asks for the issuer's CUSIP number. What is a CUSIP number?

Answer: CUSIP [53] is the trademark for a system that identifies specific security issuers and their classes of securities. Under the CUSIP plan, a CUSIP number is permanently assigned to each class and will identify that class and no other. Generally, a CUSIP number will be assigned only to a class for which there is a secondary trading market. The operation of the CUSIP numbering system is controlled by the CUSIP Board of Trustees which awarded a contract to Standard & Poor's Corporation to function as the CUSIP Service Bureau, the operational arm of the system. Issuers relying on Regulation D that do not have a class of securities with a secondary trading market and thus do not have a CUSIP number should answer Question 8 in the negative.

(89) *Question:* Part B of Form D requests statistical information about the issuer. In an offering of interests in a limited partnership to be formed, how should this part be answered?

Answer: The answers to Part B should be with respect to the partnership to be formed and will be zero or "not applicable." This will reflect the statistical profile of a start-up issuer.

(90) *Question:* Question 2 to Part C requests certain information as to the number of accredited and non-accredited investors in a Rule 505 or 506 offering. Must an issuer make a finding as to accredited investors even if the issuer is not relying on the accredited investor concept in its offering?

Answer: No. Where an issuer under Rule 505 or 506 is not relying on the accredited investor concept for all or certain investors, it should treat those investors as non-accredited for purposes of this question.

(91) *Question:* Questions 5 and 6 to Part C request certain information regarding the offering expenses and the use of proceeds. May the issuer attach a separate schedule listing expenses and use of proceeds in lieu of completing these questions?

Answer: No. The Form D has been formulated for keypunching and entry of the information into an automatic data storage system. Failure to complete the questions on the form in the space provided frustrates the objectives of the form.

(92) *Question:* May the Form D be signed by the issuer's attorney?

Answer: Form D may be signed on behalf of the issuer by anyone who is duly authorized.

Text of Amendment

List of Subjects in 17 CFR Part 231

Reporting requirements, Securities.

In accordance with the foregoing, Title 17, Chapter II, of the Code of Federal Regulations is amended as follows:

PART 231—INTERPRETIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER.

1. Part 231 is amended by adding this Release No. 33–6455 (March 3, 1983) to the list of interpretive releases.

By the Commission.

George A. Fitzsimmons,

Secretary

March 3, 1983.

[FR Doc. 83–6220 Filed 3–9–83; 8:45 am]

BILLING CODE 8010–01–M

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 41

[Dept. Reg. 108.829]

Issuance of Nonimmigrant Visas—Procedures

AGENCY: Department of State.

[52] A Form D is also required to be filed in connection with an offering conducted pursuant to section 4(6). *See* 17 CFR 230.500.

[53] The acronym "CUSIP" derives from the title of the American Banker's Association committee that developed the CUSIP system—Committee on Uniform Security Identification Procedures.

ACTION: Final rule.

SUMMARY: The Department is amending section 41.124(e)(1) of its regulations to authorize all Foreign Service posts to use the word "Bearer(s)" in lieu of the name of the alien and names of accompanying family members, if any, included in the alien's passport, in nonimmigrant visas issued in approved passports or other travel documents fulfilling the requirements of a passport as defined in section 101(a)(30) of the Immigration and Nationality Act. This action is intended to expedite the processing of non-immigrant visas.

EFFECTIVE DATE: March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Gerald M. Brown, Chief, Legislation and Regulations Division, Visa Services. (202) 632-1000.

SUPPLEMENTARY INFORMATION: Paragraph (e)(1) of § 41.124 presently states that Foreign Service posts may be individually authorized by the Department, after consultation with the Immigration and Naturalization Service, to use the "Bearer(s)" insert when issuing visas to nationals of countries as designated by the Department. The Department, with the concurrence of the Immigration and Naturalization Service, is now authorizing all Foreign Service posts to use the "Bearer(s)" insert when visaing approved passports. The insert may also be used in Certificate of Identity and Laissez Passer travel documents issued by countries whose passports have been approved, provided such documents fulfill the requirements of a "passport" as defined in section 101(a)(30) of the Immigration and Nationality Act. The bearer of the approved passport or other travel document need not be a national of the issuing country; however, the travel document must show the nationality, if any, of the bearer. The expanded use of the "Bearer(s)" insert is intended to expedite the processing of nonimmigrant visas and improve office efficiency. Compliance with 5 U.S.C. 553 of the Administrative Procedure Act, as to notice of proposed rulemaking and delayed effective date, is not necessary in this instance because the amendments involved in this order are technical and administrative in nature.

List of Subjects in 22 CFR Part 41

Aliens, Passports and visas, Students.

PART 41—[AMENDED]

Accordingly, paragraph (e)(1) of § 41.124 is amended to read:

§ 41.124 Procedures in issuing visas.

* * * * *

(e) *Insertion of name; petition and derivative status notation.* (1) Except as otherwise provided in this paragraph, the name or names of the alien or aliens to whom a nonimmigrant visa is issued shall be shown on the visa insert just after the word "to". Consular officers may, in their discretion, show the word "Bearer(s)" in lieu of the name of the alien and in lieu of the names of accompanying family members, if any, who are included in the alien's passport, in visas issued in passports or other travel documents meeting the requirements of section 101(a)(30) of the Immigration and Nationality Act, which have been designated by the Department as approved for this purpose. This procedure may not be applied in the case of aliens who are the beneficiaries of waivers granted under section 212(d)(3) of the Act.

BILLING CODE 4710-06-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

22 CFR Part 201

[AID Regulation 1]

Revision of Geographic Code Summaries

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: The Agency for International Development (A.I.D.) has revised the description of AID Geographic Code 941 "Special Free World", one of the principal codes used to specify the authorized source countries for A.I.D.-financed procurement, to reflect the change in eligibility status of several countries. Algeria is now included in Code 941 and is an eligible source country when Code 941 is authorized. Angola, Bahrain, Gabon, Mozambique, Singapore, and Syria are now excluded from Code 941. Regulation 1 is being amended to reflect these changes. Also, editorial changes are made in the summaries of Code 000 and Code 899 "Free World". There have been no changes in eligibility status under either of these codes.

EFFECTIVE DATE: March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Kathleen O'Hara, Office of Commodity Management, Agency for International Development, Washington, D.C. 20523, 703-235-2173.

SUPPLEMENTARY INFORMATION: The Agency has determined that this rule will not have a significant economic impact on a substantial number of small organizational units and small government jurisdictions.

This rule is not a major rule for purposes of Executive Order 12291 and has been submitted to OMB in accordance with the Executive Order.

List of Subjects in 22 CFR Part 201

Commodity procurement, Foreign A.I.D., Grant programs—Foreign relations, Loan programs—Foreign relations.

PART 201—RULES AND PROCEDURES APPLICABLE TO COMMODITY TRANSACTIONS FINANCED BY A.I.D.

22 CFR Part 201 is amended as follows:

1. The authority citation for Part 201 reads as follows:

Authority: Sec. 621, Foreign Assistance Act of 1961, as amended, 75 Stat. 424 (22 U.S.C. 2381) 22 CFR 201.65.

Subpart B—Conditions Governing the Eligibility of Procurement Transactions for A.I.D. Financing

2. In § 201.11, paragraph (b)(4) is revised as follows:

§ 201.11 Eligibility of Commodities.

(b) * * *

(4) *Identification of principal geographic code numbers.* The A.I.D. Geographic Code Book sets forth the official description of all geographic codes used by A.I.D. to designate the authorized source for procurement. Following are summaries of the principal codes:

Code 000—"The United States": The states of the United States, the District of Columbia, and areas of U.S. associated sovereignty, including the trust territories.

Code 899—"Free World": Any area or country, except the cooperating country itself and the following countries: Albania, Bulgaria, Cambodia, Cuba, Czechoslovakia, German Democratic Republic, Hungary, Laos, Mongolia, North Korea, People's Republic of China, Poland, Romania, Union of Soviet Socialist Republics (USSR), and Vietnam.

Code 935—"Special Free World": Any area or country in the Free World, including the cooperating country.

Code 941—"Selected Free World": The United States and any independent country in the Free World, except the cooperating country itself and the following: Afghanistan, Andorra, Angola, Australia, Austria, Bahrain, Belgium, Canada, Cyprus, Denmark, Federal Republic of Germany, Finland, France, Gabon, Greece, Hong Kong, Iceland, Iran, Iraq, Ireland, Italy, Japan, Kuwait, Libya, Liechenstein, Luxembourg, Malta, Monaco, Mozambique, Netherlands, New Zealand, Norway, Portugal, Qatar, Saudi Arabia, San Marino, Singapore, South Africa, Spain, Sweden, Switzerland, Syria, United Arab Emirates, United Kingdom, Vatican City, South Yemen, and Yugoslavia.

BILLING CODE 8116-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Ch. I

[FHWA Docket No. 83-4, Notice No. 2]

Truck Size and Weight: Policy Statement; Supplementary Statement

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Supplementary statement to policy statement.

SUMMARY: This notice provides an explanation of the FHWA policy statement on Truck Size and Weight, published on February 3, 1983 (48 FR 5210), requesting each State to provide three lists of highways. The purpose of these lists was to provide the information indicating what routes were available to truckers under the provisions of the Surface Transportation Assistance Act of 1982 and the Department of Transportation Appropriations Act of 1982. Some confusion has resulted because of the limited system originally designated by the statement.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Skinner, Office of Traffic Operations, (202) 426–1993, or Mr. David C. Oliver, Office of the Chief Counsel, (202) 426–0825, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA notice of policy statement on Truck Size and Weight, published on February 3, 1983, requested each State to provide three lists of highways. The purpose of these lists was to provide the information indicating what routes were available to truckers under the provisions of the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424, 96 Stat. 2097) (STAA) and the Department of Transportation Appropriations Act of 1982 (Pub. L. 97–369). Some confusion has resulted because of the limited system originally designated by the statement. The original designation was a concededly restricted portion of Primary System highways, designed to immediately implement the law.

Some States have indicated that they would prefer to designate the entire Primary System, and/or other highways as available to vehicles described in the statement. However, the compilation of such a list would be so cumbersome that the States are considering adopting only those highways set forth in the policy statement.

As we intend to utilize submitted information to provide descriptive material for use by the industry and public, we would like to simplify the compilation of materials and expedite the submission of this material. Therefore, States wishing to designate all, or substantially all, Primary System and/or other roads under lists 1 or 2 in the policy statement may in following the policy statement have two additional options:

Option 1. Designate all Primary System and/or other roads and submit a statement to that effect.

Option 2. Designate all Primary System and/or other roads, but with specific exceptions, which would then be submitted in a categorized list.

Finally some confusion has arisen over the relationship between list (1) (qualifying highways) and list (3) (exclusions) in the February 3 policy statement. States should not identify in list (1) (qualifying highways) those highways placed in list (3) (exclusions). List (1) should identify only qualifying highways on which large trucks may operate.

Issued on: March 2, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Parts 10 and 15

[Docket No. N-83-1213]

Announcement of Effective Dates

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of announcement of effective dates for certain recent final rules.

SUMMARY: This notice announces the effective dates for certain recently published final rules. Thirty calendar days of continuous session of Congress have expired in the present Congress since these rules were published.

EFFECTIVE DATES: March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Grady J. Norris, Assistant General Counsel for Regulations, Department of Housing and Urban Development, Room 10278, 451 7th Street, SW., Washington, D.C. 20410, telephone No. (202) 755–7055. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The effective date provision of the published rules stated that the rules would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, and announced that future notice of the rules' effectiveness would be published in the **Federal Register**. Thirty calendar days of continuous session of Congress have expired in the present Congress since these rules were published.

Accordingly, the purpose of this notice is to announce effective dates for the rules listed below:

24 CFR Part 10:

Rulemaking: Policy and Procedures, Final rule published December 20, 1982, (47 FR 56624), Docket No. R–82–1064.

Effective Date: March 10, 1983.

24 CFR Part 15:

Production or Disclosure of Material or Information, Final rule published December 13, 1982 (47 FR 55669), Docket No. R–82–1061.

Effective Date: March 10, 1983

Dated: March 3, 1983.

Grady J. Norris,

Assistant General Counsel for Regulations.

24 CFR Part 50

[Docket No. R-82-744]

Protection and Enhancement of Environmental Quality; Correction

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of announcement of effective date for interim rule and Correction.

SUMMARY: This notice announces the effective date for the interim rule published in the **Federal Register** on December 15, 1982 (47 FR 56266) that identified the environmental review procedures that apply to all HUD programs (except those authorized by Title I of the Housing and Community Development Act of 1974, as amended) and complied with the National Environmental Policy Act (NEPA) Regulations issued by the Council on Environmental Quality. There are also certain non-substantive technical corrections to §§ 50.17 and 50.20 of the interim rule that are being addressed in this notice.

EFFECTIVE DATE: March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Grady J. Norris, Assistant General Counsel for Regulations, Department of Housing and Urban Development, Room 10278, 451 7th Street, SW., Washington, D.C. 20410, telephone No. (202) 755-7055. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The effective date provision of the published interim rule stated that the rule would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, subject to waiver, and announced that future notice of the rule's effectiveness would be published in the **Federal Register.** Thirty calendar days of continuous session of Congress have expired in the present Congress since this rule was published.

However, §§ 50.17 and 50.20 contain certain non-substantive technical corrections that are being corrected as set forth below.

Accordingly, this document announces the effective date for and makes technical corrections to an interim rule published on December 15, 1982 (47 FR 56266).

PART 50—[AMENDED]

1. On page 56270, in the middle of column three "§ 50.17 Projects", the introductory paragraph and paragraph (a) are corrected to read:

§ 50.17 Projects.

An EA and FONSI or EIS for individual projects shall be completed before the applicable program decision points below for projects not meeting the criteria of § 50.20 and shall be reevaluated and updated as required by § 50.37.

(a) *New Construction.* (1) Subdivisions: Issuance of HUD Environmental Review Letter and Form 92256;

(2) Multifamily project mortgage insurance, including Title X, nursing homes, hospitals, group practice facilities, manufactured and mobile homes and parks: Issuance of SAMA Letter or equivalent indication of HUD approval, whichever comes first;

(3) Public Housing: Notification of tentative site approval (1977 procedures) or PHA proposal approval (1980 procedures);

(4) Section 8 HAP Program: Notification of selection of preliminary proposal.

* * * * *

2. On page 56271 in the middle of column one "§ 50.20 *Categorical exclusions*", the introductory paragraph is corrected to read:

§ 50.20 Categorical exclusions.

The following actions, activities and programs are categorically excluded from the NEPA requirements of this part. These actions, activities and programs, however, are not excluded from individual compliance requirements of other environmental statutes, Executive Orders and HUD standards listed in § 50.4 where appropriate. The format to be used by HUD in documenting compliance for projects is contained in Appendix B of this part. Where the responsible official determines that any action, activity or program identified in this section may have an environmental effect because of extraordinary circumstances, the requirements of NEPA shall apply.

BILLING CODE 4210-29-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 301

[T.D. 7874]

Procedure and Administration; Service of Notice of Levy by Mail

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final Regulations.

SUMMARY: This document provides final regulations under section 6331 of the Internal Revenue Code of 1954 relating to the authority of the Service to serve notice of levy by mail. These regulations will provide the public with the guidance needed to comply with the law and will affect persons upon whom notices of levy are served.

EFFECTIVE DATE: The amendments of § 301.6331-1 are effective for levies made after March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Annie R. Alexander of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3287), not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

On Friday, February 26, 1982, the Federal Register published proposed amendments to Regulations under Part 301, Procedure and Administration, under section 6331 of the Internal Revenue Code of 1954 (Code) (47 FR 8378).

This document contains final regulations under section 6331 of the Code relating to the authority of the Service to seize property by levy. Under section 6331 of the Code the term "levy" includes the power of distraint and seizure by any means. Regulation § 301.6331-1(a)(1) provides that a levy may be made by serving a notice of levy on any person in possession of, or obligated with respect to, property or rights to property subject to levy.

In order to conserve resources, the Service has increased the number of notices of levy served by mail in accordance with law and longstanding administrative practice. Some persons upon whom notices for levy are served have expressed concern that the Service's longstanding practice has not been explicitly set forth in the regulations. Consequently, the Department of the Treasury has decided to amend the regulations to specify the procedures to be followed by the Service in serving a notice of levy by mail. The amendment will also permit persons having more than one office within an Internal Revenue district to choose one office to which notices of levy are to be mailed.

A public hearing was not requested. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

Summary of Public Comments and Final Regulations

The proposed regulations authorized service of notice of levy by mail and stated that the date the notice is delivered to the person served is the date the levy is made. A number of comments were received objecting to service by regular mail and suggesting service by certified mail return receipt requested on the ground that there is no way to establish the date that regular mail is received and this creates problems in determining priorities of levies. Even if the recipient of the notice is required to establish through normal business records the date of delivery, accurate compliance is difficult. Commentators stated that this area was ripe for factual dispute where delivery is made on a Saturday or local legal holiday and the notice is not processed until the next business day because substantial withdrawals could have occurred on Saturday and Sunday through automatic teller machines. Commentators stated that delivery by certified mail return receipt requested would eliminate this problem, because there would be no delivery on Saturday or Sunday. The date on the receipt would establish the date of delivery, and the Internal Revenue Service would have a verifiable effective date in all cases.

While the Service recognizes the problems that may arise as a result of service of levy by regular mail, the Service has concluded that most of these problems can be avoided if there is a presumption that the time and date noted on the notice of levy by a person having authority to act on behalf of the person served is the date and time the levy is made. The Service retains the authority to use certified mail return receipt requested when necessary. However, a requirement of certified mail in all cases would be too costly to the Service and has not been adopted.

Most commentators objected to the rule in the proposed regulations which allowed delivery of a notice of levy to any branch office if a person has more than one office within the Internal Revenue district. Commentators stated a variety of reasons for their objection such as:

(1) The rule does not comport with decisional substantive law relating to private creditors,

(2) Many banks with significant branch networks do not have a central file which can be accessed with name, address and social security number of the taxpayer, so compliance with the proposed amendments is operationally impossible, and

(3) The rule would impose an undue cost, and administrative burden on an innocent third party.

The final regulations deleted this sentence because the issue raised by the language is unrelated to the Service's authority to serve notices of levy by mail. Thus, this deletion should not be construed as a change of the Internal Revenue Service's position that a levy on a branch bank may be effective at other branches. The question turns on the facts and circumstances of each case. *See Digitrex Inc. v. Johnson* 491 F. Supp. 66 (1980); *Therm-X-Chemical & Oil Corp. v. Extebank*, 84 A.D. 2d 787, 444 N.Y.S. 2d 26 (1981).

Some commentators expressed concern about the language in the proposed regulation which required the concurrence of the district director in order for a person to designate an office upon which the mailed notice would be served. Because the option to designate a particular office was added for the convenience of the person levied upon, the final regulation has eliminated the requirement that the district director concur with a person's designation of the office to which the notices shall be mailed.

One commenter objected to the proposed regulations' containing no guidelines on what taxpayer identification information the notice should contain. The commentator stated that the account data system could not locate the taxpayer's assets if only the taxpayer's name and social security number were given. It was suggested that the Internal Revenue Service be required to include the taxpayer's account number. This comment was not incorporated into the regulations because in many instances the Service does not have access to the taxpayer's account number.

Executive Order 12291 and Regulatory Flexibility Act

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

Although this regulation was published as a notice of proposed rulemaking that solicited public comment, the Internal Revenue Service concluded when the notice was published that the regulations were interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Consequently, these regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Drafting Information

The principal author of these regulations is Annie R. Alexander of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

Adoption of amendments to regulations

Accordingly, 26 CFR Part 301 is amended as follows:

PART 301—[AMENDED]

Paragraph. A new paragraph (c) is added to § 301.6331–1 to read as follows:

§ 301.6331–1 Levy and Distraint.

* * * * *

(c) *Service of notice of levy by mail.* A notice of levy may be served by mailing the notice to the person upon whom the service of a notice of levy is authorized under paragraph (a)(1) of this section. In such a case the date and time the notice is delivered to the person to be served is the date and time the levy is made. If the notice is sent by certificated mail, return receipt requested, the date of delivery on the receipt is treated as the date the levy is made. If, after receipt of a notice of levy, an officer or other person authorized to act on behalf of the person served signs and notes the date and time of receipt on the notice of levy, the date and time so noted will be presumed to be, in the absence of proof to the contrary, the date and time of delivery.

Any person may, upon written notice to the district director having audit jurisdiction over such person, have all notices of levy by mail sent to one designated office. After such a notice is received by the district director, notices of levy by mail will be sent to the designated office until a written notice withdrawing the request or a written notice designating a different office is received by the district director.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: February 28, 1983.

John E. Chapoton,
Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 803

Disposition of Personal Property

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule

SUMMARY: The Department of the Air Force is amending its administrative regulations by removing Part 803, Disposition of Personal Property of Chapter VII, Title 32. The source document, Air Force Regulation (AFR) 143–6, has been revised. It is intended for internal guidance and has no applicability to the general public. This action is a result of departmental review in an effort to insure that only regulations which substantially affect the public are maintained in the Air Force portion of the Code of Federal Regulations.

EFFECTIVE DATE: March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Beauchemin, Air Force Manpower and Personnel Center, MPCCM, Randolph AFB, TX 78150.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 803

Military personnel, Federal employees, Prisoners of war.

PART 803—[REMOVED]

Accordingly, 32 CFR is amended by removing Part 803.

Authority: 10 U.S.C. 8012.

Winnibel F. Holmes,
Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

Corps of Engineers, Department of the Army

33 CFR Part 207

Use, Administration and Navigation of the Canal and Locks; Willamette River, Oregon

AGENCY: Army Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: The Corps of Engineers is amending the regulations which govern the use, administration and navigation of the canal and locks on the Willamette River, Willamette Falls, Oregon. This amendment is necessary to reflect only address changes and the addition of other means to request lockage.

EFFECTIVE DATE: April 25, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Edward E. Ashley at (503) 221–6066, Mr. Ralph T. Eppard at (202) 272–0200 or write to: Office of the Chief of Engineers, ATTN: DAEN–CWO–N, Washington, D.C. 20314.

SUPPLEMENTARY INFORMATION: The Corps of Engineers is amending 33 CFR 207.680 (a)(1) and (b)(7) to reflect a change in the address of the Portland District Engineer. Paragraph (b)(2) is also amended to show that lockages may be obtained by contacting the lockmaster by VHF–FM Channel 14 radio or by telephone.

The Department of the Army has determined that notice of proposed rulemaking and public procedures are unnecessary in the promulgation of these amendments due to the editorial nature of the changes. A local public notice announcing these changes is also being distributed by the Portland District Engineer.

Note.—The Chief of Engineers has determined that this document does not contain a major rule requiring a regulatory impact analysis under Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more and it will not result in a major increase in costs or prices. The Chief of Engineers has also determined that this rule will not have a significant economic impact on a substantial number of entities and thus does not require the preparation of a regulatory flexibility analysis.

List of Subjects in 33 CFR Part 207

Navigation (water).

Accordingly, the regulations in 33 CFR 207.680 (a)(1), (b)(2) and (b)(7) are revised as set forth below.

Dated: February 23, 1983.

Approved:
William R. Gianelli,
Assistant Secretary of the Army (Civil Works).

PART 207—[AMENDED]

§ 207.880 Willamette River, Oreg.; use, administration and navigation of canal and locks at Willamette Falls, Oreg.

(a) *Administration. (1) Administrative jurisdiction.* The canal and locks and all appurtenances shall be in the charge of the District Engineer, Portland District, Corps of Engineers, Department of the Army, 319 S.W. Pine Street, Portland, Oregon 97208. The representative of the District Engineer at the locality shall be the lockmaster, who shall receive his orders and instructions from the district engineer. In case of emergency, however, the lockmaster shall have authority to take such steps as may be immediately necessary without waiting for instruction from the district engineer.

* * * * *

(b) *Use and navigation.*—(1) *Authority of lockmaster.* * * *

(2) *Signals.* All vessels desiring lockage shall signal the same by one long and one short blast of the whistle, delivered at a distance of approximately 1,000 feet from the locks. Requests for lockage may also be made by contacting the lockmaster on VHF–FM radio on channel 14, at WUJ 383, Willamette Falls Locks or by telephone or otherwise notifying the lockmaster's office. Notice to vessels desiring lockage will be given by red and green traffic lights. Vessels may enter locks on green lights, but must await green signal when lights are red. Permission to leave the lock will be given in the same manner. In the event a failure occurs and the referenced lights cannot be operated, the lockmaster will indicate by voice or by hand or lantern signals when vessels may enter or leave the locks.

* * * * *

(7) *Use of canal locks.* No person, unless authorized by the lockmaster or his assistants, shall open or close any bridge, lock gate, wicket gate, or operate any lock machinery, or in any way interfere with any mechanism or appliance connected with the operation of the locks, nor shall anyone interfere with the employees in the discharge of their duties. The lockmaster or his assistants may call for aid from the persons in charge of any craft, vessel, or raft using the lock should such aid be necessary. Persons rendering such assistance shall be strictly under the orders of the lockmaster. The Government reserves the right to refuse lockage to any vessel, craft or raft when the persons in charge thereof refuse to give such assistance when it is requested. The persons in charge of vessels with tows or rafts, barges and other craft must provide sufficient personnel, lines and towing equipment of sufficient power to insure at all times full control of such tows, rafts, barges and other craft while moving into and through the locks, unless otherwise prearranged with the lockmaster. A copy of these regulations shall be kept on board each vessel regularly engaged in navigating the locks. Copies may be obtained without charge from the lockmaster or from the District Engineer, Corps of Engineers, Department of the Army, 319 S.W. Pine Street, Post Office Box 2946, Portland, Oregon 97208.

(40 Stat. 266; 33 U.S.C. 1)

BILLING CODE 3710-92-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-7-FRL 2272-7]

Approval and Promulgation of Implementation Plans; State of Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of final rule.

SUMMARY: On June 15, 1982, the State of Kansas submitted revisions of its State Implementation Plan (SIP) to EPA. Part of these revisions were submitted in order to satisfy conditions on the state's Part D plan (46 FR 20164, April 3, 1981). Other SIP revisions not required by the conditions were submitted at the same time. The regulations required by the April 3, 1981, conditions are to control volatile organic compound emissions from tank trucks serving petroleum bulk terminals and to revise the new source regulations requiring that the owner or operator of a proposed new source demonstrate that all major sources owned or operated by the applicant be in compliance with all applicable state and federal emission limits or standards. The remainder of the submittal included changes to the new source permit requirements for nonattainment areas. On September 1, 1982 (47 FR 38531), EPA approved these revisions to the Kansas plan without prior proposal. EPA received notice that adverse or critical comments will be submitted on this plan revision. Consequently, EPA is taking action to withdraw approval of the Kansas SIP revision. Elsewhere in today's **Federal Register**, EPA is proposing to approve portions of the Kansas SIP revision and is providing an opportunity for public comment on its approval.

DATE: This action is effective on March 10, 1983.

ADDRESSES: Copies of this SIP revision are available for review at the following addresses:

Environmental Protection Agency, Region VII, Air Branch, Room 1415, 324 East 11th Street, Kansas City, Missouri 64106;

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460;

Kansas Department of Health and Environment, Bureau of Air Quality and Occupational Health, Forbes Field, Topeka, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Robert J. Chanslor at the EPA, Region VII address above or call (816) 374–3791 (FTS 758–3791).

SUPPLEMENTARY INFORMATION: On June 15, 1982, the State of Kansas submitted a revision of the state's SIP. Part of the submittal was to satisfy conditions placed on the Part D SIP on April 3, 1981, (46 FR 20164), but the remainder was not required by the conditions. The former regulations require control of VOC emissions from tank trucks serving bulk petroleum terminals and that owners or operators of a source wishing to locate in a nonattainment area demonstrate that all sources in the state under the control of the applicant are in compliance or on a schedule for compliance with all applicable emission limits or standards. The revisions not required by the April 3, 1981, conditions included definition changes. Among the revised definitions were changes in the stationary source definition and deletion of the term reconstruction. These revisions were made to be consistent with EPA's October 14, 1981, regulatory changes (46 FR 50766).

A notice of receipt of these revisions was published in the **Federal Register** on March 26, 1982 (47 FR 12965). A final rulemaking was published in the **Federal Register** on September 1, 1982, (47 FR 3853) following the special procedures described at 46 FR 44477 (September 4, 1981). The EPA advised the public that the effective date of the approval would be deferred for 60 days (until November 1, 1982). EPA announced that, if within 30 days of publication of the approval notice was received that someone wished to submit adverse or critical comment, the approval would be withdrawn and a new rulemaking procedure would be initiated by proposing the action and establishing a 30 day comment period.

EPA has received notice that a member of the public wishes to make an adverse or critical comment on the approval of the Kansas SIP revision. Therefore, EPA is withdrawing the September 1, 1982, approval in accordance with the procedures described above.

Elsewhere in today's **Federal Register**, EPA is proposing to approve the Kansas June 15, 1982 SIP submittal except for the regulations defining stationary source and governing review of reconstructed sources. The rationale for deferring action on the source definition is discussed in the proposal.

EPA is withdrawing the original approval without providing prior notice and opportunity for comment because it finds there is good cause within the meaning of 5 U.S.C. 553(b) to do so. Notice and comment would be impractical because EPA needs to withdraw its approval quickly in order to consider the comment the public wishes to submit. Further, additional notice is not necessary because EPA has already informed the public that it would follow this procedure, if a request was received to comment on the procedure (46 FR 44477 and 47 FR 38531). For the same reasons, EPA finds it has good cause under 5 U.S.C. 553(d) to make this withdrawal immediately effective.

Note.—Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this action will not have a significant impact on a substantial number of small entities because this action imposes no new regulatory requirements, and any regulatory impact would only result because of future actions by EPA. Those future actions will require that EPA make a separate determination of the applicability of 5 U.S.C. 605(b).

The Office of Management and Budget has exempted this rule from the requirements of Executive Order 12291.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by filing a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today.

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(Secs. 110 and 301 of the Act as amended (42 U.S.C. 7410 and 7601))

Dated: February 28, 1983.

Anne M. Burford,

Administrator.

PART 52—[AMENDED]

§ 52.870 [Amended]

Accordingly, 40 CFR Part 52 is amended by removing paragraph (c)(14) of § 52.870 and restoring paragraph (a) of § 52.875 as follows:

§ 52.875 General requirements.

(a) *Conditional Approval.* The following portions of the Kansas SIP developed pursuant to Part D of the 1977 CAA contain deficiencies which must be corrected within the time limit indicated for EPA to approve the Part D submission:

(1) To satisfy the requirements to section 172(b)(10), Enforceability of the Regulations, the state must adopt and submit a permanent regulation covering leaks from tank trucks serving bulk petroleum terminals and vapor recovery system by May 1, 1982.

(2) The new source permit review regulation is deficient regarding compliance with the requirements of section 173(3) of the CAA. The state must pass the necessary legislation to allow the regulation to be revised. By July 1, 1981, the state must file the revised regulation with the Revisor of Statutes; so that, the legislature can consider it for permanent adoption during the 1982 session. The revised regulation must be adopted as a permanent amendment to the Kansas air quality regulations by May 1, 1982.

(3) To comply with section 172(b)(2), Reasonably Available Control Measures, Kansas must take the following actions:

(i) Adopt and submit a regulation covering leaks from gasoline tank trucks serving bulk petroleum terminals and vapor recovery system by May 1, 1982. EPA requires the state to file the regulation with the Revisor of Statutes by July 1, 1981, so that, the legislature can consider it for permanent adoption by May 1, 1982.

(ii) Submit additional information by September 1, 1981 on the state's determination that the TSP sources without control equipment which are listed in Appendix DK of the Kansas City TSP plan are applying RACT. With this submission, the state must include a compliance schedule for completing the actions necessary to bring the uncontrolled sources to RACT as recommended by the additional RACT determination study. The compliance schedule should facilitate Kansas City attaining the TSP primary standard by the December 31, 1982 deadline.

(Secs. 110, 172, 173, and 301 of the Clean Air Act as amended (42 U.S.C. 7410 and 7601(a)))

BILLING CODE 4910-60-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1307

[Ex Parte No. MC-98; Sub-1]

Investigation Into Motor Carrier Classification

AGENCY: Interstate Commerce Commission.

ACTION: Final Policy Statement.

SUMMARY: The Interstate Commerce Commission finds that the National Motor Freight Classification (NMFC) must be revised. The Commission further concludes that tentative findings, concerning the NMFC, set forth in an interim decision (decided April 27, 1981, and printed at 364 I.C.C. 906), should be modified.

DATES: Where different TL and LTL ratings for the same classification commodity are in effect, the National

Classification Committee (NCC) shall make all the necessary adjustments in compliance with our decision by September 6, 1983. The NCC shall have until April 25, 1983, to comply with all other modifications to the NMFC which we have mandated. This decision shall be effective on April 11, 1983.

ADDRESSES: To purchase copies of the full decision contact: T. S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call toll free (800) 424–5403.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

SUPPLEMENTARY INFORMATION: In an interim decision decided April 27, 1981 (46 FR 27732, May 21, 1981) the Commission found that the NMFC needed revision. Numerous comments were received in response to the interim decision. On review of the comments, the Commission reaffirms the interim decision's findings in part, but concludes that certain findings must be modified.

The Commission's final decision delineates the factors which are to be considered in the NMFC. Those factors are: (1) Density; (2) stowability, which includes excessive weight or excessive length; (3) ease or difficulty of handling, which includes special care or attention necessary to handle the goods; and (4) liability, which includes value per pound, susceptibility to theft, liability to damage, perishability, propensity to damage other commodities with which transported, and propensity to spontaneous combustion or explosion. Certain characteristics which in the past have customarily been used in the NMFC are not relevant, namely, trade conditions, value of service, and competition with other commodities; these characteristics reflect the degree to which a commodity may bear transportation charges and have no significance as a transportation related quality of a commodity.

The Commission also finds that reduction of the NMFC to a single rating number is more acceptable than the alternatives considered. Both shippers and carriers have generally affirmed their basic belief in the desirability of the NMFC rating system.

Finally, the Commission's decision concludes that it is generally unreasonable for the NMFC to publish different ratings for an article dependent on whether it is truckload (TL), less-than-truckload (LTL), or traditionally designated any quantity (AQ). Minimum weight factors are also eliminated. The focus of the classifier must be solely on the applicable transportation characteristics. To the extent the NCC's classification ratings represent or reflect volume discounts, they are outside the proper scope of classification.

This action does not significantly affect either the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10101(a), 10701, 10704, 10706, 11701, and 5 U.S.C. 553)

Decided: February 25, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison. Commissioner Gradison dissented in part with a separate expression. Commissioner Andre dissented.

Agatha L. Mergenovich,

Secretary.

Commissioner Gradison, Dissenting in part:

I agree with the outcome of this decision, which abandons the Commission's ill-advised proposal to replace the National Motor Freight Classification with an inefficient and unworkable "information based system" in which individual rate bureaus, and perhaps even individual carriers, would have published separate classifications. The decision properly reflects the chaos and needless confusion that this proposal would have visited upon the shipping public. The decision retains the essential elements of the National Motor Freight Classification, while removing from it the vestiges of the collective ratemaking system.

However, I believe the majority made unnecessary changes to the classification system in two areas. First, the majority condemns any consideration of trade conditions, value of service or competition with other commodities. I would have permitted the occasional, carefully defined use of these classification factors. The record indicates that these factors are used infrequently to make adjustments to ratings in situations in which the ratings otherwise would discourage the commodities in question from moving under class rates. If classifiers are not allowed to make such occasional, common sense adjustments the result can only be the filing of unnecessary exceptions to the National Motor Freight Classification. This results in needless paperwork for carriers and shippers, and it makes the National Motor Freight Classification a less useful tool in contravention of the preference specifically expressed by Congress.

Second, the majority does not go far enough in disavowing the discussion in the interim decision in which the Commission undertook to rank order the importance of the various transportation characteristics. The majority continues to offer observations that are not supported by the record concerning the relative importance of certain transportation characteristics. I would have had the decision state that there is no rational basis for us to limit or expand the importance of any particular transportation factor since the relative importance of each factor varies with the commodity being classified.

Finally, I do not subscribe to the tone of the decision adopted by the majority, which treats the National Motor Freight Classification as some sort of necessary evil that we must reluctantly allow to exist. In fact, the Classification is the useful product of many decades of careful work. It helps both carriers and shippers to do their work more efficiently. The Congress has recognized this and has found that the Classification will be as useful under a system in which carriers make individual rates as it was under the system in which carriers made collective rate decisions. It assists new entrants into the motor carrier industry to make rational rate decisions, and it promotes the cost-based rate system mandated by the Motor Carrier Act of 1980.

BILLING CODE 7035-01-M

Proposed Rules

Federal Register
Vol. 48, No. 48
Thursday, March 10, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Part 318

[Docket No. 80-054P]

Trichina Control Requirements

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal meat inspection regulations require manufacturers to subject pork muscle tissue to a treatment which will kill any possible live trichinae, when that tissue or the product in which it is used may not be well cooked before consumption. Trichinae are microscopic parasites which cause a serious and sometimes fatal disease, known as trichinosis, in humans. Several treatment methods (heating, freezing, salting, and drying) are prescribed for trichina destruction. This proposal would permit additional treatment methods by providing alternate combinations of time, temperature, and salt content which are equally effective in destroying trichinae. This would provide the industry with greater flexibility in meeting the requirements for trichina control.

DATE: Comments must be received on or before May 9, 1983.

ADDRESS: Written comments to: Regulations Office, Attention: Annie Johnson, FSIS Hearing Clerk, Room 2637, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. (See also "Comments" under Supplementary Information.)

FOR FURTHER INFORMATION CONTACT: Mr. Bill F. Dennis, Director, Processed Products Division, Meat and Poultry Inspection Technical Service, Food Safety and Inspection Services, U.S. Department of Agriculture, Washington, DC 20250, (202) 477-3840.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Administrator, Food Safety and Inspection Service (FSIS), has made an initial determination that this proposed rule is not a major rule under Executive Order 12291. This proposed rule would not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Effect on Small Entities

The Administrator, FSIS, has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601). If promulgated, it would allow more flexibility for the industry in meeting FSIS requirements for trichinae control without imposing any additional burdens, costs or requirements on small entities.

Comments

Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Regulations Office and should reference the docket number located in the heading of this document. All comments submitted pursuant to this notice will be made available for public inspection in the Regulations Office between 9:00 a.m. and 4:00 p.m., Monday through Friday.

Background

Trichinosis is a disease affecting human beings that is caused by microscopic threadlike worms called trichinae *(Trichinella spiralis)*, which live in muscles of hogs. Humans contract trichinosis by eating pork or pork product which has not been cooked sufficiently to destroy the trichinae. The number of live trichinae in the pork or pork product that is eaten usually determines the seriousness of the disease. Of those who contract proven cases of trichinosis, about 2 percent die. Most patients, even those who are severely infected, eventually recover. However, in many severe cases, the symptoms become chronic, with the infected persons experiencing substantial pain and discomfort for years.

Live trichinae are not detectable in swine or pork or pork product by the unaided eye or by any other routine meat inspection procedures. (Microscopic and serological techniques for the detection of trichinae are available, but they are either too costly or not yet developed to the point where they can be used during routine inspection.) However, means are available to destroy the live trichinae in the pork or pork product. These means include heating, curing (salting), or freezing. The Federal meat inspection regulations currently require that pork products that are ordinarily not well cooked before consumption, or the pork muscle tissue used as an ingredient in such products, undergo one of these treatment methods to destroy possible live trichinae. Fresh pork and such other pork products as bacon, which are customarily well cooked in the home or elsewhere before eating, have been exempt for many years from treatment at the packing plant to destroy the trichinae.

Proposal

The Department has conducted a thorough review of the trichina treatment requirements for pork and pork products and has determined that certain revisions would permit greater flexibility in freezing and curing methods while continuing to assure the destruction of trichinae.

This proposal also responds to a December 21, 1981, petition from the Livestock Conservation Institute to review the requirements for treating raw pork used in manufacturing of dry sausages for possible live trichinae.

The Department is proposing regulations which would continue to ensure that pork and pork products are free of live trichinae while permitting processors to use a greater variety of time, temperature, and salt combinations than those in the present regulations. For example, one of the present methods for curing ham requires that, after the salt has been added, the hams shall be dried or smoked not less than 10 days at a temperature not lower than 95° F. There is no variation allowed in the present regulations (9 CFR

318.10(c)(3)(iv)) from this time and temperature. However, it has been scientifically determined that there are a number of salt content, time and temperature combinations that would be equally effective at destroying live trichinae in ham (e.g., drying or smoking the ham at a temperature of 85° F. for a period of 18 days). The proposed regulations would, accordingly, incorporate into the present regulations a greater variety of methods for the treatment of pork and pork products to destroy trichinae. All of the current treatment methods would be retained as available options.

The proposed regulations would principally affect the trichinae treatment methods by (1) providing alternate times and temperatures for the controlled freezing of pork and pork products, (2) providing alternate combinations of salt content, time and temperature for the processing of sausage, and (3) providing alternate combinations of time and temperature for the processing of hams and pork shoulders.

Specifically, the proposed amendments to the present Federal meat inspection regulations would:

1. Revise the current freezing requirement by replacing the −30° F. requirement with a time-temperature schedule which is based on USDA experimental data. In the proposed method, the term "controlled freezing" would be used in lieu of the current term "refrigeration" since freezing is a more technically correct description of the process.

2. Add a new method to be known as "Method No. 6" to the five approved methods for curing sausage. The new method would provide basic time and sausage diameter ratios, with adjustments based on reductions in salt content plus the time and temperature of the fermentation or smoking process.

3. Add a new method to be known as "Method No. 3" to the present trichinae treatment procedures for hams and pork shoulders. This proposed method would provide basic salt curing times and temperatures with optional drying times based on the holding temperature or smoking and holding temperature.

The treatment methods set in the present and the proposed regulations for freezing time and temperature, drying time, size of sausages, amount of salt, etc., were derived from studies using pork from swine experimentally infected with live trichinae. The data used in the present, as well as the proposed, regulations were compiled over a number of years by USDA, university and industry scientists. A listing of published material is provided.[1]

After careful evaluation of the present regulations, technological development in the industry, and the reliability of the procedures and data supporting this proposal, the Department is proposing to revise Part 318 of the Federal meat inspection regulations (9 CRF Part 318) regarding treatment methods for destroying trichinae in pork and pork products.

List of Subjects in 9 CFR Part 318

Meat inspection, Preparation of products.

PART 318—[AMENDED]

1. The authority citation for Part 318 reads as follows:

Authority: 34 Stat. 1260, 70 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 1254.

2. Paragraph (c) of § 318.10 of the Federal meat inspection regulations (9 CFR 318.10(c)) would be amended by revising paragraph (c)(2)(iv) to expand refrigeration time and temperature ranges; by adding to paragraph (c)(3)(i) a new method for curing sausage to be designated Method No. 6; and by adding to paragraph (c)(3)(iv) a new method for curing ham and pork shoulder picnics to be designated Method No. 3, to read as follows:

§ 318.10 Prescribed treatment of pork and products containing pork to destroy trichinae.

* * * * *

(c) * * *

(2) * * *

(iv) **In lieu of the methods prescribed in Table 1, the treatment may consist of commercial freeze drying or controlled freezing, at the center of the meat pieces, in accordance with the times and temperatures specified in Table 2.**

Method No. 6. (a) Drying Room Schedule. The meat shall be ground or chopped into pieces not exceeding three-fourths of an inch in diameter. A dry-curing mixture containing not less than 3⅓ pounds of salt to each hundredweight of the unstuffed sausage shall be thoroughly mixed with the ground or chopped meat. After the curing mixture has been added, the sausage shall be held in a stuffed or unstuffed state for a period of not less than 48 hours at a temperature not lower than 35° F. The sausage shall then be held for the remainder of the curing period in a drying room at a temperature not lower than 50° F. for the period given in the schedule contained in Table 3a.

72	14	28	55	(—)[2]	(—)[2]	(—)[2]
96	19	38	75	(—)[2]	(—)[2]	(—)[2]
120	24	48	95	(—)[2]	(—)[2]	(—)[2]

[1] In computing the days to be deducted, the number with any fraction shall be rounded to the next lower whole number and shall be deducted from the required total drying time. Example: Sausage stuffed in 3" diameter casing requires 20 days in the drying room (from Drying Room Schedule). If allowed to ferment after addition of curing materials at 80° F. for 48 hours, the 20 day drying time may be reduced 16% (from Fermentation or Smoking Schedule). Eighteen percent of 20 days equals 3.6 days. Twenty days minus 3 days equals 17 days. The total drying time required in the drying room, therefore, will be 17 days.

[2] Trichinae will be destroyed during fermentation or smoking at the temperature and length of time indicated. Therefore, no drying room period is required for products so treated.

(c) Reduced Salt Content—Drying Room Schedule. Salt content of less than 3½ pounds for each hundredweight of sausage may be permitted provided the drying room temperature is not lower than 50° F. and the drying time is increased according to the schedule contained in Table 4.

Trichinae Treatment of Sausage by Method No. 8

TABLE 4.—REDUCED SALT CONTENT—DRYING ROOM SCHEDULE

[Required percentage increase in drying room time (table 3a) for salt content of less than 3½ pounds per hundredweight of sausage.]

Minimum pounds of salt added to sausage	Increase in drying room time percent[1]
1.0	10
1.5	25
2.0	50

[1] In computing the days to be added to the required total drying time, fractions shall be rounded to the next higher whole number and added to the required total drying time. Example: Sausage stuffed in 3½ inch diameter casing requires 23 days in the drying room (from Drying Room Schedule). If the quantity of salt added per hundredweight of sausage is 2 pounds instead of 3½ pounds, the drying room time must be increased by 40 percent (from Salt Content-Drying Room Schedule), or 9.2 days. The 9.2 is rounded up to 10 days and is added to the 23 days to equal 33 days. The total drying time required in the drying room, therefore, will be 33 days.

* * * * *

(iv) * * *

Method No. 3. Hams and pork shoulders (whether whole shoulder or part) weighing 20 pounds or under shall be cured by a dry salt process for not less than 40 days at a temperature not lower than 35° F. during which the product is covered with salt. For hams and pork shoulders weighing more than 20 pounds, the time in salt shall be 40 days plus 2 additional days, covered by salt, for each pound in excess of 20 pounds. Time in an equalization phase may substitute for time in salt; however, such substitution may not account for more than 10 days. (The term "equalization," as used here, is the process of salt diffusion through the meat after any excess salt has been removed from the surface of the product.) The hams and pork shoulders shall be placed in a quantity of salt sufficient to cover each piece. Additional salt shal be applied thoroughly to the lean meat side of each piece. At least once during the curing process, the hams and pork shoulders shall be turned over and covered with fresh salt. When placed in cure, if desired, the product may be pumped with a brine solution of not less than 100° strength (salometer). After completion of the salting and equalization process, the hams and port shoulders may be washed or sprayed to remove the surface salt, but they shall not be subjected to any other treatment designed to remove salt from the meat. After curing, the hams and pork shoulders shall then be dried or smoked, or both, according to the applicable time-temperature schedule contained in Table 5 or in Table 6.

Trichinae Treatment of Unsmoked Hams and Pork Shoulders

BILLING CODE 3410-DM-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 7

[Docket No. 83-13]

Real Estate Lending by National Banks

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency (OCC) proposes to amend or remove interpretive rulings regarding real estate lending by national banks. This action will implement statutory changes contained in the Garn-St Germain Depository Institutions Act of 1982. This proposal would generally eliminate real estate lending limitations and restrictions. The intended effect of this proposal is to enhance the ability of national banks to develop real estate lending products.

DATE: Comments must be received by April 11, 1983.

ADDRESS: Comments should be directed to: Docket No. [83-13], Communications Division, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East SW., 3rd floor, Washington, D.C. 20219, Attention: C. Christine Jones, Telephone (202) 447-1768.

Comments will be available for inspection and photocopying at the same location.

FOR FURTHER INFORMATION CONTACT: Robert Sihler, National Bank Examiner, Commercial Examinations Division (202) 447-1165; or Francis S. Rath or Jerome Edelstein, Attorneys, Legal Advisory Services Division (202) 447-1880, Office of the Comptroller of the Currency, Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION:

Background

The Garn-St Germain Depository Institutions Act of 1982 (Act) (Pub. L. 97-320), Section 403, amends 12 U.S.C. 371. The Act removes statutory restrictions on real estate lending by national banks. The Act authorizes national banks to make, purchase, arrange or sell loans or extensions of credit secured by liens on interests in real estate subject to terms, conditions and limitations that the Comptroller of the Currency may prescribe.

Due to this statutory change the OTC is reviewing existing real estate interpretive rulings.

Existing Requirements

The following requirements are currently imposed. These requirements are based upon 12 U.S.C. 371 and Interpretive Rulings 12 CFR 7.2000 through 7.2700.

A. Loan-to-Value Ratios

A loan on unimproved real estate shall not exceed 66⅔% of the appraised value. 12 CFR 7.2010(a).

A loan on real estate improved with offsite improvements such as streets, water, sewers or other utilities shall not exceed 75% of the appraised value. Real property whose value is enhanced because it is located in a rapidly developing area is also considered to be improved real estate. 12 CFR 7.2010(b).

A loan on real estate in the process of being improved by a building(s) shall not exceed 75% of the appraised value. The disbursement of loan proceeds must be made proportionately to the development of the project. 12 CFR 7.2010(c).

A loan or real estate improved by a building(s) may not exceed 90% of the appraised value of the real estate. 12 CFR 7.2010(d). Under 12 CFR 7.2010(c) and (d), building is defined as "a permanent structure contributing substantially to the value of the property." This includes conventional buildings, well-developed commercial recreation areas, trailer parks with numerous sites with facilities for sewage, running water, and electricity, and farmland, which past or present use demonstrates is useful for agricultural purposes. 12 CFR 7.2010(d).

In defining loan-to-value ratios, the regulations provide that in calculating the maximum permissible loan, the machinery and equipment in a building which are adapted to the use being made of the land and building, and which are intended to be permanent additions thereto, may be taken into account in determining the value of the real estate. 12 CFR 7.2000(d).

The regulations also provide that loan-to-value limitations on land acquisition and development loans may be based upon the appraised value of the final project. 12 CFR 7.2015. Similarly, loan-to-value ratios on property with buildings under construction may be based on the value of the completed buildings; however, prudent banking requires that the disbursement of loan proceeds be made proportionately to the development of the project. 12 CFR 7.2010(c).

B. Amortization, Maturity Requirements

Loans of amounts greater than 75% of the appraised value of the real estate, loans on property improved with one-to-four family dwellings, and loans secured by leaseholds, must provide for installment payments which are sufficient to amortize the entire principal of the loan within 30 years. 12 CFR 7.2125(b) and (c), 7.2200(d). Amortization requires a regular schedule of payments which reduce the principal of the debt during the life of the loan. Deviation from a regular schedule of payments must be based on prudent banking judgement. The period between payments cannot exceed one year. 12 CFR 7.2125(a).

C. Aggregate Limitations on Real Estate Loans

A national bank may not make or purchase real estate loans in excess of the amount of either its unimpaired capital plus its unimpaired surplus fund, or its time and savings deposits, whichever is greater. 12 CFR 7.2155.

Amounts unpaid on real estate loans secured by other than first liens, when added to unpaid prior mortgages, liens, and encumbrances, shall not exceed 20% of the bank's capital stock paid in and unimpaired plus 20% of the unimpaired surplus fund. 12 U.S.C. 371(a)(3).

D. Loans on Leaseholds

Loans secured by leaseholds can be made only if the leasehold does not expire for at least 10 years beyond the loan maturity date. 12 CFR 7.2200(c). Further, (1) the lease covenants and restrictions which provide for forfeiture or reversion in the event of a breach must not be more onerous or burdensome on the lessee than those contained in leases in general use in the area where the loan is made; (2) the lease should permit acquisition of the leasehold by the lending bank by voluntary conveyance or assignment by the lessee, and acquisition and sale under judicial process, without being subject to restrictions which would jeopardize recovery of the security value of the leasehold. 12 CFR 7.2200(a). Amortization of leasehold loans is required. 12 CFR 7.2200(d).

E. Limitations on Forest Tract Loans

1. *Loan-to-Value Ratio.* The amount of loans secured by forest tracts, when added to the amount unpaid on any prior mortgages, liens, and encumbrances, shall not exceed 66⅔% of the appraised fair market value of the growing timber, lands, and improvements thereon offered as security.

Loan terms and conditions must assure that the loan balance, when added to the amount unpaid upon prior mortgages, liens, and encumbrances, if any, at no time exceeds 66⅔% of the original appraised total value of the property then remaining. 12 U.S.C. 371(b).

2. *Maturity and Amortization.* Unamortized forest tract loans shall be made for no longer than three years.

Amortized forest tract loans may be made for no longer than 15 years and must be amortized at a rate of at least 6⅔% per year. 12 U.S.C. 371(b).

3. *Aggregate Limits.* Forest tract loans are included in the aggregate limits for total real estate loans; and further, forest tract loans may not be made by a national bank in an aggregate sum in excess of 50% of its capital stock paid in and unimpaired plus 50% of its unimpaired surplus fund. 12 U.S.C. 371(b).

F. Construction Loans

Loans made to finance the construction of a building(s) and having maturities not to exceed 60 months, where there is a valid and binding commitment entered into by a financially responsible lender or other party to advance the full amount of the bank's loan upon completion of the buildings, may be considered real etate loans or commercial loans. Likewise, loans made to finance the construction of a residential or farm building(s) and having maturities not in excess of 60 months, may be considered as either commercial or real estate loans.

Loans considered commercial loans may not, in the aggregate, exceed 100% of the bank's paid-in and unimpaired capital plus 100% of its unimpaired surplus fund. 12 U.S.C. 371(c).

G. Loans made under 12 U.S.C. 24 Seventh

Certain loans are made by national banks under authority of 12 U.S.C. 24 Seventh and are not subject to the limitations imposed by 12 U.S.C. 371 as defined by the statute and interpretive rulings. These are loans:

1. Insured under the provisions of the National Housing Act. 12 U.S.C. 371(a)(2)(A).

2. Insured by the Secretary of Agriculture pursuant to Title I of the Bankhead-Jones Farm Tenant Act, or the Act of August 28, 1937, as amended, or Title V of the Housing Act of 1949, as amended. 12 U.S.C. 371(a)(2)(B).

3. Guaranteed by the Secretary of Housing and Urban Development, for the payment of obligations of which the full faith and credit of the United States is pledged; fully guaranteed or insured by a State, any agency or instrumentality of a State, or by a State authority for the payment of obligations of which the faith and credit of the State is pledged, if under the terms of the guaranty or insurance agreement the association will be assured of repayment in accordance with the terms of the loan. 12 U.S.C. 371(c)(2)(C).

4. At least 20% guaranteed under Chapter 37, Title 38 of the United States Code. 12 U.S.C. 371(a)(2).

5. Guaranteed under section 802 of the Housing and Community Development Act of 1974. 12 U.S.C. 371(a)(2).

6. Made to any borrower where the association looks for repayment by relying primarily on the borrower's general credit standing and forecast of income. 12 U.S.C. 371(e)(i).

7. Secured by assignment of rents under a lease. 12 U.S.C. 371(e)(ii).

8. In which the Small Business Administration cooperates through agreements to participate on an immediate or deferred or guaranteed basis under the Small Business Act. 12 U.S.C. 371(e).

9. Subject to a firm commitment to insure by a Government insuring agency. A firm commitment is a commitment in which a specific mortgagor is named. 12 CFR 7.2160.

10. Secured by the pledge or assignment of another real estate mortgage. 12 CFR 7.2005.

11. Granted substantially on the insurance or guaranty of a governmental agency. 12 CFR 7.2000(a), 7.2145(a).

12. Made in substantial reliance upon private company mortgage insurance or guaranty, but only to the extent of the guaranty. 12 CFR 7.2145(c).

13. Secured by a valid chattel mortgage on timber, in states which permit such mortgages. 12 U.S.C. 371(b).

14. Secured by real estate mortgages, where there is valid and binding commitment by a financially responsible third party to purchase the loan within 60 months of making the loan. 12 CFR 7.2000(g).

15. Previously made where a real estate mortgage is taken in good faith as security. 12 CFR 7.2000(b).

16. Made in reliance upon the security of a mobile home. 12 CFR 7.2000(e).

17. Made in substantial reliance on insurance or a guaranty, other collateral, or the creditworthiness of the borrower, and the loan is also secured by real estate. 12 U.S.C. 371 and 12 CFR 7.2145(d).

Regulatory Options Under the Amended Law

In complying with the Act there are several regulatory options which OCC is considering. These are:

A. Adopt a Regulation Which Reaffirms the Limitations Presently Embodied in 12 U.S.C. 371

In the opinion of OCC, the present limitations of 12 U.S.C. 371 were designed to:

1. Assure collateral value;
2. Assure borrower equity in the property;
3. Limit speculation;
4. Establish a maximum period for repayment;
5. Require the establishment of schedules for principal repayment;
6. Promote diversification of asset holdings; and,
7. Reduce the possibility of concentrations. Concentrations involve one borrower, an affiliated group of borrowers or borrowers engaged in or dependent on one industry.

The present limitations may be necessary to assure national bank safety and soundness in regard to real estate lending activities.

B. Adopt a Regulation Which Modifies the Limitations Presently Embodied in 12 U.S.C. 371

Safety and soundness considerations may warrant retention or modification of the current limitations and requirements. Some of the limitations and requirements that could be retained or modified are:

1. *Aggregate limits.* Limit the magnitude of a bank's exposure to risk yet provide banks with maximum flexibility in establishing loan terms.

2. *Amortization requirements.* Require that maturity and amortization be stipulated in the loan agreement. This permits a bank and its borrowers to match terms to circumstances yet provides a degree of certainty that the loan will be repaid in an orderly manner.

3. *Limitation on negative amortization.* Limits certain risks to the bank (e.g., collateral value and repayment) and protects the borrower from unlimited increases in debt.

If limitations are adopted, OCC may continue to exempt a percentage of a bank's real estate loans from the limitations.

C. Adopt a Regulation Which Imposes no Limitations, and Rescind Current Regulations Which Impose Limitations

Limitations may be unnecessary to assure safety and soundness in regard to real estate lending activities. The following arguments are posed:

1. Limitations are anticompetitive;
2. Other forms of lending by national banks are not specifically regulated;
3. Limitations potentially reduce the availability of mortgage money; and,
4. Limitations inhibit flexibility in designing loan terms.

If regulations should be warranted in the future or for specific mortgage instruments (e.g., shared appreciation, reverse annuity, graduated payment, growing equity mortgages, etc.), they would be developed.

Proposal

OCC proposes to adopt a regulation which imposes no limitations, and to rescind current regulations under 12 U.S.C. 371 which do impose limitations. The regulation would provide:

A. General permission to engage in real estate lending, including a clarification of types of property considered to be real estate.

B. A clarification of loans not considered real estate loans. National banks may make these loans under 12 U.S.C. 24 Seventh.

C. Preemption, for national banks, of state laws regulating real estate loans including nonpurchase money loans secured by real estate.

D. An advisory that banks must comply with other regulations, including those pertaining to disclosure.

This action is being taken for the reasons discussed under the Options section. Further, OCC can reasonably assure safety and soundness of national banks' real estate lending activities without imposing specific limitations to regulate these activities. OCC holds senior bank management responsible for each bank's operations and places emphasis on strategic planning and the formulation of policies, including lending policies. The composition, loan terms and collateral requirements of the mortgage portfolio, like other segments of the bank's loan portfolio, are responsibilities of the board of directors and senior management in their policy making function and of the lending staff in its implementation of bank policy.

Additionally, OCC evaluates all types of loans, including real estate loans, lending practices and management for prudence, quality, concentrations, policy adherence and other areas of supervisory concern.

By proposing to rescind restrictions on real estate lending the OCC is not taking the position that all real estate loans with terms which were previously prohibited comport with safe and sound banking practices.

Effects of Proposal on Certain Interpretive Rulings

In addition to rescinding the restrictions previously discussed, the proposal would rescind other Interpretive Rulings currently included in 12 CFR 7.2000 through 7.2700.

A. Interpretive Rulings Pertaining to Types of Real Estate Loans

12 U.S.C. 371 defines real estate loans as all loans secured by liens on real

property. The proposal clarifies that the following loans are considered real estate loans.

1. *Leaseholds, Land Sales Contracts, Condominium and Construction Loans.* Under the proposal, 12 CFR 7.2200, loans secured by leaseholds; 12 CFR 7.2000(c), land sales contracts; 12 CFR 7.2195, condominium loans; and 12 CFR 7.2400, 7.2405 and 7.2410, construction loans, will be rescinded. In their place OCC has included a statement in the proposed regulation that these loans continue to be real estate loans within the meaning of 12 U.S.C. 371.

2. *Loans on Cooperatives.* OCC also clarifies under the proposal that loans secured by interests in cooperatively owned real estate are real estate loans within the meaning of 12 U.S.C. 371.

OCC will continue to view loans the proceeds of which are used to substantially renovate, remodel or rehabilitate existing residential or commercial structures as construction loans.

B. Irrelevant Interpretive Rulings

Rescission of real estate lending limitations would render irrelevant certain interpretive rulings. OCC proposes to rescind the following:

1. *12 CFR 7.2150.* This ruling provides that real estate loans excessive in relation to the appraised value of the real estate violate 12 U.S.C. 371 to the extent that the value of other security or guaranty is less than the amount that the loan exceeds the appraised value. This ruling is irrelevant with the removal of loan-to-value restrictions.

2. *12 CFR 7.2410.* This ruling provides that construction loans held by a bank for a period exceeding the permitted 60 months and which are secured by liens on realty are real estate loans under 12 U.S.C. 371. This provision is irrelevant since the maximum maturity is no longer regulated.

3. *12 CFR 7.2700.* This ruling provides that ten percent of a national bank's permissible real estate loans need not comply with the limitations of 12 U.S.C. 371. This provision is irrelevant because, under the proposal, there are no limitations.

4. *12 CFR 7.2405.* This ruling provides that national banks may make combined construction and permanent financing loans for periods up to 30 years and 60 months. This provision is irrelevant since the maximum maturities of these types of financing are no longer regulated.

5. *12 CFR 7.2400(a).* This ruling provides that loans made to finance the construction of buildings which are primarily intended for residential purposes are considered loans to finance residential buildings even though some commercial use will be made of the building. This provision is irrelevant because under the proposal no distinction between types of buildings being financed is made.

6. *12 CFR 7.2040(a)–(e).* This ruling defines first liens and its provisions are irrelevant because under the proposal no distinction in made between loans secured by first liens and loans secured by subsequent liens.

7. *12 CFR 7.2040(f).* This ruling provides that in cover-all or open-end mortgages, the amount of all loans made in primary reliance upon the security of real estate, no matter what the purpose of the loan, must be aggregated to determine if the requirements of 12 U.S.C. 371 have been met. This provision is irrelevant because limitations are no longer imposed.

C. Unnecessary Interpretive Rulings

OCC is proposing to rescind interpretive rulings which expand, rather than restrict the authority of national banks to engage in real estate lending. In taking this action, OCC is not taking the position that these types of loans are impermissible. Rather, the interpretive rulings are being rescinded because the ability of national banks to engage in these activities is clear. Other interpretive rulings are being rescinded because they are redundant or because no interpretive ruling is necessary. These are:

1. *12 CFR 7.2120.* This ruling provides that national banks may participate in making real estate loans and may purchase or sell participations if the participation interests of the bank are adequately protected by the terms of the participation agreement. No ruling is necessary for banks to exercise this power.

2. *12 CFR 7.2148.* This ruling provides that a national bank may purchase real estate mortgage errors and omissions insurance to protect itself in the transactions. No ruling is necessary for banks to exercise this power.

3. *12 CFR 7.2190.* This ruling provides for real estate loans to be made on demand. No ruling is necessary for banks to exercise this power.

4. *12 CFR 7.2040.* This ruling provides that loans for which the mortgagor does not have personal liability are real estate loans under 12 U.S.C. 371. No ruling is necessary because these loans are clearly within the meaning of the statute.

5. *12 CFR 7.2120.* This ruling provides that the authority of national banks to purchase real estate bonds is governed by 12 CFR Part 1. This ruling is redundant and therefore not necessary.

Request for Comments

OCC requests any comments relevant to the regulation of real estate lending by national banks. In addition, OCC requests comments specifically addressing:

1. Loan-to-value ratios;
2. Amortization, including negative amortization;
3. Maturity requirements;
4. Aggregate limitations on real estate loans;
5. Loans on leaseholds;
6. Limitations on forest tract loans; and
7. Construction loans.
8. The preemption of state laws regarding loans secured by real estate, particularly nonpurchase money loans.

A final determination regarding the regulation of real estate lending will be made following consideration of the recommendations and issues raised by the comments received.

Special Studies

The Secretary of the Treasury has certified that this regulation will not have a "significant impact on a substantial number of small businesses," as that phrase is used in the Regulatory Flexibility Act; therefore, no regulatory flexibility analysis has been prepared. The proposed amendments would ease the burden of existing regulations. The effect of the amendments is expected to be beneficial rather than adverse, and small entities are generally expected to share the benefits of the amendments with larger institutions.

A Regulatory Impact Analysis is not required because the OCC has determined that the proposal is not a "major rule" as defined by Executive Order 12291. The proposal will not have an annual effect on the economy of $100 million or more, will not result in a major increase in costs or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions, nor will it have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises.

List of Subjects in 12 CFR Part 7

National bank, Real estate lending.

PART 7—[AMENDED]

Accordingly, the Office proposes to amend 12 CFR Part 7 as follows.

1. The authority citation for 12 CFR Part 7 reads as follows:

Authority: R.S. 324 et seq., as amended; 12 U.S.C. 1 et seq., unless otherwise noted.

2. Section 7.2000 is revised to read as follows:

§ 7.2000 Real estate loans.

(a) *General.* Any national bank may make, arrange, purchase or sell loans or extensions of credit secured by liens on interests in real estate, subject to such terms, conditions and limitations as may be prescribed, from time to time, by the Comptroller of the Currency by order, rule or regulation. For the purposes of 12 U.S.C. 371, real estate includes condominiums, leaseholds, cooperatives, land sales contracts, and construction projects.

(b) *Preemption of State law.* National banks may proceed pursuant to 12 U.S.C. 371 and this section notwithstanding any contrary law or judicial decisions of any State, the District of Columbia, Puerto Rico, the Virgin Islands, the Trust Territory of the Pacific Islands, and Guam. These laws and judicial decisions are hereby expressly preempted.

(c) *Disclosure.* National banks, in making real estate loans pursuant to this section, must comply with all applicable laws and regulations, including those pertaining to disclosure.

(Sec. 408, Pub. L. 97-320, 96 Stat. 1510-11, 12 U.S.C. 371)

3. Section 7.2005 is revised to read as follows:

§ 7.2005 Loans not constituting real estate loans within 12 U.S.C. 371

The loans listed below are not real estate loans for the purposes of 12 U.S.C. 371. National banks have the authority to make these loans pursuant to 12 U.S.C. 24 Seventh.

(a) Insured or Guaranteed Loans. (1) When the bank relies substantially on the insurance or guaranty of a governmental agency in making a loan. This includes loans which are:

(i) Insured under the provisions of the National Housing Act;

(ii) Insured by the Secretary of Agriculture pursuant to Title I of the Bankhead-Jones Farm Tenant Act, or the Act of August 28, 1937, as amended, or Title V of the Housing Act of 1949, as amended;

(iii) Guaranteed by the Secretary of Housing and Urban Development, for the payment of obligations of which the full faith and credit of the United States is pledged;

(iv) Fully guaranteed or insured by a State, any agency or instrumentality of a State, or by a State authority for the payment of obligations of which the faith and credit of the State is pledged, if under the terms of the guaranty or insurance agreement the association will be assured of repayment in accordance with the terms of the loan;

(v) At least 20% guaranteed under Chapter 37, Title 38 of the United States Code;

(vi) Guaranted under section 802 of the Housing and Community Development Act of 1974;

(vii) Loans in which the Small Business Administration cooperates through agreements to participate on an immediate or deferred or guaranteed basis under the Small Business Act; and,

(viii) Subject to a firm commitment to insure by a Government insuring agency. A firm commitment is a commitment in which a specific mortgagor is named.

(2) When the bank relies substantially upon private company mortgage insurance or guaranty, but only to the extent of the guaranty.

(b) Loans made to any borrower where the association looks for repayment by relying primarily on the borrower's general credit standing and forecast of income.

(c) Loans secured by an assignment of rents under a lease.

(d) Loans secured by the pledge or assignment of another real estate mortgage.

(e) Loans secured by a valid chattle mortgage on timber, in states which permit such mortgages.

(f) Loans previously made where a real estate mortgage subsequently is taken in good faith.

(g) Loans made in reliance upon the security of a mobile home.

(h) Loans secured by real estate mortgages, where there is a valid and binding commitment by a financially responsible third party to purchase the loan at or prior to the date of maturity of the loan.

(i) Loans made in substantial reliance on the insurance or guaranty of a governmental agency, private company mortgage insurance or guaranty, the creditworthiness of the borrower, or collateral other than real estate, secured by real estate as only a matter of prudent banking practice or because such security is required by the insurer or guarantor.

4. Sections 7.2010, 7.2015, 7.2040, 7.2120, 7.2125, 7.2145, 7.2146, 7.2148, 7.2150, 7.2155, 7.2160, 7.2190, 7.2195, 7.2200, 7.2400, 7.2405, 7.2410, 7.2600, and 7.2700 are removed.

Dated: February 4, 1983.

C. T. Conover,
Comptroller of the Currency.

BILLING CODE 4810-33-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83-ASO-12]

Proposed Designation of Control Zone, Naples, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a control zone in the vicinity of Naples Municipal Airport, Naples, Florida. This action will lower the base of controlled airspace in the vicinity of the airport from 700 feet above the surface to the surface. This will provide controlled airspace for protection of aircraft operating to and from the airport during Instrument Flight Rule weather conditions.

DATE: Comments must be received on or before: May 1, 1983.

ADDRESS: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace and Procedures Branch, ASO-530, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following

statement is made: "Comments to Airspace Docket No.———." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that will designate a control zone in the vicinity of Naples Municipal Airport, Florida. This action will lower the base of controlled airspace from 700 feet above the surface down to the surface. The additional controlled airspace will provide an increased level of safety to aircraft executing instrument operations at the airport. The airport presently supports more than 36 daily commercial flights and in excess of 70,000 annual general aviation operations. Fort Myers Airport Traffic Control Tower, which provides air traffic control service for Naples Municipal Airport, is able to communicate with aircraft on the ground at Naples. Provincetown-Boston Airlines will provide weather observation and reporting service during the hours the control zone is effective. It is anticipated the control zone will be effective from 0700 to 2300 hours, local time, daily from November to April and from 0700 to 2200 hours during the remainder of the year. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Naples Municipal Airport, FL—New

Within a 5-mile radius of Naples Municipal Airport (Lat. 26°09'08" N., Long. 81°46'32" W; within 3.5 miles each side of Collier County VOR/DME 052° and 218° radials, extending from the 5-mile radius area to 8.5 miles northeast and southwest of the VOR/DME; excluding that airspace within a one-mile radius of Wing South Airpark (lat. 26°08'59" N., Long. 81°42'12" W.). This control zone is effective during the specific days and times established in advance by a Notice to Airmen. The effective days and time will thereafter by continuously published in the Airport/Facility Directory.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(a), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on February 25, 1983.

George R. LaCaille,

Acting Director, Southern Region.

BILLING CODE 4910-13-M

CIVIL AERONAUTICS BOARD

14 CFR Parts 205, 294, and 298

[Economic Regulation Docket 37531; EDR—395C]

Aircraft Accident Liability Coverage, Canadian Charter Air Taxi Operators, and Classification and Exemption of Air Taxi Operators

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: By this notice, the CAB is asking for further comment on its proposal to revise the insurance requirements for noncommuter and Canadian charter air taxi operators. That proposal presented three alternatives: (1) increase the per-person minimum from $75,000 to $150,000 and the third-party per-occurrence minimum from $400,000 to $2,000,000; (2) retain the present minimums, eliminating safety-related exclusions; or (3) eliminate insurance minimums. This notice adds another alternative: increase the per-person minimum to $100,000, as required by the State of Alaska. The notice asks for additional facts upon which the Board can base its decision.

DATES: Comments by May 17, 1983.

Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

Requests to be put on the Service List: March 28, 1983.

The Docket Section prepares the Services List and sends it to each person listed on it, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 37531, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: For specific information on compliance, for U.S. air taxi operators, Patricia Szrom, Chief, Special Authorities Division (202–673–5068), or for Canadian charter air taxi operators, Richard Loughlin, Chief, Regulatory Affairs Division (202–673–5828); for general information, Joseph A. Brooks, Attorney-Advisor, Office of the General Counsel (202–673–5442), Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUPPLEMENTARY INFORMATION: Comments in this rulemaking were received in response to a supplemental notice of proposed rulemaking (EDR–395B, 46 FR 52585, October 27, 1981). That notice proposed that the insurance requirements for noncommuter and Canadian charter air taxi operators be changed to correspond to those in 14 CFR Part 205, which states general requirements for all other carriers, but that the per-person level of coverage be

set at $150,000. As in Part 205, third-party coverage would be $2,000,000 per occurrence, which is the current level for Canadian air taxi operators. Two alternatives to the proposal were also included in the notice. Alternative A would have eliminated required insurance coverage for these carriers and would have substituted a notice to the passengers to that effect. Alternative B would have retained present U.S. air taxi coverage amounts including the per-person minimum coverage at $75,000, while prohibiting safety-related exclusions.

Comments on those proposals were received from: G.M. Bleisdell, Jr. (an air taxi owner/operator), Cannon Creek Air Charter, Crow, Inc., Eastern North Caroline Air Taxi, Ketchum Air Charters, National Air Transportation Association, North Dakota Aeronautics Commission, Seagreen Air Transport, Ltd., Virgin Air, and Westside Air Park.

The commenters were divided among the three options proposed. Some recommended that the Board eliminate insurance requirements for on-demand air taxi operators. They argued that most operators now carry more insurance than would be required, and that for others, any increase, combined with elimination of the present safety exclusions, would greatly increase their insurance premiums. One operator stated that the proposed minimum would increase the carrier's premium by 24 percent, while another stated that it could result in a tripling of premiums.

Since insurance is usually the highest indirect operating cost for these operators, they argued, if insurance premiums were raised they would lead to higher costs for passengers and could threaten the existence of many such operators, thus jeopardizing needed air service in rural areas and in the isolated areas of Alaska.

One commenter took this argument a step further and recommended that insurance requirements be eliminated for all small carriers providing on-demand or charter service, under any authority. This commenter stated that "small carrier" should be defined in terms of operating revenue rather than equipment size.

The National Air Transportation Association stated that a poll of its membership (on-demand air taxi operators and fixed-base operators) showed that awards and settlements of air taxi accident average approximately $100,000 per person. The figures were not broken down, however, between fatalities and injuries. NATA concluded that the current requirements (75,000 per person) may not be adequate and that the $150,000 limit appeared reasonable. It argued against elimination of insurance requirements, stating that this would permit marginal operators to avoid financial responsibility for accidents and eliminate the availability of even minimal compensation for public losses.

One commenter, a commuter carrier, argued that commuters and on-demand air taxi operators compete for the same passengers in certain locations and should be required to maintain the same insurance. The commuter further argued that all passengers should receive the same protection whether travelling in scheduled or on-demand service.

Since issuing EDR-395 and reviewing the comments in response, the Board has become concerned about the lack of information about the cost impact of its proposals on noncommuter air taxi operators, especially those in Alaska. This is particularly so in view of the small number of comments received and the fact that none were received from insurers.

At its meeting on December 16, 1982, the Board voted to increase the minimum per-person insurance coverage for noncommuter air taxi operators and Canadian Charter air taxi operators from $75,000 to $150,000, to increase the third-party per occurrence minimum from $400,000 to $2,000,000 (this is the current level for Canadian air taxi operators), and to eliminate the present authority allowing policies to include certain safety-related exclusions. On January 27, the Board rescinded that action.

In its place, the Board is re-issuing EDR-395B. In addition to the normal service list, the Board will send this notice to those insurers who commented in response to earlier rulemakings on the subject of insurance.

The Board in this notice is also asking for comment on other alternatives: raising the per-person minimum amount to $100,000 as is now required by the State of Alaska for intra-Alaska operators for all air taxi operators; or raising the limit to that amount just for Alaska, while setting a different amount for non-Alaskan operations. In this alternative, the third-party per-occurrence minimum would be set at $2,000,000 and safety-related exclusions would be prohibited.

The Board would like factual information on the following:

(1) Whether minimums that apply to Alaska should be different from those for other areas;

(2) What would be the impact on premiums of each alternative proposal, especially for those operators in Alaska;

(3) Whether there would be a substantial difference in costs for those operators in Alaska as opposed to those in other areas, and why;

(4) What is the cost impact of (a) increasing the per-person minimum, (b) increasing the third-party per-occurrence minimum, and (c) eliminating the safety-related exclusions;

(5) What are the average settlements and awards for personal injury and death for these carriers, and how these figures have changed since 1969; and

(6) At present, who are the providers of liability insurance to noncommuter operators in the State of Alaska, and in what dollar increments is this insurance usually issued.

Initial Regulatory Flexibility Analysis

The same analysis applies as in EDR-395B.

List of Subjects in 14 CFR Parts 205, 294, and 298

Air carriers, Air taxis, Aircraft, Antitrust, Canada, Charter flights, Consumer protection, Freight, Insurance, Reporting and recordkeeping requirements, and Trade names.

For the convenience of interested persons, the preamble discussion of EDR-395B is repeated below.

EDR-395B

In Notice of Proposed Rulemaking EDR-395 (45 FR 7566, February 4, 1980), the Board proposed to revise and update its insurance requirements for all direct U.S. and foreign air carriers, and to put them in a new consolidated part of its regulations (14 CFR Part 205). The proposal would have made the present insurance requirements for on-demand air taxi operators (14 CFR Part 298) the same as those poroposed for all U.S. carriers. There would have been no exception for Canadian charter air taxi operators registered under new Part 294. It would thus have increased the minimum required per-person amounts for U.S. air taxi operators from $75,000 to $300,000 for both passenger and third-party coverage. The minimum per-occurrence amounts would have been changed. The requirements would have prohibited most of the coverage exclusions now permitted in U.S. air taxi operator policies, primarily those that are safety related. The rule (ER-1253), with many technical revisions, was adopted contemporaneously with this proposal essentially as proposed, except that it does not apply to on-demand air taxi operators. Canadian charter air taxi operators must maintain the same per-person amounts of coverage as U.S. on-demand air taxi operators. A list of the commenters is attached to the preamble of the rule adopted today (This list was

attached to the original issuance of EDR–395B).

In their comments, on-demand U.S. air taxis objected to being required to have the same minimum amounts and to follow the same rules for liability coverage as larger, scheduled airlines. They argued that their service is distinguishable from the others based on the type of service, the type and number of passengers served, and the type of equipment operated. On-demand air taxis argued that while larger, scheduled airlines must accept passengers and cargo under the terms of their schedules or tariffs, on-demand air taxis negotiate a separate contract with each passenger for each flight and settle on mutually agreeable terms and conditions. These contracts can, and often do, include liability coverage additional to that now required by the Board. Further, on-demand air taxis tend to use small, single-engine aircraft as compared to the multi-engine and turbo-prop aircraft operated by commuter and certificated carriers. Therefore, they contend, while damage awards and settlements well in excess of the current minimum requirements may be the rule with regard to cases involving large carriers, claims, awards and settlements in those accidents involving on-demand air taxis average approximately $100,000, based on a recent National Air Transportation Association study. Those arguments would apply as well to Canadian charter air taxi operators.

While a few of these commenters conceded that some increase in required amounts might be justifiable, even those commenters stated that the amount of the proposed increase is unreasonable. On the whole, the on-demand air taxi commenters stated that the proposed increase in the minimum amounts of coverage and changes in the exclusions would impose a severe economic burden on them and would result in a decrease in readily available on-demand air transportation, especially in rural areas, because they could not afford to continue operations with the added costs of such coverage. According to those commenters, the cost of insurance is second only to that of fuel in an on-demand air taxi operator's fixed costs. If the proposed changes in the Board's rules were adopted, the on-demand air taxis estimate that the cost of their insurance coverage would increase from 14 to 200 percent. This cost increase, they contend, would force many small carriers out of business, affecting primarily service to small communities.

In view of such comments, the Board is proposing to require that on-demand air taxi operators and Canadian charter air taxi operators follow the same liability coverage rules as other carriers, except that the minimum amount would be set at $150,000 per-person for bodily injury. All other amounts and coverage would be the same as for those carriers now covered by Part 205. As with coverage required for other carriers, safety-related exclusions from coverage would be prohibited. In considering liability coverage rules for all carriers, one of the most difficult issues faced by the Board is what to do about exclusions from coverage. The present exclusion allowed for U.S. air taxi operators remove the liability coverage in cases where the air taxi has violated safety requirements, has operated aircraft illegally, or has violated any geographic restriction on its operations. There are no similar exclusions allowed in new Part 294 for Canadian charter air taxi operators. Nor were they allowed for charter and all-cargo carriers before Part 205 was adopted. Such exclusions have the effect of denying an injured person a recovery if the airline's assets are not sufficient to pay the damages. Under today's pro-competitive and deregulatory policy, the only reason to require such a minimum source of compensation for damages is to provide a sure source for possible compensation if the air taxi is found liable in an aircraft accident. In the case of on-demand air taxi operators, if this source of compensation is removed for such a reason whenever an air taxi violates a safety requirement that results in an accident, the insurance requirement is not adequately protecting the public.

As the Board stated in adopting such a rule for other air carriers, the cost of such coverage could be reduced by negotiating with an insurer to provide catastrophic coverage, where the insurance would only pay if the net assets of the air taxi have been expended. We would particularly like to have costs estimates from the supporters of continued required coverage at this level, with the conditions set forth in Part 205 of the Board's regulations.

If insurance regulation is continued for on-demand air taxi operators, the filing of certificates or other evidence of coverage would be the same as proposed in EDR–395, but as changed and adopted in Part 205. All other terms and conditions and requirements would also be the same as in Part 205.

In the context of on-demand air taxi service, those commenters stated that a deregulatory, free-market environment assumes that carriers and passengers are fully capable of negotiating conditions of carriage, including insurance coverage, to meet their respective needs. The carrier and the passenger are better able to assess the amount of insurance necessary to protect their interests than is the government.

For U.S. air taxi operators and their counterparts, registered Canadian charter air taxi operators, providing only on-demand service, the Board is therefore further asking for comments on eliminating all insurance requirements. A simple requirement for disclosure of the existence or absence of insurance, as now required for domestic cargo carriers in 14 CFR 205.8, would be required for on-demand U.S. air taxi operators and for Canadian charter air taxi operators instead of required standard coverage.

As the commenters stated, on-demand air taxi service appears to be different from other forms of air transportation. The customer and the operator deal on an equal basis, each knowing the risks and the costs, unlike the somewhat remote relationship between passenger and carrier in larger, scheduled operations. For this reason, insurance regulation of these small carriers might no longer serve a purpose sufficient to warrant a governmental presence.

The Board also requests comment on whether the present standards, except for safety-related exclusions, should be retained for on-demand air taxi and for Canadian air taxi operators. That is, the minimum amounts of per-person coverage would remain at $75,000, and other amounts would remain as now in Part 298.

Essential Air Service

If the Board adopts the second alternative proposed, to eliminate insurance requirements for on-demand air taxis, then those air taxis that are not commuters and that provide essential air service would not be required by the government to carry a specific amount of insurance. The Board would like to have comments on whether all carriers, regardless of type or size, should be required to carry some amount of aircraft accident liability insurance. If they are so required, the Board would like comments on the amount of coverage that would be necessary as a minumum source of compensation if the carrier is found liable.

Initial Regulatory Flexibility Analysis

The Regulatory Flexibility Act, Pub. L. 96–534, took effect on January 1, 1981. The Act is designed to ensure that agencies consider flexible approaches to the regulation of small businesses and other small entities defined in the Act. It

requires regulatory flexibility analyses for rules that, if adopted, will have a "significant economic impact on a substantial number of small entities." Such analyses are only required to be done for notices of proposed rulemaking issued after January 1, 1981. EDR-395 was issued before that date. No analysis was included in that notice of proposed rulemaking. This case, because of the effect of its supplemental proposal on on-demand air taxi operators, most of which are small businesses, and the possible secondary effects on the many small businesses and communities that rely on these air carriers, requires an intial regulatory flexibility analysis.

The analysis is required to describe the need, objectives, legal basis for, and flexible alternatives to the action proposed here. The first three requirements are met by the discussion in this supplemental notice of proposed rulemaking and in EDR-395. The impact of this proposal would be to decrease insurance costs and to remove standard insurance protection for passengers and third parties. The proposal attempts to minimize the cost to small air taxi operators by reducing the required minimum amount of coverage from the earlier proposal in EDR-395. Since the first alternative to the existing rules is designed to eliminate completely the accident liability insurance requirements for on-demand air taxi operators and substitute a simple disclosure statement, there are no alternatives to that change that would "minimize any significant impact of the proposed rule on small entities." The last alternative would retain much of the status quo, and thus keep the impact on small entities low. There are no Federal rules that duplicate, overlap, or conflict with the proposed rule.

Proposed Rule

Accordingly, the Civil Aeronautics Board proposes the following from EDR-359B and the additional Alternative C in this notice:

$150,000/$2,000,000/No Exclusions

PART 298—[AMENDED]

1. Section 298.41 of Part 298 would be amended by removing paragraphs (a), (b), (c), and (d), and by revising the section to read:

§ 298.41 Basic requirements.

No air taxi operator shall engage in air transportation unless such carrier has and maintains in effect aircraft accident liability coverage that meets the requirements of Part 205 of this chapter.

§§ 298.37, 298.42, 298.43, 298.44, 298.45 [Removed] and § 298.3 [Amended]

Sections 298.37, 298.42, 298.43, 298.44, and 298.45, and paragraph (a)(4) of § 298.3, would be removed and reserved.

PART 205—[AMENDED]

3. Section 205.2 would be revised to read:

§ 205.2 Applicability.

These rules apply to all U.S. and foreign direct air carriers that provide air transportation.

4. Section 205.5 would be amended by revising paragraph (f) to read:

§ 205.5 Minimum coverage.

* * * * *

(f) Notwithstanding paragraphs (b) and (c) of this section, air taxi operators providing air transportation under Part 298 of this chapter that are not commuters by virtue of their scheduled service, and Canadian charter operators registered under Part 294, shall maintain the following coverage:

(1) Air taxi operators and Canadian charter air taxi operators in air transportation under this paragraph shall maintain third-party aircraft accident liability coverage for bodily injury to or death of persons, including nonemployee cargo attendants, other than passengers, and for damage to property, with a minimum coverage of $150,000 for any one person in any one occurrence, and a total of $2,000,000 per involved aircraft for each occurrence, except that such carriers operating aircraft of more than 60 seats or 18,000 pounds maximum payload capacity shall maintain coverage for those aircraft of $20,000,000 per involved aircraft for each occurrence.

(2) Air taxi operators and Canadian charter air taxi operators in air transportation under this paragraph shall in addition to the coverage required in paragraph (f)(1) of this section maintain aircraft accident liability coverage for bodily injury to or death of aircraft passengers, with a minimum coverage of $150,000 for any one passenger and a total per involved aircraft for each occurrence of $150,000 times 75 percent of the number of passenger seats installed in the aircraft.

(3) Coverage under this paragraph may be obtained with a combined single limit as specified in paragraph (d) of this section, applying the amounts of coverage stated in this paragraph.

No Minimums/No Exclusions

PART 298—[AMENDED]

Alternative A

Subpart E—[Reserved]

§ 298.3 [Amended]

1. Part 298 would be amended by removing and reserving Subpart E—*Liability Insurance Requirements*, and paragraph (a)(4) of § 298.3.

2. Section 298.37 would be revised to read:

§ 298.37 Prohibition of services not covered by insurance.

No air taxi operator classified as a commuter by virtue of its scheduled service under § 298.2(f)(1) shall engage in air transportation unless such commuter has and maintains in effect aircraft accident liability coverage that meets the requirements of Part 205 of this chapter.

3. The Table of Contents of Part 298 would be amended accordingly.

PART 294—[AMENDED]

Subpart E—[Reserved]

§ 294.3 [Amended]

4. Part 294 would be amended by removing and reserving Subpart E—Insurance Requirements, and paragraph (c) of § 294.3.

PART 205—[AMENDED]

5. Section 205.5 would be amended by revising paragraph (f) to read:

§ 205.5 Minimum coverage.

* * * * *

(f) Notwithstanding paragraphs (b) and (c) of this section, air taxi operators providing air transportation under Part 298 of this chapter that are not commuters by virtue of their scheduled service, and Canadian charter air taxi operators under Part 294, shall give notice in writing to any passenger of the existence or absence of bodily injury liability accident insurance. The notice shall be clearly and conspicuously included on or attached to all fare listings and passenger contracts.

$75,000/$400,000/No Exclusions

Alternative B

Section 205.5 would be amended by revising paragraph (f) to read:

§ 205.5 Minimum coverage.

* * * * *

(f) Notwithstanding paragraphs (b) and (c) of this section, air taxi operators providing air transportation under Part

298 of this chapter that are not commuters by virtue of their scheduled service, and Canadian charter air taxi operators registered under Part 294, shall maintain the following coverage:

(1) Air taxi operators and Canadian charter air taxi operators in air transportation under this paragraph shall maintain third-party aircraft accident liability coverage for bodily injury to or death of persons other than passengers, and for damage to property, with a minimum coverage of $75,000 for any one person in any one occurrence, and a total of $300,000 per involved aircraft for bodily injury, and $100,000 for property damage each occurrence.

(2) Air taxi operators and Canadian charter air taxi operators in air transportation under this paragraph shall in addition to the coverage required in paragraph (f)(1) of this section maintain aircraft accident liability coverage for bodily injury to or death of aircraft passengers or nonemployee cargo attendants with a minimum coverage of $75,000 times 75 percent of the number of passenger seats installed in the aircraft.

(3) Coverage under this paragraph may be obtained with a combined single limit as specified in paragraph (d) of this section, applying the amounts of coverage stated in this paragraph.

$100,000/$2,000,000/No Exclusions

Alternative C

Section 205.5 would be amended by revising paragraph (f) to read:

§ 205.5 Minimum coverage.

* * * * *

(f) Notwithstanding paragraphs (b) and (c) of this section, air taxi operators providing air transportation under Part 298 of this chapter than are not commuters by virtue of their scheduled service, and Canadian charter air taxi operators registered under Part 294, shall maintain the following coverage:

(1) Air taxi operators and Canadian charter air taxi operators in air transportation under this paragraph shall maintain third-party aircraft accident liability coverage for bodily injury to or death of persons other than passengers, and for damage to property, with a minimum coverage of $100,000 for any one person in any one occurrence, and a total of $2,000,000 per involved aircraft for each occurrence, except that such carriers operating aircraft of more than 60 seats or 18,000 pounds maximum payload capacity shall maintain coverage for those aircraft of $20,000,000 per involved aircraft for each occurrence.

(2) Air taxi operators and Canadian charter air taxi operators in air transportation under this paragraph shall in addition to the coverage required in paragraph (f)(1) of this section maintain aircraft accident liability coverage for bodily injury to or death of aircraft passengers or nonemployee cargo attendants with a minimum coverage of $100,000 times 75 percent of the number of passenger seats installed in the aircraft.

(3) Coverage under this paragraph may be obtained with a combined single limit as specified paragraph (d) of this section, applying the amounts of coverage stated in this paragraph.

(Secs. 204, 401, 402, 407, 416, 418, Pub. L. 85-726, as amended, 743, 754, 757, 768, 771, 91 Stat. 1284; 49 U.S.C. 1324, 1371, 1372, 1377, 1386, 1389)

BILLING CODE 6320-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 24 and 113

Proposed Customs Regulations Amendments To Establish Interest Charges on Certain Delinquent Accounts

AGENCY: Customs Service, Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Customs Regulations to establish interest charges for the last payment of supplemental duty bills (bills for additional duties ascertained upon liquidation), reimbursable services, and miscellaneous bills issued by Customs to organizations outside the U.S. Government, including sureties.

Customs and the Treasury Department believe that charging interest on delinquent accounts will provide an incentive for prompt payment and, if accounts are not paid timely, provide for reimbursement of interest costs resulting from Government borrowing.

DATE: Comments must be received on or before May 9, 1983.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Accounting and Policy Aspects: Robert B. Hamilton, Accounting Division, (202-566-2566); Bond Text Aspects: William Rosoff, Carriers, Drawback and Bonds Division, (202-566-5856); U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

In a report from the Comptroller General to Congress dated August 21, 1978, the General Accounting Office recommended that Customs charge interest on all supplemental duty accounts 30 days past due as part of an effort for the U.S. Government to maximize its use of Customs collections to decrease Government borrowings. That report states that in the Customs Regions of Boston, Chicago, Los Angeles, and New York, accounts receivable for supplemental duties averaged $8.5 million each month from April 1973 to March 1977 and that approximately 36 percent of that amount was over 90 days past due.

Section 306 of Pub. L. 96-304 (94 Stat. 928, July 8, 1980), requires that an agency improve the collection of overdue debts owed to the United States within the jurisdiction of that agency and bill interest on delinquent debts as required by the Federal Claims Collection Standards.

Chapter II of Title 4, CFR, "Federal Claims Collection Standards" provides in § 102.1 (4 CFR 102.1), that the head of an agency or his designee shall take aggressive action, on a timely basis with effective followup, to collect all claims of the United States for money or property arising out of the activities of, or referred to, his agency in accordance with the standards set forth in that chapter. Also, 4 CFR 102.11 provides that in the absence of a different rule prescribed by statute, contract, or regulation, interest should be charged on delinquent debts and debts being paid in installments in conformity with the Treasury Fiscal Requirements Manual ("TFRM").

House Report 97-21, on Customs authorization bill for Fiscal Year 1982 at pages 6 and 7, expressed the clear intent that Customs charge interest on overdue duties and fees.

Courts have held that interest may be charged on overdue accounts without express statutory authority when the Government's position is primarily that of a creditor collecting from a debtor, *Billings* v. *United States* 232 U.S. 261, 284-88 (1914); *McGrath* v. *Manufacturers Trust Co.*, 338 U.S. 241 (1949); *Rodgers* v. *United States*, 332

U.S. 371 (1947). Thus, interest may be assessed pursuant to statutes having no express reference to the collection of interest where the obligation accrues to the Government upon contractual indebtedness or indebtedness arising out of taxes. In particular, interest has been collected by the Government for unpaid overdue Customs duties, *United States* v. *Mexican International Railway Co.*, 154 Fed. 519 (1907).

In an effort to improve cash management practices, the Treasury Department has issued requirements prescribing cash management related procedures, including the necessity for interest charges on overdue receivable accounts. Part 6, Chapter 8020.20, TFRM, provides that a late charge will be collected at a percentage rate based on the current value of funds to the Treasury for overdue payments owed to the U.S. Government. It is noted that the Debt Collection Act of 1982, Pub. L. 97–365, changes the method by which the Secretary of the Treasury assesses interest charges for outstanding debts on claims owed the Government. Furthermore, in light of Section 8(e) of Pub. L. 97–365, it appears that Customs is not covered by major portions of this recent law because except as noted therein, the law does not apply to claims or indebtedness arising under the "tariff laws of the United States." However, because the Government also would be recovering its costs in matters relating to Customs, Customs intends to use the applicable percentage rate of interest based upon the current value of funds to the Treasury which is published in TFRM bulletins. In most instances in which a debtor fails to pay its debts to the Customs Service on a timely basis, the inherent authority identified in Federal Court opinions fully supports the adoption and use of an interest rate that covers the cost of money to the United States. Customs specifically invites the public to submit comments on this point.

Present Customs collection policy is to (1) issue a bill which indicates that it is due and payable upon receipt, (2) pursue collection in accordance with the Federal Claims Collection Act, and (3) if a surety is jointly liable, to make a formal demand on the surety for payment if the bill remains unpaid. Importers are required to post a bond along with each Customs entry to guarantee the payment of increased or additional duties and satisfy other Customs requirements.

Currently, there is no provision for collection of an amount exceeding the principal amount, regardless of the time period of delinquency or additional administrative costs to the U.S. Government incurred as the result of special collection efforts. In Fiscal Year 1979, for instance, the percentage of the number of Customs supplemental duty and reimbursable services bills issued during that fiscal year and paid within 30 days was 57 percent. Another 30 percent of these bills were paid within 60 days, and only the remaining 13 percent of the bills were paid more than 60 days after the date of the bill. Customs and the Treasury Department believe that charging interest on delinquent accounts will provide an incentive for prompt payment and, if accounts are not paid timely, provide for reimbursement of interest costs resulting from unnecessary Treasury borrowing. Customs believes that a majority of those bills which are now paid within 31 and 60 days after the date of billing will be paid within 30 days with the added incentive of interest charges. This mean that approximately 13 percent of the bills issued would result in action by Customs to charge interest.

The proposed regulations provide that interest charges would apply to late payments of supplemental duty bills (bills for additional duties ascertained upon liquidation), reimbursable services (such as provided for in §§ 24.16 and 24.17, Customs Regulations (19 CFR 24.16, 24.17)), and miscellaneous bills (bills other than duties, taxes, reimbursable services, liquidated damages, fines, and penalties) issued by Customs to organizations outside the U.S. Government, including sureties.

If payment for an above-mentioned bill is not received by Customs within 25 days after the due date of the bill, interest charges would be assessed upon the delinquent principal amount of the bill, and calculated from the due date of the bill. The applicable interest rate would appear on the bill. Interest on an overdue bill would be assessed on the delinquent principal amount by 30-day periods. The full 30-day interest charge would be assessed for each additional 30-day period or portion thereof that payment is delayed. The current interest rate charged will be published in the **Federal Register** and TFRM bulletin by the Bureau of Government Financial Operations, Department of the Treasury, prior to each calendar quarter beginning on January 1, April 1, July 1, and October 1. The interest rate also would be available from any Customs regional financial management office after it is published. The rate of interest that will be in effect for the period beginning on January 1, 1983, and ending on March 31, 1983, is 13.00 percent.

If the proposal were adopted, applicable Customs bonds would be amended to provide for the joint and several liability of the principal and surety for interest charges assessed on bills for supplemental duties, reimbursable services, and miscellaneous amounts if such bills are not paid in a timely manner.

As the surety bond would now cover both the principal amount and the interest for late payment of duty, we note that the surety is also subject to an additional amount of 6 percent per year on only the amount of duty due pursuant to the Act of March 2, 1799, c. 22, section 65, 1 Stat. 676 (19 U.S.C. 580).

It is the position of the U.S. Customs Service that section 580 is not an interest charge for the use of funds, but an exaction aimed at motivating apparently recalcitrant debtor sureties to pay rather than force the Government to sue to collect. The retroactive nature of the exaction exposes a nonpaying surety to potential liability far out of proportion to the liability of a surety that pays the day before it is sued. In effect, a delay in payment of a period as short as a single day may carry liability for months or years of "interest". Thus, it appears that the six percent charge is not a charge for the use of funds, nor should it be viewed as an alternative to the imposition of such a charge. The views of the public on this question will, of course, be welcomed.

Both the principal (i.e., the importer of record or party in interest) and the surety would be individually notified, at the time of the initial billing for interest and every 30 days thereafter, of the following factors: (i) the amount due, (ii) the accrual of interest charges if payment is not received within 25 days after the due date of the bill, (iii) the applicable TFRM interest rate, and (iv) the joint and several liability of the principal and the surety.

Effective Date

The regulations, if adopted, would become effective 180 days after the date of publication of a final rule as a Treasury Decision in the Federal Register and apply:

(1) With respect to overdue bills for supplemental duties, to all entries filed on or after the effective date.

(2) With respect to overdue bills for reimbursable services and miscellaneous amounts, to all actions giving rise to such bills on or after the effective date.

During the period of the delayed effective date, a bond rider would be executed and attached to applicable Customs bonds already on file to

provide for the joint and several liability of the principal and surety for interest charges on overdue bills for supplemental duties, reimbursable services, and miscellaneous amounts. In accordance with § 113.28(a), Customs Regulations (19 CFR 113.28(a)), this action would be completed at least 60 days before the delayed effective date. The bond rider also would be attached to, or printed on, all applicable bonds that are executed and filed after the delayed effective date. Use of the rider would eliminate the need for new bond forms at this time.

Bond Rider

It is proposed that a bond rider in the following form shall be executed and attached to applicable Customs bonds:

Rider

(To be attached to all applicable bonds)

If the U.S. Customs Service does not receive payment of any bill for supplemental duty, reimbursable services, or a miscellaneous amount within 25 days after the due date of the bill, the obligors agree to pay a late charge on that bill in an amount and on terms as provided by regulation for each 30-day period or part thereof that the bill remains unpaid.

Authority

These amendments are proposed under the authority of R.S. 251, as amended (19 U.S.C. 66), sec. 1, 19 Stat. 247 (19 U.S.C. 197), sec. 1, 36 Stat. 965, as amended (19 U.S.C. 198), sec. 484, 46 Stat. 722, as amended (19 U.S.C. 1484), sec. 500, 46 Stat. 729, as amended (19 U.S.C. (500), sec. 505, 46 Stat. 732, as U.S.C. 1505), sec. 623, 46 Stat. 759, as amended, (19 U.S.C. 1623), sec. 624, 46 Stat. 759, (19 U.S.C. 1624), sec. 501, 65 Stat. 290 (31 U.S.C. 483a).

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.11(b), Customs Regulations (19 CFR 103.11(b)), during regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington D.C. 20229.

The Regulatory Flexibility Act

This document is subject to the "Regulatory Flexibility Act" (Act), Pub. L. 96–354, approved on September 19, 1980. However, it has been determined that the proposed amendments do not require a regulatory flexibility analysis under the provisions of sections 603 and 604 of Title 5, United States Code (as added by section 3 of the Act). It is certified that the proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The bulk of the delinquent amounts outstanding tend to be from large importers, not small importers and other small entities. Indeed, neither small nor large entities are likely to be affected unless they are delinquent in their payments.

Inapplicability of E.O. 12291

It has been determined that these proposed amendments do not meet the criteria for a "major rule" specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared for this regulatory project.

Related Court Decision

The U.S. Court of International Trade in *Heraeus-Amersil, Inc.*, v. *United States*, 2 CIT———, 515 F. Supp. 770 (1981), held that any liquidated duties, charges, or exactions are not due and payable at liquidation, but rather at the time of filing of the action or at the expiration of the statute of limitations if no action is filed. In *United States* v. *Heraeus-Amersil, Inc.*, Appeal No. 81–19 (February 18, 1982), the U.S. Court of Customs and Patent Appeals affirmed this decision. In light of this holding, Customs has published a final rule document in the **Federal Register** (T.D. 83–14, 48 FR 1186, January 11, 1983) amending section 24.3(e), Customs Regulations (19 CFR 24.3(e)), to clarify the due date of Customs bills.

Drafting Information

The principal author of this document was Charles D. Ressin, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Surety bonds.

Proposed Amendments

It is proposed to amend parts 24 and 113, Customs Regulations (19 CFR Parts 24, 113), in the following manner:

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

It is proposed to amend Part 24 by adding a new § 24.3a after § 24.3 to read as follows:

§ 24.3a Interest charges on certain bills; notice to principal and surety.

(a) Customs bills for supplemental duties (additional duties assessed upon liquidation), reimbursable services (such as provided for in §§ 24.16 and 24.17), and miscellaneous amounts (bills other than duties, taxes, reimbursable services, liquidated damages, fines, and penalties) shall be due as provided for in § 24.3(e). If payment isnot received by Customs within 25 days after the due date of the bill, interest charges will be assessed upon the delinquent principal amount of the bill, and calculated from the due date of the bill.

(b) (1) The percentage rate of interest to be charged on such bills will be based on the current value of funds to the Treasury Department, as provided by Part 6 of the Treasury Fiscal Requirements Manual. The current interest rate may be obtained from any Customs regional financial management office shortly after it is available to Customs.

(2) The percentage rate of interest applied to an overdue bill will remain in effect for that bill until complete payment is received.

(3) Interest on overdue bills will be assessed on the delinquent principal amount by 30-day periods. The full 30-day interest charge will also be assessed for additional periods of less than 30 days (e.g., if payment is received by Customs 38 days after the due of the bill, interest will be charged for a full 60-day period).

(4) In the case of any late payment, the payment received will first be applied to the interest charge on the delinquent principal amount and then to payment of the delinquent principal amount.

(5) The date to be used in crediting the payment is the date on which the payment is received by Customs.

(c) Both the principal (i.e., the importer of record or party in interest) and the surety shall be individually notified on the bill, at the time of the initial billing for interest and every 30 days thereafter, of the following factors:

(1) The amount due,

(2) The accrual of interest charges if payment is not received within 25 days after the due date of bill,

(3) The applicable Treasury Fiscal Requirements Manual interest rate, and

(4) The joint and several liability of the principal and the surety.

PART 113—CUSTOMS BONDS

It is proposed to amend Part 113 by adding a new § 113.4 to read as follows:

§ 113.4 Liability of principals and sureties for interest charges.

The surety and the principal (i.e., importer of record or party in interest) are jointly and severally liable for interest charges on overdue bills for supplemental duties, reimbursable services, and miscellaneous amounts (see 19 CFR 24.3a). All references in Chapter 1 of this title to bills for supplemental duties, reimbursable services, and miscellaneous amounts will be construed to include interest charges as provided for under 19 CFR 24.3a in the event that these bills are delinquent.

Approved: February 17, 1983.

William von Raab,
Commissioner of Customs.

John M. Walker, Jr.,
Assistant Secretary of the Treasury

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD 13-83-06]

Seattle Opening Day Yacht Parade and Crew Race

AGENCY: Coast Guard, DOT.
ACTION: Notice of proposed rule making.

SUMMARY: This notice establishes a restricted zone in the areas of Union Bay, Portage Bay and Lake Washington on May 7, 1983, from 0800 until 1500. This action is required to permit the conducting of an approved marine event. It is intended to restrict general navigation in the area for the safety of the spectators and participants in the event.

DATE: Comments must be received on or before April 7, 1983.

ADDRESSES: Comments should be mailed to Commander, U.S. Coast Guard Group, 1519 Alaskan Way, South, Seattle, WA 98134. The comments will be available for inspection and coping at Coast Guard Group Operations Office, Room 104, 1519 Alaskan Way, South, (Pier 36) Seattle. Normal office hours are between 7:30 a.m. and 3:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Ens. S. M. Pollock, Operations, (206) 442-1874.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD 13-83-06), and the specific section of the proposal to which their comments apply, and give the reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process. Notification was not received early enough to provide for a longer comment period.

Drafting Information

The drafters of this notice are Ens. S. M. Pollock, USCG, Project Officer, USCG Group Seattle, Operations Office, and CDR. Thomas F. McGrath, USCG, Project Attorney, CCGD13 Legal Office.

Discussion of Proposed Regulation

The annual yachting season Opening Day Yacht Parade sponsored by the Seattle Yacht Club is scheduled to be held on May 7, 1983, in the Lake Washington Ship Canal between Portage Bay and Webster Point beginning at about 0800 and ending at about 1500 Pacific Daylight Savings Time. A collegiate crew race will also be conducted in this area between 1100 and 1200 PDST. As a result of these two events, traffic in the area will be congested. The congestion, in Portage Bay, and the narrow width of Portage Cut (also known as Montlake Cut) and Bay Reach inhibits vessel maneuverability. For this reason it is proposed that participating sailing vessels in the restricted zone maneuver by propelling machinery. Maneuvering with the assistance of a spinnaker will be allowed if it does not interfere with the sailing vessel's ability to maneuver. The primary concern is for the safety of participants and spectators in an area which is narrow and known for unpredictable winds.

By the authority contained in Title 46, U.S.C. 454, as implemented by Title 33, Part 100, U.S. Code of Federal Regulations, a Special Local Regulation controlling navigation on the waters described is promulgated. By the same authority, the waters involved will be patrolled by vessels of the U.S. Coast Guard. Coast Guard Officers and/or Petty Officers will enforce the regulation and cite persons and vessels in violation.

Economic Assessment and Certification

These proposed regulations are considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since no major shipping industry or trade will be interfered with. Based upon this assessment it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Proposed Regulation

PART 100—[AMENDED]

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33 Code of Federal Regulations, by adding § 100.1306 to read as follows:

§ 100-1306 Lake Washington/Portage Bay/Union Bay/opening day crew race and yacht parade.

(a) This event will take place on May 7, 1983, between the hours of 0800 PDST and 1500 PDST.

(b) The patrol of the described areas will be under the direction of a designated Coast Guard Patrol Commander who is empowered to forbid and control movement of vessels on the parade course and in the adjoining water areas immediately prior to, during and after the parade for such time as he finds it necessary for the safe and orderly conduct of the program. Portage Cut will be closed to all traffic except crew shells and vessels in the parade from 1030 PDST until the termination of the yacht parade.

(c) All sailing vessels in the restricted zone participating in the parade shall use propelling machinery for maneuvering. Spinnakers may be used,

in addition to propelling machinery, to the extent that control of the vessel is not impaired.

(d) Specific areas restricted to general navigation or anchorage from 0800 PDST until termination of the yacht parade are:

(1) The waters of Portage Bay Southeast of a line running from the Western corner of the pier (Showboat) 70 yards South of 47°39′ N, 122°18′40″W, 425 yards South-West across Portage Bay to the North-West corner of the "L" shaped moorage (at the foot of East Shelby St.) at 47°39′52″, N, 122°18′52″W.

(2) All waters of Portage Cut (also known as Montlake Cut), to Union Bay Channel Buoy 27 and Union Bay Channel Buoy 28.

(3) All waters between an East and West line connecting Union Bay Channel Buoy 27, Union Bay Channel Buoy 29 and Union Bay Channel Buoy 31 and Webster Point Light 33 and an East and West line connecting Union Bay Channel Buoy 28, Union Bay Channel Buoy 30, 470 yards East of Union Bay Channel Buoy 30 to a point 80 yards South of Webster Point Light 33.

(4) The waters between the judging and reviewing vessels and the Southern edge of the channel described above. This area is generally the area South of Union Bay Channel Buoy 28 and North of Foster Island. The judging and reviewing vessels will be identified by appropriate signs showing over their sides.

(e) A succession of sharp, short signals by whistle or horn from vessels patrolling the areas under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels signalled shall stop and shall comply with the orders of the patrol vessel; failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(Sec. 1, 35 Stat. 69, as amended, 46 U.S.C. 454; sec. 6(b)(1), 80 Stat. 938 (49 U.S.C. 1655(b)(1); 33 CFR 100.35; 49 CFR 1.46(b))

C. F. DeWolf,

Rear Admiral, U.S. Coast Guard.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA No. 866 A-7-FRL #2272-7a]

Approval and Promulgation of Implementation Plans; State of Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: The EPA is proposing to approve regulations submitted by the State of Kansas to satisfy conditions placed on that state's Part D plan revision (46 FR 20164, April 3, 1981). These regulations were submitted in draft form on October 9, 1981, and a notice of receipt was published in the **Federal Register** on March 26, 1982 (47 FR 12965). Final regulations to satisfy these conditions: (1) To make certain revisions to the new source permitting regulations and (2) to adopt a regulation controlling volatile organic compound (VOC) emissions from tank trucks serving bulk terminals were submitted on June 15, 1982. The submittal contained other revisions not required by the conditions.

On September 1, 1982, (47 FR 38531), EPA published an approval of the Kansas June 15, 1982 submittal under special procedures explained in the **Federal Register** on September 4, 1981 (46 FR 44477). Elsewhere in today's **Federal Register**, EPA is withdrawing the September 1, 1982, approval.

The purpose of todays action is to propose approval of a portion of the Kansas June 15, 1982, submittal so that the conditions on their Part D SIP may be removed. EPA also proposes to approve certain other portions of the Kansas amendments to the regulations and to defer action on several amendments.

DATE: Comments must be received by April 11, 1983.

ADDRESSES: Copies of the state submission are available during normal business hours at the following locations:

Environmental Protection Agency , Region VII, Air Branch, Room 1415, 324 East 11th Street, Kansas City, Missouri 64106;

Kansas Department of Health and Environment, Bureau of Air Quality and Occupational Health, Forbes Field, Topeka, Kansas 66101.

Written comments should be sent to: Robert J. Chanslor, Environmental Protection Agency , Region VII, Air Branch, 324 East 11th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Robert J. Chanslor at the above address or telephone (816) 374-3791 (FTS 758-3791).

SUPPLEMENTARY INFORMATION: On April 3, 1981, EPA conditionally approved certain portions of the Kansas SIP with regard to the requirements of Part D of the Clean Air Act, as amended. The conditions were specific regarding Section 172(b)(2), Section 172(b)(10), and Section 173(3). A detailed discussion of that action may be found in the **Federal Register** published on that date (46 FR 20164). Today's proposal would remove the remaining conditions arising from that action and found at 40 CFR 52.875.

To comply with one of the conditions, the state was to adopt statutory amendments to revise its new source permitting regulations to comply with Section 173(3) of the Act by April 30, 1981; file the revised regulations as temporary amendments with the Revisor of Statutes by July 1, 1981; and adopt the revised regulations as permanent amendments to the Kansas air quality regulations by May 1, 1982.

In order to comply with two other conditions, the state was to adopt and file with the Revisor of Statutes a regulation controlling volatile organic compound (VOC) emissions from tank trucks serving bulk petroleum terminals by July 1, 1981, and adopt the revised regulations as permanent amendments to the Kansas air quality regulations by May 1, 1982.

The Kansas Department of Health and Environment submitted draft revisions to the state regulations on October 9, 1981, to satisfy these conditions. Other revisions not required by the conditions were submitted at the same time.

EPA published a notice in the **Federal Register** on March 26, 1982 (47 FR 12965), that regulations had been adopted after a public hearing on November 18, 1981, and that regulations to satisfy the SIP conditions were submitted to the Revisor of Statutes on December 23, 1981, and to the Kansas Legislature in January 1982. These new regulations and regulatory changes became permanent regulations effective May 1, 1982, and were submitted to EPA on June 15, 1982.

The regulations submitted in addition to those required by April 3, 1982, conditions are 28-19-16, certain definitions in 28-19-16a, 28-19-16b, 18-19-16c, 28-19-16f, 28-19-16g, 28-19-16h, and 28-19-16i. These regulations contain new source permit requirements for nonattainment areas. Regulation 28-19-16a contains definitions which includes a definition of source that is consistent with the EPA definition found at 46 FR 50766 (October 14, 1981).

EPA has received notice that a member of the public wishes to submit adverse or critical comment on the rulemaking including the approval of the source definition and the deletion of the definition of "reconstruction". Therefore, elsewhere in today's **Federal Register**, EPA is withdrawing the September 1, 1982, approval of the June 15, 1982, SIP submittal. In this notice,

EPA proposes to approve the Part D plan revisions submitted to satisfy conditions found at 40 CFR 52.875. EPA also proposes to approve the remaining Kansas regulatory revisions not relating to the source definition.

EPA proposes to defer action on the following regulation revisions affecting new source review:

1. Regulation 28–19–16a(d) which defines "Building, Structure, Facility or Installation";
2. Deletion of Regulation 28–19–16a(v) "Reconstruction";
3. Deletion of the term reconstruction in Regulations 28–19–16, 28–19–16b, 28–19–16c, 28–19–16f, 28–19–16h, and 28–19–16i; and
4. Deletion of Regulation 28–19–16a(o) which defines "Installation".

The language of Regulation 28–19–16a(x), defining "Stationary Source", has not been explicitly revised, but the definition of "Installation" has been revised by deleting the old definition at 28–19–16a(o) and adding this term to Regulation 28–19–16a(d). Because the terms "Building, Structure, Facility or Installation", are used in the definition of "Stationary Source", the effect is to alter the Kansas source definition for new source review.

EPA believes that action should be deferred on the Kansas regulations discussed above in light of the Courts ruling in *NRDC v. Gorsuch*, No. 81–2206 (D.C. Cir., decided August 17, 1982). The Kansas revisions are substantially similar to the EPA revisions which eliminated the dual source definition (see 40 CFR 51.18(j)(1) (i) and (ii)). The EPA revision was vacated in the above decision.

The revision to Regulation 28–19–16a(g) changes the definition of contemporaneous to be consistent with the EPA approved definition in the comparable Missouri regulations.

Other changes appear at 28–19–16a(a), 28–19–16a(b), 28–19–16a(c), 28–19–16a(d) 28–19–16a(e), 28–19–16a(k), and 28–19–16a(o). These changes were made for the purpose of clarification and style.

The definition subsections have been renumbered from 28–19–16a(o) through 28–19–16a(x). The title of 28–19–16g is changed, old paragraph (a) is deleted and new paragraphs (a) through (c) are added. Regulation 28–19–51 regarding fugitive dust emissions was revoked by the state because it was found to be ineffective.

EPA is proposing to approve regulation 28–19–70 and 28–19–62 applicable to VOC emissions from tank trucks and regulation 28–19–61h applicable to new source permits as revisions to the Kansas Part D SIP. Regulation 28–19–61h requires permit applicants who own or operate other sources in the state to certify compliance or be on a schedule of compliance with all applicable emission limits before a permit may be issued for a new or modified source in a nonattainment area.

Interested persons are invited to submit pertinent comments on this proposed approval in writing. EPA will consider all such comments received 30 days from publication.

Under 5 U.S.C. Section 605(b), I certify this action, if promulgated, would not have a significant economic impact on a substantial number of small entities. It imposes no new regulatory requirements.

Under Executive Order 12291, today's action is not "major". It has been submitted to the Office of Management and Budget for review.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(Sec. 110 of the Clean Air Act, as amended (42 U.S.C. 7401)).

Dated: December 8, 1982.

[FCC 83–46; Docket Nos. 20521, 20548, BC Docket No. 78–239, and MM Docket No. 83–46; RM–3653; RM–3695; RM–4045]

Corporate Ownership Reporting and Disclosure by Broadcast Licensees and; Amendment of the Rules Relating to Multiple Ownership of Standard, FM, and Television Broadcast Stations and CATV Systems and; Reexamination of the Rules Regarding the Attribution of Ownership Interests in Broadcast, Cable Television and Newspaper Entities

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This Notice of Proposed Rule Making initiates a proceeding aimed at comprehensively reviewing the Commission's ownership attribution rules. This action is necessary to consolidate a number of related, pending proceedings and to ensure that our attribution rules do not unnecessarily restrict capital investment in FCC-licensed facilities.

This rule making proposes to increase the level of cognizable ownership interests up to a level of 5 to 20 percent. In addition, a number of ancillary proposals are made to revise the Commission's ownership reporting requirements, eliminate the existing distinction between ownership interests in closely-held and widely-held corporations and reduce the effect of the attribution rules on officers and directors of corporate licensees.

DATES: Comments must be submitted by April 25, 1983, and reply comments by May 10, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Randy W. Thomas, Office of the General Counsel, (202) 632–6990.

List of Subjects

47 CFR Part 73

Radio broadcast, Television.

47 CFR 76

Cable television.

Adopted: January 27, 1983.

Released: February 15, 1983.

By the Commission: Commissioner Quello concurring in the result; Commissioners Fogarty and Rivera concurring and issuing a joint statement; Commissioner Jones concurring and issuing a statement.

I. Introduction

1. This Notice of Proposed Rule Making commences a proceeding aimed at comprehensively revising the standards for attributing interests in broadcast, cable television and newspaper properties for the purpose of applying the multiple ownership rules. The goal of the Commission's multiple ownership rules is to promote economic competition in telecommunications and to provide a diversity of voices in the marketplace of ideas by ensuring that control of the broadcast media is not concentrated in only a few hands:[1]

> Simply stated, the fundamental purpose * * * of the multiple ownership rules is to promote diversification of ownership in order to maximize diversification of program and service viewpoints as well as to prevent undue concentration of economic power contrary to the public interest.
